#	ARTICLE	IF	CITATIONS
1	Disentangling interventions to reduce fear of falling in community-dwelling older people: a systematic review and meta-analysis of intervention components. Disability and Rehabilitation, 2022, 44, 6247-6257.	1.8	8
2	“It is designed for everybody to find their own level and to improve themselves”; views of older people and instructors of the Falls Management Exercise (FaME) programme. Age and Ageing, 2022, 51, .	1.6	2
3	Dementia and primary care teams: obstacles to the implementation of Portugal’s Dementia Strategy. Primary Health Care Research and Development, 2022, 23, e10.	1.2	3
4	Experiences of intimate continence care and the impact on the family dyad relationship for people living at home with dementia and their co-resident family members. Dementia, 2022, 21, 1556-1573.	2.0	3
5	Managing loneliness: a qualitative study of older people’s views. Aging and Mental Health, 2021, 25, 1206-1213.	2.8	31
6	Intervention Characteristics Associated With a Reduction in Fear of Falling Among Community-Dwelling Older People: A Systematic Review and Meta-analysis of Randomized Controlled Trials. Gerontologist, The, 2021, 61, e269-e282.	3.9	27
7	Care homes: averting market failure in a post-covid-19 world. BMJ, The, 2021, 372, n118.	6.0	6
8	“Real world” effectiveness of the Falls Management Exercise (FaME) programme: an implementation study. Age and Ageing, 2021, 50, 1290-1297.	1.6	3
9	Equity-specific effects of interventions to promote physical activity among middle-aged and older adults: results from applying a novel equity-specific re-analysis strategy. International Journal of Behavioral Nutrition and Physical Activity, 2021, 18, 65.	4.6	4
10	Comment on: Family caregiver assessment in primary care: How to strengthen the <sc>healthcare</sc> triad?. Journal of the American Geriatrics Society, 2021, 69, 2361-2362.	2.6	1
11	Implementation fidelity of the Falls Management Exercise Programme: a mixed methods analysis using a conceptual framework for implementation fidelity. Public Health, 2021, 197, 11-18.	2.9	5
12	“It’s a real fine balancing act”: directly employed care workers’s experiences of engaging with health services. International Journal of Care and Caring, 2021, 5, 415-432.	0.5	3
13	What is the present role for general practitioners in dementia care? Experiences of general practitioners, patients and family carers in Portugal. Dementia, 2021, 20, 1988-2006.	2.0	8
14	The key aspects of online support that older family carers of people with dementia want at the end of life: A qualitative study. Aging and Mental Health, 2020, 24, 1654-1661.	2.8	12
15	Under the radar: General practitioners’ experiences of directly employed care workers for older people. Health and Social Care in the Community, 2020, 28, 1099-1108.	1.6	4
16	Fruit and Vegetable Consumption and Incident Prefrailty and Frailty in Community-Dwelling Older People: The English Longitudinal Study of Ageing. Nutrients, 2020, 12, 3882.	4.1	17
17	Number of Pregnancies and Trajectory of Frailty Index: English Longitudinal Study of Ageing. Journal of the American Medical Directors Association, 2020, 21, 1249-1253.e1.	2.5	6
18	Challenges and Lifelines: What Was Important to Family Carers of People With Dementia Accessing the Admiral Nurse Services, a Specialist Family-Centered Dementia Support?. SAGE Open, 2019, 9, 215824401985694.	1.7	2

#	ARTICLE	IF	CITATIONS
19	Health-Care Delivery for Older People with Dementia in Primary Care. , 2019, , 311-329.		12
20	Designing and developing a co-produced theoretical and evidence-based online support for family caregivers of people with dementia at the end of life. BMC Palliative Care, 2019, 18, 71.	1.8	13
21	Equity-Specific Effects of Interventions to Promote Physical Activity among Middle-Aged and Older Adults: Development of a Collaborative Equity-Specific Re-Analysis Strategy. International Journal of Environmental Research and Public Health, 2019, 16, 3195.	2.6	6
22	Factors Associated With Improvement in Frailty Status Defined Using the Frailty Phenotype: A Systematic Review and Meta-analysis. Journal of the American Medical Directors Association, 2019, 20, 1647-1649.e2.	2.5	20
23	Measuring change in trials of physical activity interventions: a comparison of self-report questionnaire and accelerometry within the PACE-UP trial. International Journal of Behavioral Nutrition and Physical Activity, 2019, 16, 10.	4.6	39
24	Effect of pedometer-based walking interventions on long-term health outcomes: Prospective 4-year follow-up of two randomised controlled trials using routine primary care data. PLoS Medicine, 2019, 16, e1002836.	8.4	32
25	Engaging “hard to reach” groups in health promotion: the views of older people and professionals from a qualitative study in England. BMC Public Health, 2019, 19, 629.	2.9	20
26	Health promotion for mild frailty based on behaviour change: Perceptions of older people and service providers. Health and Social Care in the Community, 2019, 27, 1333-1343.	1.6	12
27	<p>Frailty syndrome: implications and challenges for health care policy</p>. Risk Management and Healthcare Policy, 2019, Volume 12, 23-30.	2.5	216
28	What is the root cause of the GP workforce crisis?. British Journal of General Practice, 2019, 69, 63.3-64.	1.4	0
29	Does doctor burnout harm patients?. British Journal of General Practice, 2019, 69, 378.2-379.	1.4	0
30	Use it or lose it: a qualitative study of the maintenance of physical activity in older adults. BMC Geriatrics, 2019, 19, 349.	2.7	48
31	A “separation of worlds” The support and social networks of family carers of people with dementia at the end of life, and the possible role of the internet. Health and Social Care in the Community, 2019, 27, e223-e232.	1.6	13
32	Transitions between frailty states among community-dwelling older people: A systematic review and meta-analysis. Ageing Research Reviews, 2019, 50, 81-88.	10.9	184
33	Alcohol Consumption and Risk of Incident Frailty: The English Longitudinal Study of Aging. Journal of the American Medical Directors Association, 2019, 20, 725-729.	2.5	25
34	Case Management for People with Dementia and its Translations: A Discussion Paper. Dementia, 2019, 18, 951-969.	2.0	13
35	Moving upstream in health promoting policies for older people with early frailty in England? A policy analysis. Journal of Health Services Research and Policy, 2018, 23, 168-175.	1.7	10
36	Adherence to Mediterranean Diet Reduces Incident Frailty Risk: Systematic Review and Meta-Analysis. Journal of the American Geriatrics Society, 2018, 66, 783-788.	2.6	203

#	ARTICLE	IF	CITATIONS
37	Identifying acceptable components for home-based health promotion services for older people with mild frailty: A qualitative study. <i>Health and Social Care in the Community</i> , 2018, 26, 393-403.	1.6	22
38	A qualitative study exploring the difficulties influencing decision making at the end of life for people with dementia. <i>Health Expectations</i> , 2018, 21, 118-127.	2.6	44
39	Frailty and Social Care: Over- or Under-Familiar Terms?. <i>Social Policy and Society</i> , 2018, 17, 23-33.	1.0	7
40	Does current smoking predict future frailty? The English longitudinal study of ageing. <i>Age and Ageing</i> , 2018, 47, 126-131.	1.6	53
41	Guiding practitioners through end of life care for people with dementia: The use of heuristics. <i>PLoS ONE</i> , 2018, 13, e0206422.	2.5	23
42	Short-term and long-term cost-effectiveness of a pedometer-based exercise intervention in primary care: a within-trial analysis and beyond-trial modelling. <i>BMJ Open</i> , 2018, 8, e021978.	1.9	7
43	Strategies employed by older people to manage loneliness: systematic review of qualitative studies and model development. <i>International Psychogeriatrics</i> , 2018, 30, 1767-1781.	1.0	29
44	Fruit and Vegetable Consumption and Frailty: A Systematic Review. <i>Journal of Nutrition, Health and Aging</i> , 2018, 22, 1010-1017.	3.3	32
45	Interpreting population reach of a large, successful physical activity trial delivered through primary care. <i>BMC Public Health</i> , 2018, 18, 170.	2.9	7
46	Relating process evaluation measures to complex intervention outcomes: findings from the PACE-UP primary care pedometer-based walking trial. <i>Trials</i> , 2018, 19, 58.	1.6	11
47	Physical activity levels in adults and older adults 3-4 years after pedometer-based walking interventions: Long-term follow-up of participants from two randomised controlled trials in UK primary care. <i>PLoS Medicine</i> , 2018, 15, e1002526.	8.4	60
48	Internet-Based Interventions Aimed at Supporting Family Caregivers of People With Dementia: Systematic Review. <i>Journal of Medical Internet Research</i> , 2018, 20, e216.	4.3	170
49	A pedometer-based walking intervention in 45- to 75-year-olds, with and without practice nurse support: the PACE-UP three-arm cluster RCT. <i>Health Technology Assessment</i> , 2018, 22, 1-274.	2.8	22
50	Explaining the effects of symptom attribution by carers on help-seeking for individuals living with dementia. <i>Dementia</i> , 2017, 16, 375-387.	2.0	17
51	What do older people experiencing loneliness think about primary care or community based interventions to reduce loneliness? A qualitative study in England. <i>Health and Social Care in the Community</i> , 2017, 25, 1733-1742.	1.6	54
52	Dementia care management in primary care. <i>Zeitschrift Fur Gerontologie Und Geriatrie</i> , 2017, 50, 68-77.	1.8	58
53	Specifying the content of home-based health behaviour change interventions for older people with frailty or at risk of frailty: an exploratory systematic review. <i>BMJ Open</i> , 2017, 7, e014127.	1.9	34
54	“You started something” then I continued by myself: a qualitative study of physical activity maintenance. <i>Primary Health Care Research and Development</i> , 2017, 18, 574-590.	1.2	23

#	ARTICLE	IF	CITATIONS
55	The UK experience of promoting dementia recognition and management in primary care. Zeitschrift Fur Gerontologie Und Geriatrie, 2017, 50, 63-67.	1.8	17
56	Promoting independence, health and well-being for older people: a feasibility study of computer-aided health and social risk appraisal system in primary care. BMC Family Practice, 2017, 18, 47.	2.9	19
57	Strategies to improve engagement of "hard to reach" older people in research on health promotion: a systematic review. BMC Public Health, 2017, 17, 349.	2.9	77
58	On Your Feet to Earn Your Seat: pilot RCT of a theory-based sedentary behaviour reduction intervention for older adults. Pilot and Feasibility Studies, 2017, 3, 23.	1.2	72
59	Family caregivers' conceptualisation of quality end-of-life care for people with dementia: A qualitative study. Palliative Medicine, 2017, 31, 726-733.	3.1	38
60	Berwick's third era. British Journal of General Practice, 2017, 67, 253.2-254.	1.4	0
61	Health promotion interventions for community-dwelling older people with mild or pre-frailty: a systematic review and meta-analysis. BMC Geriatrics, 2017, 17, 157.	2.7	90
62	Effect of a Primary Care Walking Intervention with and without Nurse Support on Physical Activity Levels in 45- to 75-Year-Olds: The Pedometer And Consultation Evaluation (PACE-UP) Cluster Randomised Clinical Trial. PLoS Medicine, 2017, 14, e1002210.	8.4	73
63	Home-based health promotion for older people with mild frailty: the HomeHealth intervention development and feasibility RCT. Health Technology Assessment, 2017, 21, 1-128.	2.8	48
64	Improving palliative care in selected settings in England using quality indicators: a realist evaluation. BMC Palliative Care, 2016, 15, 69.	1.8	12
65	A co-design process developing heuristics for practitioners providing end of life care for people with dementia. BMC Palliative Care, 2016, 15, 68.	1.8	32
66	Cost-effectiveness of exercise as a therapy for behavioural and psychological symptoms of dementia within the EVIDEM randomised controlled trial. International Journal of Geriatric Psychiatry, 2016, 31, 656-665.	2.7	28
67	Predicting dementia risk in primary care: development and validation of the Dementia Risk Score using routinely collected data. BMC Medicine, 2016, 14, 6.	5.5	86
68	Exploring non-participation in primary care physical activity interventions: PACE-UP trial interview findings. Trials, 2016, 17, 178.	1.6	21
69	What factors support older people to increase their physical activity levels? An exploratory analysis of the experiences of PACE-Lift trial participants. Archives of Gerontology and Geriatrics, 2016, 67, 1-6.	3.0	26
70	Observational cohort study: deprivation and access to anti-dementia drugs in the UK. Age and Ageing, 2016, 45, 148-154.	1.6	58
71	Community-based interventions for older people with complex needs: time to think again?. Age and Ageing, 2016, 45, 2-3.	1.6	8
72	Family carers' experiences of the Admiral Nursing Service: a quantitative analysis of carer feedback. Aging and Mental Health, 2016, 20, 669-675.	2.8	10
