#	ARTICLE	IF	CITATIONS
1	The longitudinal association of eating behaviour and ADHD symptoms in school age children: a follow-up study in the RHEA cohort. <i>European Child and Adolescent Psychiatry</i> , 2022, 31, 511-517.	4.7	3
2	Framing Causal Questions in Life Course Epidemiology. <i>Annual Review of Statistics and Its Application</i> , 2022, 9, 223-248.	7.0	3
3	Eating disorder symptoms and their associations with anthropometric and psychiatric polygenic scores. <i>European Eating Disorders Review</i> , 2022, 30, 221-236.	4.1	8
4	Parental feeding and childhood genetic risk for obesity: exploring hypothetical interventions with causal inference methods. <i>International Journal of Obesity</i> , 2022, 46, 1271-1279.	3.4	0
5	Associations between childhood autistic traits and adolescent eating disorder behaviours are partially mediated by fussy eating. <i>European Eating Disorders Review</i> , 2022, 30, 604-615.	4.1	8
6	The impact of anorexia nervosa and BMI polygenic risk on childhood growth: A 20-year longitudinal population-based study. <i>American Journal of Human Genetics</i> , 2022, 109, 1242-1254.	6.2	4
7	The genomics of childhood eating behaviours. <i>Nature Human Behaviour</i> , 2021, 5, 625-630.	12.0	7
8	One size does not fit all. Genomics differentiates among anorexia nervosa, bulimia nervosa, and binge eating disorder. <i>International Journal of Eating Disorders</i> , 2021, 54, 785-793.	4.0	43
9	Trajectories of eating behavior during COVID-19 lockdown: Longitudinal analyses of 22,374 adults. <i>Clinical Nutrition ESPEN</i> , 2021, 42, 158-165.	1.2	60
10	Childhood overeating is associated with adverse cardiometabolic and inflammatory profiles in adolescence. <i>Scientific Reports</i> , 2021, 11, 12478.	3.3	6
11	A longitudinal study of eating behaviours in childhood and later eating disorder behaviours and diagnoses. <i>British Journal of Psychiatry</i> , 2020, 216, 113-119.	2.8	76
12	The Role of Eating Behaviours in Genetic Susceptibility to Obesity. <i>Current Obesity Reports</i> , 2020, 9, 512-521.	8.4	24
13	Eating behavior trajectories in the first 10 years of life and their relationship with BMI. <i>International Journal of Obesity</i> , 2020, 44, 1766-1775.	3.4	27
14	Common etiological architecture underlying reward responsiveness, externally driven eating behaviors, and BMI in childhood: findings from the Gemini twin cohort. <i>International Journal of Obesity</i> , 2020, 44, 2064-2074.	3.4	6
15	Identifying typical trajectories in longitudinal data: modelling strategies and interpretations. <i>European Journal of Epidemiology</i> , 2020, 35, 205-222.	5.7	110
16	Polygenic Score for Body Mass Index Is Associated with Disordered Eating in a General Population Cohort. <i>Journal of Clinical Medicine</i> , 2020, 9, 1187.	2.4	27
17	The Role of the Environment in Overweight and Eating Behavior Variability: Insights from a Multivariate Twin Study. <i>Twin Research and Human Genetics</i> , 2020, 23, 338-344.	0.6	5
18	Longitudinal Analyses Suggest Genomic and Psychological Origins of Disordered Eating and Comorbidities. <i>JAMA Network Open</i> , 2020, 3, e2027188.	5.9	0

#	ARTICLE	IF	CITATIONS
19	Associations between Blood Metabolic Profile at 7 Years Old and Eating Disorders in Adolescence: Findings from the Avon Longitudinal Study of Parents and Children. <i>Metabolites</i> , 2019, 9, 191.	2.9	7
20	The association between emotional eating and depressive symptoms: a population-based twin study in Sri Lanka. <i>Global Health, Epidemiology and Genomics</i> , 2019, 4, e4.	0.8	8
21	F54POLYGENIC RISK SCORE FOR OBESITY IS ASSOCIATED WITH EATING BEHAVIORS OF TEENAGERS IN THE AVON LONGITUDINAL STUDY OF PARENTS AND CHILDREN (ALSPAC). <i>European Neuropsychopharmacology</i> , 2019, 29, S1138-S1139.	0.7	0
22	The Home Environment Shapes Emotional Eating. <i>Child Development</i> , 2018, 89, 1423-1434.	3.0	31
23	Emotional eating is learned not inherited in children, regardless of obesity risk. <i>Pediatric Obesity</i> , 2018, 13, 628-631.	2.8	44
24	Emotional over- and under-eating in early childhood are learned not inherited. <i>Scientific Reports</i> , 2017, 7, 9092.	3.3	50
25	Food fussiness and food neophobia share a common etiology in early childhood. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2017, 58, 189-196.	5.2	79
26	Genetic and environmental influences on food preferences in adolescence. <i>American Journal of Clinical Nutrition</i> , 2016, 104, 446-453.	4.7	60
27	Parental Reports of Infant and Child Eating Behaviors are not Affected by Their Beliefs About Their Twins's™ Zygosity. <i>Behavior Genetics</i> , 2016, 46, 763-771.	2.1	18
