#	ARTICLE	IF	CITATIONS
1	From dietary adaptation in the past to drug metabolism of today: An example of NAT genes in the Croatian Roma. <i>American Journal of Biological Anthropology</i> , 2022, 178, 140-153.	1.1	2
2	Untangling SNP Variations within CYP2D6 Gene in Croatian Roma. <i>Journal of Personalized Medicine</i> , 2022, 12, 374.	2.5	4
3	Pharmacogenetic distinction of the Croatian population from the European average. <i>Croatian Medical Journal</i> , 2022, 63, 117-125.	0.7	1
4	CVD Risk Factors in the Ukrainian Roma and Meta-Analysis of Their Prevalence in Roma Populations Worldwide. <i>Journal of Personalized Medicine</i> , 2021, 11, 1138.	2.5	2
5	Health-Risk Behaviours in Objective and Subjective Health among Croatians Aged 50 and Older. <i>Drustvena Istrazivanja</i> , 2020, 29, 217-239.	0.2	2
6	Global variability of the human IgG glycome. <i>Aging</i> , 2020, 12, 15222-15259.	3.1	37
7	Waist to height ratio is the anthropometric index that most appropriately mirrors the lifestyle and psychological risk factors of obesity. <i>Nutrition and Dietetics</i> , 2019, 76, 539-545.	1.8	13
8	Characterization of ADME genes variation in Roma and 20 populations worldwide. <i>PLoS ONE</i> , 2018, 13, e0207671.	2.5	11
9	Distinctiveness of the Roma population within CYP2B6 worldwide variation. <i>Pharmacogenomics</i> , 2017, 18, 1575-1587.	1.3	6
10	Novel locus for fibrinogen in 3' region of LEPR gene in island population of Vis (Croatia). <i>Journal of Human Genetics</i> , 2014, 59, 623-629.	2.3	1
11	A six decades long follow-up on body size in adolescents from Zagreb, Croatia (1951–2010). <i>Economics and Human Biology</i> , 2014, 13, 155-164.	1.7	5
12	Age trends in prevalence of cardiovascular risk factors in Roma minority population of Croatia. <i>Economics and Human Biology</i> , 2013, 11, 326-336.	1.7	21
13	A detection of microevolutionary changes by the analysis of qualitative dermatoglyphic traits: an example of Albanians from Kosovo. <i>Anthropologischer Anzeiger</i> , 2012, 69, 461-472.	0.4	3
14	Secular trend of menarche in Zagreb (Croatia) adolescents. <i>European Journal of Obstetrics, Gynecology and Reproductive Biology</i> , 2012, 160, 51-54.	1.1	14
15	Angiotensin-converting enzyme deletion allele is beneficial for the longevity of Europeans. <i>Age</i> , 2012, 34, 583-595.	3.0	24
16	The TP53 gene polymorphisms and survival of sporadic breast cancer patients. <i>Medical Oncology</i> , 2012, 29, 472-478.	2.5	6
17	Genetic variation near IRS1 associates with reduced adiposity and an impaired metabolic profile. <i>Nature Genetics</i> , 2011, 43, 753-760.	21.4	289
18	E2 allele of the Apolipoprotein E gene polymorphism is predictive for obesity status in Roma minority population of Croatia. <i>Lipids in Health and Disease</i> , 2011, 10, 9.	3.0	36

#	ARTICLE	IF	CITATIONS
19	New reference equations for forced spirometry in elderly persons. <i>Respiratory Medicine</i> , 2009, 103, 621-628.	2.9	11
20	A Quantitative Trait Locus for SBP Maps Near KCNB1 and PTGIS in a Population Isolate. <i>American Journal of Hypertension</i> , 2009, 22, 663-668.	2.0	4
21	SLC2A9 is a newly identified urate transporter influencing serum urate concentration, urate excretion and gout. <i>Nature Genetics</i> , 2008, 40, 437-442.	21.4	678
22	Gender-specific growth patterns of transversal body dimensions in Croatian children and youth (2 to 10 years of age). <i>Journal of Human Growth and Development</i> , 2008, 18, 105-111.	0.2	11
23	Traditional CVD risk factors and socio-economic deprivation in Roma minority population of Croatia. <i>Collegium Antropologicum</i> , 2008, 32, 667-76.	0.2	28
24	The prevalence of lateral incisor hypodontia and canine impaction in Croatian population. <i>Collegium Antropologicum</i> , 2008, 32, 1105-9.	0.2	12
25	The Eysenck personality factors: Psychometric structure, reliability, heritability and phenotypic and genetic correlations with psychological distress in an isolated Croatian population. <i>Personality and Individual Differences</i> , 2007, 42, 123-133.	2.9	70
26	Trapped between tradition and transition—anthropological and epidemiological cross-sectional study of Bayash Roma in Croatia. <i>Croatian Medical Journal</i> , 2007, 48, 708-19.	0.7	16
27	Gene Polymorphisms of the Renin-Angiotensin System and Early Development of Hypertension. <i>American Journal of Hypertension</i> , 2006, 19, 837-842.	2.0	40
28	3000 years of solitude: extreme differentiation in the island isolates of Dalmatia, Croatia. <i>European Journal of Human Genetics</i> , 2006, 14, 478-487.	2.8	61
29	Chronic respiratory symptoms in Croatian Adriatic island metapopulations. <i>Croatian Medical Journal</i> , 2006, 47, 627-34.	0.7	2
30	Calcaneous ultrasonographic assessment of bone mineral density in the Roma minority population of Croatia—preliminary report. <i>Collegium Antropologicum</i> , 2006, 30, 761-5.	0.2	2
31	Body mass index and nutritional status of the Bayash Roma from eastern Croatia. <i>Collegium Antropologicum</i> , 2006, 30, 783-7.	0.2	14
32	Impact analysis of a regional scientific journal (1980-2000): supporting promising local researchers pays the greatest dividends. <i>Collegium Antropologicum</i> , 2005, 29, 1-7.	0.2	94
33	Segregation analysis of systolic and diastolic blood pressure in Middle Dalmatia Island population. <i>Collegium Antropologicum</i> , 2005, 29, 301-7.	0.2	1
34	Inbreeding and susceptibility to osteoporosis in Croatian island isolates. <i>Collegium Antropologicum</i> , 2004, 28, 585-601.	0.2	14
35	Ace Alu insertion polymorphism in Croatia and its isolates. <i>Collegium Antropologicum</i> , 2004, 28, 603-10.	0.2	6
36	Complex segregation analysis of body height, weight and BMI in pedigree data from Middle Dalmatia, Croatia. <i>Collegium Antropologicum</i> , 2003, 27, 135-49.	0.2	12

#	ARTICLE	IF	CITATIONS
37	Path analysis of familial resemblance in blood pressure in Middle Dalmatia, Croatia. Collegium Antropologicum, 2003, 27, 229-37.	0.2	1
38	Evidence on major gene control of cortical index in pedigree data from Middle Dalmatia, Croatia. American Journal of Human Biology, 2001, 13, 398-408.	1.6	27
39	The lasting impact of war experiences on quality of life in long-lived retirement homes residents: The birth cohort 1906â€“1928. Ageing and Society, 0, , 1-29.	1.7	2
