LIUZ SCHENBERC

#	Article	IF	CITATIONS
1	Modeling panic attacks. Neuroscience and Biobehavioral Reviews, 2001, 25, 647-659.	6.1	187
2	Organization of single components of defensive behaviors within distinct columns of periaqueductal gray matter of the rat: role of N-METHYL-d-aspartic acid glutamate receptors. Neuroscience, 2004, 125, 71-89.	2.3	125
3	Role of the periaqueductal gray substance in the antianxiety action of benzodiazepines. Pharmacology Biochemistry and Behavior, 1978, 9, 287-295.	2.9	115
4	Organization of electrically and chemically evoked defensive behaviors within the deeper collicular layers as compared to the periaqueductal gray matter of the rat. Neuroscience, 2005, 133, 873-892.	2.3	85
5	Functional specializations within the tectum defense systems of the rat. Neuroscience and Biobehavioral Reviews, 2005, 29, 1279-1298.	6.1	80
6	Evidence of a suffocation alarm system within the periaqueductal gray matter of the rat. Neuroscience, 2012, 200, 59-73.	2.3	68
7	Cardiac baroreflex dynamics during the defence reaction in freely moving rats. Brain Research, 1993, 621, 50-58.	2.2	65
8	GABA modulation of the defense reaction induced by brain electrical stimulation. Physiology and Behavior, 1983, 31, 429-437.	2.1	62
9	Long-term effects of clomipramine and fluoxetine on dorsal periaqueductal grey-evoked innate defensive behaviours of the rat. Psychopharmacology, 2001, 155, 260-268.	3.1	51
10	Thresholds of electrically induced defence reaction of the rat: Short- and long-term adaptation mechanisms. Behavioural Brain Research, 1993, 58, 141-154.	2.2	50
11	Micturition and defensive behaviors are controlled by distinct neural networks within the dorsal periaqueductal gray and deep gray layer of the superior colliculus of the rat. Neuroscience Letters, 2000, 280, 45-48.	2.1	39
12	Logistic analysis of the defense reaction induced by electrical stimulation of the rat mesencephalic tectum. Neuroscience and Biobehavioral Reviews, 1990, 14, 473-479.	6.1	38
13	NMDA-coupled periaqueductal gray glycine receptors modulate anxioselective drug effects on plus-maze performance. Behavioural Brain Research, 1998, 90, 157-165.	2.2	34
14	Serotonin in the dorsal periaqueductal gray inhibits panic-like defensive behaviors in rats exposed to acute hypoxia. Neuroscience, 2015, 307, 191-198.	2.3	28
15	Neuroeffector mechanisms of the defense reaction in the rat. Physiology and Behavior, 1983, 31, 439-444.	2.1	27
16	A panic attack-like unusual stress reaction. Hormones and Behavior, 2008, 54, 584-591.	2.1	23
17	Evidence That the Periaqueductal Gray Matter Mediates the Facilitation of Panic-Like Reactions in Neonatally-Isolated Adult Rats. PLoS ONE, 2014, 9, e90726.	2.5	23
18	Acute effects of clomipramine and fluoxetine on dorsal periaqueductal grey-evoked unconditioned defensive behaviours of the rat. Psychopharmacology, 2002, 159, 138-144.	3.1	21

LUIZ SCHENBERG

#	Article	IF	CITATIONS
19	l-type calcium channels selectively control the defensive behaviors induced by electrical stimulation of dorsal periaqueductal gray and overlying collicular layers. Behavioural Brain Research, 2000, 111, 175-185.	2.2	20
20	Modulation of the cardiovascular defence response by low frequency stimulation of a deep somatic nerve in rats. Journal of the Autonomic Nervous System, 1995, 50, 347-354.	1.9	18
21	Evidence of a suffocation alarm system sensitive to clinically-effective treatments with the panicolytics clonazepam and fluoxetine. Journal of Psychopharmacology, 2014, 28, 1184-1188.	4.0	17
22	Elevated T-maze evaluation of anxiety and memory effects of NMDA/glycine-B site ligands injected into the dorsal periaqueductal gray matter and the superior colliculus of rats. Neuropharmacology, 2006, 51, 203-212.	4.1	16
23	Role of Periaqueductal Gray Matter in Hypertension in Spontaneously Hypertensive Rats. Hypertension, 1995, 26, 1125-1128.	2.7	16
24	Cardiovascular changes following acute and chronic chemical lesions of the dorsal periaqueductal gray in conscious rats. Journal of the Autonomic Nervous System, 1999, 76, 99-107.	1.9	13
25	Acute exposure to the insecticide O,S-dimethyl phosphoramidothioate (methamidophos) leads to impairment of cardiovascular reflexes in rats. Ecotoxicology and Environmental Safety, 2012, 80, 203-207.	6.0	13
26	Galanin subtype 1 and subtype 2 receptors mediate opposite anxiety-like effects in the rat dorsal raphe nucleus. Behavioural Brain Research, 2016, 314, 125-133.	2.2	12
27	Daily maternal separations during stress hyporesponsive period decrease the thresholds of panic-like behaviors to electrical stimulation of the dorsal periaqueductal gray of the adult rat. Behavioural Brain Research, 2018, 344, 132-144.	2.2	11
28	Neurones in the medullary raphe nuclei attenuate the cardiovascular responses evoked from the dorsolateral periaqueductal grey matter. Brain Research, 1994, 651, 236-240.	2.2	10
29	Role of pulmonary stretch receptors and sympathetic system in the inhibition of reflex bradycardia produced by chemical stimulation of the periaqueductal gray matter of the rat. Neuroscience, 2012, 210, 222-233.	2.3	10
30	In a rat model of panic, corticotropin responses to dorsal periaqueductal gray stimulation depend on physical exertion. Psychoneuroendocrinology, 2015, 53, 136-147.	2.7	10
31	Short-term full kindling of the amygdala dissociates natural and periaqueductal gray-evoked flight behaviors of the rat. Behavioural Brain Research, 2009, 199, 247-256.	2.2	9
32	Involvement of the purinergic system in central cardiovascular modulation at the level of the nucleus ambiguus of anaesthetized rats. Experimental Physiology, 2011, 96, 262-274.	2.0	8
33	On the verge of a respiratory-type panic attack: Selective activations of rostrolateral and caudoventrolateral periaqueductal gray matter following short-lasting escape to a low dose of potassium cyanide. Neuroscience, 2017, 348, 228-240.	2.3	8
34	Longâ€lasting marked inhibition of periaqueductal grayâ€evoked defensive behaviors in inescapablyâ€shocked rats. European Journal of Neuroscience, 2014, 39, 275-286.	2.6	7
35	Galanin microinjection into the dorsal periaqueductal gray matter produces paradigm-dependent anxiolytic effects. Brain Research Bulletin, 2016, 121, 42-47.	3.0	6
36	Effects of alprazolam and cannabinoid-related compounds in an animal model of panic attack. Behavioural Brain Research, 2017, 317, 508-514.	2.2	6

LUIZ SCHENBERG

#	Article	IF	CITATIONS
37	Dorsal periaqueductal gray matter-evoked panic-like behaviors are markedly inhibited by a low peripheral dose of thyrotropin releasing hormone. Psychoneuroendocrinology, 2010, 35, 262-271.	2.7	5
38	Methamidophos, an Organophosphorus Insecticide, Induces Pro-aggressive Behaviour in Mice. Neurotoxicity Research, 2017, 32, 398-408.	2.7	5
39	Methimazole-induced hypothyroidism inhibits the panic-like behaviors produced by electrical stimulation of dorsal periaqueductal gray matter of rats. Psychoneuroendocrinology, 2010, 35, 706-716.	2.7	3
