#	ARTICLE	IF	CITATIONS
1	The role of queen pheromones in social insects: queen control or queen signal?. <i>Animal Behaviour</i> , 1993, 45, 787-794.	1.9	455
2	Ant Reproductive Strategies and Sex Allocation Theory. <i>Quarterly Review of Biology</i> , 1986, 61, 1-21.	0.1	219
3	Measuring and Using Skew in the Study of Social Behavior and Evolution. <i>American Naturalist</i> , 2000, 156, 577-589.	2.1	187
4	Mortality Risk vs. Food Quality Trade-Offs in a Common Currency: Ant Patch Preferences. <i>Ecology</i> , 1990, 71, 1886-1892.	3.2	172
5	Sex Ratios and Multifaceted Parental Investment. <i>American Naturalist</i> , 1996, 148, 501-535.	2.1	140
6	Social heterosis and the maintenance of genetic diversity. <i>Journal of Evolutionary Biology</i> , 2007, 20, 2253-2265.	1.7	124
7	The past, present and future of reproductive skew theory and experiments. <i>Biological Reviews</i> , 2011, 86, 271-298.	10.4	114
8	The red and the black: habituation and the dear-enemy phenomenon in two desert <i>Pheidole</i> ants. <i>Behavioral Ecology and Sociobiology</i> , 2000, 48, 285-292.	1.4	109
9	Genetic support for the evolutionary theory of reproductive transactions in social wasps. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2000, 267, 75-79.	2.6	99
10	Social contracts in wasp societies. <i>Nature</i> , 1992, 359, 823-825.	27.8	95
11	QUEEN NUMBER IN COLONIES OF SOCIAL HYMENOPTERA AS A KIN-SELECTED ADAPTATION. <i>Evolution; International Journal of Organic Evolution</i> , 1988, 42, 566-580.	2.3	81
12	When can ants discriminate the sex of brood? A new aspect of queen-worker conflict.. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 1990, 87, 9670-9673.	7.1	75
13	The Ecology of Cooperation in Wasps: Causes and Consequences of Alternative Reproductive Decisions. <i>Ecology</i> , 1995, 76, 953-967.	3.2	73
14	Foraging for Work and Age-Based Polyethism: The Roles of Age and Previous Experience on Task Choice in Ants. <i>Ethology</i> , 2004, 110, 863-877.	1.1	72
15	Dispersal of first "workers" in social wasps: Causes and implications of an alternative reproductive strategy. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 1998, 95, 13737-13742.	7.1	70
16	Support for maternal manipulation of developmental nutrition in a facultatively eusocial bee, <i>Megalopta genalis</i> (Halictidae). <i>Behavioral Ecology and Sociobiology</i> , 2011, 65, 1179-1190.	1.4	70
17	Kinship, greenbeards, and runaway social selection in the evolution of social insect cooperation. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2011, 108, 10808-10815.	7.1	63
18	SEX-RATIO DETERMINATION WITHIN COLONIES OF ANTS. <i>Evolution; International Journal of Organic Evolution</i> , 1986, 40, 199-204.	2.3	59

#	ARTICLE	IF	CITATIONS
19	Within-group aggression and the value of group members: theory and a field test with social wasps. <i>Behavioral Ecology</i> , 1997, 8, 75-82.	2.2	58
20	Social heterosis and the maintenance of genetic diversity at the genome level. <i>Journal of Evolutionary Biology</i> , 2008, 21, 631-635.	1.7	54
21	Physiological variation as a mechanism for developmental caste-biasing in a facultatively eusocial sweat bee. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2012, 279, 1437-1446.	2.6	54
22	SELFISH LARVAE: DEVELOPMENT AND THE EVOLUTION OF PARASITIC BEHAVIOR IN THE HYMENOPTERA. <i>Evolution; International Journal of Organic Evolution</i> , 1992, 46, 1605-1620.	2.3	48
23	Kinship, parental manipulation and evolutionary origins of eusociality. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2015, 282, 20142886.	2.6	47
24	Mortality risk versus food quality trade-offs in ants: patch use over time. <i>Ecological Entomology</i> , 1991, 16, 73-80.	2.2	42
25	Foraging response of the ant <i>Lasius pallitarsis</i> to food sources with associated mortality risk. <i>Insectes Sociaux</i> , 1988, 35, 293-303.	1.2	40
26	Transactional Skew and Assured Fitness Return Models Fail to Predict Patterns of Cooperation in Wasps. <i>American Naturalist</i> , 2006, 167, 467-480.	2.1	40
27	Death in the Distance: Mortality Risk as Information for Foraging Ants. <i>Behaviour</i> , 1990, 112, 23-35.	0.8	36
28	Foundress polyphenism and the origins of eusociality in a facultatively eusocial sweat bee, <i>Megalopta genalis</i> (Halictidae). <i>Behavioral Ecology and Sociobiology</i> , 2013, 67, 331-340.	1.4	34
29	Wolbachia Horizontal Transmission Events in Ants: What Do We Know and What Can We Learn?. <i>Frontiers in Microbiology</i> , 2019, 10, 296.	3.5	34
30	Patch sampling behaviour and future foraging expectations in Argentine ants, <i>Linepithema humile</i> . <i>Animal Behaviour</i> , 1998, 55, 519-527.	1.9	32
31	Less growth with more food: How insect-prey availability changes colony demographics in the ant, <i>Camponotus floridanus</i> . <i>Journal of Insect Physiology</i> , 1991, 37, 891-898.	2.0	31
32	Opportunistic adoption of orphaned nests in paper wasps as an alternative reproductive strategy. <i>Behavioural Processes</i> , 1993, 30, 47-59.	1.1	31
33	Monogamy and high relatedness do not preferentially favor the evolution of cooperation. <i>BMC Evolutionary Biology</i> , 2011, 11, 58.	3.2	31
34	Optimal reproductive-skew models fail to predict aggression in wasps. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2004, 271, 811-817.	2.6	30
35	Male Parentage and Sexual Deception in the Social Hymenoptera. , 1993, , 384-401.		29
36	Size and Kinship Affect Success of Co-Founding <i>Lasius Pallitarsis</i> Queens. <i>Psyche: Journal of Entomology</i> , 1990, 97, 217-228.	0.9	28

#	ARTICLE	IF	CITATIONS
37	Queen condition and alate density affect pleometrosis in the ant <i>Lasius pallitarsis</i> . <i>Insectes Sociaux</i> , 1992, 39, 3-13.	1.2	27
38	Solitary nesting and reproductive success in the paper wasp <i>Polistes aurifer</i> . <i>Behavioral Ecology and Sociobiology</i> , 2005, 57, 445-456.	1.4	27
39	Alloparental Care and Eusocial Evolution: The Limits of Queller's Head-Start Advantage. <i>Oikos</i> , 1991, 61, 122.	2.7	26
40	Competition and kin discrimination in colony founding by social Hymenoptera. <i>Evolutionary Ecology</i> , 1989, 3, 221-235.	1.2	24
41	Sex-Ratio Determination Within Colonies of Ants. <i>Evolution; International Journal of Organic Evolution</i> , 1986, 40, 199.	2.3	23
42	Ontogeny of division of labor in a facultatively eusocial sweat bee <i>Megalopta genalis</i> . <i>Insectes Sociaux</i> , 2016, 63, 185-191.	1.2	23
43	Go High or Go Low? Adaptive Evolution of High and Low Relatedness Societies in Social Hymenoptera. <i>Frontiers in Ecology and Evolution</i> , 0, 5, .	2.2	18
44	Nepotism and brood reliability in the suppression of worker reproduction in the eusocial Hymenoptera. <i>Biology Letters</i> , 2006, 2, 577-579.	2.3	17
45	TUG-OF-WAR HAS NO BORDERS: IT IS THE MISSING MODEL IN REPRODUCTIVE SKEW THEORY. <i>Evolution; International Journal of Organic Evolution</i> , 2007, 61, 1244-1250.	2.3	17
46	Resolving the evolution of sterile worker castes: a window on the advantages and disadvantages of monogamy. <i>Biology Letters</i> , 2014, 10, 20140089.	2.3	14
47	INTERSPECIFIC HYBRIDIZATION IN ANTS: AT THE INTERSECTION OF ECOLOGY, EVOLUTION, AND BEHAVIOR. <i>Ecology</i> , 2006, 87, 2143-2147.	3.2	13
48	Sex Ratios and Skew Models: The Special Case of Evolution of Cooperation in Polistine Wasps. <i>American Naturalist</i> , 2002, 160, 103-118.	2.1	12
49	Exploratory behavior of <i>Lasius pallitarsis</i> ants encountering novel areas. <i>Insectes Sociaux</i> , 1991, 38, 345-349.	1.2	11
50	Extreme Polygyny: Multi-seasonal "Hypergynous" Nesting in the Introduced Paper Wasp <i>Polistes dominulus</i> . <i>Journal of Insect Behavior</i> , 2008, 21, 72-81.	0.7	10
51	Modeling Disease Evolution with Multilevel Selection: HIV as a Quasispecies Social Genome. <i>Journal of Evolutionary Medicine</i> , 2012, 1, 1-13.	0.5	9
52	Testing models of parental investment strategy and offspring size in ants. <i>Oecologia</i> , 2006, 146, 667-674.	2.0	8
53	Digging beneath the surface: incipient nest characteristics across three species of harvester ant that differ in colony founding strategy. <i>Insectes Sociaux</i> , 2010, 57, 115-123.	1.2	7
54	The cost of being queen: Investment across <i>Pogonomyrmex</i> harvester ant gynes that differ in degree of claustality. <i>Journal of Insect Physiology</i> , 2014, 70, 134-142.	2.0	7

#	ARTICLE	IF	CITATIONS
55	Age-related division of labor occurs in ants at the earliest stages of colony initiation. <i>Behavioral Ecology and Sociobiology</i> , 2021, 75, 1.	1.4	7
56	Major Evolutionary Transitions and the Roles of Facilitation and Information in Ecosystem Transformations. <i>Frontiers in Ecology and Evolution</i> , 2021, 9, .	2.2	7
57	Kin recognition and the paradoxical patterns of aggression between colonies of a Mojave desert Pheidole ant. <i>Insectes Sociaux</i> , 2006, 53, 127-135.	1.2	6
58	Preference for straight-line paths in recruitment trail formation of the Argentine ant, <i>Linepithema humile</i> . <i>Insectes Sociaux</i> , 2016, 63, 501-505.	1.2	6
59	Hamilton's rule is essential but insufficient for understanding monogamy's role in social evolution. <i>Royal Society Open Science</i> , 2019, 6, 180913.	2.4	6
60	Habitat complexity and predictability effects on finding and collecting food when ants search as cooperative groups. <i>Animal Behaviour</i> , 2018, 141, 77-84.	1.9	5
61	Weak queen or social contract?. <i>Nature</i> , 1993, 363, 503-503.	27.8	4
62	Ground truth is the test that counts. <i>Nature</i> , 2010, 467, 661-661.	27.8	4
63	How (not) to review papers on inclusive fitness. <i>Trends in Ecology and Evolution</i> , 2015, 30, 235-237.	8.7	4
64	Bordered tug-of-war models are neither general nor predictive of reproductive skew. <i>Journal of Theoretical Biology</i> , 2010, 266, 739-741.	1.7	3
65	Giving them what they want: manipulating Argentine ant activity patterns with water. <i>Journal of Applied Entomology</i> , 2012, 136, 588-595.	1.8	3
66	Ant foraging path use responds to different types of risk and their encounter probabilities. <i>Insectes Sociaux</i> , 2021, 68, 173-180.	1.2	3
67	Individual variation in tolerance of human activity by urban Dark-eyed Juncos ( <i>Junco hyemalis</i> ). <i>Wilson Journal of Ornithology</i> , 2022, 134, .	0.2	3
68	Cultural evolution and emergent group-level traits through social heterosis. <i>Behavioral and Brain Sciences</i> , 2014, 37, 266-267.	0.7	2
69	Reproductive skew in cooperative breeding: Environmental variability, antagonistic selection, choice, and control. <i>Ecology and Evolution</i> , 2019, 9, 10163-10175.	1.9	2
70	Urban junco flight initiation distances correlate with approach velocities of anthropogenic sounds. <i>Ethology Ecology and Evolution</i> , 0, , 1-11.	1.4	2
71	Genetic diversity through social heterosis can increase virulence in RNA viral infections and cancer progression. <i>Royal Society Open Science</i> , 2021, 8, 202219.	2.4	1
72	Monogamy and high relatedness do not preferentially favor the evolution of cooperation. <i>BMC Evolutionary Biology</i> , 2011, 11, .	3.2	1

#	ARTICLE	IF	CITATIONS
73	Optimists or realists? How ants allocate resources in making reproductive investments. <i>Journal of Animal Ecology</i> , 2018, 87, 1126-1136.	2.8	0
74	Exploratory behavior of Argentine Ants ( <i>Linepithema humile</i> ) encountering novel areas. <i>Insectes Sociaux</i> , 2019, 66, 653-656.	1.2	0
