|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Development of the PGPR and Cyanobacteria Consortium for Growth Promotion and Control <i>Ralstonia syzigii</i> subsp. <i>indonesiensis</i> of Tomato. IOP Conference Series: Earth and Environmental Science, 2021, 709, 012085.                                                                                                    | 0.3 | 7         |
| 2  | Diversity and characterization of entomopathogenic fungi from rhizosphere of maize plants as potential biological control agents. <i>Biodiversitas</i> , 2019, 20, .                                                                                                                                                                | 0.6 | 5         |
| 3  | A review of the Indonesian species of the family Signiphoridae (Hymenoptera, Chalcidoidea), with description of three new species. <i>ZooKeys</i> , 2019, 897, 29-47.                                                                                                                                                               | 1.1 | 5         |
| 4  | The ability of indigenous <i>Bacillus</i> spp. consortia to control the anthracnose disease ( <i>Colletotricum</i> ) Tj ETQq0 0 0 rgBT /Overlock 10 Tf 5                                                                                                                                                                            | 0.6 | 5         |
| 5  | Distribution and genetic diversity of <i>Spodoptera frugiperda</i> J. E. Smith (Noctuidae: Lepidoptera) on maize in West Sumatra, Indonesia. <i>Biodiversitas</i> , 2021, 22, .                                                                                                                                                     | 0.6 | 4         |
| 6  | The occurrence of <i>Spodoptera frugiperda</i> attack on maize in West Pasaman District, West Sumatra, Indonesia. IOP Conference Series: Earth and Environmental Science, 2021, 741, 012020.                                                                                                                                        | 0.3 | 3         |
| 7  | Short Communication: Development of selected PGPR consortium to control <i>Ralstonia syzigii</i> subsp. <i>indonesiensis</i> and promote the growth of tomato Yanti Y, Warnita, Reflin. 2018. Short Communication: Development of selected PGPR consortium to control <i>Ralstoni</i> . <i>Biodiversitas</i> , 2018, 19, 2073-2078. | 0.6 | 3         |
| 8  | Abundance of corn planthopper ( <i>Stenocranus pacificus</i> ) (Hemiptera: Delphacidae) and the potential natural enemies in West Sumatra, Indonesia. <i>Biodiversitas</i> , 2017, 18, 696-700.                                                                                                                                     | 0.6 | 3         |
| 9  | The use of several maize varieties by farmers and the infestation of <i>Spodoptera frugiperda</i> (Noctuidae:) Tj ETQq1 1 0.784314 rgBT /O                                                                                                                                                                                          | 0.3 | 2         |
| 10 | Biochemical Characterizations of Selected Indigenous Endophytic Bacteria Potential as Growth Promoters and Biocontrol Agents on Tomato. IOP Conference Series: Earth and Environmental Science, 2021, 757, 012002.                                                                                                                  | 0.3 | 2         |
| 11 | Biological control of <i>Sclerotium rolfsii</i> on tomato seedlings using <i>Bacillus</i> spp. consortium. IOP Conference Series: Earth and Environmental Science, 2021, 741, 012063.                                                                                                                                               | 0.3 | 1         |
| 12 | Diversity of plant species in paddy ecosystem in West Sumatra, Indonesia. <i>Biodiversitas</i> , 2017, 18, 1218-1225.                                                                                                                                                                                                               | 0.6 | 1         |
| 13 | Short Communication: Abundance of corn planthopper ( <i>Stenocranus pacificus</i> Kirkaldy 1907,) Tj ETQq1 1 0.784314 rgBT /Overlock 1                                                                                                                                                                                              | 0.6 | 1         |
| 14 | Screening of Indigenous Rhizospheric Cyanobacteria as Potential Growth Promotor and Biocontrol of <i>Ralstonia syzigii</i> subsp. <i>indonesiensis</i> on Chili. <i>International Journal of Environment Agriculture and Biotechnology</i> , 2019, 4, 1665-1672.                                                                    | 0.1 | 1         |
| 15 | Isolation and selection of maize plants rhizobacteria with the potential of entomopathogens against <i>Spodoptera litura</i> (Lepidoptera: Noctuidae). <i>Biodiversitas</i> , 2020, 21, .                                                                                                                                           | 0.6 | 1         |
| 16 | The The diversity and abundance of Hymenoptera insects on tidal swamp rice field in Indragiri Hilir District, Indonesia. <i>Biodiversitas</i> , 2020, 21, .                                                                                                                                                                         | 0.6 | 1         |
| 17 | The diversity of insects in West Sumateraâ€™s local rice by planting refugia as an effort to conserve natural enemies. IOP Conference Series: Earth and Environmental Science, 2020, 497, 012032.                                                                                                                                   | 0.3 | 0         |
| 18 | The ability of selected indigenous cyanobacteria isolates of West Sumatra to control <i>Fusarium oxysporum</i> sp. <i>capsicion chili</i> . IOP Conference Series: Earth and Environmental Science, 2020, 583, 012025.                                                                                                              | 0.3 | 0         |

| #  | ARTICLE                                                                                                                                                                                                                                                                    | IF  | CITATIONS |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Temperature as a Key Aspect in the Survival of <i>Hadronotus leptocorisae</i> Offspring. <i>Journal of Entomology</i> , 2017, 15, 13-18.                                                                                                                                   | 0.2 | 0         |
| 20 | INDIGENOUS RHIZOBACTERIA SCREENING FROM TOMATO TO CONTROL <i>Ralstonia syzigii</i> subsp. <i>indonesiensis</i> AND PROMOTE PLANT GROWTH RATE AND YIELD. <i>Jurnal Hama Dan Penyakit Tumbuhan Tropika</i> , 2019, 18, 177.                                                  | 0.2 | 0         |
| 21 | <i>Stenocranus pacificus</i> (Hemiptera: Delphacidae) and <i>Spodoptera frugiperda</i> (Noctuidae; Lepidoptera) are important pests on maize mix-cropped with oil palm in West Sumatra. <i>IOP Conference Series: Earth and Environmental Science</i> , 2022, 974, 012004. | 0.3 | 0         |
