| #  | Article  | IF               | CITATIONS |
|----|--|------------------|-----------|
| 1  | L'impact de la Covid-19 sur la santé des enfants, groupe«â€^protégéâ€^» de l'infection. Sante<br>Prépublication, 1-5.  | Publique,<br>0.1 | 2022,     |
| 2  | Association of neighbourhood disadvantage and individual socioeconomic position with all-cause mortality: a longitudinal multicohort analysis. Lancet Public Health, The, 2022, 7, e447-e457.                                | 10.0             | 13        |
| 3  | Studying the Case de SantÃ $^{\odot}$ de Toulouse (France) as a Propaedeutic Step. , 2022, , 705-716.  |                  | 3         |
| 4  | Tackling social inequalities in health: acceptability and feasibility of a systematic approach toward health impact assessment of urban projects. Global Health Promotion, 2021, , 175797592199546.                          | 1.3              | 0         |
| 5  | Comparison of smoking reduction with improvement of social conditions in early life: simulation in a<br>British cohort. International Journal of Epidemiology, 2021, 50, 797-808.  | 1.9              | 1         |
| 6  | Reducing socio-economic inequalities in all-cause mortality: a counterfactual mediation approach.<br>International Journal of Epidemiology, 2020, 49, 497-510.   | 1.9              | 29        |
| 7  | During the COVID-19 Quarantine, Home Has Been More Harmful Than the Virus for Children!. Pediatric<br>Emergency Care, 2020, 36, e538-e540.   | 0.9              | 14        |
| 8  | Special Report: The Biology of Inequalities in Health: The Lifepath Consortium. Frontiers in Public<br>Health, 2020, 8, 118.   | 2.7              | 44        |
| 9  | Maternal educational inequalities in measured body mass index trajectories in three European countries. Paediatric and Perinatal Epidemiology, 2019, 33, 226-237.  | 1.7              | 17        |
| 10 | Do the key functions of an intervention designed from the same specifications vary according to context? Investigating the transferability of a public health intervention in France. Implementation Science, 2019, 14, 35.  | 6.9              | 10        |
| 11 | ls the use of emergency departments socially patterned?. International Journal of Public Health, 2018, 63, 397-407.  | 2.3              | 7         |
| 12 | Diabetes mellitus and obesity in the French Caribbean: A special vulnerability for women?. Women and<br>Health, 2018, 58, 145-159.   | 1.0              | 17        |
| 13 | Integrating Multidisciplinary Results to Produce New Knowledge About the Physician–Patient<br>Relationship. Journal of Mixed Methods Research, 2017, 11, 174-201.  | 2.6              | 10        |
| 14 | Socioeconomic status and the 25â€^×â€^25 risk factors as determinants of premature mortality: a<br>multicohort study and meta-analysis of 1Â∙7 million men and women. Lancet, The, 2017, 389, 1229-1237.                     | 13.7             | 825       |
| 15 | Assessment of the ecological bias of seven aggregate social deprivation indices. BMC Public Health, 2017, 17, 86.  | 2.9              | 54        |
| 16 | The biology of inequalities in health: the LIFEPATH project. Longitudinal and Life Course Studies, 2017,<br>8, .   | 0.6              | 21        |
| 17 | Social heterogeneity of perceived health. , 2017, , 196-201.   |                  | 0         |
| 18 | Long-Term Effectiveness of a Lifestyle Intervention for the Primary Prevention of Type 2 Diabetes in a<br>Low Socio-Economic Community – An Intervention Follow-Up Study on Reunion Island. PLoS ONE, 2016,<br>11, e0146095. | 2.5              | 17        |

| #  | Article   | IF         | CITATIONS |
|----|---|------------|-----------|
| 19 | Biological marks of early-life socioeconomic experience is detected in the adult inflammatory transcriptome. Scientific Reports, 2016, 6, 38705.  | 3.3        | 41        |
| 20 | Enabling the transferability of complex interventions: exploring the combination of an intervention's key functions and implementation. International Journal of Public Health, 2016, 61, 1031-1038.                              | 2.3        | 25        |
| 21 | Mediating pathways between parental socio-economic position and allostatic load in mid-life: Findings from the 1958 British birth cohort. Social Science and Medicine, 2016, 165, 19-27.  | 3.8        | 40        |
| 22 | Perceptions of overweight in a Caribbean population: the role of health professionals. Family Practice, 2016, 33, 633-638.  | 1.9        | 5         |
| 23 | A life course approach to explore the biological embedding of socioeconomic position and social mobility through circulating inflammatory markers. Scientific Reports, 2016, 6, 25170.  | 3.3        | 47        |
| 24 | A health equity impact assessment umbrella program (AAPRISS) to tackle social inequalities in health:<br>program description. Global Health Promotion, 2016, 23, 54-62.   | 1.3        | 3         |
| 25 | Evaluation d'impact sur la santé et évaluation d'impact sur l'équité en santé : éventail<br>questions de recherche. Global Health Promotion, 2016, 23, 86-94.   | de pratiqu | ues et    |
| 26 | Construction de la santé et des inégalités sociales de santéâ€^: les gÃ <sup></sup> nes contre les déterminants<br>sociauxâ€^?. Sante Publique, 2016, Vol. 28, 169-179.   | 0.1        | 9         |
| 27 | Adverse childhood experiences and physiological wear-and-tear in midlife: Findings from the 1958<br>British birth cohort. Proceedings of the National Academy of Sciences of the United States of<br>America, 2015, 112, E738-46. | 7.1        | 155       |
| 28 | Estimating the Causal Effect of an Exposure on Change from Baseline Using Directed Acyclic Graphs and Path Analysis. Epidemiology, 2015, 26, 122-129.   | 2.7        | 15        |
| 29 | Déterminants sociaux, santé et politiques publiquesâ€^: mobiliser toutes les connaissances. Sante<br>Publique, 2015, Vol. 27, 619-621.  | 0.1        | 3         |
| 30 | Inégalités sociales de santé. , 2015, , 187-194.  |            | 3         |
| 31 | Do gender differences affect the doctor-patient interaction during consultations in general practice?<br>Results from the INTERMEDE study. Family Practice, 2014, 31, 706-713.  | 1.9        | 44        |
| 32 | Psychosocial and organizational work factors and incidence of arterial hypertension among female<br>healthcare workers. Journal of Hypertension, 2014, 32, 1229-1236.   | 0.5        | 9         |
| 33 | Mode of delivery at birth and the metabolic syndrome in midlife: the role of the birth environment in<br>a prospective birth cohort study. BMJ Open, 2014, 4, e005031.  | 1.9        | 15        |
| 34 | L'interdisciplinarité en actionÂ: les «Âmots-pièges» d'une recherche interdisciplinaire. Sante Publique,<br>2014, Vol. 26, 155-163.   | 0.1        | 7         |
| 35 | Adverse childhood experiences and premature all-cause mortality. European Journal of Epidemiology, 2013, 28, 721-734.   | 5.7        | 227       |
| 36 | Childhood adversity as a risk for cancer: findings from the 1958 British birth cohort study. BMC<br>Public Health, 2013, 13, 767.   | 2.9        | 109       |

| #  | Article  | IF  | CITATIONS |
|----|--|-----|-----------|
| 37 | The embodiment of adverse childhood experiences and cancer development: potential biological mechanisms and pathways across the life course. International Journal of Public Health, 2013, 58, 3-11.   | 2.3 | 85        |
| 38 | ls perceived social distance between the patient and the general practitioner related to their disagreement on patient's health status?. Patient Education and Counseling, 2013, 91, 97-104.   | 2.2 | 13        |
| 39 | The Organizational Work Factors' Effect on Mental Health Among Hospital Workers Is Mediated by<br>Perceived Effort–Reward Imbalance. Journal of Occupational and Environmental Medicine, 2013, 55,<br>809-816.   | 1.7 | 11        |
| 40 | Améliorer les conditions de travail à l'hôpitalâ€^: ORSOSA, de la démarche de recherche à l'action de<br>prévention. Sante Publique, 2013, Vol. 25, 389-397.   | 0.1 | 5         |
| 41 | Construction of an adaptable European transnational ecological deprivation index: the French version. Journal of Epidemiology and Community Health, 2012, 66, 982-989.   | 3.7 | 239       |
| 42 | What role does socio-economic position play in the link between functional limitations and self-rated health: France vs. USA?. European Journal of Public Health, 2012, 22, 317-321.   | 0.3 | 12        |
| 43 | Relationships between impact on employment, working conditions, socio-occupational categories and symptoms of post-traumatic stress disorder after the industrial disaster in Toulouse, France. Social Psychiatry and Psychiatric Epidemiology, 2012, 47, 1309-1319. | 3.1 | 11        |
| 44 | SRH and HrQOL: does social position impact differently on their link with health status?. BMC Public Health, 2012, 12, 19.   | 2.9 | 26        |
| 45 | Blood pressure and working conditions in hospital nurses and nursing assistants. The ORSOSA study.<br>Archives of Cardiovascular Diseases, 2011, 104, 97-103.  | 1.6 | 20        |
| 46 | About the Role of Socioeconomic Position on the Relation Between Objective Health Status and<br>Self-Rated Health: A Rapid Commentary on Dowd's Article. Annals of Epidemiology, 2011, 21, 387.  | 1.9 | 0         |
| 47 | Could clinical decision rules relying on cardiovascular risk models increase psychosocial inequalities in health? Results from the PRIME cohort study. Preventive Medicine, 2011, 52, 439-444.   | 3.4 | 3         |
| 48 | Do doctors and patients agree on cardiovascular-risk management recommendations<br>post-consultation? The INTERMEDE study. British Journal of General Practice, 2011, 61, e105-e111.   | 1.4 | 12        |
| 49 | Social Determinants of Cardiovascular Diseases. Public Health Reviews, 2011, 33, 601-622.  | 3.2 | 42        |
| 50 | Do general practitioners overestimate the health of their patients with lower education?. Social Science and Medicine, 2011, 73, 1416-1421.  | 3.8 | 17        |
| 51 | Validation of an instrument for measuring psychosocial and organisational work constraints<br>detrimental to health among hospital workers: The NWI-EO questionnaire. International Journal of<br>Nursing Studies, 2011, 48, 557-567.                                | 5.6 | 25        |
| 52 | Linking hospital workers' organisational work environment to depressive symptoms: A mediating<br>effect of effort–reward imbalance? The ORSOSA study. Social Science and Medicine, 2010, 71, 534-540.  | 3.8 | 41        |
| 53 | Controlling arterial hypertension in the French West Indies: a separate strategy for women?.<br>European Journal of Public Health, 2010, 20, 665-670.  | 0.3 | 17        |
| 54 | Improving Stroke Prevention in the French West Indies. Stroke, 2010, 41, 2637-2644.  | 2.0 | 11        |

| #  | Article  | IF  | CITATIONS |
|----|--|-----|-----------|
| 55 | Patient-physician interaction in general practice and health inequalities in a multidisciplinary study:<br>design, methods and feasibility in the French INTERMEDE study. BMC Health Services Research, 2009, 9,<br>66.                      | 2.2 | 13        |
| 56 | Poor blood pressure control in general practice: In search of explanations. Archives of Cardiovascular Diseases, 2009, 102, 477-483.   | 1.6 | 15        |
| 57 | Impact of Social Position on the Effect of Cardiovascular Risk Factors on Self-Rated Health. American<br>Journal of Public Health, 2009, 99, 1278-1284.  | 2.7 | 27        |
| 58 | Hearing status after an industrial explosion: experience of the AZF explosion, 21 September 2001,<br>France. International Archives of Occupational and Environmental Health, 2008, 81, 409-414.   | 2.3 | 4         |
| 59 | Reliability, Validity, and Health Issues Arising From Questionnaires Used to Measure Psychosocial and<br>Organizational Work Factors (POWFs) Among Hospital Nurses: A Critical Review. Journal of Nursing<br>Measurement, 2008, 16, 207-230. | 0.3 | 54        |
| 60 | The Public Health Dimension of Disasters—Health Outcome Assessment of Disasters. Prehospital and Disaster Medicine, 2008, 23, s55-s59.   | 1.3 | 16        |
| 61 | Residential environment and blood pressure in the PRIME Study: is the association mediated by body mass index and waist circumference?. Journal of Hypertension, 2008, 26, 1078-1084.  | 0.5 | 47        |
| 62 | Prevalence and therapeutic control of hypertension in French Caribbean regions. Journal of<br>Hypertension, 2005, 23, 1341-1346.   | 0.5 | 35        |
| 63 | Ignoring social factors in clinical decision rules: a contribution to health inequalities?. European<br>Journal of Public Health, 2005, 15, 441-441.   | 0.3 | 16        |
| 64 | Leishmania spp.: on the Interactions They Establish with Antigen-Presenting Cells of their Mammalian<br>Hosts. Advances in Parasitology, 2004, 58, 1-68.   | 3.2 | 55        |
| 65 | Socioeconomic Inequalities in Hypertension Prevalence and Care. Hypertension, 2002, 39, 1119-1125.   | 2.7 | 101       |
| 66 | Real-Time PCR for Detection and Quantitation of Leishmania in Mouse Tissues. Journal of Clinical<br>Microbiology, 2002, 40, 1666-1669.   | 3.9 | 172       |
| 67 | Prevalence and Therapeutic Control of Hypertension in 30 000 Subjects in the Workplace.<br>Hypertension, 2001, 38, 449-454.  | 2.7 | 81        |
| 68 | Macrophage subsets harbouring Leishmania donovani in spleens of infected BALB/c mice: localization and characterization. Cellular Microbiology, 2000, 2, 415-430.  | 2.1 | 25        |
| 69 | 14.ÂLes maladies cardio-vasculaires. , 2000, , 223-238.  |     | 3         |
| 70 | The biogenesis and properties of the parasitophorous vacuoles that harbour Leishmania in murine macrophages. Trends in Microbiology, 1998, 6, 392-401.   | 7.7 | 180       |
| 71 | Prevalence, Treatment, and Control of Hypertension in the French Population *1Data From a Survey on<br>High Blood Pressure in General Practice, 1994. American Journal of Hypertension, 1998, 11, 759-762.                                   | 2.0 | 99        |
| 72 | Using the hospital emergency department as a regular source of care. European Journal of<br>Epidemiology, 1997, 13, 223-228.   | 5.7 | 55        |

| #  | Article   | IF  | CITATIONS |
|----|---|-----|-----------|
| 73 | Premature Cardiovascular Mortality in France: Divergent Evolution between Social Categories from 1970 to 1990. International Journal of Epidemiology, 1995, 24, 331-339.  | 1.9 | 54        |
| 74 | Length of occupational noise exposure and blood pressure. International Archives of Occupational and Environmental Health, 1992, 63, 369-372.   | 2.3 | 55        |
| 75 | Relationship between alcohol consumption and hypertension prevalence and control in a French population. Journal of Chronic Diseases, 1987, 40, 713-720.  | 1.2 | 55        |
| 76 | INFLUENCE OF SOCIOPROFESSIONAL CONDITIONS ON BLOOD PRESSURE LEVELS AND HYPERTENSION<br>CONTROL: EPIDEMIOLOGIC STUDY OF 6,665 SUBJECTS IN THE PARIS DISTRICT. American Journal of<br>Epidemiology, 1984, 120, 72-86. | 3.4 | 62        |
