#	ARTICLE	IF	CITATIONS
1	Redefining lupus nephritis: clinical implications of pathophysiologic subtypes. <i>Nature Reviews Nephrology</i> , 2017, 13, 483-495.	9.6	245
2	Circulating complement activation in patients with anti-neutrophil cytoplasmic antibody-associated vasculitis. <i>Kidney International</i> , 2013, 83, 129-137.	5.2	210
3	Tubulointerstitial lesions of patients with lupus nephritis classified by the 2003 International Society of Nephrology and Renal Pathology Society system. <i>Kidney International</i> , 2010, 77, 820-829.	5.2	204
4	Inclusion of renal vascular lesions in the 2003 ISN/RPS system for classifying lupus nephritis improves renal outcome predictions. <i>Kidney International</i> , 2013, 83, 715-723.	5.2	135
5	Variants in Complement Factor H and Complement Factor H-Related Protein Genes, CFHR3 and CFHR1, Affect Complement Activation in IgA Nephropathy. <i>Journal of the American Society of Nephrology: JASN</i> , 2015, 26, 1195-1204.	6.1	124
6	Complement deposition in renal histopathology of patients with ANCA-associated pauci-immune glomerulonephritis. <i>Nephrology Dialysis Transplantation</i> , 2008, 24, 1247-1252.	0.7	105
7	Executive summary for the 2015 Annual Data Report of the China Kidney Disease Network (CK-NET). <i>Kidney International</i> , 2019, 95, 501-505.	5.2	103
8	Antineutrophil Cytoplasmic Autoantibody-Negative Pauci-immune Crescentic Glomerulonephritis. <i>Journal of the American Society of Nephrology: JASN</i> , 2007, 18, 599-605.	6.1	101
9	Clinicopathological characteristics and outcomes of patients with crescentic lupus nephritis. <i>Kidney International</i> , 2009, 76, 307-317.	5.2	93
10	A highly efficient asymmetric Michael addition of α,β -disubstituted aldehydes to maleimides catalyzed by primary amine thiourea salt. <i>Organic and Biomolecular Chemistry</i> , 2010, 8, 4767.	2.8	75
11	Combination of anti-C1q and anti-dsDNA antibodies is associated with higher renal disease activity and predicts renal prognosis of patients with lupus nephritis. <i>Nephrology Dialysis Transplantation</i> , 2012, 27, 3552-3559.	0.7	57
12	Asymmetric Michael Addition of Substituted Rhodanines to α,β -Unsaturated Ketones Catalyzed by Bulky Primary Amines. <i>Organic Letters</i> , 2012, 14, 2038-2041.	4.6	56
13	Rare Variants in the Complement Factor H-Related Protein 5 Gene Contribute to Genetic Susceptibility to IgA Nephropathy. <i>Journal of the American Society of Nephrology: JASN</i> , 2016, 27, 2894-2905.	6.1	56
14	Executive summary for China Kidney Disease Network (CK-NET) 2016 Annual Data Report. <i>Kidney International</i> , 2020, 98, 1419-1423.	5.2	56
15	Enantioselective Michael addition of ketones to maleimides catalyzed by bifunctional monosulfonyl DPEN salt. <i>Chemical Communications</i> , 2010, 46, 4589.	4.1	54
16	Complement Alternative Pathway's Activation in Patients With Lupus Nephritis. <i>American Journal of the Medical Sciences</i> , 2017, 353, 247-257.	1.1	54
17	Serum levels and renal deposition of C1q complement component and its antibodies reflect disease activity of lupus nephritis. <i>BMC Nephrology</i> , 2013, 14, 63.	1.8	53
18	Podocyte involvement in lupus nephritis based on the 2003 ISN/RPS system: a large cohort study from a single centre. <i>Rheumatology</i> , 2014, 53, 1235-1244.	1.9	53

#	ARTICLE	IF	CITATIONS
19	Plasma complement factor H is associated with disease activity of patients with ANCA-associated vasculitis. <i>Arthritis Research and Therapy</i> , 2015, 17, 129.	3.5	53
20	Anti-C1q antibodies and IgG subclass distribution in sera from Chinese patients with lupus nephritis. <i>Nephrology Dialysis Transplantation</i> , 2008, 24, 172-178.	0.7	52
21	Serum complement factor H is associated with clinical and pathological activities of patients with lupus nephritis. <i>Rheumatology</i> , 2012, 51, 2269-2277.	1.9	51
22	Anti-C1q autoantibodies from active lupus nephritis patients could inhibit the clearance of apoptotic cells and complement classical pathway activation mediated by C1q in vitro. <i>Immunobiology</i> , 2014, 219, 980-989.	1.9	40
23	Does Wrist Arthrodesis With Structural Iliac Crest Bone Graft After Wide Resection of Distal Radius Giant Cell Tumor Result in Satisfactory Function and Local Control?. <i>Clinical Orthopaedics and Related Research</i> , 2017, 475, 767-775.	1.5	40
24	Treadmill exercise slows cognitive deficits in aging rats by antioxidation and inhibition of amyloid production. <i>NeuroReport</i> , 2013, 24, 342-347.	1.2	31
25	Clinicopathologic Characteristics and Outcomes of Renal Thrombotic Microangiopathy in Anti-Neutrophil Cytoplasmic Autoantibody-Associated Glomerulonephritis. <i>Clinical Journal of the American Society of Nephrology: CJASN</i> , 2015, 10, 750-758.	4.5	30
26	Renal microvascular lesions in lupus nephritis. <i>Renal Failure</i> , 2020, 42, 19-29.	2.1	29
27	Lupus nephritis combined with renal injury due to thrombotic thrombocytopenic purpura-haemolytic uraemic syndrome. <i>Nephrology Dialysis Transplantation</i> , 2010, 25, 145-152.	0.7	26
28	Complement Factor H Inhibits Anti-Neutrophil Cytoplasmic Autoantibody-Induced Neutrophil Activation by Interacting With Neutrophils. <i>Frontiers in Immunology</i> , 2018, 9, 559.	4.8	26
29	EZH2, a prominent orchestrator of genetic and epigenetic regulation of solid tumor microenvironment and immunotherapy. <i>Biochimica Et Biophysica Acta: Reviews on Cancer</i> , 2022, 1877, 188700.	7.4	26
30	Clinical and Renal Biopsy Findings Predicting Outcome in Renal Thrombotic Microangiopathy: A Large Cohort Study from a Single Institute in China. <i>Scientific World Journal, The</i> , 2014, 2014, 1-9.	2.1	25
31	Rhein Elicits <i>In Vitro</i> Cytotoxicity in Primary Human Liver HL-7702 Cells by Inducing Apoptosis through Mitochondria-Mediated Pathway. <i>Evidence-based Complementary and Alternative Medicine</i> , 2015, 2015, 1-19.	1.2	24
32	Normal range of complement components during pregnancy: A prospective study. <i>American Journal of Reproductive Immunology</i> , 2020, 83, e13202.	1.2	24
33	Methylenetetrahydrofolate reductase C677T and A1298C polymorphisms and gastric cancer susceptibility. <i>World Journal of Gastroenterology</i> , 2014, 20, 11429.	3.3	23
34	Serum A08 C1q antibodies are associated with disease activity and prognosis in Chinese patients with lupus nephritis. <i>Kidney International</i> , 2016, 90, 1357-1367.	5.2	22
35	Immunological features and functional analysis of anti-CFH autoantibodies in patients with atypical hemolytic uremic syndrome. <i>Pediatric Nephrology</i> , 2019, 34, 269-281.	1.7	22
36	Interference of antimodified C-reactive protein autoantibodies from lupus nephritis in the biofunctions of modified C-reactive protein. <i>Human Immunology</i> , 2012, 73, 156-163.	2.4	21

#	ARTICLE	IF	CITATIONS
37	The clinical and laboratory features of Chinese Han anti-factor H autoantibody-associated hemolytic uremic syndrome. <i>Pediatric Nephrology</i> , 2017, 32, 811-822.	1.7	21
38	The pregnancy outcomes in patients with stage 3-4 chronic kidney disease and the effects of pregnancy in the long-term kidney function. <i>Journal of Nephrology</i> , 2018, 31, 953-960.	2.0	21
39	The functional activities of complement factor H are impaired in patients with ANCA-positive vasculitis. <i>Clinical Immunology</i> , 2017, 175, 41-50.	3.2	20
40	Renal mTORC1 activation is associated with disease activity and prognosis in lupus nephritis. <i>Rheumatology</i> , 2022, 61, 3830-3840.	1.9	20
41	Detection of anti-C1q antibodies and anti-C1q globular head domain antibodies in sera from Chinese patients with lupus nephritis. <i>Molecular Immunology</i> , 2009, 46, 2178-2182.	2.2	19
42	Antibodies to $\alpha 5$ chain of collagen IV are pathogenic in Goodpasture's disease. <i>Journal of Autoimmunity</i> , 2016, 70, 1-11.	6.5	19
43	Myeloperoxidase influences the complement regulatory activity of complement factor H. <i>Rheumatology</i> , 2018, 57, 2213-2224.	1.9	18
44	Overactivation of Complement Alternative Pathway in Postpartum Atypical Hemolytic Uremic Syndrome Patients with Renal Involvement. <i>American Journal of Reproductive Immunology</i> , 2015, 74, 345-356.	1.2	17
45	A Validation of the 2018 Revision of International Society of Nephrology/Renal Pathology Society Classification for Lupus Nephritis: A Cohort Study from China. <i>American Journal of Nephrology</i> , 2020, 51, 483-492.	3.1	16
46	Renal Interstitial Arteriosclerotic Lesions in Lupus Nephritis Patients: A Cohort Study from China. <i>PLoS ONE</i> , 2015, 10, e0141547.	2.5	15
47	Radiofrequency ablation under 3D intraoperative Iso-C C-arm navigation for the treatment of osteoid osteomas. <i>British Journal of Radiology</i> , 2015, 88, 20140535.	2.2	15
48	Anti-pentraxin 3 auto-antibodies might be protective in lupus nephritis: a large cohort study. <i>Renal Failure</i> , 2017, 39, 465-473.	2.1	14
49	Sphingosine-1-phosphate and its receptors in anti-neutrophil cytoplasmic antibody-associated vasculitis. <i>Nephrology Dialysis Transplantation</i> , 2017, 32, 1313-1322.	0.7	14
50	Podocyte Involvement in Renal Thrombotic Microangiopathy: A Clinicopathological Study. <i>American Journal of Nephrology</i> , 2020, 51, 752-760.	3.1	14
51	The predictive value of crescents in the disease progression of lupus nephritis based on the 2018 International Society of Nephrology/Renal Pathology Society Revision System: a large cohort study from China. <i>Renal Failure</i> , 2020, 42, 166-172.	2.1	14
52	A method of purifying intact complement factor H from human plasma. <i>Protein Expression and Purification</i> , 2013, 91, 105-111.	1.3	12
53	The Spectrum of C4d Deposition in Renal Biopsies of Lupus Nephritis Patients. <i>Frontiers in Immunology</i> , 2021, 12, 654652.	4.8	11
54	Acute tubulointerstitial nephritis with germinal centers in antineutrophil cytoplasmic antibody-associated vasculitis. <i>Medicine (United States)</i> , 2019, 98, e18178.	1.0	10

#	ARTICLE	IF	CITATIONS
55	Monoclonal immunoglobulin mediates complement activation in monoclonal gammopathy associated-C3 glomerulonephritis. BMC Nephrology, 2019, 20, 459.	1.8	8
56	Anti-complement factor H autoantibodies may be protective in lupus nephritis. Clinica Chimica Acta, 2020, 508, 1-8.	1.1	8
57	Renal involvement in a silicosis patient “ case report and literature review. Renal Failure, 2019, 41, 1045-1053.	2.1	6
58	Clinicopathological Characteristics and Outcomes of Chinese Patients with Scanty Immune Deposits Lupus Nephritis: A Large Cohort Study from a Single Center. Scientific World Journal, The, 2014, 2014, 1-11.	2.1	5
59	Evaluation of 12 different assays for detecting ANCA in Chinese patients with GPA and MPA: a multicenter study in China. Clinical Rheumatology, 2019, 38, 3477-3483.	2.2	5
60	C1q A08 Is a Half-Cryptic Epitope of Anti-C1q A08 Antibodies in Lupus Nephritis and Important for the Activation of Complement Classical Pathway. Frontiers in Immunology, 2020, 11, 848.	4.8	5
61	Anti-glomerular basement membrane glomerulonephritis with thrombotic microangiopathy: a case report. Immunologic Research, 2017, 65, 769-773.	2.9	4
62	Circulating anti-C3b IgG in lupus nephritis: A large cohort study. Clinical Immunology, 2020, 217, 108514.	3.2	4
63	Early alterations in cortical morphology after neoadjuvant chemotherapy in breast cancer patients: A longitudinal magnetic resonance imaging study. Human Brain Mapping, 2022, 43, 4513-4528.	3.6	4
64	Patient-specific iPSC-derived endothelial cells reveal aberrant p38 MAPK signaling in atypical hemolytic uremic syndrome. Stem Cell Reports, 2021, 16, 2305-2319.	4.8	3
65	Discovery of NEU1 as a candidate renal biomarker for proliferative lupus nephritis chronicity. Lupus Science and Medicine, 2021, 8, e000569.	2.7	3
66	Lupus Nephritis With Obvious IgA Deposits in the Kidneys. American Journal of the Medical Sciences, 2022, 363, 174-184.	1.1	2
67	Effectiveness and Tolerability of Nifedipine GITS in Patients with Chronic Kidney Disease and Uncontrolled Hypertension: A Prospective, Multicenter, Observational Study (ADRENAL). Advances in Therapy, 2021, 38, 4771-4785.	2.9	2
68	Proteomic profiling of kidney samples in patients with pure membranous and proliferative lupus nephritis. Lupus, 2022, 31, 837-847.	1.6	2
69	Posterior Reversible Encephalopathy Syndrome in a Patient With Microscopic Polyangiitis: A Case Report and Literature Review. Frontiers in Medicine, 2021, 8, 792744.	2.6	1
70	A novel mutation in complement 2 accompanied by susceptibility variants in C3 glomerulonephritis: A case study. Nefrologia, 2019, 39, 664-671.	0.4	0
71	A novel mutation in complement 2 accompanied by susceptibility variants in C3 glomerulonephritis: A case study. Nefrologia, 2019, 39, 664-671.	0.4	0
72	A rare case of malignant hypertension with splenic rupture and thrombotic microangiopathy. Medicine (United States), 2020, 99, e20581.	1.0	0

#	ARTICLE	IF	CITATIONS
73	Genetic and functional analysis of two missense mutations in CD46 predispose to postpartum atypical hemolytic uremic syndrome. <i>Clinica Chimica Acta</i> , 2020, 503, 61-69.	1.1	0
74	Genetic Variant CFH rs6677604 Might Play a Protective Role in lupus Nephritis. <i>American Journal of the Medical Sciences</i> , 2021, 361, 336-343.	1.1	0
75	von Willebrand factor variants in C3 glomerulopathy: A Chinese cohort study. <i>Clinical Immunology</i> , 2021, 229, 108794.	3.2	0
76	Neoadjuvant radiotherapy for soft tissue sarcoma in China: a preliminary result. <i>Annals of Translational Medicine</i> , 2021, 10, 0-0.	1.7	0
