citing authors

#	ARTICLE	IF	CITATIONS
1	Mind the social feedback: effects of tDCS applied to the left DLPFC on psychophysiological responses during the anticipation and reception of social evaluations. <i>Social Cognitive and Affective Neuroscience</i> , 2022, 17, 131-141.	3.0	14
2	Effects of HF-rTMS over the left and right DLPFC on proactive and reactive cognitive control. <i>Social Cognitive and Affective Neuroscience</i> , 2022, 17, 109-119.	3.0	20
3	A Novel Experience Sampling Method Tool Integrating Momentary Assessments of Cognitive Biases: Two Compliance, Usability, and Measurement Reactivity Studies. <i>JMIR Formative Research</i> , 2022, 6, e32537.	1.4	0
4	Repetitive Negative Thinking Processes Account for Gender Differences in Depression and Anxiety During Adolescence. <i>International Journal of Cognitive Therapy</i> , 2022, 15, 115-133.	2.2	6
5	Manipulating avoidance motivation to modulate attention bias for negative information in dysphoria: An eye-tracking study. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2021, 70, 101613.	1.2	5
6	Contextual goal-dependent attention flexibility or rule-based learning? An investigation of a new attention flexibility paradigm. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2021, 71, 101632.	1.2	0
7	Combined effects of tDCS over the left DLPFC and gaze-contingent training on attention mechanisms of emotion regulation in low-resilient individuals. <i>Progress in Neuro-Psychopharmacology and Biological Psychiatry</i> , 2021, 108, 110177.	4.8	10
8	Looking for carrots, watching out for sticks: A gaze-contingent approach towards training contextual goal-dependent affective attention flexibility. <i>Behaviour Research and Therapy</i> , 2021, 136, 103787.	3.1	6
9	How Flexible are we in Regulating our Emotions? A Discussion on Current Conceptual Frameworks of Emotion Regulation Flexibility, Requirements for Future Research and Potential Practical Implications. <i>Spanish Journal of Psychology</i> , 2021, 24, e31.	2.1	5
10	An Online Assessment to Evaluate the Role of Cognitive Biases and Emotion Regulation Strategies for Mental Health During the COVID-19 Lockdown of 2020: Structural Equation Modeling Study. <i>JMIR Mental Health</i> , 2021, 8, e30961.	3.3	12
11	Prefrontal tDCS Attenuates Self-Referential Attentional Deployment: A Mechanism Underlying Adaptive Emotional Reactivity to Social-Evaluative Threat. <i>Frontiers in Human Neuroscience</i> , 2021, 15, 700557.	2.0	3
12	Contextual Changes Influence Attention Flexibility Towards New Goals. <i>Cognitive Therapy and Research</i> , 2020, 44, 327-344.	1.9	9
13	Parental (non-)pain attending verbalizations moderate the relationship between child attention and memory bias for pain. <i>European Journal of Pain</i> , 2020, 24, 1797-1811.	2.8	10
14	Inverse effects of tDCS over the left versus right DLPC on emotional processing: A pupillometry study. <i>L'Encephale</i> , 2019, 45, S67.	0.9	1
15	Music to my ears, goal for my eyes? Music reward modulates gaze disengagement from negative stimuli in dysphoria. <i>Behaviour Research and Therapy</i> , 2019, 120, 103434.	3.1	5
16	Inverse effects of tDCS over the left versus right DLPC on emotional processing: A pupillometry study. <i>PLoS ONE</i> , 2019, 14, e0218327.	2.5	19
17	Attachment-related attention bias plays a causal role in trust in maternal support. <i>Journal of Experimental Child Psychology</i> , 2019, 185, 176-190.	1.4	10
18	A novel process-based approach to improve resilience: Effects of computerized mouse-based (gaze)contingent attention training (MCAT) on reappraisal and rumination. <i>Behaviour Research and Therapy</i> , 2019, 118, 110-120.	3.1	30

#	ARTICLE	IF	CITATIONS
19	Eye-gaze contingent attention training (ECAT): Examining the causal role of attention regulation in reappraisal and rumination. <i>Biological Psychology</i> , 2019, 142, 116-125.	2.2	33
20	Attentional disengagement from emotional information predicts future depression via changes in ruminative brooding: A five-month longitudinal eye-tracking study. <i>Behaviour Research and Therapy</i> , 2019, 118, 30-42.	3.1	28
21	Can't look Away: Attention control deficits predict Rumination, depression symptoms and depressive affect in daily Life. <i>Journal of Affective Disorders</i> , 2019, 245, 1061-1069.	4.1	38
22	Attentional scope, rumination, and processing of emotional information: An eye-tracking study.. <i>Emotion</i> , 2019, 19, 1259-1267.	1.8	3
23	Neurocognitive mechanisms behind emotional attention: Inverse effects of anodal tDCS over the left and right DLPFC on gaze disengagement from emotional faces. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2018, 18, 485-494.	2.0	42
24	Eye-gaze disengagement from emotional faces predicts depressive symptoms via ruminative brooding: A five-month longitudinal study with two eye-tracking assessments. <i>International Journal of Psychophysiology</i> , 2018, 131, S44-S45.	1.0	0
25	Testing the attentional scope model of rumination: An eye-tracking study using the moving window paradigm. <i>Biological Psychology</i> , 2017, 123, 278-285.	2.2	7
26	Disentangling the Interplay Among Cognitive Biases: Evidence of Combined Effects of Attention, Interpretation and Autobiographical Memory in Depression. <i>Cognitive Therapy and Research</i> , 2017, 41, 829-841.	1.9	20
27	Identification of emotions in mixed disgusted-happy faces as a function of depressive symptom severity. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2017, 57, 96-102.	1.2	7
28	Older adults' attentional deployment: Differential gaze patterns for different negative mood states. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2017, 55, 49-56.	1.2	15
29	Latent Growth Curve Analysis of Gender Differences in Response Styles and Depressive Symptoms during Mid-Adolescence. <i>Cognitive Therapy and Research</i> , 2017, 41, 289-303.	1.9	11
30	Anodal tDCS over the right dorsolateral prefrontal cortex modulates cognitive processing of emotional information as a function of trait rumination in healthy volunteers. <i>Biological Psychology</i> , 2017, 123, 111-118.	2.2	16
31	Depression-related difficulties disengaging from negative faces are associated with sustained attention to negative feedback during social evaluation and predict stress recovery. <i>PLoS ONE</i> , 2017, 12, e0175040.	2.5	40
32	Attentional bias modification in depression through gaze contingencies and regulatory control using a new eye-tracking intervention paradigm: study protocol for a placebo-controlled trial. <i>BMC Psychiatry</i> , 2016, 16, 439.	2.6	28
33	Social Anxietyâ€™Linked Attention Bias to Threat Is Indirectly Related to Post-Event Processing Via Subjective Emotional Reactivity to Social Stress. <i>Behavior Therapy</i> , 2016, 47, 377-387.	2.4	17
34	Effects of tDCS over the right DLPFC on attentional disengagement from positive and negative faces: An eye-tracking study. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2016, 16, 1027-1038.	2.0	42
35	Attention training through gaze-contingent feedback: Effects on reappraisal and negative emotions.. <i>Emotion</i> , 2016, 16, 1074-1085.	1.8	53
36	Explicit self-esteem mediates the relationship between implicit self-esteem and memory biases in major depression. <i>Psychiatry Research</i> , 2016, 242, 336-344.	3.3	20

#	ARTICLE	IF	CITATIONS
37	Validación de un test para determinar el sesgo atencional en pacientes dependientes de alcohol. <i>Anales De Psicología</i> , 2015, 31, 504.	0.7	2
38	Life is â€¦ great! Emotional attention during instructed and uninstructed ambiguity resolution in relation to depressive symptoms. <i>Biological Psychology</i> , 2015, 109, 67-72.	2.2	35
39	Gaze-fixation and pupil dilation in the processing of emotional faces: The role of rumination. <i>Cognition and Emotion</i> , 2014, 28, 1347-1366.	2.0	65
40	Gaze-fixation to happy faces predicts mood repair after a negative mood induction.. <i>Emotion</i> , 2014, 14, 85-94.	1.8	113
41	Self-esteem and evaluative beliefs in paranoia. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2014, 45, 297-302.	1.2	11
42	Rumination and specificity of autobiographical memory in dysphoria. <i>Memory</i> , 2014, 22, 646-654.	1.7	23
43	Looking at the eyes of happiness: Positive emotions mediate the influence of life satisfaction on attention to happy faces. <i>Journal of Positive Psychology</i> , 2014, 9, 435-448.	4.0	50
44	Memory biases in remitted depression: The role of negative cognitions at explicit and automatic processing levels. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2014, 45, 128-135.	1.2	49
45	Attentional disengagement predicts stress recovery in depression: An eye-tracking study.. <i>Journal of Abnormal Psychology</i> , 2013, 122, 303-313.	1.9	213
46	Prototypicality and Intensity of Emotional Faces using an Anchor-Point Method. <i>Spanish Journal of Psychology</i> , 2013, 16, E7.	2.1	19
47	Sesgos de Atención Selectiva como Factor de Mantenimiento y Vulnerabilidad a la Depresión: Una Revisión Crítica. <i>Terapia Psicológica</i> , 2012, 30, 103-117.	0.3	5
48	Aproximaciones cognitivas a la investigación sobre el delirio persecutorio. <i>Análise Psicológica</i> , 2012, 27, 213-231.	0.2	0
49	Implicit and explicit self-esteem discrepancies in paranoia and depression.. <i>Journal of Abnormal Psychology</i> , 2011, 120, 691-699.	1.9	45
