#	ARTICLE	IF	CITATIONS
1	Glacial landscape configuration influences channel response to flooding. <i>Earth Surface Processes and Landforms</i> , 2022, 47, 209-227.	2.5	2
2	Experimental insights into the effect of event sequencing and sediment input texture on step-pool channel evolution. <i>Earth Surface Processes and Landforms</i> , 2022, 47, 569-581.	2.5	1
3	The Influence of Riparian Vegetation on the Sinuosity and Lateral Stability of Meandering Channels. <i>Geophysical Research Letters</i> , 2022, 49, .	4.0	9
4	Geomorphic Controls on Sediment Mobility and Channel Stability of a Riffle-Pool Gravel Bed Channel. <i>Lecture Notes in Civil Engineering</i> , 2022, , 3-26.	0.4	3
5	Convolutional neural networks for image-based sediment detection applied to a large terrestrial and airborne dataset. <i>Earth Surface Dynamics</i> , 2022, 10, 349-366.	2.4	9
6	Reach-scale morphodynamics: Insights from 20 years of observations and model simulations. <i>Geomorphology</i> , 2022, 413, 108375.	2.6	2
7	Poyang and Dongting Lakes, Yangtze River: tributary lakes blocked by main-stem aggradation. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2022, 119, .	7.1	5
8	Grain Size-Specific Engelund-Hansen Type Relation for Bed Material Load in Sand-Bed Rivers, With Application to the Mississippi River. <i>Water Resources Research</i> , 2021, 57, e2020WR027517.	4.2	7
9	Pool-Riffle Adjustment Due to Changes in Flow and Sediment Supply. <i>Water Resources Research</i> , 2021, 57, e2020WR028048.	4.2	15
10	Effect of stress history on sediment transport and channel adjustment in graded gravel-bed rivers. <i>Earth Surface Dynamics</i> , 2021, 9, 333-350.	2.4	9
11	Bio-climate affects hillslope and fluvial sediment grain size along the Chilean Coastal Cordillera. <i>Geomorphology</i> , 2021, 384, 107700.	2.6	5
12	On How Episodic Sediment Supply Influences the Evolution of Channel Morphology, Bedload Transport and Channel Stability in an Experimental Step-Pool Channel. <i>Water Resources Research</i> , 2021, 57, e2020WR029133.	4.2	9
13	Intraseasonal-to-Interannual Analysis of Discharge and Suspended Sediment Concentration Time-Series of the Upper Changjiang (Yangtze River). <i>Water Resources Research</i> , 2021, 57, e2020WR029457.	4.2	18
14	Quantifying sediment connectivity: Moving toward a holistic assessment through a mixed methods approach. <i>Earth Surface Processes and Landforms</i> , 2021, 46, 2501-2519.	2.5	13
15	Linkages between bedload displacements and topographic change. <i>Earth Surface Processes and Landforms</i> , 2021, 46, 3127-3142.	2.5	7
16	Spatiotemporal Patterns of Fractional Suspended Sediment Dynamics in Small Watersheds. <i>Water Resources Research</i> , 2021, 57, e2021WR030851.	4.2	6
17	Cycles of aggradation and degradation in gravel-bed rivers mediated by sediment storage and morphologic evolution. <i>Geomorphology</i> , 2021, 395, 108001.	2.6	1
18	Does variable channel morphology lead to dynamic salmon habitat?. <i>Earth Surface Processes and Landforms</i> , 2020, 45, 295-311.	2.5	8

#	ARTICLE	IF	CITATIONS
19	Experiment on morphological and hydraulic adjustments of step-pool unit to flow increase. <i>Earth Surface Processes and Landforms</i> , 2020, 45, 280-294.	2.5	19
20	Co-evolution of coarse grain structuring and bed roughness in response to episodic sediment supply in an experimental aggrading channel. <i>Earth Surface Processes and Landforms</i> , 2020, 45, 948-961.	2.5	19
21	A decadal-scale numerical model for wandering, cobble-bedded rivers subject to disturbance. <i>Earth Surface Processes and Landforms</i> , 2020, 45, 912-927.	2.5	7
22	Response of In-stream Wood to Riparian Timber Harvesting: Field Observations and Long-Term Projections. <i>Water Resources Research</i> , 2020, 56, e2020WR027077.	4.2	11
23	Rough Correlations: Meta-Analysis of Roughness Measures in Gravel Bed Rivers. <i>Water Resources Research</i> , 2020, 56, e2020WR027079.	4.2	13
24	Back to Einstein: Burial-Induced Three-Range Diffusion in Fluvial Sediment Transport. <i>Geophysical Research Letters</i> , 2020, 47, e2020GL087440.	4.0	13
25	Experimental Insights Into the Threshold of Motion in Alluvial Channels: Sediment Supply and Streambed State. <i>Journal of Geophysical Research F: Earth Surface</i> , 2020, 125, e2020JF005736.	2.8	18
26	Joint Stochastic Bedload Transport and Bed Elevation Model: Variance Regulation and Power Law Rests. <i>Journal of Geophysical Research F: Earth Surface</i> , 2020, 125, e2019JF005259.	2.8	11
27	The influence of channel morphology on bedload path lengths: Insights from a survival process model. <i>Earth Surface Processes and Landforms</i> , 2020, 45, 2982-2997.	2.5	10
28	Morphometrics of China's Loess Plateau: The spatial legacy of tectonics, climate, and loess deposition history. <i>Geomorphology</i> , 2020, 354, 107043.	2.6	16
29	Width variations control the development of grain structuring in steep step-pool dominated streams: insight from flume experiments. <i>Earth Surface Processes and Landforms</i> , 2020, 45, 1430-1440.	2.5	19
30	Experimental study of sediment supply control on step formation, evolution, and stability. <i>Earth Surface Dynamics</i> , 2020, 8, 855-868.	2.4	10
31	Characterization of morphological units in a small, forested stream using close-range remotely piloted aircraft imagery. <i>Earth Surface Dynamics</i> , 2020, 8, 913-929.	2.4	8
32	Step-Pool Channel Features. , 2020, , .		3
33	Einstein conjecture and resting-time statistics in the bed-load transport of monodispersed particles. <i>Journal of Fluid Mechanics</i> , 2019, 876, 1077-1089.	3.4	7
34	What controls the disequilibrium state of gravel-bed rivers?. <i>Earth Surface Processes and Landforms</i> , 2019, 44, 3020-3041.	2.5	10
35	Spatial and temporal patterns of sediment storage over 45 years in Carnation Creek, BC, a previously glaciated mountain catchment. <i>Earth Surface Processes and Landforms</i> , 2019, 44, 1584-1601.	2.5	15
36	Locating suitable sites for the construction of underground dams using the subsurface flow simulation (SWAT model) and analytical network process (ANP) (case study: Daroongar watershed,) Tj ETQq0 0 0 rgt /Overlock 10 Tf 5		

#	ARTICLE	IF	CITATIONS
37	Modelling the effects of climatic and hydrological regime changes on the sediment dynamics of the Fraser River Basin, British Columbia, Canada. <i>Hydrological Processes</i> , 2019, 33, 244-260.	2.6	2
38	Variable hillslope-channel coupling and channel characteristics of forested mountain streams in glaciated landscapes. <i>Earth Surface Processes and Landforms</i> , 2019, 44, 736-751.	2.5	21
39	Spatial linkages between geomorphic and hydraulic conditions and invertebrate drift characteristics in a small mountain stream. <i>Canadian Journal of Fisheries and Aquatic Sciences</i> , 2018, 75, 1823-1835.	1.4	6
40	Experimental study on the stability and failure of individual step-pool. <i>Geomorphology</i> , 2018, 311, 51-62.	2.6	39
41	Fluvial response to changes in the magnitude and frequency of sediment supply in a 1-D model. <i>Earth Surface Dynamics</i> , 2018, 6, 1041-1057.	2.4	14
42	Morphodynamics of a Width-Variable Gravel Bed Stream: New Insights on Pool-Riffle Formation From Physical Experiments. <i>Journal of Geophysical Research F: Earth Surface</i> , 2018, 123, 2735-2766.	2.8	59
43	Development and Application of a Large-Scale, Physically Based, Distributed Suspended Sediment Transport Model on the Fraser River Basin, British Columbia, Canada. <i>Journal of Geophysical Research F: Earth Surface</i> , 2018, 123, 2481-2508.	2.8	8
44	Abrupt drainage basin reorganization following a Pleistocene river capture. <i>Nature Communications</i> , 2018, 9, 3756.	12.8	45
45	The Effect of Episodic Sediment Supply on Bedload Variability and Sediment Mobility. <i>Water Resources Research</i> , 2018, 54, 6319-6335.	4.2	18
46	Probabilistic Prediction and Forecast of Daily Suspended Sediment Concentration on the Upper Yangtze River. <i>Journal of Geophysical Research F: Earth Surface</i> , 2018, 123, 1982-2003.	2.8	9
47	The Origin of Fine Sediment Determines the Observations of Suspended Sediment Fluxes Under Unsteady Flow Conditions. <i>Water Resources Research</i> , 2018, 54, 5654-5669.	4.2	52
48	Experiment on temporal variation of bed load transport in response to changes in sediment supply in streams. <i>Water Resources Research</i> , 2017, 53, 763-778.	4.2	23
49	The Impact of Urbanization on Temporal Changes in Sediment Transport in a Gravel Bed Channel in Southern Ontario, Canada. <i>Water Resources Research</i> , 2017, 53, 8443-8458.	4.2	39
50	What are the contemporary sources of sediment in the Mississippi River?. <i>Geophysical Research Letters</i> , 2017, 44, 8919-8924.	4.0	19
51	Calculating the Explicit Probability of Entrainment Based on Inertial Acceleration Measurements. <i>Journal of Hydraulic Engineering</i> , 2017, 143, 04016097.	1.5	17
52	A reduced-complexity model for sediment transport and step-pool morphology. <i>Earth Surface Dynamics</i> , 2016, 4, 549-566.	2.4	33
53	On how spatial variations of channel width influence river profile curvature. <i>Geophysical Research Letters</i> , 2016, 43, 6313-6323.	4.0	42
54	Reach-scale contributions of road-surface sediment to the Honna River, Haida Gwaii, BC. <i>Hydrological Processes</i> , 2016, 30, 3450-3465.	2.6	30

#	ARTICLE	IF	CITATIONS
55	Sampling variability in estimates of flow characteristics in coarse-bed channels: Effects of sample size. <i>Water Resources Research</i> , 2016, 52, 1899-1922.	4.2	7
56	Simulated wood budgets in two mountain streams. <i>Geomorphology</i> , 2016, 259, 119-133.	2.6	29
57	The role of channel morphology on the mobility and dispersion of bed sediment in a small gravel-bed stream. <i>Earth Surface Processes and Landforms</i> , 2016, 41, 2191-2206.	2.5	67
58	Drag Forces on Large Cylinders. <i>River Research and Applications</i> , 2016, 32, 411-417.	1.7	5
59	The relative stability of salmon redds and unspawned streambeds. <i>Water Resources Research</i> , 2015, 51, 6074-6092.	4.2	22
60	Does small-bodied salmon spawning activity enhance streambed mobility?. <i>Water Resources Research</i> , 2015, 51, 7467-7484.	4.2	15
61	Pool-riffle sedimentation and surface texture trends in a gravel bed stream. <i>Water Resources Research</i> , 2015, 51, 8704-8728.	4.2	13
62	Channel adjustments to a succession of water pulses in gravel bed rivers. <i>Water Resources Research</i> , 2015, 51, 8773-8790.	4.2	14
63	Temporal variability and memory in sediment transport in an experimental step-pool channel. <i>Water Resources Research</i> , 2015, 51, 9325-9337.	4.2	53
64	Using LiDAR to characterize logjams in lowland rivers. <i>Geomorphology</i> , 2015, 246, 531-541.	2.6	20
65	The effects of discharge and slope on hyporheic flow in step-pool morphologies. <i>Hydrological Processes</i> , 2015, 29, 419-433.	2.6	32
66	Principles of Bedload Transport of Non-cohesive Sediment in Open-Channels. <i>GeoPlanet: Earth and Planetary Sciences</i> , 2015, , 323-372.	0.2	4
67	Effects of glacial retreat on proglacial streams and riparian zones in the Coast and North Cascade Mountains. <i>Earth Surface Processes and Landforms</i> , 2014, 39, 351-365.	2.5	12
68	Modeling temporal trends in bedload transport in gravel-bed streams using hierarchical mixed-effects models. <i>Geomorphology</i> , 2014, 219, 260-269.	2.6	5
69	Influence of the sediment supply texture on morphological adjustments in gravel-bed rivers. <i>Water Resources Research</i> , 2014, 50, 8868-8890.	4.2	25
70	Sensitivity of stoichiometric ratios in the Mississippi River to hydrologic variability. <i>Journal of Geophysical Research G: Biogeosciences</i> , 2014, 119, 1049-1062.	3.0	13
71	Effective discharge in small formerly glaciated mountain streams of British Columbia: Limitations and implications. <i>Water Resources Research</i> , 2014, 50, 4440-4458.	4.2	54
72	Modelling changes in suspended sediment from forest road surfaces in a coastal watershed of British Columbia. <i>Hydrological Processes</i> , 2014, 28, 4914-4927.	2.6	6

#	ARTICLE	IF	CITATIONS
73	Wood dynamics in upland streams under different disturbance regimes. <i>Earth Surface Processes and Landforms</i> , 2013, 38, 1197-1209.	2.5	31
74	Linking spatial patterns of bed surface texture, bed mobility, and channel hydraulics in a mountain stream to potential spawning substrate for small resident trout. <i>Geomorphology</i> , 2013, 197, 96-107.	2.6	33
75	Sediment residence time distributions: Theory and application from bed elevation measurements. <i>Journal of Geophysical Research F: Earth Surface</i> , 2013, 118, 2557-2567.	2.8	37
76	Scale-dependent interactions between wood and channel dynamics: Modeling jam formation and sediment storage in gravel-bed streams. <i>Journal of Geophysical Research F: Earth Surface</i> , 2013, 118, 2500-2508.	2.8	10
77	Displacement characteristics of coarse fluvial bed sediment. <i>Journal of Geophysical Research F: Earth Surface</i> , 2013, 118, 155-165.	2.8	82
78	Modeling wood dynamics, jam formation, and sediment storage in a gravel-bed stream. <i>Journal of Geophysical Research</i> , 2012, 117, .	3.3	28
79	A conceptual model for the blooming behavior and persistence of the benthic mat-forming diatom <i>Didymosphenia geminata</i> in oligotrophic streams. <i>Journal of Geophysical Research</i> , 2012, 117, .	3.3	40
80	A network model for prediction and diagnosis of sediment dynamics at the watershed scale. <i>Journal of Geophysical Research</i> , 2012, 117, .	3.3	42
81	Estimating suspended sediment concentrations in areas with limited hydrological data using a mixed-effects model. <i>Hydrological Processes</i> , 2012, 26, 3678-3688.	2.6	17
82	Spatial organization of process domains in headwater drainage basins of a glaciated foothills region with complex longitudinal profiles. <i>Water Resources Research</i> , 2011, 47, .	4.2	12
83	A lake sediment-based proxy of floods in the Rocky Mountain Front Ranges, Canada. <i>Journal of Paleolimnology</i> , 2011, 45, 137-149.	1.6	26
84	Suspended sediment balance for the mainstem of Changjiang (Yangtze River) in the period 1964-1985. <i>Hydrological Processes</i> , 2011, 25, 2339-2353.	2.6	12
85	Patterns, puzzles and people: implementing hydrologic synthesis. <i>Hydrological Processes</i> , 2011, 25, 3256-3266.	2.6	22
86	Palestinian Water I: Resources, Allocation and Perception. <i>Geography Compass</i> , 2010, 4, 118-138.	2.7	4
87	Palestinian Water II: Climate Change and Land Use. <i>Geography Compass</i> , 2010, 4, 139-157.	2.7	4
88	Step-pool stability: Testing the jammed state hypothesis. <i>Journal of Geophysical Research</i> , 2010, 115, .	3.3	115
89	Spatial and temporal variation of in-reach suspended sediment dynamics along the mainstem of Changjiang (Yangtze River), China. <i>Water Resources Research</i> , 2010, 46, .	4.2	32
90	Promise, performance and current limitations of a magnetic Bedload Movement Detector. <i>Earth Surface Processes and Landforms</i> , 2009, 34, 1022-1032.	2.5	9

#	ARTICLE	IF	CITATIONS
91	Bar structure in an arid ephemeral stream. <i>Sedimentary Geology</i> , 2009, 221, 57-70.	2.1	14
92	Video-based gravel transport measurements with a flume mounted light table. <i>Earth Surface Processes and Landforms</i> , 2008, 33, 2285-2296.	2.5	36
93	Salmon-driven bed load transport and bed morphology in mountain streams. <i>Geophysical Research Letters</i> , 2008, 35, .	4.0	88
94	Identification of steps and pools from stream longitudinal profile data. <i>Geomorphology</i> , 2008, 102, 395-406.	2.6	70
95	Spatial and temporal variation of sediment yield in the landscape: Example of Huanghe (Yellow River). <i>Geophysical Research Letters</i> , 2008, 35, .	4.0	45
96	Fine particles in small steepland streams: physical, ecological, and human connections. <i>WIT Transactions on State-of-the-art in Science and Engineering</i> , 2008, , 125-181.	0.0	1
97	18 Sediment storage and transport in coarse bed streams: scale considerations. <i>Developments in Earth Surface Processes</i> , 2007, 11, 473-496.	2.8	19
98	Glacially induced organization of channel-reach morphology in mountain streams. <i>Journal of Geophysical Research</i> , 2007, 112, .	3.3	50
99	Glacial erosion, evolution of river long profiles, and the organization of process domains in mountain drainage basins of coastal British Columbia. <i>Journal of Geophysical Research</i> , 2006, 111, .	3.3	100
100	Experiments on the effect of hydrograph characteristics on vertical grain sorting in gravel bed rivers. <i>Water Resources Research</i> , 2006, 42, .	4.2	147
101	Characteristics of Gravel Bars in Ephemeral Streams. <i>Journal of Sedimentary Research</i> , 2005, 75, 29-42.	1.6	56
102	Use of Tracers in Fluvial Geomorphology. , 2005, , 397-423.		41
103	GEOMORPHOLOGY OF STEEPLAND HEADWATERS: THE TRANSITION FROM HILLSLOPES TO CHANNELS. <i>Journal of the American Water Resources Association</i> , 2005, 41, 835-851.	2.4	127
104	SEDIMENT TRANSPORT AND CHANNEL MORPHOLOGY OF SMALL, FORESTED STREAMS. <i>Journal of the American Water Resources Association</i> , 2005, 41, 853-876.	2.4	131
105	SUSPENDED SEDIMENT DYNAMICS IN SMALL FOREST STREAMS OF THE PACIFIC NORTHWEST. <i>Journal of the American Water Resources Association</i> , 2005, 41, 877-898.	2.4	99
106	SPATIAL AND TEMPORAL DYNAMICS OF WOOD IN HEADWATER STREAMS OF THE PACIFIC NORTHWEST. <i>Journal of the American Water Resources Association</i> , 2005, 41, 899-919.	2.4	85
107	REPLY TO DISCUSSION by John M. Faustini.. <i>Journal of the American Water Resources Association</i> , 2005, 41, 1241-1242.	2.4	2
108	Recent (1999-2003) Canadian research on contemporary processes of river erosion and sedimentation, and river mechanics. <i>Hydrological Processes</i> , 2005, 19, 265-283.	2.6	10

#	ARTICLE	IF	CITATIONS
109	Influence of small- and large-scale variables on the chemical and isotopic compositions of urban rainwater, as illustrated by a case study in Ashdod, Israel. <i>Journal of Geophysical Research</i> , 2005, 110, .	3.3	22
110	GEOMORPHOLOGY OF STEEPLAND HEADWATERS: THE TRANSITION FROM HILLSLOPES TO CHANNELS. <i>Journal of the American Water Resources Association</i> , 2005, 41, 835-851.	2.4	163
111	SPATIAL AND TEMPORAL DYNAMICS OF WOOD IN HEADWATER STREAMS OF THE PACIFIC NORTHWEST. <i>Journal of the American Water Resources Association</i> , 2005, 41, 899-919.	2.4	98
112	SEDIMENT DISPERSION IN SALMON SPAWNING STREAMS: THE INFLUENCE OF FLOODS AND SALMON REDD CONSTRUCTION. <i>Journal of the American Water Resources Association</i> , 2004, 40, 1071-1086.	2.4	73
113	Bed load transport in an obstruction-formed pool in a forest, gravelbed stream. <i>Geomorphology</i> , 2004, 58, 203-221.	2.6	55
114	Complex mass wasting response of drainage basins to forest management in coastal British Columbia. <i>Geomorphology</i> , 2003, 49, 109-124.	2.6	37
115	Landslide inventory in a rugged forested watershed: a comparison between air-photo and field survey data. <i>Geomorphology</i> , 2003, 54, 179-196.	2.6	189
