#	ARTICLE	IF	CITATIONS
1	“Bouncing Back”™ From Subclinical Malaria: Inflammation and Erythrocytosis After Resolution of <i>P. falciparum</i> Infection in Gambian Children. <i>Frontiers in Immunology</i> , 2022, 13, 780525.	2.2	4
2	Dry season prevalence of <i>Plasmodium falciparum</i> in asymptomatic Gambian children, with a comparative evaluation of diagnostic methods. <i>Malaria Journal</i> , 2022, 21, .	0.8	4
3	Antibody-Dependent Natural Killer Cell Activation After Ebola Vaccination. <i>Journal of Infectious Diseases</i> , 2021, 223, 1171-1182.	1.9	22
4	Regulation of the human NK cell compartment by pathogens and vaccines. <i>Clinical and Translational Immunology</i> , 2021, 10, e1244.	1.7	13
5	Salivary DNA Loads for Human Herpesviruses 6 and 7 Are Correlated With Disease Phenotype in Myalgic Encephalomyelitis/Chronic Fatigue Syndrome. <i>Frontiers in Medicine</i> , 2021, 8, 656692.	1.2	21
6	Durable natural killer cell responses after heterologous two-dose Ebola vaccination. <i>Npj Vaccines</i> , 2021, 6, 19.	2.9	12
7	Differentiation and adaptation of natural killer cells for anti-malarial immunity. <i>Immunological Reviews</i> , 2020, 293, 25-37.	2.8	11
8	The impact of delayed treatment of uncomplicated <i>P. falciparum</i> malaria on progression to severe malaria: A systematic review and a pooled multicentre individual-patient meta-analysis. <i>PLoS Medicine</i> , 2020, 17, e1003359.	3.9	50
9	Age-Related Dynamics of Circulating Innate Lymphoid Cells in an African Population. <i>Frontiers in Immunology</i> , 2020, 11, 594107.	2.2	18
10	Does Malaria Cause Diarrhoea? A Systematic Review. <i>Frontiers in Medicine</i> , 2020, 7, 589379.	1.2	11
11	Natural Killer Cells Dampen the Pathogenic Features of Recall Responses to Influenza Infection. <i>Frontiers in Immunology</i> , 2020, 11, 135.	2.2	10
12	Differential IL-18 Dependence of Canonical and Adaptive NK Cells for Antibody Dependent Responses to <i>P. falciparum</i> . <i>Frontiers in Immunology</i> , 2020, 11, 533.	2.2	5
13	Ebola virus glycoprotein stimulates IL-18-dependent natural killer cell responses. <i>Journal of Clinical Investigation</i> , 2020, 130, 3936-3946.	3.9	12
14	Influenza Vaccination Primes Human Myeloid Cell Cytokine Secretion and NK Cell Function. <i>Journal of Immunology</i> , 2019, 203, 1609-1618.	0.4	19
15	Modelling pathogen load dynamics to elucidate mechanistic determinants of host- <i>Plasmodium falciparum</i> interactions. <i>Nature Microbiology</i> , 2019, 4, 1592-1602.	5.9	19
16	The temporal dynamics and infectiousness of subpatent <i>Plasmodium falciparum</i> infections in relation to parasite density. <i>Nature Communications</i> , 2019, 10, 1433.	5.8	121
17	Cellular Immune Function in Myalgic Encephalomyelitis/Chronic Fatigue Syndrome (ME/CFS). <i>Frontiers in Immunology</i> , 2019, 10, 796.	2.2	56
18	Malaria, anemia, and invasive bacterial disease: A neutrophil problem?. <i>Journal of Leukocyte Biology</i> , 2019, 105, 645-655.	1.5	33

#	ARTICLE	IF	CITATIONS
19	Parasite Immunology: Forty years on. <i>Parasite Immunology</i> , 2019, 41, e12607.	0.7	0
20	Vaccinating for natural killer cell effector functions. <i>Clinical and Translational Immunology</i> , 2018, 7, e1010.	1.7	29
21	IL-15 Promotes Polyfunctional NK Cell Responses to Influenza by Boosting IL-12 Production. <i>Journal of Immunology</i> , 2018, 200, 2738-2747.	0.4	28
22	CMV and natural killer cells: shaping the response to vaccination. <i>European Journal of Immunology</i> , 2018, 48, 50-65.	1.6	65
23	Human candidate gene polymorphisms and risk of severe malaria in children in Kilifi, Kenya: a case-control association study. <i>Lancet Haematology</i> , 2018, 5, e333-e345.	2.2	90
24	Relationship between Anaemia, Haemolysis, Inflammation and Haem Oxygenase-1 at Admission with Sepsis: a pilot study. <i>Scientific Reports</i> , 2018, 8, 11198.	1.6	26
25	Haemolysis and haem oxygenase-1 induction during persistent asymptomatic malaria infection in Burkina Faso children. <i>Malaria Journal</i> , 2018, 17, 253.	0.8	13
26	The ecology of immune state in a wild mammal, <i>Mus musculus domesticus</i> . <i>PLoS Biology</i> , 2018, 16, e2003538.	2.6	44
27	Novel genetic polymorphisms associated with severe malaria and under selective pressure in North-eastern Tanzania. <i>PLoS Genetics</i> , 2018, 14, e1007172.	1.5	55
28	Host Resistance to Plasmodium-Induced Acute Immune Pathology Is Regulated by Interleukin-10 Receptor Signaling. <i>Infection and Immunity</i> , 2017, 85, .	1.0	20
29	The comparative immunology of wild and laboratory mice, <i>Mus musculus domesticus</i> . <i>Nature Communications</i> , 2017, 8, 14811.	5.8	233
30	Resistance to malaria through structural variation of red blood cell invasion receptors. <i>Science</i> , 2017, 356, .	6.0	135
31	Enhancement of cytokine-driven NK cell IFN $\gamma$ production after vaccination of HCMV infected Africans. <i>European Journal of Immunology</i> , 2017, 47, 1040-1050.	1.6	28
32	Malaria Host Candidate Genes Validated by Association With Current, Recent, and Historical Measures of Transmission Intensity. <i>Journal of Infectious Diseases</i> , 2017, 216, 45-54.	1.9	13
33	Calorie Restriction Attenuates Terminal Differentiation of Immune Cells. <i>Frontiers in Immunology</i> , 2017, 7, 667.	2.2	24
34	NK Cells: Uncertain Allies against Malaria. <i>Frontiers in Immunology</i> , 2017, 8, 212.	2.2	64
35	IL-17 Production from T Helper 17, Mucosal-Associated Invariant T, and $\gamma\delta$ T Cells in Tuberculosis Infection and Disease. <i>Frontiers in Immunology</i> , 2017, 8, 1252.	2.2	72
36	The Immunology of Wild Rodents: Current Status and Future Prospects. <i>Frontiers in Immunology</i> , 2017, 8, 1481.	2.2	35

#	ARTICLE	IF	CITATIONS
37	Characterisation of the opposing effects of G6PD deficiency on cerebral malaria and severe malarial anaemia. <i>ELife</i> , 2017, 6, .	2.8	64
38	The UK ME/CFS Biobank for biomedical research on Myalgic Encephalomyelitis/Chronic Fatigue Syndrome (ME/CFS) and Multiple Sclerosis. <i>Open Journal of Bioresources</i> , 2017, 4, .	1.5	42
39	Synergy between Common $\gamma$ Chain Family Cytokines and IL-18 Potentiates Innate and Adaptive Pathways of NK Cell Activation. <i>Frontiers in Immunology</i> , 2016, 7, 101.	2.2	69
40	Sustained Immune Complex-Mediated Reduction in CD16 Expression after Vaccination Regulates NK Cell Function. <i>Frontiers in Immunology</i> , 2016, 7, 384.	2.2	67
41	“Asymptomatic” Malaria: A Chronic and Debilitating Infection That Should Be Treated. <i>PLoS Medicine</i> , 2016, 13, e1001942.	3.9	259
42	Influenza Vaccination Generates Cytokine-Induced Memory-like NK Cells: Impact of Human Cytomegalovirus Infection. <i>Journal of Immunology</i> , 2016, 197, 313-325.	0.4	76
43	B cell sub-types following acute malaria and associations with clinical immunity. <i>Malaria Journal</i> , 2016, 15, 139.	0.8	30
44	IL-18-induced expression of high-affinity IL-2R on murine NK cells is essential for NK cell IFN $\gamma$ production during murine <i>Plasmodium yoelii</i> infection. <i>European Journal of Immunology</i> , 2015, 45, 3431-3440.	1.6	40
45	Genetic determinants of anti-malarial acquired immunity in a large multi-centre study. <i>Malaria Journal</i> , 2015, 14, 333.	0.8	26
46	Serology describes a profile of declining malaria transmission in Farafenni, The Gambia. <i>Malaria Journal</i> , 2015, 14, 416.	0.8	49
47	<i>USP38, FREM3, SDC1, DDC, and LOC727982</i> Gene Polymorphisms and Differential Susceptibility to Severe Malaria in Tanzania. <i>Journal of Infectious Diseases</i> , 2015, 212, 1129-1139.	1.9	26
48	Gradual acquisition of immunity to severe malaria with increasing exposure. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2015, 282, 20142657.	1.2	91
49	African Glucose-6-Phosphate Dehydrogenase Alleles Associated with Protection from Severe Malaria in Heterozygous Females in Tanzania. <i>PLoS Genetics</i> , 2015, 11, e1004960.	1.5	58
50	Impaired NK Cell Responses to Pertussis and H1N1 Influenza Vaccine Antigens in Human Cytomegalovirus-Infected Individuals. <i>Journal of Immunology</i> , 2015, 194, 4657-4667.	0.4	56
51	Immunogenicity of the RTS,S/AS01 malaria vaccine and implications for duration of vaccine efficacy: secondary analysis of data from a phase 3 randomised controlled trial. <i>Lancet Infectious Diseases</i> , The, 2015, 15, 1450-1458.	4.6	262
52	The Gut Microbiota of Wild Mice. <i>PLoS ONE</i> , 2015, 10, e0134643.	1.1	103
53	Acquired Immunity to Intracellular Protozoa. , 2014, , 301-311.		2
54	From Immunology to Eco-Immunology: More than a New Name. , 2014, , 1-19.		12

#	ARTICLE	IF	CITATIONS
55	Searching for Achilles's™ heel: can rational design of malaria vaccines overcome antigenic diversity?. <i>Pathogens and Global Health</i> , 2014, 108, 63-64.	1.0	0
56	Parasite Immunology embraces 21st century publishing: moving to online-only publication. <i>Parasite Immunology</i> , 2014, 36, 1-2.	0.7	0
57	Differential activation of CD57-defined natural killer cell subsets during recall responses to vaccine antigens. <i>Immunology</i> , 2014, 142, 140-150.	2.0	54
58	There and back again: 35 years of <i>Parasite Immunology</i> . <i>Parasite Immunology</i> , 2014, 36, 113-114.	0.7	0
59	Dynamics of the Antibody Response to <i>Plasmodium falciparum</i> Infection in African Children. <i>Journal of Infectious Diseases</i> , 2014, 210, 1115-1122.	1.9	124
60	IL-27 Receptor Signaling Regulates Memory CD4 <sup>+</sup> T Cell Populations and Suppresses Rapid Inflammatory Responses during Secondary Malaria Infection. <i>Infection and Immunity</i> , 2014, 82, 10-20.	1.0	27
61	Reappraisal of known malaria resistance loci in a large multicenter study. <i>Nature Genetics</i> , 2014, 46, 1197-1204.	9.4	206
62	Rapid NK cell differentiation in a population with near-universal human cytomegalovirus infection is attenuated by NKG2C deletions. <i>Blood</i> , 2014, 124, 2213-2222.	0.6	107
63	Serologically Defined Variations in Malaria Endemicity in Pará State, Brazil. <i>PLoS ONE</i> , 2014, 9, e113357.	1.1	30
64	Influence of infection on malaria-specific antibody dynamics in a cohort exposed to intense malaria transmission in northern Uganda. <i>Parasite Immunology</i> , 2013, 35, 164-173.	0.7	40
65	Comparison of parasite sequestration in uncomplicated and severe childhood <i>Plasmodium falciparum</i> malaria. <i>Journal of Infection</i> , 2013, 67, 220-230.	1.7	44
66	Infection and immunity from a lifecourse perspective: Life Study Enhancement. <i>Lancet</i> , The, 2013, 382, S35.	6.3	2
67	Piecing Together the Puzzle of Severe Malaria. <i>Science Translational Medicine</i> , 2013, 5, 211ps18.	5.8	49
68	Stuck in a rut? Reconsidering the role of parasite sequestration in severe malaria syndromes. <i>Trends in Parasitology</i> , 2013, 29, 585-592.	1.5	55
69	Immune mechanisms in malaria: new insights in vaccine development. <i>Nature Medicine</i> , 2013, 19, 168-178.	15.2	176
70	Microvascular Dysfunction in Severe <i>Plasmodium falciparum</i> Malaria. <i>Journal of Infectious Diseases</i> , 2013, 207, 369-370.	1.9	13
71	Co-evolution of Human Leukocyte Antigen (HLA) Class I Ligands with Killer-Cell Immunoglobulin-Like Receptors (KIR) in a Genetically Diverse Population of Sub-Saharan Africans. <i>PLoS Genetics</i> , 2013, 9, e1003938.	1.5	113
72	IL-27 Receptor Signalling Restricts the Formation of Pathogenic, Terminally Differentiated Th1 Cells during Malaria Infection by Repressing IL-12 Dependent Signals. <i>PLoS Pathogens</i> , 2013, 9, e1003293.	2.1	53

#	ARTICLE	IF	CITATIONS
73	IL-27 Receptor Signaling Regulates CD4+ T Cell Chemotactic Responses during Infection. <i>Journal of Immunology</i> , 2013, 190, 4553-4561.	0.4	26
74	Functional Significance of CD57 Expression on Human NK Cells and Relevance to Disease. <i>Frontiers in Immunology</i> , 2013, 4, 422.	2.2	214
75	The Relationship between RTS,S Vaccine-Induced Antibodies, CD4+ T Cell Responses and Protection against <i>Plasmodium falciparum</i> Infection. <i>PLoS ONE</i> , 2013, 8, e61395.	1.1	163
76	WSX-1 Signalling Inhibits CD4+ T Cell Migration to the Liver during Malaria Infection by Repressing Chemokine-Independent Pathways. <i>PLoS ONE</i> , 2013, 8, e78486.	1.1	4
77	The CTLA-4 and PD-1/PD-L1 Inhibitory Pathways Independently Regulate Host Resistance to <i>Plasmodium</i> -induced Acute Immune Pathology. <i>PLoS Pathogens</i> , 2012, 8, e1002504.	2.1	110
78	Prolonged Neutrophil Dysfunction after <i>Plasmodium falciparum</i> Malaria Is Related to Hemolysis and Heme Oxygenase-1 Induction. <i>Journal of Immunology</i> , 2012, 189, 5336-5346.	0.4	106
79	Malaria impairs resistance to <i>Salmonella</i> through heme- and heme oxygenase-dependent dysfunctional granulocyte mobilization. <i>Nature Medicine</i> , 2012, 18, 120-127.	15.2	197
80	IFN- $\gamma$ -Producing CD4+ T Cells Promote Experimental Cerebral Malaria by Modulating CD8+ T Cell Accumulation within the Brain. <i>Journal of Immunology</i> , 2012, 189, 968-979.	0.4	166
81	Antigen-Specific IL-2 Secretion Correlates with NK Cell Responses after Immunization of Tanzanian Children with the RTS,S/AS01 Malaria Vaccine. <i>Journal of Immunology</i> , 2012, 188, 5054-5062.	0.4	77
82	Activation of Human NK Cells by <i>Plasmodium</i> -Infected Red Blood Cells. <i>Methods in Molecular Biology</i> , 2012, 923, 447-464.	0.4	3
83	Developmental allometry and paediatric malaria. <i>Malaria Journal</i> , 2012, 11, 64.	0.8	12
84	Candidate Human Genetic Polymorphisms and Severe Malaria in a Tanzanian Population. <i>PLoS ONE</i> , 2012, 7, e47463.	1.1	39
85	Long-Lived Memory B-Cell Responses following BCG Vaccination. <i>PLoS ONE</i> , 2012, 7, e51381.	1.1	44
86	Freeze-thaw lysates of <i>Plasmodium falciparum</i> -infected red blood cells induce differentiation of functionally competent regulatory T cells from memory T cells. <i>European Journal of Immunology</i> , 2012, 42, 1767-1777.	1.6	9
87	Endogenous galectin-3 controls experimental malaria in a species-specific manner. <i>Parasite Immunology</i> , 2012, 34, 383-387.	0.7	16
88	Efficacy of RTS,S/AS01E malaria vaccine and exploratory analysis on anti-circumsporozoite antibody titres and protection in children aged 5-17 months in Kenya and Tanzania: a randomised controlled trial. <i>Lancet Infectious Diseases</i> , The, 2011, 11, 102-109.	4.6	152
89	Malaria Vaccines: Current Status and Future Prospects. <i>Journal of Pharmacy and Pharmacology</i> , 2011, 49, 21-27.	1.2	3
90	Systemic effector and regulatory immune responses to chlamydial antigens in trachomatous trichiasis. <i>Frontiers in Microbiology</i> , 2011, 2, 10.	1.5	18

#	ARTICLE	IF	CITATIONS
91	Serological Markers Suggest Heterogeneity of Effectiveness of Malaria Control Interventions on Bioko Island, Equatorial Guinea. PLoS ONE, 2011, 6, e25137.	1.1	103
92	The Breadth, but Not the Magnitude, of Circulating Memory B Cell Responses to <i>P. falciparum</i> Increases with Age/Exposure in an Area of Low Transmission. PLoS ONE, 2011, 6, e25582.	1.1	72
93	Measures of immune function of wild mice, <i>Mus musculus</i> . Molecular Ecology, 2011, 20, 881-892.	2.0	91
94	Wild mice provide insights into natural killer cell maturation and memory. Molecular Ecology, 2011, 20, 4827-4829.	2.0	1
95	The relevance of non-human primate and rodent malaria models for humans. Malaria Journal, 2011, 10, 23.	0.8	109
