#	ARTICLE	IF	CITATIONS
1	A comparative study on the leishmanicidal activity of the L-amino acid oxidases BjuLAAO-II and BmooLAAO-II isolated from Brazilian Bothrops snake venoms. <i>International Journal of Biological Macromolecules</i> , 2021, 167, 267-278.	7.5	10
2	Chikungunya virus entry is strongly inhibited by phospholipase A2 isolated from the venom of <i>Crotalus durissus terrificus</i> . <i>Scientific Reports</i> , 2021, 11, 8717.	3.3	27
3	Unraveling the structure and function of CdcPDE: A novel phosphodiesterase from <i>Crotalus durissus collilineatus</i> snake venom. <i>International Journal of Biological Macromolecules</i> , 2021, 178, 180-192.	7.5	7
4	Towards toxin PEGylation: The example of rCollinein-1, a snake venom thrombin-like enzyme, as a PEGylated biopharmaceutical prototype. <i>International Journal of Biological Macromolecules</i> , 2021, 190, 564-573.	7.5	9
5	A Synthetic Snake-Venom-Based Tripeptide Protects PC12 Cells from the Neurotoxicity of Acrolein by Improving Axonal Plasticity and Bioenergetics. <i>Neurotoxicity Research</i> , 2020, 37, 227-237.	2.7	9
6	Inflammation and coagulation crosstalk induced by BJcuL, a galactose-binding lectin isolated from <i>Bothrops jararacussu</i> snake venom. <i>International Journal of Biological Macromolecules</i> , 2020, 144, 296-304.	7.5	11
7	Beyond hemostasis: a snake venom serine protease with potassium channel blocking and potential antitumor activities. <i>Scientific Reports</i> , 2020, 10, 4476.	3.3	23
8	Pegylating toxins: A new trend in toxinology? A successful example of a PEGylated snake venom serine protease. <i>Toxicon</i> , 2020, 177, S58-S59.	1.6	0
9	<i>Bothrops moojeni</i> venom and BmooLAAO-I downmodulate CXCL8/IL-8 and CCL2/MCP-1 production and oxidative burst response, and upregulate CD11b expression in human neutrophils. <i>International Immunopharmacology</i> , 2020, 80, 106154.	3.8	3
10	Role of crotoxin in coagulation: novel insights into anticoagulant mechanisms and impairment of inflammation-induced coagulation. <i>Journal of Venomous Animals and Toxins Including Tropical Diseases</i> , 2020, 26, e20200076.	1.4	8
11	<i>Bothrops moojeni</i> L-amino acid oxidase induces apoptosis and epigenetic modulation on Bcr-Abl+ cells. <i>Journal of Venomous Animals and Toxins Including Tropical Diseases</i> , 2020, 26, e20200123.	1.4	13
12	Crotoxin-Induced Mice Lung Impairment: Role of Nicotinic Acetylcholine Receptors and COX-Derived Prostanoids. <i>Biomolecules</i> , 2020, 10, 794.	4.0	8
13	First report on BaltCRP, a cysteine-rich secretory protein (CRISP) from <i>Bothrops alternatus</i> venom: Effects on potassium channels and inflammatory processes. <i>International Journal of Biological Macromolecules</i> , 2019, 140, 556-567.	7.5	13
14	BthTX-I from <i>Bothrops jararacussu</i> induces apoptosis in human breast cancer cell lines and decreases cancer stem cell subpopulation. <i>Journal of Venomous Animals and Toxins Including Tropical Diseases</i> , 2019, 25, e20190010.	1.4	21
15	Immunomodulatory actions and epigenetic alterations induced by proteases from <i>Bothrops</i> snake venoms in human immune cells. <i>Toxicology in Vitro</i> , 2019, 61, 104586.	2.4	4
16	Cytotoxic, genotoxic, and oxidative stress-inducing effect of an L-amino acid oxidase isolated from <i>Bothrops jararacussu</i> venom in a co-culture model of HepG2 and HUVEC cells. <i>International Journal of Biological Macromolecules</i> , 2019, 127, 425-432.	7.5	22
17	Crotoxin, a neurotoxin from <i>Crotalus durissus terrificus</i> snake venom, as a potential tool against thrombosis development. <i>International Journal of Biological Macromolecules</i> , 2019, 134, 653-659.	7.5	8
18	Effects of crotoxin, a neurotoxin from <i>Crotalus durissus terrificus</i> snake venom, on human endothelial cells. <i>International Journal of Biological Macromolecules</i> , 2019, 134, 613-621.	7.5	11

#	ARTICLE	IF	CITATIONS
19	BjussuLAAO-II induces cytotoxicity and alters DNA methylation of cell-cycle genes in monocultured/co-cultured HepG2 cells. <i>Journal of Venomous Animals and Toxins Including Tropical Diseases</i> , 2019, 25, e147618.	1.4	7
20	Expression, purification and virucidal activity of two recombinant isoforms of phospholipase A2 from <i>Crotalus durissus terrificus</i> venom. <i>Archives of Virology</i> , 2019, 164, 1159-1171.	2.1	20
21	Global proteomic and functional analysis of <i>Crotalus durissus collilineatus</i> individual venom variation and its impact on envenoming. <i>Journal of Proteomics</i> , 2019, 191, 153-165.	2.4	42
22	A synthetic snake-venom-based tripeptide (Glu-Val-Trp) protects PC12 cells from MPP + toxicity by activating the NGF-signaling pathway. <i>Peptides</i> , 2018, 104, 24-34.	2.4	17
23	An overview of the immune modulating effects of enzymatic toxins from snake venoms. <i>International Journal of Biological Macromolecules</i> , 2018, 109, 664-671.	7.5	25
24	The toxin BjussuLAAO-II induces oxidative stress and DNA damage, upregulates the inflammatory cytokine genes TNF and IL6, and downregulates the apoptotic-related genes BAX, BCL2 and RELA in human Caco-2 cells. <i>International Journal of Biological Macromolecules</i> , 2018, 109, 212-219.	7.5	19
25	Kinetic investigations and stability studies of two <i>Bothrops</i> L-amino acid oxidases. <i>Journal of Venomous Animals and Toxins Including Tropical Diseases</i> , 2018, 24, 37.	1.4	11
26	Cytotoxic and pro-apoptotic action of MjTX-I, a phospholipase A2 isolated from <i>Bothrops moojeni</i> snake venom, towards leukemic cells. <i>Journal of Venomous Animals and Toxins Including Tropical Diseases</i> , 2018, 24, 40.	1.4	15
27	Immunotherapeutic potential of Crotoxin: anti-inflammatory and immunosuppressive properties. <i>Journal of Venomous Animals and Toxins Including Tropical Diseases</i> , 2018, 24, 39.	1.4	21
28	Cytotoxic and inflammatory potential of a phospholipase A2 from <i>Bothrops jararaca</i> snake venom. <i>Journal of Venomous Animals and Toxins Including Tropical Diseases</i> , 2018, 24, 33.	1.4	31
29	Antivenomic approach of different <i>Crotalus durissus collilineatus</i> venoms. <i>Journal of Venomous Animals and Toxins Including Tropical Diseases</i> , 2018, 24, 34.	1.4	4
30	New Insights on Moojase, a Thrombin-Like Serine Protease from <i>Bothrops moojeni</i> Snake Venom. <i>Toxins</i> , 2018, 10, 500.	3.4	17
31	CR-LAAO causes genotoxic damage in HepG2 tumor cells by oxidative stress. <i>Toxicology</i> , 2018, 404-405, 42-48.	4.2	10
32	Proteopeptidomic, Functional and Immunoreactivity Characterization of <i>Bothrops moojeni</i> Snake Venom: Influence of Snake Gender on Venom Composition. <i>Toxins</i> , 2018, 10, 177.	3.4	48
33	BjSP, a novel serine protease from <i>Bothrops jararaca</i> snake venom that degrades fibrinogen without forming fibrin clots. <i>Toxicology and Applied Pharmacology</i> , 2018, 357, 50-61.	2.8	15
34	Sacha inchi seeds from sub-tropical cultivation: effects of roasting on antinutrients, antioxidant capacity and oxidative stability. <i>Journal of Food Science and Technology</i> , 2018, 55, 4159-4166.	2.8	29
35	LTB4 and PGE2 modulate the release of MIP-1 $\alpha$ and IL-1 $\beta$ by cells stimulated with <i>Bothrops</i> snake venoms. <i>Toxicon</i> , 2018, 150, 289-296.	1.6	17
36	Crystal structure and molecular dynamics studies of L-amino acid oxidase from <i>Bothrops atrox</i> . <i>Toxicon</i> , 2017, 128, 50-59.	1.6	16

#	ARTICLE	IF	CITATIONS
37	CR-LAAO, an L-amino acid oxidase from <i>Calloselasma rhodostoma</i> venom, as a potential tool for developing novel immunotherapeutic strategies against cancer. <i>Scientific Reports</i> , 2017, 7, 42673.	3.3	44
38	Isolation and characterization of a novel metalloprotease inhibitor from <i>Bothrops alternatus</i> snake serum. <i>International Journal of Biological Macromolecules</i> , 2017, 98, 436-446.	7.5	9
39	A new l-amino acid oxidase from <i>Bothrops jararacussu</i> snake venom: Isolation, partial characterization, and assessment of pro-apoptotic and antiprotozoal activities. <i>International Journal of Biological Macromolecules</i> , 2017, 103, 25-35.	7.5	31
40	Disseminated intravascular coagulation caused by moojenactivase, a procoagulant snake venom metalloprotease. <i>International Journal of Biological Macromolecules</i> , 2017, 103, 1077-1086.	7.5	12
41	Immune cells and mediators involved in the inflammatory responses induced by a P-I metalloprotease and a phospholipase A2 from <i>Bothrops atrox</i> venom. <i>Molecular Immunology</i> , 2017, 85, 238-247.	2.2	34
42	Structural and binding studies of a C-type galactose-binding lectin from <i>Bothrops jararacussu</i> snake venom. <i>Toxicon</i> , 2017, 126, 59-69.	1.6	7
43	Investigating possible biological targets of Bj-CRP, the first cysteine-rich secretory protein (CRISP) isolated from <i>Bothrops jararaca</i> snake venom. <i>Toxicology Letters</i> , 2017, 265, 156-169.	0.8	29
44	New findings from the first transcriptome of the <i>Bothrops moojeni</i> snake venom gland. <i>Toxicon</i> , 2017, 140, 105-117.	1.6	22
45	Antithrombotic activity of Batroxase, a metalloprotease from <i>Bothrops atrox</i> venom, in a model of venous thrombosis. <i>International Journal of Biological Macromolecules</i> , 2017, 95, 263-267.	7.5	13
46	Multiple effects of toxins isolated from <i>Crotalus durissus terrificus</i> on the hepatitis C virus life cycle. <i>PLoS ONE</i> , 2017, 12, e0187857.	2.5	25
47	l-Amino acid oxidase isolated from <i>Calloselasma rhodostoma</i> snake venom induces cytotoxicity and apoptosis in JAK2V617F-positive cell lines. <i>Revista Brasileira De Hematologia E Hemoterapia</i> , 2016, 38, 128-134.	0.7	14
48	Effects of <i>Bothrops atrox</i> venom and two isolated toxins on the human complement system: Modulation of pathways and generation of anaphylatoxins. <i>Molecular Immunology</i> , 2016, 80, 91-100.	2.2	14
49	The L-amino acid oxidase from <i>Calloselasma rhodostoma</i> snake venom modulates apoptomiRs expression in Bcr-Abl-positive cell lines. <i>Toxicon</i> , 2016, 120, 9-14.	1.6	15
50	rBaltMIP, a recombinant alpha-type myotoxin inhibitor from <i>Bothrops alternatus</i> (Rhinocerocephis) Tj ETQq0 0 0 rgBT /Overlock 10 Tf 50 2 53-62.	1.6	2
51	Moojenactivase, a novel pro-coagulant PIII metalloprotease isolated from <i>Bothrops moojeni</i> snake venom, activates coagulation factors II and X and induces tissue factor up-regulation in leukocytes. <i>Archives of Toxicology</i> , 2016, 90, 1261-1278.	4.2	26
52	CR-LAAO antileukemic effect against Bcr-Abl + cells is mediated by apoptosis and hydrogen peroxide. <i>International Journal of Biological Macromolecules</i> , 2016, 86, 309-320.	7.5	25
53	Evaluation of the in vivo thrombolytic activity of a metalloprotease from <i>Bothrops atrox</i> venom using a model of venous thrombosis. <i>Toxicon</i> , 2016, 109, 18-25.	1.6	16
54	Immunomodulatory activity of <i>Tityus serrulatus</i> scorpion venom on human T lymphocytes. <i>Journal of Venomous Animals and Toxins Including Tropical Diseases</i> , 2015, 21, 46.	1.4	22

#	ARTICLE	IF	CITATIONS
55	Bothrops snake venoms and their isolated toxins, an L-amino acid oxidase and a serine protease, modulate human complement system pathways. <i>Journal of Venomous Animals and Toxins Including Tropical Diseases</i> , 2015, 21, 29.	1.4	18
56	Purification procedure for the isolation of a P-I metalloprotease and an acidic phospholipase A2 from <i>Bothrops atrox</i> snake venom. <i>Journal of Venomous Animals and Toxins Including Tropical Diseases</i> , 2015, 21, 28.	1.4	25
57	Snake venom galactoside-binding lectins: a structural and functional overview. <i>Journal of Venomous Animals and Toxins Including Tropical Diseases</i> , 2015, 21, 35.	1.4	27
58	Antitumor potential of the myotoxin BthTX-I from <i>Bothrops jararacussu</i> snake venom: evaluation of cell cycle alterations and death mechanisms induced in tumor cell lines. <i>Journal of Venomous Animals and Toxins Including Tropical Diseases</i> , 2015, 21, 44.	1.4	39
59	Evaluating the microbicidal, antiparasitic and antitumor effects of CR-LAAO from <i>Calloselasma rhodostoma</i> venom. <i>International Journal of Biological Macromolecules</i> , 2015, 80, 489-497.	7.5	44
60	Inflammatory mediators involved in the paw edema and hyperalgesia induced by Batroxase, a metalloproteinase isolated from <i>Bothrops atrox</i> snake venom. <i>International Immunopharmacology</i> , 2015, 28, 199-207.	3.8	40
61	A tripeptide isolated from <i>Bothrops atrox</i> venom has neuroprotective and neurotrophic effects on a cellular model of Parkinson's disease. <i>Chemico-Biological Interactions</i> , 2015, 235, 10-16.	4.0	16
62	Evaluation of the local inflammatory events induced by BpirMP, a metalloproteinase from <i>Bothrops pirajai</i> venom. <i>Molecular Immunology</i> , 2015, 68, 456-464.	2.2	30
63	Phospholipase A2 Isolated from the Venom of <i>Crotalus durissus terrificus</i> Inactivates Dengue virus and Other Enveloped Viruses by Disrupting the Viral Envelope. <i>PLoS ONE</i> , 2014, 9, e112351.	2.5	53
64	L-Methionine inhibits growth of human pancreatic cancer cells. <i>Anti-Cancer Drugs</i> , 2014, 25, 200-203.	1.4	14
65	P-I class metalloproteinase from <i>Bothrops moojeni</i> venom is a post-proline cleaving peptidase with kininogenase activity: Insights into substrate selectivity and kinetic behavior. <i>Biochimica Et Biophysica Acta - Proteins and Proteomics</i> , 2014, 1844, 545-552.	2.3	17
66	Heterologous expression and biochemical and functional characterization of a recombinant alpha-type myotoxin inhibitor from <i>Bothrops alternatus</i> snake. <i>Biochimie</i> , 2014, 105, 119-128.	2.6	13
67	Snake venom L-amino acid oxidases: an overview on their antitumor effects. <i>Journal of Venomous Animals and Toxins Including Tropical Diseases</i> , 2014, 20, 23.	1.4	75
68	Galatrox is a C-type lectin in <i>Bothrops atrox</i> snake venom that selectively binds LacNAc-terminated glycans and can induce acute inflammation. <i>Glycobiology</i> , 2014, 24, 1010-1021.	2.5	20
69	Unusual biotransformation products of the sesquiterpene lactone budlein A by <i>Aspergillus</i> species. <i>Phytochemistry</i> , 2013, 96, 92-100.	2.9	12
70	Proteomic analysis of <i>Bothrops pirajai</i> snake venom and characterization of BpirMP, a new P-I metalloproteinase. <i>Journal of Proteomics</i> , 2013, 80, 250-267.	2.4	43
71	L-Amino Acid Oxidase Isolated from <i>Bothrops pirajai</i> Induces Apoptosis in BCR-ABL Positive Cells and Potentiates Imatinib Mesylate Effect. <i>Basic and Clinical Pharmacology and Toxicology</i> , 2013, 113, 103-112.	2.5	30
72	Effects of two serine proteases from <i>Bothrops pirajai</i> snake venom on the complement system and the inflammatory response. <i>International Immunopharmacology</i> , 2013, 15, 764-771.	3.8	43

#	ARTICLE	IF	CITATIONS
73	Ts6 and Ts2 from <i>Tityus serrulatus</i> venom induce inflammation by mechanisms dependent on lipid mediators and cytokine production. <i>Toxicon</i> , 2013, 61, 1-10.	1.6	47
74	Phospholipase A2 Inhibitors Isolated From Medicinal Plants: Alternative Treatment Against Snakebites. <i>Mini-Reviews in Medicinal Chemistry</i> , 2013, 13, 1348-1356.	2.4	14
75	Microbial transformation of the sesquiterpene lactone tagitinin C by the fungus <i>Aspergillus terreus</i> . <i>Journal of Industrial Microbiology and Biotechnology</i> , 2012, 39, 1719-1724.	3.0	14
76	Biochemical characterization and comparative analysis of two distinct serine proteases from <i>Bothrops pirajai</i> snake venom. <i>Biochimie</i> , 2012, 94, 2545-2558.	2.6	41
77	Isolation and characterization of moojenin, an acid-active, anticoagulant metalloproteinase from <i>Bothrops moojeni</i> venom. <i>Toxicon</i> , 2012, 60, 1251-1258.	1.6	24
78	Crotoxin and phospholipases A2 from <i>Crotalus durissus terrificus</i> showed antiviral activity against dengue and yellow fever viruses. <i>Toxicon</i> , 2012, 59, 507-515.	1.6	75
79	Batroxase, a new metalloproteinase from <i>B. atrox</i> snake venom with strong fibrinolytic activity. <i>Toxicon</i> , 2012, 60, 70-82.	1.6	85
80	Cell cycle arrest evidence, parasitocidal and bactericidal properties induced by L-amino acid oxidase from <i>Bothrops atrox</i> snake venom. <i>Biochimie</i> , 2011, 93, 941-947.	2.6	55
81	<i>Tityus serrulatus</i> venom and toxins Ts1, Ts2 and Ts6 induce macrophage activation and production of immune mediators. <i>Toxicon</i> , 2011, 57, 1101-1108.	1.6	68
82	Molecular characterization of an acidic phospholipase A2 from <i>Bothrops pirajai</i> snake venom: synthetic C-terminal peptide identifies its antiplatelet region. <i>Archives of Toxicology</i> , 2011, 85, 1219-1233.	4.2	38
83	Hyaluronidase recruits mesenchymal-like cells to the lung and ameliorates fibrosis. <i>Fibrogenesis and Tissue Repair</i> , 2011, 4, 3.	3.4	50
84	A rational protocol for the successful crystallization of L-amino-acid oxidase from <i>Bothrops atrox</i> . <i>Acta Crystallographica Section F: Structural Biology Communications</i> , 2011, 67, 475-478.	0.7	4
85	Isolation, functional, and partial biochemical characterization of galatrox, an acidic lectin from <i>Bothrops atrox</i> snake venom. <i>Acta Biochimica Et Biophysica Sinica</i> , 2011, 43, 181-192.	2.0	17
86	Low-molecular-mass peptides from the venom of the Amazonian viper <i>Bothrops atrox</i> protect against brain mitochondrial swelling in rat: Potential for neuroprotection. <i>Toxicon</i> , 2010, 56, 86-92.	1.6	15
87	Functional and structural analysis of two fibrinogen-activating enzymes isolated from the venoms of <i>Crotalus durissus terrificus</i> and <i>Crotalus durissus collilineatus</i> . <i>Acta Biochimica Et Biophysica Sinica</i> , 2009, 41, 21-29.	2.0	21
88	Antitumor effects of snake venom chemically modified Lys49 phospholipase A2-like BthTX-I and a synthetic peptide derived from its C-terminal region. <i>Biologicals</i> , 2009, 37, 222-229.	1.4	57
89	Computer-aided Drug Design of Novel PLA2 Inhibitor Candidates for Treatment of Snakebite. <i>Journal of Biomolecular Structure and Dynamics</i> , 2009, 27, 27-35.	3.5	37
90	Snake Venom L-Amino Acid Oxidases: Some Consideration About their Functional Characterization. <i>Protein and Peptide Letters</i> , 2009, 16, 908-912.	0.9	33

#	ARTICLE	IF	CITATIONS
91	Snake Venom Phospholipases A2: A New Class of Antitumor Agents. <i>Protein and Peptide Letters</i> , 2009, 16, 894-898.	0.9	47
92	Crystal structure of a myotoxic Asp49-phospholipase A2 with low catalytic activity: Insights into Ca <sup>2+</sup> -independent catalytic mechanism. <i>Biochimica Et Biophysica Acta - Proteins and Proteomics</i> , 2008, 1784, 591-599.	2.3	30
93	Antitumoural Effect of an L-Amino Acid Oxidase Isolated from <i>Bothrops jararaca</i> Snake Venom. <i>Basic and Clinical Pharmacology and Toxicology</i> , 2008, 102, 533-542.	2.5	46
94	Antineurotoxic activity of <i>Galactia glaucescens</i> against <i>Crotalus durissus terrificus</i> venom. <i>FÁ-toterapÃ-Ãç</i> , 2008, 79, 378-380.	2.2	8
95	BjussuSP-I: A new thrombin-like enzyme isolated from <i>Bothrops jararacussu</i> snake venom. <i>Comparative Biochemistry and Physiology Part A, Molecular &amp; Integrative Physiology</i> , 2008, 151, 443-454.	1.8	37
96	Evidence of caspase-mediated apoptosis induced by l-amino acid oxidase isolated from <i>Bothrops atrox</i> snake venom. <i>Comparative Biochemistry and Physiology Part A, Molecular &amp; Integrative Physiology</i> , 2008, 151, 542-550.	1.8	92
97	Molecular Dynamics, Flexible Docking, Virtual Screening, ADMET Predictions, and Molecular Interaction Field Studies to Design Novel Potential MAO-B Inhibitors. <i>Journal of Biomolecular Structure and Dynamics</i> , 2008, 25, 347-355.	3.5	40
98	A new acidic myotoxic, anti-platelet and prostaglandin I2 inductor phospholipase A2 isolated from <i>Bothrops moojeni</i> snake venom. <i>Toxicon</i> , 2008, 52, 908-917.	1.6	71
99	Myotoxic phospholipases A2 isolated from <i>Bothrops brazili</i> snake venom and synthetic peptides derived from their C-terminal region: Cytotoxic effect on microorganism and tumor cells. <i>Peptides</i> , 2008, 29, 1645-1656.	2.4	89
100	Molecular characterization of BjussuSP-I, a new thrombin-like enzyme with procoagulant and kallikrein-like activity isolated from <i>Bothrops jararacussu</i> snake venom. <i>Biochimie</i> , 2008, 90, 500-507.	2.6	23
101	Chemical constituents from <i>Tabernaemontana catharinensis</i> root bark: a brief NMR review of indole alkaloids and in vitro cytotoxicity. <i>Quimica Nova</i> , 2008, 31, 20-24.	0.3	63
102	PotencializaÃ§Ã£o do efeito metemoglobinizante da dapsona em ratos pela N-acetilcisteÃªna. <i>BJPS: Brazilian Journal of Pharmaceutical Sciences</i> , 2008, 44, 97-104.	0.5	3
103	Triterpenoid saponins, new metalloprotease snake venom inhibitors isolated from <i>Pentaclethra macroloba</i> . <i>Toxicon</i> , 2007, 50, 283-291.	1.6	64
104	Molecular approaches for structural characterization of <i>Bothrops</i> l-amino acid oxidases with antiprotozoal activity: cDNA cloning, comparative sequence analysis, and molecular modeling. <i>Biochemical and Biophysical Research Communications</i> , 2007, 355, 302-306.	2.1	48
105	Cytotoxic l-amino acid oxidase from <i>Bothrops moojeni</i> : Biochemical and functional characterization. <i>International Journal of Biological Macromolecules</i> , 2007, 41, 132-140.	7.5	87
106	Molecular characterization and phylogenetic analysis of BjussuMP-I: A RGD-P-III class hemorrhagic metalloprotease from <i>Bothrops jararacussu</i> snake venom. <i>Journal of Molecular Graphics and Modelling</i> , 2007, 26, 69-85.	2.4	27
107	Biochemical and functional characterization of an l-amino acid oxidase isolated from <i>Bothrops pirajai</i> snake venom. <i>Bioorganic and Medicinal Chemistry</i> , 2006, 14, 7034-7043.	3.0	118
108	Inhibition of the myotoxic activity of <i>Bothrops jararacussu</i> venom and its two major myotoxins, BthTX-I and BthTX-II, by the aqueous extract of <i>Tabernaemontana catharinensis</i> A. DC. ( <i>Apocynaceae</i> ). <i>Phytomedicine</i> , 2005, 12, 123-130.	5.3	37

#	ARTICLE	IF	CITATIONS
109	Evaluation of the effect of aqueous extract of <i>Croton urucurana</i> Baillon (Euphorbiaceae) on the hemorrhagic activity induced by the venom of <i>Bothrops jararaca</i> , using new techniques to quantify hemorrhagic activity in rat skin. <i>Phytomedicine</i> , 2005, 12, 570-576.	5.3	34
110	Medicinal Plants with Inhibitory Properties Against Snake Venoms. <i>Current Medicinal Chemistry</i> , 2005, 12, 2625-2641.	2.4	181
111	Anticoagulant and antifibrinolytic properties of the aqueous extract from <i>Bauhinia forficata</i> against snake venoms. <i>Journal of Ethnopharmacology</i> , 2005, 98, 213-216.	4.1	74
112	Antihemorrhagic, antinucleolytic and other antiophidian properties of the aqueous extract from <i>Pentaclethra macroloba</i> . <i>Journal of Ethnopharmacology</i> , 2005, 100, 145-152.	4.1	59
113	Effects of voltage-gated Na <sup>+</sup> channel toxins from <i>Tityus serrulatus</i> venom on rat arterial blood pressure and plasma catecholamines. <i>Comparative Biochemistry and Physiology Part - C: Toxicology and Pharmacology</i> , 2005, 141, 85-92.	2.6	43
114	Rosmarinic acid, a new snake venom phospholipase A2 inhibitor from <i>Cordia verbenacea</i> (Boraginaceae): antiserum action potentiation and molecular interaction. <i>Toxicon</i> , 2005, 46, 318-327.	1.6	150
115	Purification and Characterization of Jararassin-I, A Thrombin-like Enzyme from <i>Bothrops jararaca</i> Snake Venom. <i>Acta Biochimica Et Biophysica Sinica</i> , 2004, 36, 798-802.	2.0	21
116	Neo-clerodane diterpenoid, a new metalloprotease snake venom inhibitor from <i>Baccharis trimera</i> (Asteraceae): anti-proteolytic and anti-hemorrhagic properties. <i>Chemico-Biological Interactions</i> , 2004, 150, 243-251.	4.0	75
117	Anticrotalic and antitumoral activities of gel filtration fractions of aqueous extract from <i>Tabernaemontana catharinensis</i> (Apocynaceae). <i>Comparative Biochemistry and Physiology Part - C: Toxicology and Pharmacology</i> , 2004, 137, 19-27.	2.6	28
118	A new hemorrhagic metalloprotease from <i>Bothrops jararacussu</i> snake venom: isolation and biochemical characterization. <i>Toxicon</i> , 2004, 44, 215-223.	1.6	42
