List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/8899573/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Role of ventilation in airborne transmission of infectious agents in the built environment ? a multidisciplinary systematic review. Indoor Air, 2007, 17, 2-18.	4.3	822
2	Arsenic methylation and bladder cancer risk in Taiwan. Cancer Causes and Control, 2003, 14, 303-310.	1.8	219
3	Higher temperature and urbanization affect the spatial patterns of dengue fever transmission in subtropical Taiwan. Science of the Total Environment, 2009, 407, 2224-2233.	8.0	218
4	Arsenic Methylation and Skin Cancer Risk in Southwestern Taiwan. Journal of Occupational and Environmental Medicine, 2003, 45, 241-248.	1.7	214
5	Weather as an effective predictor for occurrence of dengue fever in Taiwan. Acta Tropica, 2007, 103, 50-57.	2.0	206
6	Predicted risk of childhood allergy, asthma, and reported symptoms using measured phthalate exposure in dust and urine. Indoor Air, 2012, 22, 186-199.	4.3	172
7	Linking Student Performance in Massachusetts Elementary Schools with the "Greenness―of School Surroundings Using Remote Sensing. PLoS ONE, 2014, 9, e108548.	2.5	141
8	An Internet-Based Interactive Telemonitoring System for Improving Childhood Asthma Outcomes in Taiwan. Telemedicine Journal and E-Health, 2007, 13, 257-268.	2.8	130
9	Diseases Caused by Enterovirus 71 Infection. Pediatric Infectious Disease Journal, 2009, 28, 904-910.	2.0	129
10	Exposure of Workers to Airborne Microorganisms in Open-Air Swine Houses. Applied and Environmental Microbiology, 2001, 67, 155-161.	3.1	116
11	Indoor air quality varies with ventilation types and working areas in hospitals. Building and Environment, 2015, 85, 190-195.	6.9	113
12	Fine Particle Pollution, Alanine Transaminase, and Liver Cancer: A Taiwanese Prospective Cohort Study (REVEAL-HBV). Journal of the National Cancer Institute, 2016, 108, .	6.3	113
13	Increased levels of ambient fungal spores in Taiwan are associated with dust events from China. Atmospheric Environment, 2004, 38, 4879-4886.	4.1	108
14	Effects of Extreme Precipitation to the Distribution of Infectious Diseases in Taiwan, 1994–2008. PLoS ONE, 2012, 7, e34651.	2.5	108
15	Exposure Assessment of Indoor Allergens, Endotoxin, and Airborne Fungi for Homes in Southern Taiwan. Environmental Research, 2001, 85, 135-144.	7.5	107
16	Traffic-Related Air Pollution, Climate, and Prevalence of Eczema in Taiwanese School Children. Journal of Investigative Dermatology, 2008, 128, 2412-2420.	0.7	107
17	The effects of evaporating essential oils on indoor air quality. Atmospheric Environment, 2007, 41, 1230-1236.	4.1	89
18	Hepatocellular carcinoma–related cyclin D1 is selectively regulated by autophagy degradation system. Hepatology, 2018, 68, 141-154.	7.3	84

#	Article	IF	CITATIONS
19	The seasonal distribution of bioaerosols in municipal landfill sites: a 3-yr study. Atmospheric Environment, 2002, 36, 4385-4395.	4.1	83
20	Simultaneous exposure of non-diabetics to high levels of dioxins and mercury increases their risk of insulin resistance. Journal of Hazardous Materials, 2011, 185, 749-755.	12.4	70
21	The Association between Enterovirus 71 Infections and Meteorological Parameters in Taiwan. PLoS ONE, 2012, 7, e46845.	2.5	69
22	A Comparison of Sampling Media for Environmental Viable Fungi Collected in a Hospital Environment. Environmental Research, 2000, 82, 253-257.	7.5	64
23	Changing microbial concentrations are associated with ventilation performance in Taiwan's air-conditioned office buildings. Indoor Air, 2005, 15, 19-26.	4.3	61
24	Interaction between environmental tobacco smoke and arsenic methylation ability on the risk of bladder cancer. Cancer Causes and Control, 2005, 16, 75-81.	1.8	57
25	Profile of PCDD/F levels in serum of general Taiwanese between different gender, age and smoking status. Science of the Total Environment, 2005, 337, 31-43.	8.0	51
26	Relationship between mean daily ambient temperature range and hospital admissions for schizophrenia: Results from a national cohort of psychiatric inpatients. Science of the Total Environment, 2011, 410-411, 41-46.	8.0	51
27	Examining non-stationary effects of social determinants on cardiovascular mortality after cold surges in Taiwan. Science of the Total Environment, 2010, 408, 2042-2049.	8.0	50
28	Associations between dietary intake and serum polychlorinated dibenzo-p-dioxin and dibenzofuran (PCDD/F) levels in Taiwanese. Environmental Research, 2003, 91, 172-178.	7.5	48
29	Relationship between heat index and mortality of 6 major cities in Taiwan. Science of the Total Environment, 2013, 442, 275-281.	8.0	46
30	A hybrid kriging/land-use regression model with Asian culture-specific sources to assess NO2 spatial-temporal variations. Environmental Pollution, 2020, 259, 113875.	7.5	46
31	Different cell death mechanisms and gene expression in human cells induced by pentachlorophenol and its major metabolite, tetrachlorohydroquinone. Chemico-Biological Interactions, 2000, 128, 173-188.	4.0	41
32	Risk assessment of formaldehyde in typical office buildings in Taiwan. Indoor Air, 2003, 13, 359-363.	4.3	37
33	Dioxin Exposure and Insulin Resistance in Taiwanese Living Near a Highly Contaminated Area. Epidemiology, 2010, 21, 56-61.	2.7	37
34	Cardiovascular mortality during heat and cold events: determinants of regional vulnerability in Taiwan. Occupational and Environmental Medicine, 2011, 68, 525-530.	2.8	37
35	Airborne Fungi and Endotoxin Concentrations in Different Areas within Textile Plants in Taiwan: A 3-Year Study. Environmental Research, 2002, 89, 58-65.	7.5	34
36	The association between tumor necrosis factor, HLA-DR alleles, and IgE-mediated asthma in Taiwanese adolescents. Allergy: European Journal of Allergy and Clinical Immunology, 2002, 57, 831-834.	5.7	34

#	Article	IF	CITATIONS
37	Cognitive function and blood methylmercury in adults living near a deserted chloralkali factory. Environmental Research, 2008, 108, 334-339.	7.5	34
38	Effects of essential oils on the formation of formaldehyde and secondary organic aerosols in an aromatherapy environment. Building and Environment, 2012, 57, 120-125.	6.9	34
39	Fatty Liver and Hepatic Function for Residents with Markedly High Serum PCDD/Fs Levels in Taiwan. Journal of Toxicology and Environmental Health - Part A: Current Issues, 2006, 69, 367-380.	2.3	33
40	Biochemistry examinations and health disorder evaluation of Taiwanese living near incinerators and with low serum PCDD/Fs levels. Science of the Total Environment, 2006, 366, 538-548.	8.0	31
41	Association between indoor air pollutant exposure and blood pressure and heart rate in subjects according to body mass index. Science of the Total Environment, 2016, 539, 271-276.	8.0	31
42	Home Exposures, Parental Atopy, and Occurrence of Asthma Symptoms in Adulthood in Southern Taiwan. Chest, 2006, 129, 300-308.	0.8	30
43	Fungal Exposure of Children at Homes and Schools: A Health Perspective. Archives of Environmental Health, 2001, 56, 144-149.	0.4	29
44	Levels of House Dust Mite-Specific IgE and Cockroach-Specific IgE and Their Association With Lower Pulmonary Function in Taiwanese Children. Chest, 2002, 121, 347-353.	0.8	29
45	Cold surge: A sudden and spatially varying threat to health?. Science of the Total Environment, 2009, 407, 3421-3424.	8.0	29
46	Higher moisture content is associated with greater emissions of DEHP from PVC wallpaper. Environmental Research, 2017, 152, 1-6.	7.5	29
47	Genetic Polymorphism inp53Codon 72 and Skin Cancer in Southwestern Taiwan. Journal of Environmental Science and Health - Part A Toxic/Hazardous Substances and Environmental Engineering, 2003, 38, 201-211.	1.7	28
48	Evaluation of background persistent organic pollutant levels in human from Taiwan: Polychlorinated dibenzo-p-dioxins, dibenzofurans, and biphenyls. Environment International, 2009, 35, 33-42.	10.0	28
49	Abdominal Obesity and Insulin Resistance in People Exposed to Moderate-to-High Levels of Dioxin. PLoS ONE, 2016, 11, e0145818.	2.5	28
50	Changes in profiles of airborne fungi in flooded homes in southern Taiwan after Typhoon Morakot. Science of the Total Environment, 2011, 409, 1677-1682.	8.0	27
51	The association between the incidence of mumps and meteorological parameters in Taiwan. Human Vaccines and Immunotherapeutics, 2015, 11, 1406-1412.	3.3	26
52	Susceptibility of endothelial cells to bovine herpesvirus type 4 (BHV-4). Journal of Virological Methods, 1997, 63, 219-225.	2.1	24
53	Sustainability of higher education institutions in Taiwan. International Journal of Sustainability in Higher Education, 2010, 11, 163-172.	3.1	24
54	Incorporating land-use regression into machine learning algorithms in estimating the spatial-temporal variation of carbon monoxide in Taiwan. Environmental Modelling and Software, 2021, 139, 104996.	4.5	21

HUEY-JEN JENNY SU

#	Article	IF	CITATIONS
55	Using land-use machine learning models to estimate daily NO2 concentration variations in Taiwan. Journal of Cleaner Production, 2021, 317, 128411.	9.3	21
56	Global greenness in relation to reducing the burden of cardiovascular diseases: ischemic heart disease and stroke. Environmental Research Letters, 2020, 15, 124003.	5.2	21
57	Allostatic Load Model Associated with Indoor Environmental Quality and Sick Building Syndrome among Office Workers. PLoS ONE, 2014, 9, e95791.	2.5	21
58	Hyperuricemia After Exposure to Polychlorinated Dibenzo-P-Dioxins and Dibenzofurans Near a Highly Contaminated Area. Epidemiology, 2013, 24, 582-589.	2.7	20
59	Temporal and spatial variations in IAQ and its association with building characteristics and human activities in tropical and subtropical areas. Building and Environment, 2019, 163, 106249.	6.9	20
60	Effects of changing risk factors on increasing asthma prevalence in southern Taiwan. Paediatric and Perinatal Epidemiology, 2003, 17, 3-9.	1.7	19
61	A positive relationship between ambient temperature and bipolar disorder identified using a national cohort of psychiatric inpatients. Social Psychiatry and Psychiatric Epidemiology, 2013, 48, 295-302.	3.1	19
62	Early-life or lifetime sun exposure, sun reaction, and the risk of squamous cell carcinoma in an Asian population. Cancer Causes and Control, 2010, 21, 771-776.	1.8	16
63	A dose-dependent relationship between the severity of visible mold growth and IgE levels of pre-school-aged resident children in Taiwan. Indoor Air, 2010, 20, 392-398.	4.3	15
64	Cumulative effect of indoor temperature on cardiovascular disease–related emergency department visits among older adults in Taiwan. Science of the Total Environment, 2020, 731, 138958.	8.0	15
65	Linkage between residential green spaces and allergic rhinitis among Asian children (case study:) Tj ETQq1 1	0.784314 rgBT	- /Overlock 1 15
66	The Effect of Surrounding Greenness on Type 2 Diabetes Mellitus: A Nationwide Population-Based Cohort in Taiwan. International Journal of Environmental Research and Public Health, 2021, 18, 267.	2.6	15
67	Climate variability of cold surge and its impact on the air quality of Taiwan. Climatic Change, 2009, 94, 457-471.	3.6	14
68	Association Between Surrounding Greenness and Schizophrenia: A Taiwanese Cohort Study. International Journal of Environmental Research and Public Health, 2019, 16, 1415.	2.6	14
69	Roles of Genotypes of β2-Adrenergic Receptor in the Relationship Between Eosinophil Counts and Lung Function in Taiwanese Adolescents. Journal of Asthma, 2003, 40, 265-272.	1.7	13
70	Airborne fungi and bacteria in child daycare centers and the effectiveness of weak acid hypochlorous water on controlling microbes. Journal of Environmental Monitoring, 2012, 14, 2692.	2.1	12
71	COVID-19 reveals the systemic nature of urban health globally. Cities and Health, 2020, , 1-5.	2.6	12
72	Chemical and stable isotopic characteristics of PM2.5 emitted from Chinese cooking. Environmental Pollution, 2020, 267, 115577.	7.5	12

#	Article	IF	CITATIONS
73	Associations among phthalate exposure, DNA methylation of TSLP, and childhood allergy. Clinical Epigenetics, 2021, 13, 76.	4.1	12
74	Domestic Exposure to Fungi and Total Serum IgE Levels in Asthmatic Children. Mediators of Inflammation, 2005, 2005, 167-170.	3.0	11
75	Patterns of serum PCDD/Fs affected by vegetarian regime and consumption of local food for residents living near municipal waste incinerators from Taiwan. Environment International, 2006, 32, 650-655.	10.0	11
76	Precipitation Increases the Occurrence of Sporadic Legionnaires' Disease in Taiwan. PLoS ONE, 2014, 9, e114337.	2.5	11
77	Development of Hourly Indoor PM2.5 Concentration Prediction Model: The Role of Outdoor Air, Ventilation, Building Characteristic, and Human Activity. International Journal of Environmental Research and Public Health, 2020, 17, 5906.	2.6	11
78	Pollen of Broussonetia papyrifera: An emerging aeroallergen associated with allergic illness in Taiwan. Science of the Total Environment, 2019, 657, 804-810.	8.0	10
79	Distribution variations of multi allergens at asthmatic children's homes. Science of the Total Environment, 2002, 289, 249-254.	8.0	9
80	New Phenylpropane and Anti-inflammatory Diterpene Derivatives fromAmentotaxus formosana. Planta Medica, 2005, 71, 344-348.	1.3	9
81	Association between tofu intake and serum polychlorinated dibenzo-p-dioxins and dibenzofurans (PCDD/Fs) in the elderly Taiwanese. Environment International, 2007, 33, 265-271.	10.0	9
82	Developing a water literacy. Current Opinion in Environmental Sustainability, 2011, 3, 517-519.	6.3	9
83	Feeding Bottles Usage and the Prevalence of Childhood Allergy and Asthma. Clinical and Developmental Immunology, 2012, 2012, 1-8.	3.3	9
84	Paternal Heredity and Housing Characteristics Affect Childhood Asthma and Allergy Morbidity. Archives of Environmental and Occupational Health, 2012, 67, 155-162.	1.4	9
85	The topical application of 2,3,7,8-tetrachlorodibenzo-p-dioxin lacks skin tumor-promoting potency but induces hepatic injury and tumor necrosis factor-î± expression in ICR male mice. Food and Chemical Toxicology, 2004, 42, 1217-1225.	3.6	7
86	Effects of Vitamin C and E Intake on Peak Expiratory Flow Rate of Asthmatic Children Exposed to Atmospheric Particulate Matter. Archives of Environmental and Occupational Health, 2013, 68, 80-86.	1.4	7
87	Development of an efficient viral aerosol collector for higher sampling flow rate. Environmental Science and Pollution Research, 2018, 25, 3884-3893.	5.3	7
88	Residential green space structures are associated with a lower risk of bipolar disorder: A nationwide population-based study in Taiwan. Environmental Pollution, 2021, 283, 115864.	7.5	7
89	New land use regression model to estimate atmospheric temperature and heat island intensity in Taiwan. Theoretical and Applied Climatology, 2020, 141, 1451-1459.	2.8	6
90	Influence of Indoor Temperature Exposure on Emergency Department Visits Due to Infectious and Non-Infectious Respiratory Diseases for Older People. International Journal of Environmental Research and Public Health, 2021, 18, 5273.	2.6	6

#	Article	IF	CITATIONS
91	Is green space exposure beneficial in a developing country?. Landscape and Urban Planning, 2021, 215, 104226.	7.5	6
92	When Are We Most Vulnerable to Temperature Variations in a Day?. PLoS ONE, 2014, 9, e113195.	2.5	6
93	Predicting the risk of cardiovascular disease in people exposed to moderate to high levels of dioxin. Journal of Hazardous Materials, 2011, 198, 317-322.	12.4	5
94	Ambient viral and bacterial distribution during long-range transport in Northern Taiwan. Environmental Pollution, 2021, 270, 116231.	7.5	5
95	Estimations of infiltration factors of diurnal PM _{2.5} and heavy metals in children's bedrooms. Indoor Air, 2022, 32, .	4.3	5
96	School type, stress and sport-related injuries in middle school students in central Taiwan. Safety Science, 2001, 39, 137-144.	4.9	4
97	Allergen exposure induces inflammation and affects adiponectin levels in adipose tissue. Toxicology Letters, 2013, 223, 88-95.	0.8	4
98	Allergen exposure induces adipose tissue inflammation and insulin resistance. International Immunopharmacology, 2014, 23, 104-112.	3.8	3
99	Extreme Precipitation and Climate-related Infectious Diseases in Taiwan (1994–2008). Epidemiology, 2011, 22, S20-S21.	2.7	2
100	Long-term allergen exposure induces adipose tissue inflammation and circulatory system injury. Cellular Immunology, 2016, 303, 34-42.	3.0	2
101	Stable C and N isotopes of PM2.5 and size-segregated particles emitted from incense stick and cigarette burning. Environmental Research, 2022, 212, 113346.	7.5	2
102	Changes in Ambient Bacterial Community in Northern Taiwan during Long-Range Transport: Asian Dust Storm and Frontal Pollution. Atmosphere, 2022, 13, 841.	2.3	2
103	Interactive Effects Between CYP1A1 Genotypes and Environmental Polychlorinated Dibenzo-p-Dioxins and Dibenzofurans Exposures on Liver Function Profile. Journal of Toxicology and Environmental Health - Part A: Current Issues, 2006, 69, 269-281.	2.3	1
104	Application of a stable carbon isotope for identifying Broussonetia papyrifera pollen. Environmental Science and Pollution Research, 2019, 26, 27353-27361.	5.3	1
105	Contribution of Indoor- and Outdoor-Generated Fine and Coarse Particles to Indoor Air in Taiwanese Hospitals. Aerosol and Air Quality Research, 2018, 18, 3234-3242.	2.1	1
106	Extreme Precipitation and Public Health Consequences in Taiwan. Global Bioethics, 2011, 24, 107-108.	1.5	0
107	Climate Variability and Human Health in Southeast Asia: A Taiwan Study. Advances in Asian Human-Environmental Research, 2016, , 237-242.	1.0	0
