#	ARTICLE	IF	CITATIONS
1	Stable Early Maternal Report of Behavioral Inhibition Predicts Lifetime Social Anxiety Disorder in Adolescence. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2009, 48, 928-935.	0.5	440
2	Attention biases to threat and behavioral inhibition in early childhood shape adolescent social withdrawal.. <i>Emotion</i> , 2010, 10, 349-357.	1.8	257
3	Impact of Behavioral Inhibition and Parenting Style on Internalizing and Externalizing Problems from Early Childhood through Adolescence. <i>Journal of Abnormal Child Psychology</i> , 2009, 37, 1063-1075.	3.5	248
4	Attention Biases to Threat Link Behavioral Inhibition to Social Withdrawal over Time in Very Young Children. <i>Journal of Abnormal Child Psychology</i> , 2011, 39, 885-895.	3.5	222
5	A History of Childhood Behavioral Inhibition and Enhanced Response Monitoring in Adolescence Are Linked to Clinical Anxiety. <i>Biological Psychiatry</i> , 2009, 65, 445-448.	1.3	209
6	Striatal Functional Alteration in Adolescents Characterized by Early Childhood Behavioral Inhibition. <i>Journal of Neuroscience</i> , 2006, 26, 6399-6405.	3.6	206
7	Temperament and Anxiety Disorders. <i>Child and Adolescent Psychiatric Clinics of North America</i> , 2005, 14, 681-706.	1.9	194
8	Attention Bias Modification Treatment for Pediatric Anxiety Disorders: A Randomized Controlled Trial. <i>American Journal of Psychiatry</i> , 2012, 169, 213-230.	7.2	194
9	Attention biases, anxiety, and development: toward or away from threats or rewards?. <i>Depression and Anxiety</i> , 2012, 29, 282-294.	4.1	192
10	Attention alters neural responses to evocative faces in behaviorally inhibited adolescents. <i>NeuroImage</i> , 2007, 35, 1538-1546.	4.2	188
11	Variations in the serotonin-transporter gene are associated with attention bias patterns to positive and negative emotion faces. <i>Biological Psychology</i> , 2010, 83, 269-271.	2.2	150
12	Striatal Functional Alteration During Incentive Anticipation in Pediatric Anxiety Disorders. <i>American Journal of Psychiatry</i> , 2012, 169, 205-212.	7.2	148
13	Neural Correlates of Reward Processing in Adolescents With a History of Inhibited Temperament. <i>Psychological Science</i> , 2009, 20, 1009-1018.	3.3	137
14	A developmental neuroscience perspective on affect-biased attention. <i>Developmental Cognitive Neuroscience</i> , 2016, 21, 26-41.	4.0	114
15	The Impact of Reward, Punishment, and Frustration on Attention in Pediatric Bipolar Disorder. <i>Biological Psychiatry</i> , 2005, 58, 532-539.	1.3	105
16	Digital disruption? Maternal mobile device use is related to infant social&emotional functioning. <i>Developmental Science</i> , 2018, 21, e12610.	2.4	100
17	The relation between electroencephalogram asymmetry and attention biases to threat at baseline and under stress. <i>Brain and Cognition</i> , 2013, 82, 337-343.	1.8	95
18	Maternal anxiety predicts attentional bias towards threat in infancy.. <i>Emotion</i> , 2017, 17, 874-883.	1.8	94

#	ARTICLE	IF	CITATIONS
19	Patterns of Neural Connectivity During an Attention Bias Task Moderate Associations Between Early Childhood Temperament and Internalizing Symptoms in Young Adulthood. <i>Biological Psychiatry</i> , 2013, 74, 273-279.	1.3	87
20	Individual differences in children's performance during an emotional Stroop task: A behavioral and electrophysiological study. <i>Brain and Cognition</i> , 2003, 52, 33-51.	1.8	81
21	Developmental Relations Among Behavioral Inhibition, Anxiety, and Attention Biases to Threat and Positive Information. <i>Child Development</i> , 2017, 88, 141-155.	3.0	81
22	Neural correlates of attention biases, behavioral inhibition, and social anxiety in children: An ERP study. <i>Developmental Cognitive Neuroscience</i> , 2016, 19, 200-210.	4.0	77
23	Lasting associations between early-childhood temperament and late-adolescent reward-circuitry response to peer feedback. <i>Development and Psychopathology</i> , 2014, 26, 229-243.	2.3	76
24	Frontolimbic functioning during threat-related attention: Relations to early behavioral inhibition and anxiety in children. <i>Biological Psychology</i> , 2017, 122, 98-109.	2.2	74
25	Striatal responses to negative monetary outcomes differ between temperamentally inhibited and non-inhibited adolescents. <i>Neuropsychologia</i> , 2011, 49, 479-485.	1.6	73
26	Variations of the flanker paradigm: Assessing selective attention in young children. <i>Behavior Research Methods</i> , 2007, 39, 62-70.	4.0	72
27	Association between attention bias to threat and anxiety symptoms in children and adolescents. <i>Depression and Anxiety</i> , 2018, 35, 229-238.	4.1	72
28	A Behavioral and Electrophysiological Study of Children's Selective Attention Under Neutral and Affective Conditions. <i>Journal of Cognition and Development</i> , 2005, 6, 89-118.	1.3	68
29	Association of DRD4 with attention problems in normal childhood development. <i>Psychiatric Genetics</i> , 2001, 11, 25-29.	1.1	67
30	Startle Response in Behaviorally Inhibited Adolescents With a Lifetime Occurrence of Anxiety Disorders. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2009, 48, 610-617.	0.5	67
31	Patterns of sustained attention in infancy shape the developmental trajectory of social behavior from toddlerhood through adolescence.. <i>Developmental Psychology</i> , 2010, 46, 1723-1730.	1.6	67
32	Attention Biases Towards and Away from Threat Mark the Relation between Early Dysregulated Fear and the Later Emergence of Social Withdrawal. <i>Journal of Abnormal Child Psychology</i> , 2015, 43, 1067-1078.	3.5	67
33	Can't stop believing: inhibitory control and resistance to misleading testimony. <i>Developmental Science</i> , 2014, 17, 965-976.	2.4	65
34	Behavioral and Electrophysiological Markers of Selective Attention in Children of Parents with a History of Depression. <i>Biological Psychiatry</i> , 2006, 60, 1131-1138.	1.3	64
35	Salivary cortisol levels and infant temperament shape developmental trajectories in boys at risk for behavioral maladjustment. <i>Psychoneuroendocrinology</i> , 2008, 33, 916-925.	2.7	64
36	Attention to novelty in behaviorally inhibited adolescents moderates risk for anxiety. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2009, 50, 1365-1372.	5.2	60

#	ARTICLE	IF	CITATIONS
37	The role of classroom quality in ameliorating the academic and social risks associated with difficult temperament.. <i>School Psychology Quarterly</i> , 2011, 26, 175-188.	2.0	60
38	Sensitivity to social and non-social threats in temperamentally shy children at risk for anxiety. <i>Developmental Science</i> , 2014, 17, 239-247.	2.4	58
39	Threat-related attention bias in socioemotional development: A critical review and methodological considerations. <i>Developmental Review</i> , 2019, 51, 31-57.	4.7	57
40	Linking Gene, Brain, and Behavior. <i>Psychological Science</i> , 2009, 20, 831-837.	3.3	54
41	Longitudinal study of striatal activation to reward and loss anticipation from mid-adolescence into late adolescence/early adulthood. <i>Brain and Cognition</i> , 2014, 89, 51-60.	1.8	53
42	Patterns of attention to threat across tasks in behaviorally inhibited children at risk for anxiety. <i>Developmental Science</i> , 2017, 20, e12391.	2.4	48
43	Temperament and Parenting Styles in Early Childhood Differentially Influence Neural Response to Peer Evaluation in Adolescence. <i>Journal of Abnormal Child Psychology</i> , 2015, 43, 863-874.	3.5	45
44	Developmental Differences in Infants' Attention to Social and Nonsocial Threats. <i>Infancy</i> , 2017, 22, 403-415.	1.6	42
45	Alterations in amygdala functional connectivity reflect early temperament. <i>Biological Psychology</i> , 2014, 103, 248-254.	2.2	40
46	Navigating Through the Experienced Environment: Insights From Mobile Eye Tracking. <i>Current Directions in Psychological Science</i> , 2020, 29, 286-292.	5.3	40
47	Temperamental contributions to children's performance in an emotion-word processing task: A behavioral and electrophysiological study. <i>Brain and Cognition</i> , 2007, 65, 22-35.	1.8	39
48	DRD4 and striatal modulation of the link between childhood behavioral inhibition and adolescent anxiety. <i>Social Cognitive and Affective Neuroscience</i> , 2014, 9, 445-453.	3.0	38
49	Application of Cognitive Neuroscience Techniques to the Study of Anxiety-Related Processing Biases in Children. , 0, , 183-205.		37
50	Temperament and Attention as Core Mechanisms in the Early Emergence of Anxiety. <i>Contributions To Human Development</i> , 2014, 26, 42-56.	0.7	37
51	Biobehavioral Markers of Attention Bias Modification in Temperamental Risk for Anxiety: A Randomized Control Trial. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2018, 57, 103-110.	0.5	37
52	Through the Looking Glass: Temperament and Emotion as Separate and Interwoven Constructs. , 2019, , 139-168.		37
53	Longitudinal relations among exuberance, externalizing behaviors, and attentional bias to reward: the mediating role of effortful control. <i>Developmental Science</i> , 2016, 19, 853-862.	2.4	36
54	The impact of negative affect on attention patterns to threat across the first 2 years of life.. <i>Developmental Psychology</i> , 2017, 53, 2219-2232.	1.6	36

#	ARTICLE	IF	CITATIONS
55	Emerging Adulthood Brain Development. , 2014, , .		35
56	Speech presentation cues moderate frontal EEG asymmetry in socially withdrawn young adults. Brain and Cognition, 2012, 78, 156-162.	1.8	34
57	Impact of attention biases to threat and effortful control on individual variations in negative affect and social withdrawal in very young children. Journal of Experimental Child Psychology, 2016, 141, 210-221.	1.4	34
58	Reward and punishment sensitivity in shy and non-shy adults: Relations between social and motivated behavior. Personality and Individual Differences, 2006, 40, 699-711.	2.9	33
59	Early temperament, propensity for risk-taking and adolescent substance-related problems: A prospective multi-method investigation. Addictive Behaviors, 2010, 35, 1148-1151.	3.0	33
60	ENDURING INFLUENCE OF EARLY TEMPERAMENT ON NEURAL MECHANISMS MEDIATING ATTENTION-EMOTION CONFLICT IN ADULTS. Depression and Anxiety, 2014, 31, 53-62.	4.1	33
61	Early childhood temperament predicts substance use in young adults. Translational Psychiatry, 2012, 2, e157-e157.	4.8	29
62	Trajectories of Infants's™ Biobehavioral Development: Timing and Rate of Aâ€Notâ€B Performance Gains and EEG Maturation. Child Development, 2018, 89, 711-724.	3.0	28
63	Opportunities for Neurodevelopmental Plasticity From Infancy Through Early Adulthood. Child Development, 2018, 89, 687-697.	3.0	27
64	A Methodological Case Study with Mobile Eye-Tracking of Child Interaction in a Science Museum. TechTrends, 2018, 62, 509-517.	2.3	27
65	Identification of emotional facial expressions among behaviorally inhibited adolescents with lifetime anxiety disorders. Cognition and Emotion, 2015, 29, 372-382.	2.0	26
66	Different Psychophysiological and Behavioral Responses Elicited by Frustration in Pediatric Bipolar Disorder and Severe Mood Dysregulation. American Journal of Psychiatry, 2007, 164, 309.	7.2	26
67	Young Children's Affective Responses to Acceptance and Rejection From Peers: A Computerâ€based Task Sensitive to Variation in Temperamental Shyness and Gender. Social Development, 2013, 22, 146-162.	1.3	25
68	ALTERED TOPOGRAPHY OF INTRINSIC FUNCTIONAL CONNECTIVITY IN CHILDHOOD RISK FOR SOCIAL ANXIETY. Depression and Anxiety, 2016, 33, 995-1004.	4.1	25
69	The importance of using multiple outcome measures in infant research. Infancy, 2020, 25, 420-437.	1.6	25
70	Deficits in inhibitory force control in young adults with ADHD. Neuropsychologia, 2017, 99, 172-178.	1.6	24
71	Developmental patterns of anger from infancy to middle childhood predict problem behaviors at age 8.. Developmental Psychology, 2018, 54, 2090-2100.	1.6	24
72	Intergenerational transmission of attentional bias and anxiety. Developmental Science, 2019, 22, e12772.	2.4	23

#	ARTICLE	IF	CITATIONS
73	Biased attention to threat and anxiety: On taking a developmental approach. <i>Journal of Experimental Psychopathology</i> , 2019, 10, 204380871986071.	0.8	22
74	Stationary and ambulatory attention patterns are differentially associated with early temperamental risk for socioemotional problems: Preliminary evidence from a multimodal eye-tracking investigation. <i>Development and Psychopathology</i> , 2019, 31, 971-988.	2.3	21
75	Personality development in the context of individual traits and parenting dynamics. <i>New Ideas in Psychology</i> , 2019, 53, 37-46.	1.9	18
76	Temperament moderates developmental changes in vigilance to emotional faces in infants: Evidence from an eye-tracking study. <i>Developmental Psychobiology</i> , 2020, 62, 339-352.	1.6	17
77	Variable- and person-centered approaches to affect-biased attention in infancy reveal unique relations with infant negative affect and maternal anxiety. <i>Scientific Reports</i> , 2021, 11, 1719.	3.3	17
78	Neural correlates of attention bias to masked facial threat cues: Examining children at-risk for social anxiety disorder. <i>NeuroImage: Clinical</i> , 2018, 19, 202-212.	2.7	14
79	Biased Attention to Threat: Answering Old Questions With Young Infants. <i>Current Directions in Psychological Science</i> , 2019, 28, 534-539.	5.3	13
80	Attention Mechanisms in Behavioral Inhibition: Exploring and Exploiting the Environment. , 2018, , 237-261.		12
81	Individual differences in infancy research: Letting the baby stand out from the crowd. <i>Infancy</i> , 2020, 25, 438-457.	1.6	12
82	Individual dynamics of delta-beta coupling: using a multilevel framework to examine inter- and intraindividual differences in relation to social anxiety and behavioral inhibition. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2021, 62, 771-779.	5.2	12
83	Dyadic behavioral synchrony between behaviorally inhibited and non-inhibited peers is associated with concordance in EEG frontal Alpha asymmetry and Delta-Beta coupling. <i>Biological Psychology</i> , 2021, 159, 108018.	2.2	12
84	Temperament Development, Theories of. , 2015, , 191-198.		10
85	Parent-to-Child Anxiety Transmission Through Dyadic Social Dynamics: A Dynamic Developmental Model. <i>Clinical Child and Family Psychology Review</i> , 2022, 25, 110-129.	4.5	10
86	Effortful Control in Adolescence: Individual Differences within a Unique Developmental Window. , 2015, , 78-100.		9
87	Dopaminergic associations between behavioral inhibition, executive functioning, and anxiety in development. <i>Developmental Review</i> , 2021, 60, 100966.	4.7	9
88	Profiles of Naturalistic Attentional Trajectories Associated with Internalizing Behaviors in School-Age Children: A Mobile Eye Tracking Study. <i>Research on Child and Adolescent Psychopathology</i> , 2022, 50, 637-648.	2.3	9
89	Representation of response alternatives in human presupplementary motor area: Multi-voxel pattern analysis in a go/no-go task. <i>Neuropsychologia</i> , 2014, 56, 110-118.	1.6	8
90	Integrating high-density ERP and fMRI measures of face-elicited brain activity in 9-12-year-old children: An ERP source localization study. <i>NeuroImage</i> , 2019, 184, 599-608.	4.2	8

#	ARTICLE	IF	CITATIONS
91	Do you see what I mean?: Using mobile eye tracking to capture parent-child dynamics in the context of anxiety risk. <i>Development and Psychopathology</i> , 2022, 34, 997-1012.	2.3	8
92	Mobile Eye Tracking Captures Changes in Attention Over Time During a Naturalistic Threat Paradigm in Behaviorally Inhibited Children. <i>Affective Science</i> , 2021, 2, 495-505.	2.6	8
93	The role of temperament in somatic complaints among young female adults. <i>Journal of Health Psychology</i> , 2012, 17, 26-35.	2.3	7
94	Young children's neural processing of their mother's voice: An fMRI study. <i>Neuropsychologia</i> , 2019, 122, 11-19.	1.6	7
95	Moderating effects of environmental stressors on the development of attention to threat in infancy. <i>Developmental Psychobiology</i> , 2022, 64, e22241.	1.6	7
96	From parents to children and back again: Bidirectional processes in the transmission and development of depression and anxiety. <i>Depression and Anxiety</i> , 2021, 38, 1198-1200.	4.1	7
97	The impact of prenatal maternal stress due to potentially traumatic events on child temperament: A systematic review. <i>Developmental Psychobiology</i> , 2021, 63, e22195.	1.6	6
98	Attention Biases to Threat in Infants and Parents: Links to Parental and Infant Anxiety Dispositions. <i>Research on Child and Adolescent Psychopathology</i> , 2022, 50, 387-402.	2.3	6
99	Pupil responses to dynamic negative facial expressions of emotion in infants and parents. <i>Developmental Psychobiology</i> , 2021, 63, e22190.	1.6	6
100	Young children's behavioral and neural responses to peer feedback relate to internalizing problems. <i>Developmental Cognitive Neuroscience</i> , 2019, 36, 100610.	4.0	5
101	The emergence of childhood bipolar disorder: a prospective study from 4 months to 7 years of age. <i>Journal of Applied Developmental Psychology</i> , 2002, 23, 431-450.	1.7	4
102	Implementation of the diffusion model on dot-probe task performance in children with behavioral inhibition. <i>Psychological Research</i> , 2022, 86, 831-843.	1.7	4
103	Psychometric properties of infant electroencephalography: Developmental stability, reliability, and construct validity of frontal alpha asymmetry and delta-beta coupling. <i>Developmental Psychobiology</i> , 2021, 63, e22178.	1.6	4
104	Infant Emotion Development and Temperament. , 2020, , 715-741.		3
105	Sharing in the Family System: Contributions of Parental Emotional Expressiveness and Children's Physiological Regulation. <i>Parenting</i> , 2021, 21, 332-356.	1.4	3
106	Next Steps: Behavioral Inhibition as a Model System. , 2018, , 357-372.		3
107	The social learning of threat and safety in the family: Parent-child transmission of social fears via verbal information. <i>Developmental Psychobiology</i> , 2022, 64, e22257.	1.6	3
108	Relations between social attention, expressed positive affect and behavioral inhibition during play.. <i>Developmental Psychology</i> , 2022, 58, 2036-2048.	1.6	3
