#	ARTICLE	IF	CITATIONS
1	Respiratory weakness after mechanical ventilation is associated with one-year mortality - a prospective study. <i>Critical Care</i> , 2016, 20, 231.	5.8	88
2	Muscle weakness, functional capacities and recovery for COVID-19 ICU survivors. <i>BMC Anesthesiology</i> , 2021, 21, 64.	1.8	52
3	Comparison of exercise intensity during four early rehabilitation techniques in sedated and ventilated patients in ICU: a randomised cross-over trial. <i>Critical Care</i> , 2018, 22, 110.	5.8	49
4	Advanced telehealth technology improves home-based exercise therapy for people with stable chronic obstructive pulmonary disease: a systematic review. <i>Journal of Physiotherapy</i> , 2021, 67, 27-40.	1.7	40
5	Effects of exercise training in people with non-small cell lung cancer before lung resection: a systematic review and meta-analysis. <i>Thorax</i> , 2022, 77, 486-496.	5.6	30
6	People undertaking pulmonary rehabilitation are willing and able to provide accurate data via a remote pulse oximetry system: a multicentre observational study. <i>Journal of Physiotherapy</i> , 2019, 65, 28-36.	1.7	24
7	Effect of prehabilitation on ventilatory efficiency in non-small cell lung cancer patients: A cohort study. <i>Journal of Thoracic and Cardiovascular Surgery</i> , 2019, 157, 2504-2512.e1.	0.8	23
8	Nasal high flow does not improve exercise tolerance in COPD patients recovering from acute exacerbation: A randomized crossover study. <i>Respirology</i> , 2019, 24, 1088-1094.	2.3	19
9	ICU outcomes can be predicted by noninvasive muscle evaluation: a meta-analysis. <i>European Respiratory Journal</i> , 2020, 56, 1902482.	6.7	16
10	Is overlap of respiratory and limb muscle weakness at weaning from mechanical ventilation associated with poorer outcomes?. <i>Intensive Care Medicine</i> , 2017, 43, 282-283.	8.2	13
11	Measurement properties of the one-minute sit-to-stand test in children and adolescents with cystic fibrosis: A multicenter randomized cross-over trial. <i>PLoS ONE</i> , 2021, 16, e0246781.	2.5	12
12	Home-based Neuromuscular Electrical Stimulation as an Add-on to Pulmonary Rehabilitation Does Not Provide Further Benefits in Patients With Chronic Obstructive Pulmonary Disease: A Multicenter Randomized Trial. <i>Archives of Physical Medicine and Rehabilitation</i> , 2018, 99, 1462-1470.	0.9	10
13	Mid-Term Effects of Pulmonary Rehabilitation on Cognitive Function in People with Severe Chronic Obstructive Pulmonary Disease. <i>International Journal of COPD</i> , 2020, Volume 15, 1111-1121.	2.3	10
14	Prehabilitation sessions can be provided more frequently in a shortened regimen with similar or better efficacy in people with non-small cell lung cancer: a Randomised trial. <i>Journal of Physiotherapy</i> , 2022, 68, 43-50.	1.7	8
15	Clinimetric evaluation of muscle function tests for individuals with cystic fibrosis: A systematic review. <i>Journal of Cystic Fibrosis</i> , 2020, 19, 981-995.	0.7	7
16	Functional Electrical Stimulation: A New Therapeutic Approach to Enhance Exercise Intensity in Chronic Obstructive Pulmonary Disease Patients: A Randomized, Controlled Crossover Trial. <i>Archives of Physical Medicine and Rehabilitation</i> , 2018, 99, 1454-1461.	0.9	6
17	Role of Non-Invasive Respiratory Supports in COVID-19 Acute Respiratory Failure Patients with Do Not Intubate Orders. <i>Journal of Clinical Medicine</i> , 2021, 10, 2783.	2.4	6
18	Comparison of oxygen uptake during cycle ergometry with and without functional electrical stimulation in patients with COPD: protocol for a randomised, single-blind, placebo-controlled, cross-over trial. <i>BMJ Open Respiratory Research</i> , 2016, 3, e000130.	3.0	4

#	ARTICLE	IF	CITATIONS
19	Reliability of respiratory pressure measurements in ventilated and non-ventilated patients in ICU: an observational study. <i>Annals of Intensive Care</i> , 2018, 8, 14.	4.6	4
20	NIV Is not Adequate for High Intensity Endurance Exercise in COPD. <i>Journal of Clinical Medicine</i> , 2020, 9, 1054.	2.4	4
21	Validity and reliability of the one-minute sit-to-stand test for the measurement of cardio-respiratory responses in children with cystic fibrosis. <i>Pulmonology</i> , 2022, 28, 137-139.	2.1	4
22	Remote Assessment of Quality of Life and Functional Exercise Capacity in a Cohort of COVID-19 Patients One Year after Hospitalization (TELECOVID). <i>Journal of Clinical Medicine</i> , 2022, 11, 905.	2.4	4
23	Changes in Cycle-Ergometer Performance during Pulmonary Rehabilitation Predict COPD Exacerbation. <i>COPD: Journal of Chronic Obstructive Pulmonary Disease</i> , 2019, 16, 261-265.	1.6	3
24	Functional Electrical Stimulation Changes Muscle Oxygenation in Patients with Chronic Obstructive Pulmonary Disease During Moderate-Intensity Exercise: A Secondary Analysis. <i>COPD: Journal of Chronic Obstructive Pulmonary Disease</i> , 2019, 16, 30-36.	1.6	3
25	The relationship between maximal expiratory pressure values and critical outcomes in mechanically ventilated patients: a post hoc analysis of an observational study. <i>Annals of Intensive Care</i> , 2021, 11, 8.	4.6	3
26	Effects of different early rehabilitation techniques on haemodynamic and metabolic parameters in sedated patients: protocol for a randomised, single-blind, cross-over trial. <i>BMJ Open Respiratory Research</i> , 2017, 4, e000173.	3.0	2
27	Urinary Incontinence in People Referred for Pulmonary Rehabilitation: An Undisclosed Issue but a Real Problem. <i>Physical Therapy</i> , 2021, 101, .	2.4	2
28	Effets de la ventilation en position verticale. Å€ propos dâ€™un patient en rÃ©animation. <i>Kinesithérapie</i> , 2013, 13, 51-55.	0.1	1
29	RÃ©sumÃ© des recommandations ATS/ERS 2013. <i>Kinesithérapie</i> , 2014, 14, 24-30.	0.1	1
30	Changes in cycle-ergometer performance during pulmonary rehabilitation predict COPD exacerbation. <i>COPD: Journal of Chronic Obstructive Pulmonary Disease</i> , 2019, 16, 308-308.	1.6	1
31	Physiotherapy during the Covid-19 pandemic: management of critically ill patients in the ICU and follow-up care. , 2021, 1, 1-8.		1
32	Nasal High-Flow during Exercise in Patients with COPD: A Systematic Review and Meta-Analysis. <i>Annals of the American Thoracic Society</i> , 2021, , .	3.2	1
33	Effets mÃ©taboliques de lâ€™Ã©lectrothÃ©rapie couplÃ©e au cycloergomÃ©tre de litÂˆ: Ã©tude prÃ©liminaire. <i>Kinesithérapie</i> , 2015, 15, 37-41.	0.1	0
34	Now is the time to take the next step. , 2021, 01, 1-2.		0
35	Correspondence: High positive airway pressure could shorten the drainage period in haemothorax but not physiotherapy intervention. <i>Journal of Physiotherapy</i> , 2021, 67, 74.	1.7	0
36	Factors influencing participation in educational workshops as part of a pulmonary rehabilitation program in patients with chronic obstructive pulmonary disease: a retrospective study. <i>Expert Review of Respiratory Medicine</i> , 2021, , 1-9.	2.5	0
