#	ARTICLE	IF	CITATIONS
1	Systematic review with meta-analysis: the accuracy of serological tests to support the diagnosis of coeliac disease. <i>Alimentary Pharmacology and Therapeutics</i> , 2022, 55, 514-527.	1.9	16
2	Respiratory tract infections and gut microbiome modifications: A systematic review. <i>PLoS ONE</i> , 2022, 17, e0262057.	1.1	22
3	Antibiotics for lower respiratory tract infection in children presenting in primary care (ARTIC-PC): the predictive value of molecular testing. <i>Clinical Microbiology and Infection</i> , 2022, 28, 1238-1244.	2.8	3
4	Development and external validation of a clinical prediction model to aid coeliac disease diagnosis in primary care: An observational study. <i>EClinicalMedicine</i> , 2022, 46, 101376.	3.2	4
5	Accuracy of the NICE traffic light system in children presenting to general practice: a retrospective cohort study. <i>British Journal of General Practice</i> , 2022, 72, e398-e404.	0.7	8
6	Prognostic value of upper respiratory tract microbes in children presenting to primary care with respiratory infections: A prospective cohort study. <i>PLoS ONE</i> , 2022, 17, e0268131.	1.1	3
7	Inhaled antibiotics for acute lower respiratory tract infections in primary care: a hypothesis. <i>Lancet Respiratory Medicine</i> , 2022, , .	5.2	1
8	Reducing antibiotic use in uncomplicated urinary tract infections in adult women: a systematic review and individual participant data meta-analysis. <i>Clinical Microbiology and Infection</i> , 2022, 28, 1558-1566.	2.8	11
9	Can primary care research be conducted more efficiently using routinely reported practice-level data: a cluster randomised controlled trial conducted in England?. <i>BMJ Open</i> , 2022, 12, e061574.	0.8	1
10	Pelargonium sidoides root extract for the treatment of acute cough due to lower respiratory tract infection in adults: a feasibility double-blind, placebo-controlled randomised trial. <i>BMC Complementary Medicine and Therapies</i> , 2021, 21, 48.	1.2	5
11	Does cranberry extract reduce antibiotic use for symptoms of acute uncomplicated urinary tract infections (CUTI)? A feasibility randomised trial. <i>BMJ Open</i> , 2021, 11, e046791.	0.8	5
12	The role of economic, educational and social resources in supporting the use of digital health technologies by people with T2D: a qualitative study. <i>BMC Public Health</i> , 2021, 21, 293.	1.2	7
13	Novel multi-virus rapid respiratory microbiological point-of-care testing in primary care: a mixed-methods feasibility evaluation. <i>Family Practice</i> , 2021, 38, 598-605.	0.8	5
14	Protocol for an "efficient design"™ cluster randomised controlled trial to evaluate a complex intervention to improve antibiotic prescribing for CHildren presenting to primary care with acute COugh and respiratory tract infection: the CHICO study. <i>BMJ Open</i> , 2021, 11, e041769.	0.8	3
15	The early use of Antibiotics for at Risk CHildren with Influenza-like illness (ARCHIE): a double-blind randomised placebo-controlled trial. <i>European Respiratory Journal</i> , 2021, 58, 2002819.	3.1	4
16	Predicting poor outcomes in children aged 1-12 with respiratory tract infections: A systematic review. <i>PLoS ONE</i> , 2021, 16, e0249533.	1.1	3
17	Delayed antibiotic prescribing for respiratory tract infections: individual patient data meta-analysis. <i>BMJ</i> , 2021, 373, n808.	3.0	42
18	Should homes and workplaces purchase portable air filters to reduce the transmission of SARS-CoV-2 and other respiratory infections? A systematic review. <i>PLoS ONE</i> , 2021, 16, e0251049.	1.1	26

#	ARTICLE	IF	CITATIONS
19	Safety of reducing antibiotic prescribing in primary care: a mixed-methods study. <i>Health Services and Delivery Research</i> , 2021, 9, 1-126.	1.4	3
20	Prevalence and Antimicrobial Resistance of Bacteria in Children With Acute Otitis Media and Ear Discharge. <i>Pediatric Infectious Disease Journal</i> , 2021, 40, 756-762.	1.1	20
21	The aim of general practice: can it be explained in one sentence?. <i>British Journal of General Practice</i> , 2021, 71, 346.3-347.	0.7	0
22	Can we achieve shorter antibiotic courses in primary care?. <i>Drug and Therapeutics Bulletin</i> , 2021, 59, 131-132.	0.3	1
23	Outcome selection in primary care antimicrobial stewardship research. <i>Journal of Antimicrobial Chemotherapy</i> , 2021, 77, 7-12.	1.3	3
24	Antibiotics for lower respiratory tract infection in children presenting in primary care in England (ARTIC PC): a double-blind, randomised, placebo-controlled trial. <i>Lancet</i> , The, 2021, 398, 1417-1426.	6.3	32
25	Point-of-care tests to inform antibiotic prescribing. <i>BMJ</i> , The, 2021, 374, n2253.	3.0	4
26	D-Mannose to prevent Recurrent urinary tract Infections (MERIT): protocol for a randomised controlled trial. <i>BMJ Open</i> , 2021, 11, e037128.	0.8	11
27	Diagnostic accuracy of Fever-PAIN and Centor criteria for bacterial throat infection in adults with sore throat: a secondary analysis of a randomised controlled trial. <i>BJGP Open</i> , 2021, 5, BJGPO.2021.0122.	0.9	5
28	The accuracy of diagnostic indicators for coeliac disease: A systematic review and meta-analysis. <i>PLoS ONE</i> , 2021, 16, e0258501.	1.1	10
29	Respiratory infections in children: an appropriateness study of when parents should home care or seek medical help. <i>British Journal of General Practice</i> , 2021, 71, e140-e147.	0.7	2
30	Prospective Study of the Performance of Parent-Collected Nasal and Saliva Swab Samples, Compared with Nurse-Collected Swab Samples, for the Molecular Detection of Respiratory Microorganisms. <i>Microbiology Spectrum</i> , 2021, , e0016421.	1.2	6
31	Immediate oral versus immediate topical versus delayed oral antibiotics for children with acute otitis media with discharge: the REST three-arm non-inferiority electronic platform-supported RCT. <i>Health Technology Assessment</i> , 2021, 25, 1-76.	1.3	2
32	Predisposing factors to acquisition of acute respiratory tract infections in the community: a systematic review and meta-analysis. <i>BMC Infectious Diseases</i> , 2021, 21, 1254.	1.3	12
33	Topical or oral antibiotics for children with acute otitis media presenting with ear discharge: study protocol of a randomised controlled non-inferiority trial. <i>BMJ Open</i> , 2021, 11, e052128.	0.8	1
34	Exploring the appropriateness of antibiotic prescribing for common respiratory tract infections in UK primary care. <i>Journal of Antimicrobial Chemotherapy</i> , 2020, 75, 236-242.	1.3	13
35	Relationship between microbiology of throat swab and clinical course among primary care patients with acute cough: a prospective cohort study. <i>Family Practice</i> , 2020, 37, 332-339.	0.8	10
36	Strategies to reduce antibiotic use in women with uncomplicated urinary tract infection in primary care: protocol of a systematic review and meta-analysis including individual patient data. <i>BMJ Open</i> , 2020, 10, e035883.	0.8	6

#	ARTICLE	IF	CITATIONS
37	Antibiotic-induced changes in the human gut microbiota for the most commonly prescribed antibiotics in primary care in the UK: a systematic review. <i>BMJ Open</i> , 2020, 10, e035677.	0.8	111
38	Accuracy of potential diagnostic indicators for coeliac disease: a systematic review protocol. <i>BMJ Open</i> , 2020, 10, e038994.	0.8	5
39	Acute middle ear infection (acute otitis media) in children. <i>BMJ</i> , 2020, 371, m4238.	3.0	8
40	Point-of-care testing for respiratory infections during and after COVID-19. <i>British Journal of General Practice</i> , 2020, 70, 574-575.	0.7	9
41	Probability of sepsis after infection consultations in primary care in the United Kingdom in 2002–2017: Population-based cohort study and decision analytic model. <i>PLoS Medicine</i> , 2020, 17, e1003202.	3.9	19
42	Association between guidelines and medical practitioners' perception of best management for patients attending with an apparently uncomplicated acute sore throat: a cross-sectional survey in five countries. <i>BMJ Open</i> , 2020, 10, e037884.	0.8	10
43	Economic evaluation of the OSAC randomised controlled trial: oral corticosteroids for non-asthmatic adults with acute lower respiratory tract infection in primary care. <i>BMJ Open</i> , 2020, 10, e033567.	0.8	2
44	Non-steroidal anti-inflammatory drugs (NSAIDs) for acute sore throat. <i>The Cochrane Library</i> , 2020, .	1.5	2
45	Digital interventions for parents of acutely ill children and their treatment-seeking behaviour: a systematic review. <i>British Journal of General Practice</i> , 2020, 70, e172-e178.	0.7	20
46	Antimicrobial resistance associations with national primary care antibiotic stewardship policy: Primary care-based, multilevel analytic study. <i>PLoS ONE</i> , 2020, 15, e0232903.	1.1	22
47	A multi-centre, pragmatic, three-arm, individually randomised, non-inferiority, open trial to compare immediate orally administered, immediate topically administered or delayed orally administered antibiotics for acute otitis media with discharge in children: The Runny Ear Study (REST): study protocol. <i>Trials</i> , 2020, 21, 463.	0.7	4
48	Use of antibiotics and asthma medication for acute lower respiratory tract infections in people with and without asthma: retrospective cohort study. <i>Respiratory Research</i> , 2020, 21, 4.	1.4	13
49	Serious bacterial infections and antibiotic prescribing in primary care: cohort study using electronic health records in the UK. <i>BMJ Open</i> , 2020, 10, e036975.	0.8	15
50	Health Equity in the Effectiveness of Web-Based Health Interventions for the Self-Care of People With Chronic Health Conditions: Systematic Review. <i>Journal of Medical Internet Research</i> , 2020, 22, e17849.	2.1	30
51	Digital Health Interventions for People With Type 2 Diabetes to Develop Self-Care Expertise, Adapt to Identity Changes, and Influence Other's Perception: Qualitative Study. <i>Journal of Medical Internet Research</i> , 2020, 22, e21328.	2.1	14
52	The feasibility of measuring calprotectin from a throat swab as a marker of infections caused by group A streptococcus: a case-control feasibility study. <i>BJGP Open</i> , 2020, 4, bjgpopen20X101006.	0.9	4
53	Oral prednisolone for acute lower respiratory tract infection in clinically unrecognised asthma: an exploratory analysis of the Oral Steroids for Acute Cough (OSAC) randomised controlled trial. <i>BJGP Open</i> , 2020, 4, bjgpopen20X101099.	0.9	0

62	Title is missing!. , 2020, 15, e0232903.		0
63	Title is missing!. , 2020, 15, e0232903.		0
64	HATRIC: a study of Pelargonium sidoides root extract EPs®7630 (Kaloba®) for the treatment of acute cough due to lower respiratory tract infection in adultsâ€”study protocol for a double blind, placebo-controlled randomised feasibility trial. Pilot and Feasibility Studies, 2019, 5, 98.	0.5	5
65	Understanding the influence of parent-clinician communication on antibiotic prescribing for children with respiratory tract infections in primary care: a qualitative observational study using a conversation analysis approach. BMC Family Practice, 2019, 20, 102.	2.9	13
66	Primary care cliniciansâ€™ views of paediatric respiratory infection surveillance information to inform clinical decision-making: a qualitative study. BMJ Paediatrics Open, 2019, 3, e000418.	0.6	7
67	Delayed antibiotic prescribing for respiratory tract infections: protocol of an individual patient data meta-analysis. BMJ Open, 2019, 9, e026925.	0.8	6
68	Efficacy, safety and impact on antimicrobial resistance of duration and dose of amoxicillin treatment for young children with Community-Acquired Pneumonia: a protocol for a randomised controlled Trial (CAP-IT). BMJ Open, 2019, 9, e029875.	0.8	10
69	Reducing Primary Care Attendance Intentions for Pediatric Respiratory Tract Infections. Annals of Family Medicine, 2019, 17, 239-249.	0.9	6
70	Long-term outcomes of urinary tract infection (UTI) in Childhood (LUCI): protocol for an electronic record-linked cohort study. BMJ Open, 2019, 9, e024210.	0.8	3
71	Antibiotic prescribing in primary care. BMJ: British Medical Journal, 2019, 364, l780.	2.4	17
72	Parental and clinician agreement of illness severity in children with RTIs: secondary analysis of data from a prospective cohort study. British Journal of General Practice, 2019, 69, e236-e245.	0.7	3

#	ARTICLE	IF	CITATIONS
73	Respiratory Tract Infections in Children in the Community: Prospective Online Inception Cohort Study. <i>Annals of Family Medicine</i> , 2019, 17, 14-22.	0.9	16
74	Effectiveness and safety of electronically delivered prescribing feedback and decision support on antibiotic use for respiratory illness in primary care: REDUCE cluster randomised trial. <i>BMJ: British Medical Journal</i> , 2019, 364, l236.	2.4	85
75	Best emollients for eczema (BEE) – comparing four types of emollients in children with eczema: protocol for randomised trial and nested qualitative study. <i>BMJ Open</i> , 2019, 9, e033387.	0.8	13
76	Does cranberry extract reduce antibiotic use for symptoms of acute uncomplicated urinary tract infections (UTI)? Protocol for a feasibility study. <i>Trials</i> , 2019, 20, 767.	0.7	8
77	Coding infections in primary care. <i>BMJ, The</i> , 2019, 367, l6816.	3.0	5
78	Electronically delivered interventions to reduce antibiotic prescribing for respiratory infections in primary care: cluster RCT using electronic health records and cohort study. <i>Health Technology Assessment</i> , 2019, 23, 1-70.	1.3	19
79	Anaesthetic analgesic ear drops to reduce antibiotic consumption in children with acute otitis media: the CEDAR RCT. <i>Health Technology Assessment</i> , 2019, 23, 1-48.	1.3	11
80	Comparison of risk factors for, and prevalence of, antibiotic resistance in contaminating and pathogenic urinary <i>Escherichia coli</i> in children in primary care: prospective cohort study. <i>Journal of Antimicrobial Chemotherapy</i> , 2018, 73, 1359-1367.	1.3	24
81	Antibiotic prescribing quality for children in primary care: an observational study. <i>British Journal of General Practice</i> , 2018, 68, e90-e96.	0.7	35
82	Can we identify older people most vulnerable to living in cold homes during winter?. <i>Annals of Epidemiology</i> , 2018, 28, 1-7.e3.	0.9	4
83	Economic analysis of oral dexamethasone for symptom relief of sore throat: the UK TOAST study. <i>BMJ Open</i> , 2018, 8, e019184.	0.8	8
84	Does locally relevant, real-time infection epidemiological data improve clinician management and antimicrobial prescribing in primary care? A systematic review. <i>Family Practice</i> , 2018, 35, 542-550.	0.8	6
85	Parents' preferences for nursery care when children are unwell: a discrete choice experiment. <i>Journal of Public Health</i> , 2018, 42, 161-168.	1.0	0
86	Population-based paediatric respiratory infection surveillance: a prospective inception feasibility cohort study. <i>Pilot and Feasibility Studies</i> , 2018, 4, 182.	0.5	7
87	Child and adolescent musculoskeletal pain (CAM-Pain) feasibility study: testing a method of identifying, recruiting and collecting data from children and adolescents who consult about a musculoskeletal condition in UK general practice. <i>BMJ Open</i> , 2018, 8, e021116.	0.8	4
88	Urosepsis: a growing and preventable problem?. <i>British Journal of General Practice</i> , 2018, 68, 493-494.	0.7	8
89	Use of primary care data to predict those most vulnerable to cold weather: a case-crossover analysis. <i>British Journal of General Practice</i> , 2018, 68, e146-e156.	0.7	6
90	Early use of Antibiotics for at Risk CHildren with Influenza (ARCHIE): protocol for a double-blind, randomised, placebo-controlled trial. <i>BMJ Open</i> , 2018, 8, e021144.	0.8	3

#	ARTICLE	IF	CITATIONS
91	Impact of antibiotics for children presenting to general practice with cough on adverse outcomes: secondary analysis from a multicentre prospective cohort study. <i>British Journal of General Practice</i> , 2018, 68, e682-e693.	0.7	19
92	Managing infectious disease in primary care: using real-time syndromic and microbiological surveillance. <i>British Journal of General Practice</i> , 2018, 68, 266-267.	0.7	1
93	What gives rise to clinician gut feeling, its influence on management decisions and its prognostic value for children with RTI in primary care: a prospective cohort study. <i>BMC Family Practice</i> , 2018, 19, 25.	2.9	17
94	Potential for reducing inappropriate antibiotic prescribing in English primary care. <i>Journal of Antimicrobial Chemotherapy</i> , 2018, 73, ii36-ii43.	1.3	169
95	Post-consultation illness trajectories in children with acute cough and respiratory tract infection: prospective cohort study. <i>Family Practice</i> , 2018, 35, 676-683.	0.8	7
96	UTICalc may enhance UTI risk-estimation in young children. <i>Journal of Pediatrics</i> , 2018, 200, 291-294.	0.9	6
97	Diagnosis of Urinary Tract Infections in Children. <i>American Family Physician</i> , 2018, 97, 273-274.	0.1	2
98	The Diagnosis of Urinary Tract Infection in Young Children (DUTY) Study Clinical Rule: Economic Evaluation. <i>Value in Health</i> , 2017, 20, 556-566.	0.1	10
99	Effect of Oral Dexamethasone Without Immediate Antibiotics vs Placebo on Acute Sore Throat in Adults. <i>JAMA - Journal of the American Medical Association</i> , 2017, 317, 1535.	3.8	29
100	Feasibility cluster randomised controlled trial of a within-consultation intervention to reduce antibiotic prescribing for children presenting to primary care with acute respiratory tract infection and cough. <i>BMJ Open</i> , 2017, 7, e014506.	0.8	24
101	Adjunctive clindamycin for cellulitis: a clinical trial comparing flucloxacillin with or without clindamycin for the treatment of limb cellulitis. <i>BMJ Open</i> , 2017, 7, e013260.	0.8	36
102	Throat swabs in children with respiratory tract infection: associations with clinical presentation and potential targets for point-of-care testing. <i>Family Practice</i> , 2017, 34, 407-415.	0.8	18
103	Effect of Oral Prednisolone on Symptom Duration and Severity in Nonasthmatic Adults With Acute Lower Respiratory Tract Infection. <i>JAMA - Journal of the American Medical Association</i> , 2017, 318, 721.	3.8	35
104	Symptom response to antibiotic prescribing strategies in acute sore throat in adults: the DESCARTE prospective cohort study in UK general practice. <i>British Journal of General Practice</i> , 2017, 67, e634-e642.	0.7	13
105	Influence of the duration of penicillin prescriptions on outcomes for acute sore throat in adults: the DESCARTE prospective cohort study in UK general practice. <i>British Journal of General Practice</i> , 2017, 67, e623-e633.	0.7	7
106	Comparison of microbiological diagnosis of urinary tract infection in young children by routine health service laboratories and a research laboratory: Diagnostic cohort study. <i>PLoS ONE</i> , 2017, 12, e0171113.	1.1	6
107	Development of an intervention to reduce antibiotic use for childhood coughs in UK primary care using critical synthesis of multi-method research. <i>BMC Medical Research Methodology</i> , 2017, 17, 175.	1.4	11
108	Uva-ursi extract and ibuprofen as alternative treatments of adult female urinary tract infection (ATAFUTI): study protocol for a randomised controlled trial. <i>Trials</i> , 2017, 18, 421.	0.7	11

#	ARTICLE	IF	CITATIONS
109	Parent views on the content and potential impact of respiratory tract infection surveillance information: semistructured interviews to inform future research. <i>BMJ Paediatrics Open</i> , 2017, 1, e000036.	0.6	3
110	Global prevalence of antibiotic resistance in paediatric urinary tract infections caused by <i>Escherichia coli</i> and association with routine use of antibiotics in primary care: systematic review and meta-analysis. <i>BMJ</i> , The, 2016, 352, i939.	3.0	294
111	Community paediatric respiratory infection surveillance study protocol: a feasibility, prospective inception cohort study. <i>BMJ Open</i> , 2016, 6, e013017.	0.8	5
112	Faecal carriage of antibiotic resistant <i>Escherichia coli</i> in asymptomatic children and associations with primary care antibiotic prescribing: a systematic review and meta-analysis. <i>BMC Infectious Diseases</i> , 2016, 16, 359.	1.3	31
113	Paracetamol (acetaminophen) or non-steroidal anti-inflammatory drugs, alone or combined, for pain relief in acute otitis media in children. <i>The Cochrane Library</i> , 2016, 2016, CD011534.	1.5	17
114	Influence of Clinical Communication on Parents' Antibiotic Expectations for Children With Respiratory Tract Infections. <i>Annals of Family Medicine</i> , 2016, 14, 141-147.	0.9	56
115	Development and internal validation of a clinical rule to improve antibiotic use in children presenting to primary care with acute respiratory tract infection and cough: a prognostic cohort study. <i>Lancet Respiratory Medicine</i> , the, 2016, 4, 902-910.	5.2	61
116	Improving the Diagnosis and Treatment of Urinary Tract Infection in Young Children in Primary Care: Results from the DUTY Prospective Diagnostic Cohort Study. <i>Annals of Family Medicine</i> , 2016, 14, 325-336.	0.9	29
117	Nappy pad urine samples for investigation and treatment of UTI in young children: the 'DUTY' prospective diagnostic cohort study. <i>British Journal of General Practice</i> , 2016, 66, e516-e524.	0.7	6
118	Safety of reduced antibiotic prescribing for self limiting respiratory tract infections in primary care: cohort study using electronic health records. <i>BMJ</i> , The, 2016, 354, i3410.	3.0	103
119	Electronically delivered, multicomponent intervention to reduce unnecessary antibiotic prescribing for respiratory infections in primary care: a cluster randomised trial using electronic health records 'REDUCE' Trial study original protocol. <i>BMJ Open</i> , 2016, 6, e010892.	0.8	11
120	Primary care clinician antibiotic prescribing decisions in consultations for children with RTIs: a qualitative interview study. <i>British Journal of General Practice</i> , 2016, 66, e207-e213.	0.7	91
121	Empiric antibiotic treatment for urinary tract infection in preschool children: susceptibilities of urine sample isolates. <i>Family Practice</i> , 2016, 33, 127-132.	0.8	12
122	Are topical antibiotics an alternative to oral antibiotics for children with acute otitis media and ear discharge?. <i>BMJ</i> , The, 2016, 352, i308.	3.0	14
123	Factors influencing parents' decision-making when sending children with respiratory tract infections to nursery. <i>Journal of Public Health</i> , 2016, 38, 281-288.	1.0	6
124	The Diagnosis of Urinary Tract infection in Young children (DUTY): a diagnostic prospective observational study to derive and validate a clinical algorithm for the diagnosis of urinary tract infection in children presenting to primary care with an acute illness. <i>Health Technology Assessment</i> , 2016, 20, 1-294.	1.3	56
125	The CHICO (Children's Cough) Trial protocol: a feasibility randomised controlled trial investigating the clinical and cost-effectiveness of a complex intervention to improve the management of children presenting to primary care with acute respiratory tract infection. <i>BMJ Open</i> , 2015, 5, e008615.	0.8	13
126	Clinical presentation and microbiological diagnosis in paediatric respiratory tract infection: a systematic review. <i>British Journal of General Practice</i> , 2015, 65, e69-e81.	0.7	18

#	ARTICLE	IF	CITATIONS
127	It's safer to let parent consulting and clinician antibiotic prescribing decisions for children with respiratory tract infections: An analysis across four qualitative studies. <i>Social Science and Medicine</i> , 2015, 136-137, 156-164.	1.8	114
128	Can oral corticosteroids reduce the severity or duration of an acute cough, and the associated National Health Service and societal costs, in adults presenting to primary care? Study protocol for a randomised controlled trial. <i>Trials</i> , 2015, 16, 78.	0.7	6
129	A systematic review of parent and clinician views and perceptions that influence prescribing decisions in relation to acute childhood infections in primary care. <i>Scandinavian Journal of Primary Health Care</i> , 2015, 33, 11-20.	0.6	143
130	Childhood urinary tract infection in primary care: a prospective observational study of prevalence, diagnosis, treatment, and recovery. <i>British Journal of General Practice</i> , 2015, 65, e217-e223.	0.7	16
131	Antibiotic Prescribing in Primary Care and Antimicrobial Resistance in Patients Admitted to Hospital with Urinary Tract Infection: A Controlled Observational Pilot Study. <i>Antibiotics</i> , 2014, 3, 29-38.	1.5	11
132	Oral corticosteroid use for clinical and cost-effective symptom relief of sore throat: study protocol for a randomized controlled trial. <i>Trials</i> , 2014, 15, 365.	0.7	4
133	"They just say everything's a virus" Parent's judgment of the credibility of clinician communication in primary care consultations for respiratory tract infections in children: A qualitative study. <i>Patient Education and Counseling</i> , 2014, 95, 248-253.	1.0	78
