#	ARTICLE	IF	CITATIONS
1	Rayleigh-Taylor instability of classical diffusive density profiles for miscible fluids in porous media: a linear stability analysis. Journal of Engineering Mathematics, 2022, 132, 1.	1.2	0
2	Modelling film flows down a fibre - ERRATUM. Journal of Fluid Mechanics, 2020, 890, .	3.4	0
3	Rayleigh-Taylor instabilities in miscible fluids with initially piecewise linear density profiles. Journal of Engineering Mathematics, 2020, 121, 57-83.	1.2	3
4	Asymptotic properties of radial reaction fronts. Physical Review E, 2018, 98, .	2.1	2
5	Density profiles around reaction-diffusion fronts in partially miscible systems: A general classification. Physical Review E, 2016, 94, 043115.	2.1	22
6	Buoyancy-driven instabilities around miscible reaction fronts: A general classification. Physical Review E, 2015, 91, 023001.	2.1	55
7	Onset conditions for a Rayleigh-Taylor instability with step function density profiles. Journal of Engineering Mathematics, 2014, 86, 31-48.	1.2	10
8	Chemically-Driven Miscible Viscous Fingering: How Can a Reaction Destabilize Typically Stable Fluid Displacements?. Springer Proceedings in Complexity, 2013, , 9-13.	0.3	0
9	Mixed-mode instability of a miscible interface due to coupling between Rayleigh-Taylor and double-diffusive convective modes. Physics of Fluids, 2013, 25, .	4.0	48
10	Thermal effects on the diffusive layer convection instability of an exothermic acid-base reaction front. Physical Review E, 2013, 88, 033009.	2.1	23
11	Experimental evidence of reaction-driven miscible viscous fingering. Physical Review E, 2012, 85, 015304.	2.1	64
12	Dynamics of a Reactive Thin Film. Mathematical Modelling of Natural Phenomena, 2012, 7, 99-145.	2.4	6
13	Approximating the large time asymptotic reaction zone solution for fractional order kinetics $A^n B^m$. Discrete and Continuous Dynamical Systems - Series S, 2012, 5, 219-234.	1.1	0
14	Differential diffusion effects on buoyancy-driven instabilities of acid-base fronts: the case of a color indicator. Physical Chemistry Chemical Physics, 2011, 13, 17295.	2.8	36
15	Convective Mixing Induced by Acid-Base Reactions. Journal of Physical Chemistry B, 2011, 115, 9739-9744.	2.6	53
16	Buoyancy-driven instabilities of miscible two-layer stratifications in porous media and Hele-Shaw cells. Journal of Fluid Mechanics, 2011, 670, 38-65.	3.4	119
17	Viscous fingering of a miscible reactive $A + B \rightarrow C$ interface: a linear stability analysis. Journal of Fluid Mechanics, 2010, 652, 501-528.	3.4	88
18	Influence of buoyancy-driven convection on the dynamics of $A + B \rightarrow C$ reaction fronts in horizontal solution layers. Chemical Engineering Science, 2010, 65, 2382-2391.	3.8	29

#	ARTICLE	IF	CITATIONS
19	Chemically Driven Hydrodynamic Instabilities. <i>Physical Review Letters</i> , 2010, 104, 044501.	7.8	129
20	Influence of Double Diffusive Effects on Miscible Viscous Fingering. <i>Physical Review Letters</i> , 2010, 105, 204501.	7.8	74
21	Active Role of a Color Indicator in Buoyancy-Driven Instabilities of Chemical Fronts. <i>Journal of Physical Chemistry Letters</i> , 2010, 1, 752-757.	4.6	56
22	Higher-order large-time asymptotics for a reaction of the form $nA + mB \rightarrow C$. <i>Physical Review E</i> , 2009, 79, 016105.	2.1	5
23	Publisher's Note: Higher-order large-time asymptotics for a reaction of the form $nA + mB \rightarrow C$ [<i>Phys. Rev. E</i> 79, 016105 (2009)]. <i>Physical Review E</i> , 2009, 79, .	2.1	0
24	Analytical small-time asymptotic properties of $\frac{A}{A+B} \rightarrow \frac{A}{A+B} \hat{t}^{\alpha}$. <i>Physical Review E</i> , 2009, 80, 046118.	2.1	8
25	Interfacial instabilities driven by chemical reactions. <i>European Physical Journal: Special Topics</i> , 2009, 166, 121-125.	2.6	3
26	Dynamics of $\frac{A}{A+B} \rightarrow \frac{A}{A+B} \hat{t}^{\alpha}$. <i>Physical Review Letters</i> , 2008, 101, 084503.	2.1	10
27	Analytical asymptotic solutions of $\frac{A}{A+B} \rightarrow \frac{A}{A+B} \hat{t}^{\alpha}$ equations in two-layer systems: A general study. <i>Physical Review E</i> , 2008, 78, 026122.	2.1	12
28	Modelling film flows down a fibre. <i>Journal of Fluid Mechanics</i> , 2008, 603, 431-462.	3.4	108
29	Dynamics of a horizontal thin liquid film in the presence of reactive surfactants. <i>Physics of Fluids</i> , 2007, 19, 112102.	4.0	44
30	Free-surface thin-film flows over uniformly heated topography. <i>Physical Review E</i> , 2007, 75, 026306.	2.1	55
31	Heated falling films. <i>Journal of Fluid Mechanics</i> , 2007, 592, 295-334.	3.4	78
32	Interfacial hydrodynamic waves driven by chemical reactions. <i>Journal of Engineering Mathematics</i> , 2007, 59, 207-220.	1.2	10
33	Dynamics of a reactive falling film at large Péclet numbers. I. Long-wave approximation. <i>Physics of Fluids</i> , 2004, 16, 3191-3208.	4.0	33
34	Dynamics of a reactive falling film at large Péclet numbers. II. Nonlinear waves far from criticality: Integral-boundary-layer approximation. <i>Physics of Fluids</i> , 2004, 16, 3209-3226.	4.0	21
35	Wave dynamics on a thin-liquid film falling down a heated wall. <i>Journal of Engineering Mathematics</i> , 2004, 50, 177-208.	1.2	49
36	Dynamics of a vertically falling film in the presence of a first-order chemical reaction. <i>Physics of Fluids</i> , 2002, 14, 2402.	4.0	20

#	ARTICLE	IF	CITATIONS
37	Mass-transport enhancement in regions bounded by rigid walls. <i>Journal of Engineering Mathematics</i> , 2002, 42, 45-64.	1.2	8
38	Circulation and reaction enhancement of mass transport in a cavity. <i>Chemical Engineering Science</i> , 2001, 56, 5177-5188.	3.8	5
39	Potential flow in a semi-infinite channel with multiple sub-channels using the Schwarzâ€œChristoffel transformation. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2000, 189, 341-359.	6.6	3
40	An analytical, numerical, and experimental comparison of the fluid velocity in the vicinity of an open tank with one and two lateral exhaust slot hoods and a uniform crossdraft. <i>Annals of Occupational Hygiene</i> , 2000, 44, 407-419.	1.9	12
