| #  | ARTICLE                                                                                                                                                                                                           | IF   | CITATIONS |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 1  | Long-term seizure and psychiatric outcomes following laser ablation of mesial temporal structures. <i>Epilepsia</i> , 2022, 63, 812-823.                                                                          | 5.1  | 13        |
| 2  | Neuropsychiatric Treatments for Epilepsy: Nonpharmacological Approaches. <i>Seminars in Neurology</i> , 2022, , .                                                                                                 | 1.4  | 0         |
| 3  | Antiseizure Medications for Adults With Epilepsy. <i>JAMA - Journal of the American Medical Association</i> , 2022, 327, 1269.                                                                                    | 7.4  | 104       |
| 4  | ILAE clinical practice recommendations for the medical treatment of depression in adults with epilepsy. <i>Epilepsia</i> , 2022, 63, 316-334.                                                                     | 5.1  | 28        |
| 5  | Suicidality in Patients With Epilepsy: Why Should Neurologists Care?. <i>Frontiers in Integrative Neuroscience</i> , 2022, 16, .                                                                                  | 2.1  | 5         |
| 6  | Psychiatric Comorbidities in People With Epilepsy. <i>Neurology: Clinical Practice</i> , 2021, 11, e112-e120.                                                                                                     | 1.6  | 84        |
| 7  | Mood and quality of life in patients treated with brain-responsive neurostimulation: The value of earlier intervention. <i>Epilepsy and Behavior</i> , 2021, 117, 107868.                                         | 1.7  | 6         |
| 8  | Status Triphasicus Versus Status Epilepticus?. <i>Journal of Clinical Neurophysiology</i> , 2021, 38, 376-383.                                                                                                    | 1.7  | 2         |
| 9  | Neural fragility as an EEG marker of the seizure onset zone. <i>Nature Neuroscience</i> , 2021, 24, 1465-1474.                                                                                                    | 14.8 | 61        |
| 10 | Does a psychiatric history play a role in the development of psychiatric adverse events to perampanel and to placebo?. <i>Epilepsy and Behavior</i> , 2021, 125, 108380.                                          | 1.7  | 9         |
| 11 | Bidirectional Relations Among Depression, Migraine, and Epilepsy: Do They Have an Impact on Their Response to Treatment?. <i>Current Topics in Behavioral Neurosciences</i> , 2021, , 1.                          | 1.7  | 0         |
| 12 | Psychogenic Non-Epileptic Seizures 2020: The Enhanced Role of the Neurologist. <i>Epilepsy Currents</i> , 2020, 20, 35S-37S.                                                                                      | 0.8  | 1         |
| 13 | Cognitive disorders in epilepsy I: Clinical experience, real-world evidence and recommendations. <i>Seizure: the Journal of the British Epilepsy Association</i> , 2020, 83, 216-222.                             | 2.0  | 35        |
| 14 | Psychiatric Comorbidities in Medication-Resistant Epilepsy. , 2020, , 256-268.                                                                                                                                    |      | 0         |
| 15 | Presurgical evaluation of temporal lobe epilepsy: Is an outpatient prolonged ambulatory EEG study sufficient to recommend a surgical resection?. <i>Epilepsy and Behavior Reports</i> , 2020, 14, 100392.         | 1.0  | 1         |
| 16 | Could the 2017 ILAE and the four-dimensional epilepsy classifications be merged to a new 'Integrated Epilepsy Classification'? <i>Seizure: the Journal of the British Epilepsy Association</i> , 2020, 78, 31-37. | 2.0  | 18        |
| 17 | From theory to practice: Critical points in the 2017 ILAE classification of epileptic seizures and epilepsies. <i>Epilepsia</i> , 2020, 61, 350-353.                                                              | 5.1  | 5         |
| 18 | Cognitive outcomes following laser interstitial therapy for mesiotemporal epilepsies. <i>Neurology: Clinical Practice</i> , 2020, 10, 314-323.                                                                    | 1.6  | 10        |

| #  | ARTICLE                                                                                                                                                                                                                             | IF  | CITATIONS |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Obstacles in the treatment of common psychiatric comorbidities in patients with epilepsy: What is wrong with this picture?. <i>Epilepsy and Behavior</i> , 2019, 98, 291-292.                                                       | 1.7 | 11        |
| 20 | Neurobiologic properties of mood disorders may have an impact on epilepsy: Should this motivate neurologists to screen for this psychiatric comorbidity in these patients?. <i>Epilepsy and Behavior</i> , 2019, 98, 298-301.       | 1.7 | 13        |
| 21 | Magnetic Resonanceâ€“Guided Laser Interstitial Thermal Therapy for Mesial Temporal Epilepsy: A Case Series Analysis of Outcomes and Complications at 2-Year Follow-Up. <i>World Neurosurgery</i> , 2019, 126, e1121-e1129.          | 1.3 | 20        |
| 22 | Isolated Abdominal Motor Seizures of Mesial Parietal Origin: Epileptic Belly Dancing?. <i>Movement Disorders Clinical Practice</i> , 2019, 6, 396-399.                                                                              | 1.5 | 4         |
| 23 | Psychiatric comorbidities go unrecognized in patients with epilepsy: â€œYou see what you knowâ€. <i>Epilepsy and Behavior</i> , 2019, 98, 302-305.                                                                                 | 1.7 | 30        |
| 24 | Critique of the 2017 epileptic seizure and epilepsy classifications. <i>Epilepsia</i> , 2019, 60, 1032-1039.                                                                                                                        | 5.1 | 26        |
| 25 | Fetal antiepileptic drug exposure and learning and memory functioning at 6â€“ years of age: The NEAD prospective observational study. <i>Epilepsy and Behavior</i> , 2019, 92, 154-164.                                             | 1.7 | 30        |
| 26 | Psychiatric complications after epilepsy surgeryâ€“ but where are the psychiatrists?. <i>Epilepsy and Behavior</i> , 2019, 98, 318-321.                                                                                             | 1.7 | 40        |
| 27 | Opsoclonus-myooclonus-encephalopathy induced by cefepime. <i>Journal of the Neurological Sciences</i> , 2019, 396, 33-35.                                                                                                           | 0.6 | 10        |
| 28 | Disconnection of hippocampal networks contributes to memory dysfunction in individuals with temporal lobe epilepsy. <i>Hippocampus</i> , 2019, 29, 451-457.                                                                         | 1.9 | 6         |
| 29 | Classification of paroxysmal events and the fourâ€“dimensional epilepsy classification system. <i>Epileptic Disorders</i> , 2019, 21, 1-29.                                                                                         | 1.3 | 20        |
| 30 | Depression in people with epilepsy: How much do Asian colleagues acknowledge it?. <i>Seizure: the Journal of the British Epilepsy Association</i> , 2018, 57, 45-49.                                                                | 2.0 | 17        |
| 31 | Epilepsy as a Network Disorder (2): What can we learn from other network disorders such as dementia and schizophrenia, and what are the implications for translational research?. <i>Epilepsy and Behavior</i> , 2018, 78, 302-312. | 1.7 | 17        |
| 32 | Practice guideline update summary: Efficacy and tolerability of the new antiepileptic drugs I: Treatment of new-onset epilepsy. <i>Epilepsy Currents</i> , 2018, 18, 260-268.                                                       | 0.8 | 50        |
| 33 | Bidirectional relations among common psychiatric and neurologic comorbidities and epilepsy: Do they have an impact on the course of the seizure disorder?. <i>Epilepsia Open</i> , 2018, 3, 210-219.                                | 2.4 | 41        |
| 34 | Practice guideline update summary: Efficacy and tolerability of the new antiepileptic drugs II: Treatment-resistant epilepsy. <i>Epilepsy Currents</i> , 2018, 18, 269-278.                                                         | 0.8 | 34        |
| 35 | Ablation dynamics during laser interstitial thermal therapy for mesiotemporal epilepsy. <i>PLoS ONE</i> , 2018, 13, e0199190.                                                                                                       | 2.5 | 20        |
| 36 | Practice guideline update summary: Efficacy and tolerability of the new antiepileptic drugs I: Treatment of new-onset epilepsy. <i>Neurology</i> , 2018, 91, 74-81.                                                                 | 1.1 | 108       |

| #  | ARTICLE                                                                                                                                                                                      | IF   | CITATIONS |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 37 | Practice guideline update summary: Efficacy and tolerability of the new antiepileptic drugs II: Treatment-resistant epilepsy. <i>Neurology</i> , 2018, 91, 82-90.                            | 1.1  | 82        |
| 38 | Association Between Selective Serotonin-Reuptake Inhibitor Antidepressants and Increased Risk of Poststroke Epilepsy. <i>Mayo Clinic Proceedings</i> , 2017, 92, 179-181.                    | 3.0  | 4         |
| 39 | Ultra-rare genetic variation in common epilepsies: a case-control sequencing study. <i>Lancet Neurology</i> , The, 2017, 16, 135-143.                                                        | 10.2 | 190       |
| 40 | Antiseizure, antidepressant, and antipsychotic medication prescribing in elderly nursing home residents. <i>Epilepsy and Behavior</i> , 2017, 69, 116-120.                                   | 1.7  | 19        |
| 41 | Laser thermal ablation for mesiotemporal epilepsy: Analysis of ablation volumes and trajectories. <i>Epilepsia</i> , 2017, 58, 801-810.                                                      | 5.1  | 136       |
| 42 | The impact of antidepressants on seizure frequency and depressive and anxiety disorders of patients with epilepsy: Is it worth investigating?. <i>Epilepsy and Behavior</i> , 2017, 70, 5-9. | 1.7  | 50        |
| 43 | The relationship between mood disorder and insomnia depends on race in US veterans with epilepsy. <i>Epilepsy and Behavior</i> , 2017, 70, 80-86.                                            | 1.7  | 1         |
| 44 | Psychiatric comorbidities in new onset epilepsy: Should they be always investigated?. <i>Seizure: the Journal of the British Epilepsy Association</i> , 2017, 49, 79-82.                     | 2.0  | 66        |
| 45 | Concurrent mood and anxiety disorders are associated with pharmaco-resistant seizures in patients with MTL. <i>Epilepsia</i> , 2017, 58, 1268-1276.                                          | 5.1  | 75        |
| 46 | Educational needs of epileptologists regarding psychiatric comorbidities of the epilepsies: a descriptive quantitative survey. <i>Epileptic Disorders</i> , 2017, 19, 178-185.               | 1.3  | 18        |
| 47 | Can Neurochemical Changes of Mood Disorders Explain the Increase Risk of Epilepsy or its Worse Seizure Control?. <i>Neurochemical Research</i> , 2017, 42, 2071-2076.                        | 3.3  | 18        |
| 48 | Visual Deficit From Laser Interstitial Thermal Therapy for Temporal Lobe Epilepsy: Anatomical Considerations. <i>Operative Neurosurgery</i> , 2017, 13, 627-633.                             | 0.8  | 31        |
| 49 | 2014 Epilepsy Benchmarks Area III: Improve Treatment Options for Controlling Seizures and Epilepsy-Related Conditions without Side Effects. <i>Epilepsy Currents</i> , 2016, 16, 192-197.    | 0.8  | 10        |
| 50 | Most antidepressant drugs are safe for patients with epilepsy at therapeutic doses: A review of the evidence. <i>Epilepsy and Behavior</i> , 2016, 61, 282-286.                              | 1.7  | 89        |
| 51 | Psychiatric comorbidities in epilepsy: Should they be considered in the classification of epileptic disorders?. <i>Epilepsy and Behavior</i> , 2016, 64, 306-308.                            | 1.7  | 38        |
| 52 | Psychosis of epilepsy: a multifaceted neuropsychiatric disorder. <i>CNS Spectrums</i> , 2016, 21, 247-257.                                                                                   | 1.2  | 79        |
| 53 | Management of psychiatric and neurological comorbidities in epilepsy. <i>Nature Reviews Neurology</i> , 2016, 12, 106-116.                                                                   | 10.1 | 313       |
| 54 | Copy number variant analysis from exome data in 349 patients with epileptic encephalopathy. <i>Annals of Neurology</i> , 2015, 78, 323-328.                                                  | 5.3  | 59        |

| #  | ARTICLE                                                                                                                                                                                                                      | IF   | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 55 | Validation of the Chinese version of the Neurological Disorders Depression Inventory for Epilepsy (C-NDDI-E) in West China. <i>Epilepsy and Behavior</i> , 2015, 47, 6-10.                                                   | 1.7  | 43        |
| 56 | Quality of life and mood in patients with medically intractable epilepsy treated with targeted responsive neurostimulation. <i>Epilepsy and Behavior</i> , 2015, 45, 242-247.                                                | 1.7  | 114       |
