## Andrea Gajardo-Vidal

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/9070280/publications.pdf

Version: 2024-02-01

#	Article	IF	CITATIONS
1	The impact of sample size on the reproducibility of voxel-based lesion-deficit mappings. Neuropsychologia, 2018, 115, 101-111.	1.6	67
2	Damage to Broca's area does not contribute to long-term speech production outcome after stroke. Brain, 2021, 144, 817-832.	7.6	65
3	How right hemisphere damage after stroke can impair speech comprehension. Brain, 2018, 141, 3389-3404.	7.6	53
4	How distributed processing produces false negatives in voxel-based lesion-deficit analyses. Neuropsychologia, 2018, 115, 124-133.	1.6	30
5	Using transcranial magnetic stimulation of the undamaged brain to identify lesion sites that predict language outcome after stroke. Brain, 2017, 140, 1729-1742.	7.6	16
6	Generalizing post-stroke prognoses from research data to clinical data. NeuroImage: Clinical, 2019, 24, 102005.	2.7	12
7	Paradoxical lesions, plasticity and active inference. Brain Communications, 2020, 2, fcaa164.	3.3	11
8	Brain regions that support accurate speech production after damage to Broca's area. Brain Communications, 2021, 3, fcab230.	3.3	9
9	Lesions that do or do not impair digit span: a study of 816 stroke survivors. Brain Communications, 2021, 3, fcab031.	3.3	8
10	A functional dissociation of the left frontal regions that contribute to single word production tasks. Neurolmage, 2021, 245, 118734.	4.2	7
11	Reply: Broca's area: why was neurosurgery neglected for so long when seeking to re-establish the scientific truth? <i>and</i> Where is the speech production area? Evidence from direct cortical electrical stimulation mapping. Brain, 2021, 144, e62-e62.	7.6	2
12	Better long-term speech outcomes in stroke survivors who received early clinical speech and language therapy: What's driving recovery?. Neuropsychological Rehabilitation, 2022, 32, 2319-2341.	1.6	2
13	Right cerebral motor areas that support accurate speech production following damage to cerebellar speech areas. Neurolmage: Clinical, 2021, 32, 102820.	2.7	2
14	Dissociating the functions of three left posterior superior temporal regions that contribute to speech perception and production. NeuroImage, 2021, 245, 118764.	4.2	2
