#	Article	IF	CITATIONS
1	Genistein Attenuates the Hypertensive Effects of Dietary NaCl in Hypertensive Male Rats. Endocrinology, 2007, 148, 5396-5402.	2.8	41
2	Perinatal taurine exposure affects adult arterial pressure control. Amino Acids, 2014, 46, 57-72.	2.7	40
3	Perinatal Taurine Depletion Increases Susceptibility to Adult Sugar-Induced Hypertension in Rats. Advances in Experimental Medicine and Biology, 2009, 643, 123-133.	1.6	32
4	Perinatal Taurine Alters Arterial Pressure Control and Renal Function in Adult Offspring. Advances in Experimental Medicine and Biology, 2009, 643, 145-156.	1.6	27
5	Perinatal Taurine Supplementation Prevents Metabolic and Cardiovascular Effects of Maternal Diabetes in Adult Rat Offspring. Advances in Experimental Medicine and Biology, 2017, 975 Pt 1, 295-305.	1.6	24
6	Excess dietary glucose alters renal function before increasing arterial pressure and inducing insulin resistance. American Journal of Hypertension, 2002, 15, 773-779.	2.0	23
7	High sugar intake via the renin-angiotensin system blunts the baroreceptor reflex in adult rats that were perinatally depleted of taurine. Journal of Biomedical Science, 2010, 17, S30.	7.0	21
8	Perinatal taurine exposure affects adult oxidative stress. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2013, 305, R95-R97.	1.8	21
9	Sex Dependent Effects of Perinatal Taurine Exposure on the Arterial Pressure Control in Adult Offspring. Advances in Experimental Medicine and Biology, 2009, 643, 135-144.	1.6	21
10	Contribution of the sympathetic nervous system to salt-sensitivity in lifetime captopril-treated spontaneously hypertensive rats. Journal of Hypertension, 1995, 13, 1037-1042.	0.5	16
11	High sugar intake exacerbates cardiac reperfusion injury in perinatal taurine depleted adult rats. Journal of Biomedical Science, 2010, 17, S22.	7.0	13
12	Taurine supplementation in spontaneously hypertensive rats: Advantages and limitations for human applications. World Journal of Cardiology, 2013, 5, 404.	1.5	13
13	Perinatal taurine exposure alters renal potassium excretion mechanisms in adult conscious rats. Journal of Biomedical Science, 2010, 17, S29.	7.0	10
14	Adult renal function is modified by perinatal taurine status in conscious male rats. Journal of Biomedical Science, 2010, 17, S31.	7.0	9
15	Abnormal autonomic nervous system function in rural Thai men: A potential contributor to their high risk of sudden unexplained nocturnal death syndrome. International Journal of Cardiology, 2017, 226, 87-92.	1.7	8
16	Perinatal Taurine Imbalance Alters the Interplay of Renin–Angiotensin System and Estrogen on Glucose–Insulin Regulation in Adult Female Rats. Advances in Experimental Medicine and Biology, 2013, 776, 67-80.	1.6	8
17	Contribution of the Sympathetic Nervous System to Hypertensive Response to Insulin Excess in Spontaneously Hypertensive Rats. Journal of Cardiovascular Pharmacology, 1996, 27, 539-544.	1.9	8
18	High Sugar Intake Blunts Arterial Baroreflex via Estrogen Receptors in Perinatal Taurine Supplemented Rats. Advances in Experimental Medicine and Biology, 2013, 775, 437-448.	1.6	7

#	Article	IF	CITATIONS
19	Taurine Supplementation Reduces Renal Nerve Activity in Male Rats in which Renal Nerve Activity was Increased by a High Sugar Diet. Advances in Experimental Medicine and Biology, 2017, 975 Pt 1, 27-37.	1.6	5
20	Blunted Nighttime Sympathetic Nervous System Response to Stress Among Thai Men with Positive Family History of Sudden Unexplained Nocturnal Death Syndrome. International Heart Journal, 2019, 60, 55-62.	1.0	5
21	Perinatal Taurine Exposure Programs Patterns of Autonomic Nerve Activity Responses to Tooth Pulp Stimulation in Adult Male Rats. Advances in Experimental Medicine and Biology, 2013, 775, 121-134.	1.6	5
22	Impaired renal response to portal infusion of hypertonic saline in adriamycinâ€ŧreated rats. Clinical and Experimental Pharmacology and Physiology, 2012, 39, 636-641.	1.9	4
23	The Effects of Taurine Exposure on the Brain and Neurological Disorders. , 2015, , 207-213.		4
24	Perinatal Taurine Imbalance Followed by High Sugar Intake Alters the Effects of Estrogen on Renal Excretory Function in Adult Female Rats. Advances in Experimental Medicine and Biology, 2017, 975 Pt 2, 769-787.	1.6	4
25	Inhibition of Renin-Angiotensin System from Conception to Young Mature Life Induces Salt-Sensitive Hypertension via Angiotensin II-Induced Sympathetic Overactivity in Adult Male Rats. Advances in Experimental Medicine and Biology, 2019, 1155, 45-59.	1.6	4
26	Taurine Supplementation Prevents the Adverse Effect of High Sugar Intake on Arterial Pressure Control After Cardiac Ischemia/Reperfusion in Female Rats. Advances in Experimental Medicine and Biology, 2015, 803, 597-611.	1.6	4
27	Renal Responses to Hypertonic Saline Infusion in Salt-Sensitive Spontaneously Hypertensive Rats. American Journal of the Medical Sciences, 1997, 314, 370-376.	1.1	4
28	Perinatal Taurine Exposure on Infants. , 2013, , 393-408.		3
29	Taurine Supplementation Ameliorates the Adverse Effects of Perinatal Taurine Depletion and High Sugar Intake on Cardiac Ischemia/Reperfusion Injury of Adult Female Rats. Advances in Experimental Medicine and Biology, 2017, 975 Pt 2, 741-755.	1.6	3
30	Perinatal Taurine Supplementation Alters Renal Function via Renin-Angiotensin System Overactivity in Adult Female Rats. Advances in Experimental Medicine and Biology, 2017, 975 Pt 2, 757-768.	1.6	2
31	The Effect of Perinatal Taurine on Adult Renal Function Does Not Appear to Be Mediated by Taurine's Inhibition of the Renin-Angiotensin System. Advances in Experimental Medicine and Biology, 2015, 803, 665-677.	1.6	2
32	Perinatal taurine supplementation influences renal hemodynamics and excretory function in adult, female rats. FASEB Journal, 2007, 21, A502.	0.5	2
33	Perinatal Taurine Supplementation Prevents the Adverse Effects of Maternal Dyslipidemia on Growth and Cardiovascular Control in Adult Rat Offspring. Advances in Experimental Medicine and Biology, 2019, 1155, 415-427.	1.6	2
34	Taurine Supplementation Inhibits Cardiac and Systemic Renin-Angiotensin System Overactivity After Cardiac Ischemia/Reperfusion in Adult Female Rats Perinatally Depleted of Taurine Followed by High Sugar Intake. Advances in Experimental Medicine and Biology, 2019, 1155, 101-112.	1.6	2
35	Renal Function in Spontaneously Hypertensive Rats with Insulin-Exacerbated Hypertension. Clinical and Experimental Hypertension, 1997, 19, 313-329.	1.3	1
36	Insulin-exacerbated hypertension in captopril-treated spontaneously hypertensive rats: role of sympathoexcitation. Canadian Journal of Physiology and Pharmacology, 2003, 81, 1036-1041.	1.4	1

#	Article	IF	CITATIONS
37	Perinatal taurine depletion increases oxidative stress in adult female rats. FASEB Journal, 2013, 27, 908.4.	0.5	1
38	Perinatal Taurine Exposure Alters Hematological and Chemical Properties of Blood in Adult Male Rats. Advances in Experimental Medicine and Biology, 2015, 803, 157-166.	1.6	1
39	Autonomic testing using postural challenge in hypertensive risked subjects. FASEB Journal, 2006, 20, A823.	0.5	0
40	Perinatal taurine depletion causes autonomic dysregulation in rats on a high glucose diet. FASEB Journal, 2007, 21, A887.	0.5	0
41	Perinatal taurine exposure alters renal potassium excretion in adult conscious rats. FASEB Journal, 2008, 22, 1158.7.	0.5	0
42	Perinatal taurine status influences the effect of high sugar on renal potassium excretion in adult conscious female rats. FASEB Journal, 2009, 23, 602.11.	0.5	0
43	High dietary sugar exacerbates cardiac reperfusion injury in perinatal taurine depleted adult rats. FASEB Journal, 2010, 24, 601.4.	0.5	0
44	Perinatal taurine imbalance induces insulin resistance via the reninâ€angiotensin system in adult female rats. FASEB Journal, 2012, 26, 1102.7.	0.5	0
45	Taurine supplementation initially accelerates saltâ€induced nighttime hypertension in spontaneously hypertensive rats. FASEB Journal, 2013, 27, 689.5.	0.5	0
46	Inhibition of reninâ€angiotensin system from conception to young mature life induces saltâ€sensitive increased blood pressure via angiotensin IIâ€induced sympathetic overactivity in adult male rats. FASEB Journal, 2018, 32, 714.4.	0.5	0
