#	ARTICLE	IF	CITATIONS
1	CANDELS: THE COSMIC ASSEMBLY NEAR-INFRARED DEEP EXTRAGALACTIC LEGACY SURVEY. <i>Astrophysical Journal, Supplement Series</i> , 2011, 197, 35.	3.0	1,590
2	CANDELS: THE COSMIC ASSEMBLY NEAR-INFRARED DEEP EXTRAGALACTIC LEGACY SURVEYâ€™THE <i>HUBBLE SPACE TELESCOPE</i> OBSERVATIONS, IMAGING DATA PRODUCTS, AND MOSAICS. <i>Astrophysical Journal, Supplement Series</i> , 2011, 197, 36.	3.0	1,549
3	A Unified, Mergerâ€driven Model of the Origin of Starbursts, Quasars, the Cosmic Xâ€Ray Background, Supermassive Black Holes, and Galaxy Spheroids. <i>Astrophysical Journal, Supplement Series</i> , 2006, 163, 1-49.	3.0	1,484
4	A Cosmological Framework for the Coâ€evolution of Quasars, Supermassive Black Holes, and Elliptical Galaxies. I. Galaxy Mergers and Quasar Activity. <i>Astrophysical Journal, Supplement Series</i> , 2008, 175, 356-389.	3.0	1,154
5	Galaxies on FIRE (Feedback In Realistic Environments): stellar feedback explains cosmologically inefficient star formation. <i>Monthly Notices of the Royal Astronomical Society</i> , 2014, 445, 581-603.	1.6	1,068
6	A semi-analytic model for the co-evolution of galaxies, black holes and active galactic nuclei. <i>Monthly Notices of the Royal Astronomical Society</i> , 2008, 391, 481-506.	1.6	921
7	An Observational Determination of the Bolometric Quasar Luminosity Function. <i>Astrophysical Journal</i> , 2007, 654, 731-753.	1.6	883
8	A new class of accurate, mesh-free hydrodynamic simulation methods. <i>Monthly Notices of the Royal Astronomical Society</i> , 2015, 450, 53-110.	1.6	743
9	FIRE-2 simulations: physics versus numerics in galaxy formation. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018, 480, 800-863.	1.6	676
10	Black Holes in Galaxy Mergers: Evolution of Quasars. <i>Astrophysical Journal</i> , 2005, 630, 705-715.	1.6	497
11	Gusty, gaseous flows of FIRE: galactic winds in cosmological simulations with explicit stellar feedback. <i>Monthly Notices of the Royal Astronomical Society</i> , 2015, 454, 2691-2713.	1.6	478
12	HOW DO DISKS SURVIVE MERGERS?. <i>Astrophysical Journal</i> , 2009, 691, 1168-1201.	1.6	446
13	RECONCILING DWARF GALAXIES WITH $\Lambda$ CDM COSMOLOGY: SIMULATING A REALISTIC POPULATION OF SATELLITES AROUND A MILKY WAYâ€™MASS GALAXY. <i>Astrophysical Journal Letters</i> , 2016, 827, L23.	3.0	430
14	Stellar feedback in galaxies and the origin of galaxy-scale winds. <i>Monthly Notices of the Royal Astronomical Society</i> , 2012, 421, 3522-3537.	1.6	425
15	How do massive black holes get their gas?. <i>Monthly Notices of the Royal Astronomical Society</i> , 2010, 407, 1529-1564.	1.6	415
16	Quasar feedback: more bang for your buck. <i>Monthly Notices of the Royal Astronomical Society</i> , 2010, 401, 7-14.	1.6	397
17	Self-regulated star formation in galaxies via momentum input from massive stars. <i>Monthly Notices of the Royal Astronomical Society</i> , 2011, 417, 950-973.	1.6	389
18	A general class of Lagrangian smoothed particle hydrodynamics methods and implications for fluid mixing problems. <i>Monthly Notices of the Royal Astronomical Society</i> , 2013, 428, 2840-2856.	1.6	367

#	ARTICLE	IF	CITATIONS
19	MERGERS AND BULGE FORMATION IN $\Lambda$ CDM: WHICH MERGERS MATTER?. <i>Astrophysical Journal</i> , 2010, 715, 202-229.	1.6	344
20	A Cosmological Framework for the Co-evolution of Quasars, Supermassive Black Holes, and Elliptical Galaxies. II. Formation of Red Ellipticals. <i>Astrophysical Journal, Supplement Series</i> , 2008, 175, 390-422.	3.0	318
21	A Physical Model for the Origin of Quasar Lifetimes. <i>Astrophysical Journal</i> , 2005, 625, L71-L74.	1.6	316
22	The origin and evolution of the galaxy mass-metallicity relation. <i>Monthly Notices of the Royal Astronomical Society</i> , 2016, 456, 2140-2156.	1.6	307
23	Forged in fire: cusps, cores and baryons in low-mass dwarf galaxies. <i>Monthly Notices of the Royal Astronomical Society</i> , 2015, 454, 2092-2106.	1.6	291
24	The cosmic baryon cycle and galaxy mass assembly in the FIRE simulations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2017, 470, 4698-4719.	1.6	289
25	The impact of baryonic physics on the structure of dark matter haloes: the view from the FIRE cosmological simulations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2015, 454, 2981-3001.	1.6	260
26	Formation of $z \sim 1/6$ Quasars from Hierarchical Galaxy Mergers. <i>Astrophysical Journal</i> , 2007, 665, 187-208.	1.6	253
27	The structure of the interstellar medium of star-forming galaxies. <i>Monthly Notices of the Royal Astronomical Society</i> , 2012, 421, 3488-3521.	1.6	248
28	mufasa: galaxy formation simulations with meshless hydrodynamics. <i>Monthly Notices of the Royal Astronomical Society</i> , 2016, 462, 3265-3284.	1.6	243
29	Not so lumpy after all: modelling the depletion of dark matter subhaloes by Milky Way-like galaxies. <i>Monthly Notices of the Royal Astronomical Society</i> , 2017, 471, 1709-1727.	1.6	242
30	Fueling Low-level AGN Activity through Stochastic Accretion of Cold Gas. <i>Astrophysical Journal, Supplement Series</i> , 2006, 166, 1-36.	3.0	233
31	DISSIPATION AND EXTRA LIGHT IN GALACTIC NUCLEI. IV. EVOLUTION IN THE SCALING RELATIONS OF SPHEROIDS. <i>Astrophysical Journal</i> , 2009, 691, 1424-1458.	1.6	219
32	Compact high-redshift galaxies are the cores of the most massive present-day spheroids. <i>Monthly Notices of the Royal Astronomical Society</i> , 2009, 398, 898-910.	1.6	216
33	Star formation in galaxy mergers with realistic models of stellar feedback and the interstellar medium. <i>Monthly Notices of the Royal Astronomical Society</i> , 2013, 430, 1901-1927.	1.6	208
34	BREATHING FIRE: HOW STELLAR FEEDBACK DRIVES RADIAL MIGRATION, RAPID SIZE FLUCTUATIONS, AND POPULATION GRADIENTS IN LOW-MASS GALAXIES. <i>Astrophysical Journal</i> , 2016, 820, 131.	1.6	205
35	An analytic model of angular momentum transport by gravitational torques: from galaxies to massive black holes. <i>Monthly Notices of the Royal Astronomical Society</i> , 2011, 415, 1027-1050.	1.6	199
36	Discriminating between the physical processes that drive spheroid size evolution. <i>Monthly Notices of the Royal Astronomical Society</i> , 2010, 401, 1099-1117.	1.6	190

#	ARTICLE	IF	CITATIONS
37	THE AGORA HIGH-RESOLUTION GALAXY SIMULATIONS COMPARISON PROJECT. <i>Astrophysical Journal, Supplement Series</i> , 2014, 210, 14.	3.0	185
38	MERGERS IN $\Lambda$ CDM: UNCERTAINTIES IN THEORETICAL PREDICTIONS AND INTERPRETATIONS OF THE MERGER RATE. <i>Astrophysical Journal</i> , 2010, 724, 915-945.	1.6	183
39	Black holes on FIRE: stellar feedback limits early feeding of galactic nuclei. <i>Monthly Notices of the Royal Astronomical Society: Letters</i> , 2017, 472, L109-L114.	1.2	176
40	fire in the field: simulating the threshold of galaxy formation. <i>Monthly Notices of the Royal Astronomical Society</i> , 2017, 471, 3547-3562.	1.6	173
41	The effects of gas on morphological transformation in mergers: implications for bulge and disc demographics. <i>Monthly Notices of the Royal Astronomical Society</i> , 2009, 397, 802-814.	1.6	169
42	(Star)bursts of FIRE: observational signatures of bursty star formation in galaxies. <i>Monthly Notices of the Royal Astronomical Society</i> , 2017, 466, 88-104.	1.6	169
43	Submillimetre galaxies in a hierarchical universe: number counts, redshift distribution and implications for the IMF. <i>Monthly Notices of the Royal Astronomical Society</i> , 2013, 428, 2529-2547.	1.6	165
44	Gravitational torque-driven black hole growth and feedback in cosmological simulations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2017, 464, 2840-2853.	1.6	162
45	An Observed Fundamental Plane Relation for Supermassive Black Holes. <i>Astrophysical Journal</i> , 2007, 669, 67-73.	1.6	155
46	The formation of submillimetre-bright galaxies from gas infall over a billion years. <i>Nature</i> , 2015, 525, 496-499.	13.7	154
47	Feedback-regulated star formation in molecular clouds and galactic discs. <i>Monthly Notices of the Royal Astronomical Society</i> , 2013, 433, 1970-1990.	1.6	152
48	How stellar feedback simultaneously regulates star formation and drives outflows. <i>Monthly Notices of the Royal Astronomical Society</i> , 2017, 465, 1682-1698.	1.6	151
49	The bolometric quasar luminosity function at $z \sim 7$ . <i>Monthly Notices of the Royal Astronomical Society</i> , 2020, 495, 3252-3275.	1.6	150
50	A Theoretical Interpretation of the Black Hole Fundamental Plane. <i>Astrophysical Journal</i> , 2007, 669, 45-66.	1.6	149
51	Galactic r-process enrichment by neutron star mergers in cosmological simulations of a Milky Way-mass galaxy. <i>Monthly Notices of the Royal Astronomical Society</i> , 2015, 447, 140-148.	1.6	148
52	The stellar initial mass function, core mass function and the last-crossing distribution. <i>Monthly Notices of the Royal Astronomical Society</i> , 2012, 423, 2037-2044.	1.6	147
53	The meaning and consequences of star formation criteria in galaxy models with resolved stellar feedback. <i>Monthly Notices of the Royal Astronomical Society</i> , 2013, 432, 2647-2653.	1.6	147
54	Determining the Properties and Evolution of Red Galaxies from the Quasar Luminosity Function. <i>Astrophysical Journal, Supplement Series</i> , 2006, 163, 50-79.	3.0	145

#	ARTICLE	IF	CITATIONS
55	Stellar and quasar feedback in concert: effects on AGN accretion, obscuration, and outflows. <i>Monthly Notices of the Royal Astronomical Society</i> , 2016, 458, 816-831.	1.6	143
56	Gaia Reveals a Metal-rich, in situ Component of the Local Stellar Halo. <i>Astrophysical Journal</i> , 2017, 845, 101.	1.6	142
57	How to model supernovae in simulations of star and galaxy formation. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018, 477, 1578-1603.	1.6	140
58	Neutral hydrogen in galaxy haloes at the peak of the cosmic star formation history. <i>Monthly Notices of the Royal Astronomical Society</i> , 2015, 449, 987-1003.	1.6	139
59	Be it therefore resolved: cosmological simulations of dwarf galaxies with 30 solar mass resolution. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019, 490, 4447-4463.	1.6	139
60	The Local Group on FIRE: dwarf galaxy populations across a suite of hydrodynamic simulations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019, 487, 1380-1399.	1.6	137
61	ON SIZES, KINEMATICS, $M/L$ GRADIENTS, AND LIGHT PROFILES OF MASSIVE COMPACT GALAXIES AT $z \sim 2$ . <i>Astrophysical Journal</i> , 2010, 722, 1666-1684.	1.6	135
62	A physical model for $z \sim 2$ dust-obscured galaxies.... <i>Monthly Notices of the Royal Astronomical Society</i> , 2010, 407, 1701-1720.	1.6	134
63	Morphologies of $z \sim 0.7$ AGN host galaxies in CANDELS: no trend of merger incidence with AGN luminosity. <i>Monthly Notices of the Royal Astronomical Society</i> , 2014, 439, 3342-3356.	1.6	132
64	The origins of the circumgalactic medium in the FIRE simulations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019, 488, 1248-1272.	1.6	132
65	Gas kinematics, morphology and angular momentum in the FIRE simulations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018, 473, 1930-1955.	1.6	131
66	A general theory of turbulent fragmentation. <i>Monthly Notices of the Royal Astronomical Society</i> , 2013, 430, 1653-1693.	1.6	130
67	The Impact of Enhanced Halo Resolution on the Simulated Circumgalactic Medium. <i>Astrophysical Journal</i> , 2019, 882, 156.	1.6	128
68	QUASARS ARE NOT LIGHT BULBS: TESTING MODELS OF QUASAR LIFETIMES WITH THE OBSERVED EDDINGTON RATIO DISTRIBUTION. <i>Astrophysical Journal</i> , 2009, 698, 1550-1569.	1.6	127
69	DISSIPATION AND EXTRA LIGHT IN GALACTIC NUCLEI. III. CORE ELLIPTICALS AND MISSING LIGHT. <i>Astrophysical Journal, Supplement Series</i> , 2009, 181, 486-532.	3.0	127
70	The difficulty of getting high escape fractions of ionizing photons from high-redshift galaxies: a view from the FIRE cosmological simulations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2015, 453, 960-975.	1.6	126
71	The structure and dynamical evolution of the stellar disc of a simulated Milky Way-mass galaxy. <i>Monthly Notices of the Royal Astronomical Society</i> , 2017, 467, 2430-2444.	1.6	125
72	The origin of ultra diffuse galaxies: stellar feedback and quenching. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018, 478, 906-925.	1.6	125

#	ARTICLE	IF	CITATIONS
73	Sweating the small stuff: simulating dwarf galaxies, ultra-faint dwarf galaxies, and their own tiny satellites. Monthly Notices of the Royal Astronomical Society, 2015, 453, 1305-1316.	1.6	124
74	A CHARACTERISTIC DIVISION BETWEEN THE FUELING OF QUASARS AND SEYFERTS: FIVE SIMPLE TESTS. Astrophysical Journal, 2009, 694, 599-609.	1.6	120
75	When feedback fails: the scaling and saturation of star formation efficiency. Monthly Notices of the Royal Astronomical Society, 2018, 475, 3511-3528.	1.6	120
76	Stellar feedback and bulge formation in clumpy discs. Monthly Notices of the Royal Astronomical Society, 2012, 427, 968-978.	1.6	119
77	Metal flows of the circumgalactic medium, and the metal budget in galactic haloes. Monthly Notices of the Royal Astronomical Society, 2017, 468, 4170-4188.	1.6	119
78	Binary stars can provide the "missing photons" needed for reionization. Monthly Notices of the Royal Astronomical Society, 2016, 459, 3614-3619.	1.6	115
79	Feedback first: the surprisingly weak effects of magnetic fields, viscosity, conduction and metal diffusion on sub- $L^*$ galaxy formation. Monthly Notices of the Royal Astronomical Society, 2017, 471, 144-166.	1.6	113
80	The nuclear stellar disc in Andromeda: a fossil from the era of black hole growth. Monthly Notices of the Royal Astronomical Society: Letters, 2010, 405, L41-L45.	1.2	111
81	Modelling chemical abundance distributions for dwarf galaxies in the Local Group: the impact of turbulent metal diffusion. Monthly Notices of the Royal Astronomical Society, 2018, 474, 2194-2211.	1.6	111
82	Accurate, meshless methods for magnetohydrodynamics. Monthly Notices of the Royal Astronomical Society, 2016, 455, 51-88.	1.6	108
83	But what about...: cosmic rays, magnetic fields, conduction, and viscosity in galaxy formation. Monthly Notices of the Royal Astronomical Society, 2020, 492, 3465-3498.	1.6	107
84	Simulating galaxies in the reionization era with FIRE-2: galaxy scaling relations, stellar mass functions, and luminosity functions. Monthly Notices of the Royal Astronomical Society, 2018, 478, 1694-1715.	1.6	106
85	Cosmic ray feedback in the FIRE simulations: constraining cosmic ray propagation with GeV $\gamma$ -ray emission. Monthly Notices of the Royal Astronomical Society, 2019, 488, 3716-3744.	1.6	106
86	Properties of the circumgalactic medium in cosmic ray-dominated galaxy haloes. Monthly Notices of the Royal Astronomical Society, 2020, 496, 4221-4238.	1.6	99
87	The origins of active galactic nuclei obscuration: the "torus" as a dynamical, unstable driver of accretion. Monthly Notices of the Royal Astronomical Society, 2012, 420, 320-339.	1.6	98
88	On the dust temperatures of high-redshift galaxies. Monthly Notices of the Royal Astronomical Society, 2019, 489, 1397-1422.	1.6	97
89	Where are the most ancient stars in the Milky Way?. Monthly Notices of the Royal Astronomical Society, 2018, 480, 652-668.	1.6	96
90	Resonant drag instabilities in protoplanetary discs: the streaming instability and new, faster growing instabilities. Monthly Notices of the Royal Astronomical Society, 2018, 477, 5011-5040.	1.6	93

#	ARTICLE	IF	CITATIONS
91	The origin of the diverse morphologies and kinematics of Milky Way-mass galaxies in the FIRE-2 simulations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018, 481, 4133-4157.	1.6	91
92	What FIREs up star formation: the emergence of the Kennicutt-Schmidt law from feedback. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018, 478, 3653-3673.	1.6	91
93	Giant clumps in the FIRE simulations: a case study of a massive high-redshift galaxy. <i>Monthly Notices of the Royal Astronomical Society</i> , 2017, 465, 952-969.	1.6	90
94	A stellar feedback origin for neutral hydrogen in high-redshift quasar-mass haloes. <i>Monthly Notices of the Royal Astronomical Society: Letters</i> , 2016, 461, L32-L36.	1.2	89
95	A maximum stellar surface density in dense stellar systems. <i>Monthly Notices of the Royal Astronomical Society: Letters</i> , 2010, 401, L19-L23.	1.2	88
96	THE AGORA HIGH-RESOLUTION GALAXY SIMULATIONS COMPARISON PROJECT. II. ISOLATED DISK TEST. <i>Astrophysical Journal</i> , 2016, 833, 202.	1.6	88
97	RECOVERING STELLAR POPULATION PROPERTIES AND REDSHIFTS FROM BROADBAND PHOTOMETRY OF SIMULATED GALAXIES: LESSONS FOR SED MODELING. <i>Astrophysical Journal</i> , 2009, 696, 348-369.	1.6	87
98	A model for (non-lognormal) density distributions in isothermal turbulence. <i>Monthly Notices of the Royal Astronomical Society</i> , 2013, 430, 1880-1891.	1.6	87
99	Dust attenuation, dust emission, and dust temperature in galaxies at $z \approx 5$ : a view from the FIRE-2 simulations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019, 487, 1844-1864.	1.6	87
100	X-ray Emission from Hot Gas in Galaxy Mergers. <i>Astrophysical Journal</i> , 2006, 643, 692-706.	1.6	87
101	The Radical Consequences of Realistic Satellite Orbits for the Heating and Implied Merger Histories of Galactic Disks. <i>Astrophysical Journal</i> , 2008, 688, 757-769.	1.6	85
102	An excursion-set model for the structure of giant molecular clouds and the interstellar medium. <i>Monthly Notices of the Royal Astronomical Society</i> , 2012, 423, 2016-2036.	1.6	85
103	Star formation histories of dwarf galaxies in the FIRE simulations: dependence on mass and Local Group environment. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019, 489, 4574-4588.	1.6	83
104	Anisotropic diffusion in mesh-free numerical magnetohydrodynamics. <i>Monthly Notices of the Royal Astronomical Society</i> , 2017, 466, 3387-3405.	1.6	80
105	The no-spin zone: rotation versus dispersion support in observed and simulated dwarf galaxies. <i>Monthly Notices of the Royal Astronomical Society</i> , 2017, 465, 2420-2431.	1.6	80
106	Formation of globular cluster candidates in merging proto-galaxies at high redshift: a view from the FIRE cosmological simulations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018, 474, 4232-4244.	1.6	79
107	The formation of massive, quiescent galaxies at cosmic noon. <i>Monthly Notices of the Royal Astronomical Society: Letters</i> , 2016, 458, L14-L18.	1.2	78
108	How Much Mass Do Supermassive Black Holes Eat in Their Old Age?. <i>Astrophysical Journal</i> , 2006, 643, 641-651.	1.6	78

#	ARTICLE	IF	CITATIONS
109	Synthetic Gaia Surveys from the FIRE Cosmological Simulations of Milky Way-mass Galaxies. <i>Astrophysical Journal, Supplement Series</i> , 2020, 246, 6.	3.0	77
110	A profile in FIRE: resolving the radial distributions of satellite galaxies in the Local Group with simulations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020, 491, 1471-1490.	1.6	77
111	The Self-Regulated Growth of Supermassive Black Holes. <i>Astrophysical Journal</i> , 2008, 686, 815-828.	1.6	76
112	The physics of Lyman- $\alpha$ escape from high-redshift galaxies. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019, 484, 39-59.	1.6	76
113	Interacting galaxies on FIRE-2: the connection between enhanced star formation and interstellar gas content. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019, 485, 1320-1338.	1.6	75
114	No missing photons for reionization: moderate ionizing photon escape fractions from the FIRE-2 simulations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020, 498, 2001-2017.	1.6	75
115	High Angular Momentum Halo Gas: A Feedback and Code-independent Prediction of LCDM. <i>Astrophysical Journal</i> , 2017, 843, 47.	1.6	74
116	STARFORGE: Towards a comprehensive numerical model of star cluster formation and feedback. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021, 506, 2199-2231.	1.6	73
117	A constrained-gradient method to control divergence errors in numerical MHD. <i>Monthly Notices of the Royal Astronomical Society</i> , 2016, 462, 576-587.	1.6	72
118	A dark matter profile to model diverse feedback-induced core sizes of $\Lambda$ CDM haloes. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020, 497, 2393-2417.	1.6	71
119	Luminosity-dependent Quasar Lifetimes: Reconciling the Optical and X-Ray Quasar Luminosity Functions. <i>Astrophysical Journal</i> , 2005, 632, 81-91.	1.6	70
120	The fundamentally different dynamics of dust and gas in molecular clouds. <i>Monthly Notices of the Royal Astronomical Society</i> , 2016, 456, 4174-4190.	1.6	70
121	The creation and persistence of a misaligned gas disc in a simulated early-type galaxy. <i>Monthly Notices of the Royal Astronomical Society</i> , 2015, 451, 3269-3277.	1.6	68
122	When and where did GW150914 form?. <i>Monthly Notices of the Royal Astronomical Society: Letters</i> , 2016, 463, L31-L35.	1.2	67
123	On the survival of cool clouds in the circumgalactic medium. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020, 492, 1841-1854.	1.6	67
124	Virialization of the Inner CGM in the FIRE Simulations and Implications for Galaxy Disks, Star Formation, and Feedback. <i>Astrophysical Journal</i> , 2021, 911, 88.	1.6	66
125	Colours, star formation rates and environments of star-forming and quiescent galaxies at the cosmic noon. <i>Monthly Notices of the Royal Astronomical Society</i> , 2017, 470, 1050-1072.	1.6	65
126	Low-redshift Lyman limit systems as diagnostics of cosmological inflows and outflows. <i>Monthly Notices of the Royal Astronomical Society</i> , 2017, 469, 2292-2304.	1.6	65

#	ARTICLE	IF	CITATIONS
