#	Article	IF	CITATIONS
1	Where is the UK's pollinator biodiversity? The importance of urban areas for flower-visiting insects. Proceedings of the Royal Society B: Biological Sciences, 2015, 282, 20142849.	2.6	393
2	The city as a refuge for insect pollinators. Conservation Biology, 2017, 31, 24-29.	4.7	368
3	A systems approach reveals urban pollinator hotspots and conservation opportunities. Nature Ecology and Evolution, 2019, 3, 363-373.	7.8	293
4	Food for Pollinators: Quantifying the Nectar and Pollen Resources of Urban Flower Meadows. PLoS ONE, 2016, 11, e0158117.	2.5	233
5	The potential for indirect effects between coâ€flowering plants via shared pollinators depends on resource abundance, accessibility and relatedness. Ecology Letters, 2014, 17, 1389-1399.	6.4	172
6	Landscape impacts on pollinator communities in temperate systems: evidence and knowledge gaps. Functional Ecology, 2017, 31, 26-37.	3.6	141
7	Constructing more informative plant–pollinator networks: visitation and pollen deposition networks in a heathland plant community. Proceedings of the Royal Society B: Biological Sciences, 2015, 282, 20151130.	2.6	127
8	Opportunities and threats for pollinator conservation in global towns and cities. Current Opinion in Insect Science, 2020, 38, 63-71.	4.4	119
9	Protecting an Ecosystem Service. Advances in Ecological Research, 2016, 54, 135-206.	2.7	115
10	A horizon scan of future threats and opportunities for pollinators and pollination. PeerJ, 2016, 4, e2249.	2.0	115
11	Pollinator importance networks illustrate the crucial value of bees in a highly speciose plant community. Scientific Reports, 2017, 7, 8389.	3.3	78
12	Pollinator size and its consequences: Robust estimates of body size in pollinating insects. Ecology and Evolution, 2019, 9, 1702-1714.	1.9	69
13	Long-term effects of hedgerow management policies on resource provision for wildlife. Biological Conservation, 2012, 145, 24-29.	4.1	59
14	Daily temporal structure in African savanna flower visitation networks and consequences for network sampling. Ecology, 2011, 92, 687-698.	3.2	51
15	Quantifying nectar production by flowering plants in urban and rural landscapes. Journal of Ecology, 2021, 109, 1747-1757.	4.0	44
16	Changes in hedgerow floral diversity over 70years in an English rural landscape, and the impacts of management. Biological Conservation, 2013, 167, 97-105.	4.1	39
17	Reliably predicting pollinator abundance: Challenges of calibrating processâ€based ecological models. Methods in Ecology and Evolution, 2020, 11, 1673-1689.	5.2	22
18	Molecular taxonomic analysis of the plant associations of adult pollen beetles (Nitidulidae:) Tj ETQq0 0 0 rgBT /C)verlock 10 2.0	0 Tf 50 67 Td 16

2

1101-1116.

#	Article	IF	CITATIONS
19	Does agri-environment scheme participation in England increase pollinator populations and crop pollination services?. Agriculture, Ecosystems and Environment, 2022, 325, 107755.	5.3	14
20	Turnover in floral composition explains species diversity and temporal stability in the nectar supply of urban residential gardens. Journal of Applied Ecology, 2022, 59, 801-811.	4.0	14
21	Assessment of the response of pollinator abundance to environmental pressures using structured expert elicitation. Journal of Apicultural Research, 2018, 57, 593-604.	1.5	11
22	Large herbivores transform plant-pollinator networks in an African savanna. Current Biology, 2021, 31, 2964-2971.e5.	3.9	10
23	Field boundary features can stabilise bee populations and the pollination of massâ€flowering crops in rotational systems. Journal of Applied Ecology, 2021, 58, 2287-2304.	4.0	10
24	TWO NEW SPECIES OF MUSCIDAE (DIPTERA) FROM KENYA, ASSOCIATED WITH FLOWERS OF ACACIA SPECIES (FABACEAE MIMOSOIDEAE) AND BALANITES SPECIES (BALANITACEAE). Journal of the East Africa Natural History Society and National Museum, 2007, 96, 83-93.	1.0	2
25	Differences in pollination syndromes and the frequency of autonomous delayed selfing between co-flowering <i>Hibiscus aponeurus</i> (Sprague and Hutch) and <i>H. flavifolius</i> (Ulbr) from Kenya. Journal of Pollination Ecology, 0, 22, 21-34.	0.5	1
