#	ARTICLE	IF	CITATIONS
1	Boosting long-term effects of degraded memories via acute stress. <i>Comprehensive Psychoneuroendocrinology</i> , 2022, 11, 100154.	1.7	0
2	A multi-country test of brief reappraisal interventions on emotions during the COVID-19 pandemic. <i>Nature Human Behaviour</i> , 2021, 5, 1089-1110.	12.0	71
3	Verbal suggestions fail to modulate expectations about the effectiveness of a laboratory model of EMDR therapy: Results of two preregistered studies. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2021, 73, 101673.	1.2	3
4	Making eye movements during imaginal exposure leads to short-lived memory effects compared to imaginal exposure alone. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2020, 67, 101466.	1.2	18
5	The effects of dual-tasks on intrusive memories following analogue trauma. <i>Behaviour Research and Therapy</i> , 2019, 120, 103448.	3.1	16
6	Lateral Eye Movements Do Not Increase False-Memory Rates: A Failed Direct-Replication Study. <i>Clinical Psychological Science</i> , 2019, 7, 1159-1167.	4.0	20
7	On EMDR: Measuring the working memory taxation of various types of eye (non-)movement conditions. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2019, 65, 101494.	1.2	8
8	No evidence for the inverted U-Curve: More demanding dual tasks cause stronger aversive memory degradation. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2019, 65, 101484.	1.2	11
9	Retrieving and Modifying Traumatic Memories: Recent Research Relevant to Three Controversies. <i>Current Directions in Psychological Science</i> , 2019, 28, 91-96.	5.3	41
10	The Effect of modality specific interference on working memory in recalling aversive auditory and visual memories. <i>Cognition and Emotion</i> , 2019, 33, 1169-1180.	2.0	12
11	Dual-tasking during recall of negative memories or during visual perception of images: Effects on vividness and emotionality. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2019, 62, 112-116.	1.2	5
12	Successfully controlling intrusive memories is harder when control must be sustained. <i>Memory</i> , 2017, 25, 1201-1216.	1.7	44
13	Intervention strength does not differentially affect memory reconsolidation of strong memories. <i>Neurobiology of Learning and Memory</i> , 2017, 144, 174-185.	1.9	8
14	Modification of episodic memories by novel learning: a failed replication study. <i>HÅrgr Utbildning</i> , 2017, 8, 1315291.	3.0	7
15	Exploring expectation effects in EMDR: does prior treatment knowledge affect the degrading effects of eye movements on memories?. <i>HÅrgr Utbildning</i> , 2017, 8, 1328954.	3.0	19
16	Blurring emotional memories using eye movements: individual differences and speed of eye movements. <i>HÅrgr Utbildning</i> , 2016, 7, 29476.	3.0	38
17	Speed Matters: Relationship between Speed of Eye Movements and Modification of Aversive Autobiographical Memories. <i>Frontiers in Psychiatry</i> , 2015, 6, 45.	2.6	47
18	Taxing Working Memory during Retrieval of Emotional Memories Does Not Reduce Memory Accessibility When Cued with Reminders. <i>Frontiers in Psychiatry</i> , 2015, 6, 16.	2.6	9

#	ARTICLE	IF	CITATIONS
19	Emotional and non-emotional memories are suppressible under direct suppression instructions. <i>Cognition and Emotion</i> , 2013, 27, 1122-1131.	2.0	46
