#	ARTICLE	IF	CITATIONS
1	Adrenal MT1 melatonin receptor expression is linked with seasonal variation in social behavior in male Siberian hamsters. <i>Hormones and Behavior</i> , 2022, 138, 105099.	1.0	8
2	Maternal stress and the maternal microbiome have sex-specific effects on offspring development and aggressive behavior in Siberian hamsters (<i>Phodopus sungorus</i>). <i>Hormones and Behavior</i> , 2022, 141, 105146.	1.0	9
3	Winter madness: Melatonin as a neuroendocrine regulator of seasonal aggression. <i>Journal of Experimental Zoology Part A: Ecological and Integrative Physiology</i> , 2022, 337, 873-889.	0.9	11
4	Maternal antibiotics disrupt microbiome, behavior, and temperature regulation in unexposed infant mice. <i>Developmental Psychobiology</i> , 2022, 64, .	0.9	5
5	Melatonin-dependent changes in neurosteroids are associated with increased aggression in a seasonally breeding rodent. <i>Journal of Neuroendocrinology</i> , 2021, 33, e12940.	1.2	11
6	The call of the wild: using non-model systems to investigate microbiome-behaviour relationships. <i>Journal of Experimental Biology</i> , 2021, 224, .	0.8	16
7	The ontogeny of personality: Repeatability of social and escape behaviors across developmental stages in Siberian hamsters (<i>Phodopus sungorus</i>). <i>Journal of Experimental Zoology Part A: Ecological and Integrative Physiology</i> , 2021, 335, .	0.9	2
8	Food restriction during development delays puberty but does not affect adult seasonal reproductive responses to food availability in Siberian hamsters (<i>Phodopus sungorus</i>). <i>Journal of Experimental Zoology Part A: Ecological and Integrative Physiology</i> , 2021, 335, 691-702.	0.9	0
9	Photoperiod modulates the gut microbiome and aggressive behavior in Siberian hamsters. <i>Journal of Experimental Biology</i> , 2020, 223, .	0.8	22
10	Melatonin mediates seasonal transitions in aggressive behavior and circulating androgen profiles in male Siberian hamsters. <i>Hormones and Behavior</i> , 2020, 117, 104608.	1.0	21
11	Seasonal patterns of melatonin alter aggressive phenotypes of female Siberian hamsters. <i>Journal of Neuroendocrinology</i> , 2020, 32, e12894.	1.2	8
12	Chemical sympathectomy reduces peripheral inflammatory responses to acute and chronic sleep fragmentation. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2020, 318, R781-R789.	0.9	21
13	Wintering Strategies. , 2019, , 588-598.		0
14	The parent-offspring microbiome and neurobehavioral development. <i>Behavioral and Brain Sciences</i> , 2019, 42, .	0.4	1
15	A gut feeling: Microbiome-brain-immune interactions modulate social and affective behaviors. <i>Hormones and Behavior</i> , 2018, 99, 41-49.	1.0	91
16	Physiological predictors of leptin vary during menses and ovulation in healthy women. <i>Reproductive Biology</i> , 2018, 18, 132-136.	0.9	8
17	Sickness-induced changes in physiology do not affect fecundity or same-sex behavior. <i>Physiology and Behavior</i> , 2018, 184, 68-77.	1.0	3
18	Acute intraperitoneal lipopolysaccharide influences the immune system in the absence of gut dysbiosis. <i>Physiological Reports</i> , 2018, 6, e13639.	0.7	9

#	ARTICLE	IF	CITATIONS
19	Interactions Among Sexual Activity, Menstrual Cycle Phase, and Immune Function in Healthy Women. <i>Journal of Sex Research</i> , 2018, 55, 1087-1095.	1.6	16
20	Endotoxin rapidly desensitizes the gonads to kisspeptin-induced luteinizing hormone release in male Siberian hamsters (<i>Phodopus sungorus</i>). <i>Journal of Experimental Biology</i> , 2018, 221, .	0.8	3
21	Hormonal Correlates of Exploratory and Play-Soliciting Behavior in Domestic Dogs. <i>Frontiers in Psychology</i> , 2018, 9, 1559.	1.1	8
22	Special Issue Dedicated to Dr. Timothy J Bartness. <i>Physiology and Behavior</i> , 2018, 190, 1-2.	1.0	2
23	<i>Aggressive Behavior</i> . , 2018, , 242-247.		9
24	Neural Androgen Synthesis and Aggression: Insights From a Seasonally Breeding Rodent. <i>Frontiers in Endocrinology</i> , 2018, 9, 136.	1.5	35
25	Early-life sickness may predispose Siberian hamsters to behavioral changes following alterations of the gut microbiome in adulthood. <i>Brain, Behavior, and Immunity</i> , 2018, 73, 571-583.	2.0	12
26	Glucose and insulin modulate sickness responses in male Siberian hamsters. <i>General and Comparative Endocrinology</i> , 2017, 242, 83-91.	0.8	9
27	Aggressive behaviours track transitions in seasonal phenotypes of female Siberian hamsters. <i>Functional Ecology</i> , 2017, 31, 1071-1081.	1.7	30
28	Lipid signaling and fat storage in the dark-eyed junco. <i>General and Comparative Endocrinology</i> , 2017, 247, 166-173.	0.8	3
29	Introduction to the Special Issue on Neuroendocrine-Immune Interactions: Implications for Integrative and Comparative Physiologists. <i>Hormones and Behavior</i> , 2017, 88, 1-3.	1.0	1
30	Exogenous kisspeptin enhances seasonal reproductive function in male Siberian hamsters. <i>Functional Ecology</i> , 2017, 31, 1220-1230.	1.7	6
31	Partnered sexual activity moderates menstrual cycle-related changes in inflammation markers in healthy women: an exploratory observational study. <i>Fertility and Sterility</i> , 2017, 107, 763-773.e3.	0.5	18
32	Introduction to ecoimmunology: An integrative approach. <i>Journal of Experimental Zoology Part A: Ecological and Integrative Physiology</i> , 2017, 327, 219-221.	0.9	4
33	A Return to Wisdom: Using Sickness Behaviors to Integrate Ecological and Translational Research. <i>Integrative and Comparative Biology</i> , 2017, 57, 1204-1213.	0.9	11
34	Overcoming neonatal sickness: Sex-specific effects of sickness on physiology and social behavior. <i>Physiology and Behavior</i> , 2017, 179, 324-332.	1.0	9
35	Effects of exogenous leptin on seasonal reproductive responses to interacting environmental cues in female Siberian hamsters. <i>General and Comparative Endocrinology</i> , 2017, 250, 95-103.	0.8	2
36	Sex-specific modulation of the gut microbiome and behavior in Siberian hamsters. <i>Brain, Behavior, and Immunity</i> , 2017, 60, 51-62.	2.0	59

#	ARTICLE	IF	CITATIONS
37	Neuroendocrine-immune circuits, phenotypes, and interactions. <i>Hormones and Behavior</i> , 2017, 87, 25-34.	1.0	70
38	Testosterone and immune-reproductive tradeoffs in healthy women. <i>Hormones and Behavior</i> , 2017, 88, 122-130.	1.0	13
39	Bi-directional actions of dehydroepiandrosterone and aggression in female Siberian hamsters. <i>Journal of Experimental Zoology</i> , 2016, 325, 116-121.	1.2	20
40	Timing of Maternal Immunization Affects Immunological and Behavioral Outcomes of Adult Offspring in Siberian Hamsters (<i>Phodopus sungorus</i>). <i>Journal of Experimental Zoology</i> , 2016, 325, 377-389.	1.2	3
41	Urinary volatile compounds differ across reproductive phenotypes and following aggression in male Siberian hamsters. <i>Physiology and Behavior</i> , 2016, 164, 58-67.	1.0	7
42	Food as a supplementary cue triggers seasonal changes in aggression, but not reproduction, in Siberian hamsters. <i>Physiology and Behavior</i> , 2016, 167, 298-308.	1.0	14
43	Empathy in prairie voles: Is this the consolation prize?. <i>Learning and Behavior</i> , 2016, 44, 303-304.	0.5	1
44	There's no place like biome: Can helminths restore the body's ecosystem?. <i>Brain, Behavior, and Immunity</i> , 2016, 51, 12-13.	2.0	0
45	Timothy J. Bartness. <i>Journal of Biological Rhythms</i> , 2016, 31, 6-11.	1.4	0
46	Photoperiod and aggression induce changes in ventral gland compounds exclusively in male Siberian hamsters. <i>Hormones and Behavior</i> , 2016, 81, 1-11.	1.0	10
47	Social isolation disrupts innate immune responses in both male and female prairie voles and enhances agonistic behavior in female prairie voles (<i>Microtus ochrogaster</i>). <i>Hormones and Behavior</i> , 2015, 70, 7-13.	1.0	32
48	Short-day aggression is independent of changes in cortisol or glucocorticoid receptors in male Siberian hamsters (<i>Phodopus sungorus</i>). <i>Journal of Experimental Zoology</i> , 2015, 323, 331-342.	1.2	25
49	The agonistic adrenal: melatonin elicits female aggression via regulation of adrenal androgens. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2015, 282, 20152080.	1.2	48
50	Vocal behaviour during aggressive encounters between Siberian hamsters, <i>Phodopus sungorus</i> . <i>Animal Behaviour</i> , 2015, 102, 85-93.	0.8	25
51	Body mass affects seasonal variation in sickness intensity in a seasonally-breeding rodent. <i>Journal of Experimental Biology</i> , 2015, 218, 1667-76.	0.8	14
52	Vocalizations convey sex, seasonal phenotype, and aggression in a seasonal mammal. <i>Physiology and Behavior</i> , 2015, 152, 143-150.	1.0	22
53	Sexual activity modulates shifts in ATH1/TH2 cytokine profile across the menstrual cycle: an observational study. <i>Fertility and Sterility</i> , 2015, 104, 1513-1521.e4.	0.5	32
54	Interaction of menstrual cycle phase and sexual activity predicts mucosal and systemic humoral immunity in healthy women. <i>Physiology and Behavior</i> , 2015, 152, 92-98.	1.0	18

#	ARTICLE	IF	CITATIONS
55	DHEA effects on brain and behavior: Insights from comparative studies of aggression. <i>Journal of Steroid Biochemistry and Molecular Biology</i> , 2015, 145, 261-272.	1.2	105
56	Ecoimmunology for psychoneuroimmunologists: Considering context in neuroendocrine-immune-behavior interactions. <i>Brain, Behavior, and Immunity</i> , 2015, 44, 9-16.	2.0	44
57	Leptin mediates seasonal variation in some but not all symptoms of sickness in Siberian hamsters. <i>Hormones and Behavior</i> , 2014, 66, 802-811.	1.0	10
58	Examining sources of variation in HPG axis function among individuals and populations of the dark-eyed junco. <i>Hormones and Behavior</i> , 2014, 65, 179-187.	1.0	46
59	Metabolic stressors and signals differentially affect energy allocation between reproduction and immune function. <i>General and Comparative Endocrinology</i> , 2014, 208, 21-29.	0.8	19
60	Associations between innate immune function and ectoparasites in wild rodent hosts. <i>Parasitology Research</i> , 2013, 112, 1763-1770.	0.6	21
61	Maternal immune activation affects litter success, size and neuroendocrine responses related to behavior in adult offspring. <i>Physiology and Behavior</i> , 2013, 119, 175-184.	1.0	35
62	Leptin, a neuroendocrine mediator of immune responses, inflammation, and sickness behaviors. <i>Hormones and Behavior</i> , 2012, 62, 272-279.	1.0	69
63	Photoperiod-dependent effects of neuronal nitric oxide synthase inhibition on aggression in Siberian hamsters. <i>Hormones and Behavior</i> , 2012, 61, 176-180.	1.0	18
64	Maternal Contact Differentially Modulates Central and Peripheral Oxytocin in Rat Pups During a Brief Regime of Mother-Pup Interaction that Induces a Filial Huddling Preference. <i>Journal of Neuroendocrinology</i> , 2012, 24, 831-840.	1.2	77
65	Leptin as a Physiological Mediator of Energetic Trade-Offs in Ecoimmunology: Implications for Disease. <i>Integrative and Comparative Biology</i> , 2011, 51, 505-513.	0.9	51
66	Beyond phytohaemagglutinin: assessing vertebrate immune function across ecological contexts. <i>Journal of Animal Ecology</i> , 2011, 80, 710-730.	1.3	255
67	Neuroendocrine-immune crosstalk in vertebrates and invertebrates: implications for host defence. <i>Functional Ecology</i> , 2011, 25, 29-39.	1.7	92
68	Response to exogenous kisspeptin varies according to sex and reproductive condition in Siberian hamsters (<i>Phodopus sungorus</i>). <i>General and Comparative Endocrinology</i> , 2011, 170, 172-179.	0.8	13
69	Trade-offs between reproductive coloration and innate immunity in a natural population of female sagebrush lizards. <i>Herpetological Journal</i> , 2011, 21, 131-134.	0.3	7
70	The glutamate agonist NMDA blocks gonadal regression and enhances antibody response to an immune challenge in Siberian hamsters (<i>Phodopus sungorus</i>). <i>Journal of Comparative Physiology B: Biochemical, Systemic, and Environmental Physiology</i> , 2010, 180, 267-277.	0.7	1
71	In vivo but not in vitro leptin enhances lymphocyte proliferation in Siberian hamsters (<i>Phodopus</i>) Tj ETQq1 1 0.784314 rgBT /Overlock 1 0.8	0.8	7
72	Exogenous insulin enhances humoral immune responses in short-day, but not long-day, Siberian hamsters (<i>Phodopus sungorus</i>). <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2010, 277, 2211-2218.	1.2	14

#	ARTICLE	IF	CITATIONS
73	Social defeat differentially affects immune responses in Siberian hamsters (<i>Phodopus sungorus</i>). <i>Physiology and Behavior</i> , 2010, 101, 53-58.	1.0	18
74	Food supplementation and testosterone interact to influence reproductive behavior and immune function in <i>Sceloporus graciosus</i> . <i>Hormones and Behavior</i> , 2010, 57, 134-139.	1.0	69
75	Vasopressin cell groups exhibit strongly divergent responses to copulation and male-male interactions in mice. <i>Hormones and Behavior</i> , 2010, 58, 368-377.	1.0	69
76	Human disturbance alters endocrine and immune responses in the Galapagos marine iguana (<i>Amblyrhynchus cristatus</i>). <i>Hormones and Behavior</i> , 2010, 58, 792-799.	1.0	132
77	Ecological immunology: The organism in context. <i>Integrative and Comparative Biology</i> , 2009, 49, 246-253.	0.9	104
78	Leptin increases maternal investment. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2009, 276, 4003-4011.	1.2	33
79	Photoperiod and food restriction differentially affect reproductive and immune responses in Siberian hamsters (<i>Phodopus sungorus</i>). <i>Functional Ecology</i> , 2009, 23, 979-988.	1.7	46
80	Aggressive encounters differentially affect serum dehydroepiandrosterone and testosterone concentrations in male Siberian hamsters (<i>Phodopus sungorus</i>). <i>Hormones and Behavior</i> , 2009, 56, 376-381.	1.0	30
81	Photoperiod and Testosterone Interact to Drive Seasonal Changes in Kisspeptin Expression in Siberian Hamsters (<i>Phodopus sungorus</i>). <i>Journal of Neuroendocrinology</i> , 2008, 20, 1339-1347.	1.2	53
82	Novel mechanisms for neuroendocrine regulation of aggression. <i>Frontiers in Neuroendocrinology</i> , 2008, 29, 476-489.	2.5	195
83	Exogenous kisspeptin does not alter photoperiod-induced gonadal regression in Siberian hamsters (<i>Phodopus sungorus</i>). <i>General and Comparative Endocrinology</i> , 2008, 156, 552-558.	0.8	37
84	The role of androgens in the mediation of seasonal territorial aggression in male Siberian hamsters (<i>Phodopus sungorus</i>). <i>Physiology and Behavior</i> , 2008, 95, 633-640.	1.0	46
85	Experimentally induced sickness decreases food intake, but not hoarding, in Siberian hamsters (<i>Phodopus sungorus</i>). <i>Behavioural Processes</i> , 2008, 79, 195-198.	0.5	7
86	Incubation Environment Affects Immune System Development in a Turtle with Environmental Sex Determination. <i>Journal of Herpetology</i> , 2008, 42, 536-541.	0.2	33
87	Female mice respond differently to costly foraging versus food restriction. <i>Journal of Experimental Biology</i> , 2008, 211, 2214-2223.	0.8	16
88	Recent advances in reproductive neuroendocrinology: a role for RFamide peptides in seasonal reproduction?. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2008, 275, 1943-1951.	1.2	34
89	Short-day increases in aggression are independent of circulating gonadal steroids in female Siberian hamsters (<i>Phodopus sungorus</i>). <i>Hormones and Behavior</i> , 2007, 52, 183-190.	1.0	56
90	Suppression of kisspeptin expression and gonadotropic axis sensitivity following exposure to inhibitory day lengths in female Siberian hamsters. <i>Hormones and Behavior</i> , 2007, 52, 492-498.	1.0	77

#	ARTICLE	IF	CITATIONS
91	Environmental Control of Kisspeptin: Implications for Seasonal Reproduction. <i>Endocrinology</i> , 2007, 148, 1158-1166.	1.4	179
92	Metabolic stress suppresses humoral immune function in long-day, but not short-day, Siberian hamsters (<i>Phodopus sungorus</i>). <i>Journal of Comparative Physiology B: Biochemical, Systemic, and Environmental Physiology</i> , 2007, 177, 339-347.	0.7	34
93	Behavioral and physiological responses to experimentally elevated testosterone in female dark-eyed juncos (<i>Junco hyemalis carolinensis</i>). <i>Hormones and Behavior</i> , 2006, 50, 200-207.	1.0	112
94	Pleiotropic contributions of nitric oxide to aggressive behavior. <i>Neuroscience and Biobehavioral Reviews</i> , 2006, 30, 346-355.	2.9	55
95	Diet quality affects egg size and number but does not reduce maternal antibody transmission in Japanese quail <i>Coturnix japonica</i> . <i>Journal of Animal Ecology</i> , 2005, 74, 1051-1058.	1.3	54
96	Leptin regulates energetic tradeoffs between body fat and humoral immunity. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2005, 272, 1845-1850.	1.2	57
97	Gonadal hormones modulate the display of submissive behavior in socially defeated female Syrian hamsters. <i>Hormones and Behavior</i> , 2005, 47, 569-575.	1.0	35
98	Persistent photoperiodic effects on immunological responsiveness: shedding light on immunity. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2004, 286, R18-R19.	0.9	0
99	Seasonal Patterns of Stress, Disease, and Sickness Responses. <i>Current Directions in Psychological Science</i> , 2004, 13, 198-201.	2.8	18
100	The energetics of immunity: a neuroendocrine link between energy balance and immune function. <i>Hormones and Behavior</i> , 2004, 45, 173-180.	1.0	195
101	Adrenal hormones mediate melatonin-induced increases in aggression in male Siberian hamsters (<i>Phodopus sungorus</i>). <i>Hormones and Behavior</i> , 2004, 46, 582-591.	1.0	86
102	Social interactions differentially affect reproductive and immune responses of Siberian hamsters. <i>Physiology and Behavior</i> , 2004, 83, 73-79.	1.0	31
103	Studies of Food Intake: Lessons from Nontraditionally Studied Species. , 2004, , 423-467.		9
104	Social interactions differentially affect reproductive and immune responses of Siberian hamsters. <i>Physiology and Behavior</i> , 2004, 83, 73-9.	1.0	23
105	Brain mast cells are influenced by chemosensory cues associated with estrus induction in female prairie voles (<i>Microtus ochrogaster</i>). <i>Hormones and Behavior</i> , 2003, 44, 377-384.	1.0	22
106	Reductions in total body fat decrease humoral immunity. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2003, 270, 905-911.	1.2	123
107	Photoperiod modulates the effects of norepinephrine on lymphocyte proliferation in Siberian hamsters. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2003, 285, R873-R879.	0.9	17
108	Seasonal Changes in Adiposity: the Roles of the Photoperiod, Melatonin and Other Hormones, and Sympathetic Nervous System. <i>Experimental Biology and Medicine</i> , 2002, 227, 363-376.	1.1	182
