#	ARTICLE	IF	CITATIONS
1	Association of Retail Environment and Neighborhood Socioeconomic Status With Mortality Among Community-Dwelling Older Adults in the United States: Cardiovascular Health Study. Journals of Gerontology - Series A Biological Sciences and Medical Sciences, 2022, 77, 2240-2247.	1.7	3
2	Spatially varying racial inequities in cardiovascular health and the contribution of individual- and neighborhood-level characteristics across the United States: The REasons for geographic and racial differences in stroke (REGARDS) study. Spatial and Spatio-temporal Epidemiology, 2022, 40, 100473.	0.9	3
3	Changes in the Retail Food Environment in Mexican Cities and Their Association with Blood Pressure Outcomes. International Journal of Environmental Research and Public Health, 2022, 19, 1353.	1.2	5
4	Neighborhood walkability and poverty predict excessive gestational weight gain: A cross-sectional study in New York City. Obesity, 2022, 30, 503-514.	1.5	4
5	Multilevel Factors for Adiposity Change in a Population-Based Prospective Study of Black Breast Cancer Survivors. Journal of Clinical Oncology, 2022, 40, 2213-2223.	0.8	7
6	Addressing patient's unmet social needs: disparities in access to social services in the United States from 1990 to 2014, a national times series study. BMC Health Services Research, 2022, 22, 367.	0.9	1
7	Selective serotonin reuptake inhibitors and lung function in the multi-ethnic study of atherosclerosis lung study. Respiratory Medicine, 2022, 196, 106805.	1.3	0
8	Impact of land use and food environment on risk of type 2 diabetes: A national study of veterans, 2008–2018. Environmental Research, 2022, 212, 113146.	3.7	5
9	Building a Methodological Foundation for Impactful Urban Planetary Health Science. Journal of Urban Health, 2021, 98, 442-452.	1.8	13
10	Business Data Categorization and Refinement for Application in Longitudinal Neighborhood Health Research: a Methodology. Journal of Urban Health, 2021, 98, 271-284.	1.8	28
11	The Association of Neighborhood Medical Facilities with Aging in Place and Risk of Incident Myocardial Infarction. Journal of Aging and Health, 2021, 33, 227-236.	0.9	1
12	Associations between neighborhood greenspace and brain imaging measures in non-demented older adults: the Cardiovascular Health Study. Social Psychiatry and Psychiatric Epidemiology, 2021, 56, 1575-1585.	1.6	11
13	Associations between Greenspace and Gentrification-Related Sociodemographic and Housing Cost Changes in Major Metropolitan Areas across the United States. International Journal of Environmental Research and Public Health, 2021, 18, 3315.	1.2	8
14	Land use diversity and park use in New York City. Preventive Medicine Reports, 2021, 22, 101321.	0.8	7
15	Healthy food retail availability and cardiovascular mortality in the United States: a cohort study. BMJ Open, 2021, 11, e048390.	0.8	6
16	Association of neighborhood physical activity opportunities with incident cardiovascular disease in the Cardiovascular Health Study. Health and Place, 2021, 70, 102596.	1.5	5
17	Matching participant address with public records database in a US national longitudinal cohort study. SSM - Population Health, 2021, 15, 100887.	1.3	3
18	261Can a physical activity supportive environment reduce socioeconomic inequities in incident coronary heart disease?. International Journal of Epidemiology, 2021, 50, .	0.9	0

#	Article	IF	Citations
19	Higher Neighborhood Population Density Is Associated with Lower Potassium Intake in the Hispanic Community Health Study/Study of Latinos (HCHS/SOL). International Journal of Environmental Research and Public Health, 2021, 18, 10716.	1.2	0
20	Does a physical activity supportive environment ameliorate or exacerbate socioeconomic inequities in incident coronary heart disease?. Journal of Epidemiology and Community Health, 2021, 75, 637-642.	2.0	3
21	Evaluating the Impact of the Clean Heat Program on Air Pollution Levels in New York City. Environmental Health Perspectives, 2021, 129, 127701.	2.8	4
22	Development and validation of a method to quantify benefits of clean-air taxi legislation. Journal of Exposure Science and Environmental Epidemiology, 2020, 30, 629-640.	1.8	3
23	Using Universal Kriging to Improve Neighborhood Physical Disorder Measurement. Sociological Methods and Research, 2020, 49, 1163-1185.	4.3	13
24	Assessing Google Street View Image Availability in Latin American Cities. Journal of Urban Health, 2020, 97, 552-560.	1.8	32
25	Neighborhood characteristics associated with park use and park-based physical activity among children in low-income diverse neighborhoods in New York City. Preventive Medicine, 2020, 131, 105948.	1.6	57
26	Evaluating the health effects of place-based slum upgrading physical environment interventions: A systematic review (2012â€"2018). Social Science and Medicine, 2020, 261, 113102.	1.8	18
27	Patterns in Geographic Access to Health Care Facilities Across Neighborhoods in the United States Based on Data From the National Establishment Time-Series Between 2000 and 2014. JAMA Network Open, 2020, 3, e205105.	2.8	35
28	Tracking of Obesity in Childhood into Adulthood: Effects on Body Mass Index and Fat Mass Index at Age 50. Childhood Obesity, 2020, 16, 226-233.	0.8	67
29	A comparative case study of walking environment in Madrid and Philadelphia using multiple sampling methods and street virtual audits. Cities and Health, 2020, 4, 336-344.	1.6	3
30	Who is in this study, anyway? Guidelines for a useful TableÂ1. Journal of Clinical Epidemiology, 2019, 114, 125-132.	2.4	28
31	Development of a Neighborhood Walkability Index for Studying Neighborhood Physical Activity Contexts in Communities across the U.S. over the Past Three Decades. Journal of Urban Health, 2019, 96, 583-590.	1.8	46
32	Urban trees and asthma: a call for epidemiological research. Lancet Respiratory Medicine,the, 2019, 7, e19-e20.	5.2	22
33	Using community-based system dynamics modeling to understand the complex systems that influence health in cities: The SALURBAL study. Health and Place, 2019, 60, 102215.	1.5	43
34	How Does Park Use and Physical Activity Differ between Childhood and Adolescence? A Focus on Gender and Race-Ethnicity. Journal of Urban Health, 2019, 96, 692-702.	1.8	16
35	Park use preferences and physical activity among ethnic minority children in low-income neighborhoods in New York City. Urban Forestry and Urban Greening, 2019, 38, 346-353.	2.3	45
36	Disparities in trajectories of changes in the unhealthy food environment in New York City: A latent class growth analysis, 1990â€"2010. Social Science and Medicine, 2019, 234, 112362.	1.8	24

#	Article	IF	Citations
37	Safer sex intentions modify the relationship between substance use and sexual risk behavior among black South African men who have sex with men. International Journal of STD and AIDS, 2019, 30, 786-794.	0.5	9
38	Short-term associations between objective crime, park-use, and park-based physical activity in low-income neighborhoods. Preventive Medicine, 2019, 126, 105735.	1.6	33
39	Neighborhood Recreation Facilities and Facility Membership Are Jointly Associated with Objectively Measured Physical Activity. Journal of Urban Health, 2019, 96, 570-582.	1.8	23
40	A Local View of Informal Urban Environments: a Mobile Phone-Based Neighborhood Audit of Street-Level Factors in a Brazilian Informal Community. Journal of Urban Health, 2019, 96, 537-548.	1.8	13
41	Body mass index across the life course: emergence of race-by-sex disparities in early childhood. Annals of Epidemiology, 2019, 33, 44-48.	0.9	4
42	Urban trees, air quality, and asthma: An interdisciplinary review. Landscape and Urban Planning, 2019, 187, 47-59.	3.4	166
43	Association of secondhand tobacco smoke exposure during childhood on adult cardiovascular disease risk among never-smokers. Annals of Epidemiology, 2019, 32, 28-34.e1.	0.9	14
44	Use of SOPARC to assess physical activity in parks: do race/ethnicity, contextual conditions, and settings of the target area, affect reliability?. BMC Public Health, 2019, 19, 1730.	1.2	15
45	Measuring Neighborhood Order and Disorder: a Rapid Literature Review. Current Environmental Health Reports, 2019, 6, 316-326.	3.2	14
46	653â€ƒCrohn's Disease Mortality and Ambient Air Pollution in New York City. American Journal of Gastroenterology, 2019, 114, S382-S383.	0.2	0
47	Household-level drinking water quality, access, and management practices within an informal community: a case study at Rio das Pedras, Rio de Janeiro. Journal of Water Sanitation and Hygiene for Development, 2019, 9, 80-89.	0.7	6
48	Building a Data Platform for Cross-Country Urban Health Studies: the SALURBAL Study. Journal of Urban Health, 2019, 96, 311-337.	1.8	89
49	The association between neighborhood socioeconomic disadvantage and high-risk injection behavior among people who inject drugs. Drug and Alcohol Dependence, 2018, 183, 184-191.	1.6	7
50	Levels and determinants of tree pollen in New York City. Journal of Exposure Science and Environmental Epidemiology, 2018, 28, 119-124.	1.8	26
51	Perceptions and Uses of Public and Private Health Care in a Brazilian Favela. Qualitative Health Research, 2018, 28, 159-172.	1.0	13
52	Temporal and spatial associations between influenza and asthma hospitalisations in New York City from 2002 to 2012: a longitudinal ecological study. BMJ Open, 2018, 8, e020362.	0.8	13
53	Associations of Neighborhood-Level Social Determinants of Health with Bacterial Infections in Young, Febrile Infants. Journal of Pediatrics, 2018, 203, 336-344.e1.	0.9	19
54	Medical facilities in the neighborhood and incidence of sudden cardiac arrest. Resuscitation, 2018, 130, 118-123.	1.3	12

#	Article	IF	Citations
55	Neighborhood food environment, dietary fatty acid biomarkers, and cardiac arrest risk. Health and Place, 2018, 53, 128-134.	1.5	6
56	Designing Healthier Built Environments. , 2018, , .		4
57	The relationship between childhood obesity and neighborhood food ecology explored through the context of gentrification in New York City. International Public Health Journal, 2018, 10, 481-496.	1.0	1
58	Lung function, percent emphysema, and QT duration: The Multi-Ethnic Study of Atherosclerosis (MESA) lung study. Respiratory Medicine, 2017, 123, 1-7.	1.3	12
59	Percent Emphysema and Daily Motor Activity Levels in the General Population. Chest, 2017, 151, 1039-1050.	0.4	10
60	The association of unemployment from age 21 to 33 with substance use disorder symptoms at age 39: The role of childhood neighborhood characteristics. Drug and Alcohol Dependence, 2017, 174, 1-8.	1.6	20
61	Angiotensin-Converting Inhibitors and Angiotensin II Receptor Blockers and Longitudinal Change in Percent Emphysema on Computed Tomography. The Multi-Ethnic Study of Atherosclerosis Lung Study. Annals of the American Thoracic Society, 2017, 14, 649-658.	1.5	45
62	Race, Ethnicity, Health Insurance, and Mortality in Older Survivors of Critical Illness. Critical Care Medicine, 2017, 45, e583-e591.	0.4	15
63	Disparities in self-rated health across generations and through the life course. Social Science and Medicine, 2017, 174, 17-25.	1.8	31
64	Concordance With Prevention Guidelines and Subsequent Cancer, Cardiovascular Disease, and Mortality: A Longitudinal Study of Older Adults. American Journal of Epidemiology, 2017, 186, 1168-1179.	1.6	16
65	Determinants of hazardous drinking among black South African men who have sex with men. Drug and Alcohol Dependence, 2017, 180, 14-21.	1.6	6
66	Mooney et al. Respond to â€œObserving Neighborhood Physical Disorderâ€. American Journal of Epidemiology, 2017, 186, 278-279.	1.6	0
67	Evaluating the Effectiveness of New York City Health Policy Initiatives in Reducing Cardiovascular Disease Mortality, 1990â€"2011. American Journal of Epidemiology, 2017, 186, 555-563.	1.6	6
68	Cataloging the Bloomberg era: New York City legislation relevant to cardiovascular risk factors. Cities and Health, 2017, 1, 125-138.	1.6	2
69	P27â€¦Can we better capture longitudinal exposure to the neighbourhood environment? a latent class growth analysis of the obesogenic environment in new york city, 1990â€"2010. , 2017, , .		1
70	Street Audits to Measure Neighborhood Disorder: Virtual or In-Person?. American Journal of Epidemiology, 2017, 186, 265-273.	1.6	40
71	Model-based and design-based inference goals frame how to account for neighborhood clustering in studies of health in overlapping context types. SSM - Population Health, 2017, 3, 600-608.	1.3	3
72	Elevated systemic biomarkers and persistent anxiety and depression in smokers with and without COPD: An analysis of the SPIROMICS cohort. , 2017, , .		0

#	Article	IF	Citations
73	Use of Google Street View to Assess Environmental Contributions to Pedestrian Injury. American Journal of Public Health, 2016, 106, 462-469.	1.5	73
74	Quantifying Distance Overestimation From Global Positioning System in Urban Spaces. American Journal of Public Health, 2016, 106, 651-653.	1.5	16
75	Ethnic differences in sudden cardiac arrest resuscitation. Heart, 2016, 102, 1363-1370.	1.2	19
76	Per cent emphysema is associated with respiratory and lung cancer mortality in the general population: a cohort study. Thorax, 2016, 71, 624-632.	2.7	61
77	In the Wrong Place with the Wrong SNP. Epidemiology, 2016, 27, 656-662.	1.2	5
78	Cause and context: place-based approaches to investigate how environments affect mental health. Social Psychiatry and Psychiatric Epidemiology, 2016, 51, 1571-1579.	1.6	16
79	Neighborhood Socioeconomic Status and Cognitive Function in Late Life. American Journal of Epidemiology, 2016, 183, 1088-1097.	1.6	55
80	Neighborhood physical disorder in New York City. Journal of Maps, 2016, 12, 53-60.	1.0	26
81	Using GPS Data to Study Neighborhood Walkability and Physical Activity. American Journal of Preventive Medicine, 2016, 50, e65-e72.	1.6	80
82	Measuring health-relevant businesses over 21Âyears: refining the National Establishment Time-Series (NETS), a dynamic longitudinal data set. BMC Research Notes, 2015, 8, 507.	0.6	36
83	Association of proximity and density of parks and objectively measured physical activity in the United States: A systematic review. Social Science and Medicine, 2015, 138, 22-30.	1.8	183
84	Prior Depression and Health Insurance in Non-receipt of Needed Medical Services. American Journal of Preventive Medicine, 2015, 48, 737-741.	1.6	0
85	Food environments are relevant to recruitment and adherence in dietary modification trials. Nutrition Research, 2015, 35, 480-488.	1.3	9
86	The independent associations of recorded crime and perceived safety with physical health in a nationally representative cross-sectional survey of men and women in New Zealand. BMJ Open, 2014, 4, e004058.	0.8	26
87	Invited Commentary: Taking Advantage of Time-Varying Neighborhood Environments. American Journal of Epidemiology, 2014, 180, 462-466.	1.6	10
88	Validity of an Ecometric Neighborhood Physical Disorder Measure Constructed by Virtual Street Audit. American Journal of Epidemiology, 2014, 180, 626-635.	1.6	88
89	Residential Relocation by Older Adults in Response to Incident Cardiovascular Health Events: A Case-Crossover Analysis. Journal of Environmental and Public Health, 2014, 2014, 1-7.	0.4	4
90	Disability and Recovery of Independent Function in Obstructive Lung Disease: The Cardiovascular Health Study. Respiration, 2014, 88, 329-338.	1.2	5

#	ARTICLE	IF	CITATIONS
91	Are feelings of peace or depression the drivers of the relationship between neighbourhood social fragmentation and mental health in Aotearoa/New Zealand?. Health and Place, 2014, 26, 1-6.	1.5	6
92	Neighborhood Social Context and Individual Polycyclic Aromatic Hydrocarbon Exposures Associated with Child Cognitive Test Scores. Journal of Child and Family Studies, 2014, 23, 785-799.	0.7	34
93	The impact of neighborhood park access and quality on body mass index among adults in New York City. Preventive Medicine, 2014, 64, 63-68.	1.6	59
94	Comparing Nutrition Environments in Bodegas and Fast-Food Restaurants. Journal of the Academy of Nutrition and Dietetics, 2014, 114, 595-602.	0.4	10
95	Association Between Emphysema-like Lung on Cardiac Computed Tomography and Mortality in Persons Without Airflow Obstruction. Annals of Internal Medicine, 2014, 161, 863.	2.0	72
96	Aesthetic Amenities and Safety Hazards Associated with Walking and Bicycling for Transportation in New York City. Annals of Behavioral Medicine, 2013, 45, 76-85.	1.7	35
97	Neighborhood Walkability and Active Travel (Walking and Cycling) in New York City. Journal of Urban Health, 2013, 90, 575-585.	1.8	77
98	Neighborhood safety and green space as predictors of obesity among preschool children from low-income families in New York City. Preventive Medicine, 2013, 57, 189-193.	1.6	161
99	Asthma and lung structure on computed tomography: TheÂMulti-Ethnic Study of Atherosclerosis Lung Study. Journal of Allergy and Clinical Immunology, 2013, 131, 361-368.e11.	1.5	22
100	More neighborhood retail associated with lower obesity among New York City public high school students. Health and Place, 2013, 23, 104-110.	1.5	40
101	Associations between Body Mass Index and Park Proximity, Size, Cleanliness, and Recreational Facilities. American Journal of Health Promotion, 2013, 27, 262-269.	0.9	62
102	Air Pollution and Individual and Neighborhood Socioeconomic Status: Evidence from the Multi-Ethnic Study of Atherosclerosis (MESA). Environmental Health Perspectives, 2013, 121, 1325-1333.	2.8	207
103	Urban Tree Canopy and Asthma, Wheeze, Rhinitis, and Allergic Sensitization to Tree Pollen in a New York City Birth Cohort. Environmental Health Perspectives, 2013, 121, 494-500.	2.8	217
104	Neighbourhood food environments and body mass index among New York City adults. Journal of Epidemiology and Community Health, 2013, 67, 736-742.	2.0	54
