Karin Landerl

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/9131746/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Developmental dyscalculia and basic numerical capacities: a study of 8–9-year-old students. Cognition, 2004, 93, 99-125.	1.1	750
2	Development of word reading fluency and spelling in a consistent orthography: An 8-year follow-up Journal of Educational Psychology, 2008, 100, 150-161.	2.1	538
3	The impact of orthographic consistency on dyslexia: A German-English comparison. Cognition, 1997, 63, 315-334.	1.1	493
4	Dyslexia and dyscalculia: Two learning disorders with different cognitive profiles. Journal of Experimental Child Psychology, 2009, 103, 309-324.	0.7	321
5	The double-deficit hypothesis and difficulties in learning to read a regular orthography Journal of Educational Psychology, 2000, 92, 668-680.	2.1	321
6	Comorbidity of learning disorders: prevalence and familial transmission. Journal of Child Psychology and Psychiatry and Allied Disciplines, 2010, 51, 287-294.	3.1	309
7	Predictors of developmental dyslexia in European orthographies with varying complexity. Journal of Child Psychology and Psychiatry and Allied Disciplines, 2013, 54, 686-694.	3.1	307
8	Cognitive mechanisms underlying reading and spelling development in five European orthographies. Learning and Instruction, 2014, 29, 65-77.	1.9	293
9	Differences in Phonological Recoding in German- and English-Speaking Children. Scientific Studies of Reading, 1998, 2, 31-54.	1.3	267
10	Naming Speed and Reading: From Prediction to Instruction. Reading Research Quarterly, 2010, 45, 341-362.	1.8	258
11	The relationship of phonemic awareness to reading acquisition: More consequence than precondition but still important. Cognition, 1991, 40, 219-249.	1.1	210
12	Poor Reading: A Deficit in Skill-Automatization or a Phonological Deficit?. Scientific Studies of Reading, 1998, 2, 321-340.	1.3	206
13	Phonological Awareness and Rapid Automatized Naming as Longitudinal Predictors of Reading in Five Alphabetic Orthographies with Varying Degrees of Consistency. Scientific Studies of Reading, 2019, 23, 220-234.	1.3	174
14	Deficits in phoneme segmentation are not the core problem of dyslexia: Evidence from German and English children. Applied Psycholinguistics, 2000, 21, 243-262.	0.8	171
15	RAN Is Not a Measure of Orthographic Processing. Evidence From the Asymmetric German Orthography. Scientific Studies of Reading, 2009, 13, 1-25.	1.3	162
16	Typical and atypical development of basic numerical skills in elementary school. Journal of Experimental Child Psychology, 2009, 103, 546-565.	0.7	151
17	Cognitive Risk Factors for Specific Learning Disorder. Journal of Learning Disabilities, 2016, 49, 272-281.	1.5	143
18	Double Dissociation Between Reading and Spelling Deficits. Scientific Studies of Reading, 2009, 13, 359-382.	1.3	124

KARIN LANDERL

#	Article	IF	CITATIONS
19	Naming speed in dyslexia and dyscalculia. Learning and Individual Differences, 2008, 18, 224-236.	1.5	115
20	Subitizing and counting in typical and atypical development. Developmental Science, 2011, 14, 280-291.	1.3	115
21	Training reading fluency in dysfluent readers with high reading accuracy: Word specific effects but low transfer to untrained words. Annals of Dyslexia, 2004, 54, 89-113.	1.2	88
22	Word recognition deficits in German: more evidence from a representative sample. Dyslexia, 2001, 7, 183-196.	0.8	84
23	Genome-wide association scan identifies new variants associated with a cognitive predictor of dyslexia. Translational Psychiatry, 2019, 9, 77.	2.4	82
24	The role of rhyme awareness in learning to read a regular orthography. British Journal of Developmental Psychology, 1994, 12, 469-484.	0.9	71
25	Influences of orthographic consistency and reading instruction on the development of nonword reading skills. European Journal of Psychology of Education, 2000, 15, 239-257.	1.3	70
26	Effects of orthographic consistency on eye movement behavior: German and English children and adults process the same words differently. Journal of Experimental Child Psychology, 2015, 130, 92-105.	0.7	65
27	Basic number processing deficits in developmental dyscalculia: Evidence from eye tracking. Cognitive Development, 2009, 24, 371-386.	0.7	63
28	Development of numerical processing in children with typical and dyscalculic arithmetic skills—a longitudinal study. Frontiers in Psychology, 2013, 4, 459.	1.1	63
29	Intrusion of orthographic knowledge on phoneme awareness: Strong in normal readers, weak in dyslexic readers. Applied Psycholinguistics, 1996, 17, 1-14.	0.8	61
30	Genetic analysis of dyslexia candidate genes in the European cross-linguistic NeuroDys cohort. European Journal of Human Genetics, 2014, 22, 675-680.	1.4	59
31	Genome-wide association study reveals new insights into the heritability and genetic correlates of developmental dyslexia. Molecular Psychiatry, 2021, 26, 3004-3017.	4.1	56
32	White matter alterations and tract lateralization in children with dyslexia and isolated spelling deficits. Human Brain Mapping, 2019, 40, 765-776.	1.9	54
33	The Transition From Sublexical to Lexical Processing in a Consistent Orthography: An Eye-Tracking Study. Scientific Studies of Reading, 2014, 18, 224-233.	1.3	49
34	Repeated Reading of Syllables Among Finnish-Speaking Children With Poor Reading Skills. Scientific Studies of Reading, 2010, 14, 317-340.	1.3	47
35	Phonological and morphological consistency in the acquisition of vowel duration spelling in Dutch and German. Journal of Experimental Child Psychology, 2005, 92, 322-344.	0.7	39
36	Understanding comorbidity of learning disorders: taskâ€dependent estimates of prevalence. Journal of Child Psychology and Psychiatry and Allied Disciplines, 2019, 60, 286-294.	3.1	39

KARIN LANDERL

#	Article	IF	CITATIONS
37	Training reading fluency: is it important to practice reading aloud and is generalization possible?. Annals of Dyslexia, 2008, 58, 59-79.	1.2	37
38	Temporal processing, attention, and learning disorders. Learning and Individual Differences, 2010, 20, 393-401.	1.5	36
39	The relation between language and arithmetic in bilinguals: insights from different stages of language acquisition. Frontiers in Psychology, 2015, 6, 265.	1.1	36
40	Cognitive Precursors of Reading: A Cross-Linguistic Perspective. Scientific Studies of Reading, 2022, 26, 111-124.	1.3	36
41	Training reading fluency among poor readers of German: many ways to the goal. Annals of Dyslexia, 2008, 58, 115-137.	1.2	35
42	Magnetoencephalographic Signatures of Numerosity Discrimination in Fetuses and Neonates. Developmental Neuropsychology, 2014, 39, 316-329.	1.0	35
43	Categorization of vowel length in German poor spellers: An orthographically relevant phonological distinction. Applied Psycholinguistics, 2003, 24, 523-538.	0.8	33
44	Reading and Spelling Development Across Languages Varying in Orthographic Consistency: Do Their Paths Cross?. Child Development, 2020, 91, e266-e279.	1.7	33
45	The Influences of Syllable Structure and Reading Ability on the Development of Phoneme Awareness: A Longitudinal, Cross-Linguistic Study. Scientific Studies of Reading, 2010, 14, 464-484.	1.3	32
46	Home Literacy Environment and Early Literacy Development Across Languages Varying in Orthographic Consistency. Frontiers in Psychology, 2020, 11, 1923.	1.1	32
47	A common variant in Myosin-18B contributes to mathematical abilities in children with dyslexia and intraparietal sulcus variability in adults. Translational Psychiatry, 2013, 3, e229-e229.	2.4	28
48	The development of reading and spelling abilities in the first 3Âyears of learning Arabic. Reading and Writing, 2011, 24, 1043-1060.	1.0	25
49	Core deficit and individual manifestations of developmental dyscalculia (DD): The role of comorbidity. Trends in Neuroscience and Education, 2013, 2, 38-42.	1.5	24
50	Lexical Reading in Dysfluent Readers of German. Scientific Studies of Reading, 2018, 22, 24-40.	1.3	24
51	Solving arithmetic problems in first and second language: Does the language context matter?. Learning and Instruction, 2016, 42, 72-82.	1.9	23
52	Print-, sublexical and lexical processing in children with reading and/or spelling deficits: An ERP study. International Journal of Psychophysiology, 2018, 130, 53-62.	0.5	20
53	Visual attention span performance in German-speaking children with differential reading and spelling profiles: No evidence of group differences. PLoS ONE, 2018, 13, e0198903.	1.1	20
54	Same Same, but Different: Word and Sentence Reading in German and English. Scientific Studies of Reading, 2016, 20, 203-219.	1.3	19

Karin Landerl

#	Article	IF	CITATIONS
55	Neurophysiological correlates of word processing deficits in isolated reading and isolated spelling disorders. Clinical Neurophysiology, 2018, 129, 526-540.	0.7	18
56	Evidence for the involvement of ZNF804A in cognitive processes of relevance to reading and spelling. Translational Psychiatry, 2012, 2, e136-e136.	2.4	17
57	Eye Movements during Silent and Oral Reading in a Regular Orthography: Basic Characteristics and Correlations with Childhood Cognitive Abilities and Adolescent Reading Skills. PLoS ONE, 2017, 12, e0170986.	1.1	17
58	Deficits in Letter-Speech Sound Associations but Intact Visual Conflict Processing in Dyslexia: Results from a Novel ERP-Paradigm. Frontiers in Human Neuroscience, 2017, 11, 116.	1.0	14
59	Speaking two languages with different number naming systems: What implications for magnitude judgments in bilinguals at different stages of language acquisition?. Cognitive Processing, 2016, 17, 225-241.	0.7	13
60	Visuo-spatial cueing in children with differential reading and spelling profiles. PLoS ONE, 2017, 12, e0180358.	1.1	12
61	Orthographic learning in children with isolated and combined reading and spelling deficits. Child Neuropsychology, 2019, 25, 370-393.	0.8	12
62	Stability of Deficits in Reading Fluency and/or Spelling. Scientific Studies of Reading, 2020, 24, 241-251.	1.3	12
63	Reading strategies of good and poor readers of German with different spelling abilities. Journal of Experimental Child Psychology, 2018, 174, 150-169.	0.7	10
64	Two-digit number writing and arithmetic in Year 1 children: Does number word inversion matter?. Cognitive Development, 2020, 56, 100967.	0.7	10
65	Language effects in early development of number writing and reading. Journal of Numerical Cognition, 2021, 7, 368-387.	0.6	10
66	Spelling pronunciations: Transforming irregularity into regularity. Learning and Instruction, 2008, 18, 295-308.	1.9	9
67	Beyond Phonology. Topics in Language Disorders, 2018, 38, 272-285.	0.9	8
68	Reading-related functional activity in children with isolated spelling deficits and dyslexia. Language, Cognition and Neuroscience, 2021, 36, 543-561.	0.7	8
69	Anchoring the deficit of the anchor deficit: dyslexia or attention?. Dyslexia, 2010, 16, 175-182.	0.8	7
70	Twenty-four or four-and-twenty: Language modulates cross-modal matching for multidigit numbers in children and adults. Journal of Experimental Child Psychology, 2021, 202, 104970.	0.7	7
71	Lese-/Rechtschreibstörung. , 2009, , 395-410.		7
72	An evaluation of spelling pronunciations as a means of improving spelling of orthographic markers. European Journal of Psychology of Education, 2008, 23, 3-23.	1.3	6

KARIN LANDERL

#	Article	IF	CITATIONS
73	Symbolic Processing Mediates the Relation Between Non-symbolic Processing and Later Arithmetic Performance. Frontiers in Psychology, 2020, 11, 549.	1.1	6
74	Common and distinct predictors of non-symbolic and symbolic ordinal number processing across the early primary school years. PLoS ONE, 2021, 16, e0258847.	1.1	6
75	Naming processes in reading and spelling disorders: An electrophysiological investigation. Clinical Neurophysiology, 2020, 131, 351-360.	0.7	5
76	Phonologische Bewusstheit. Zeitschrift Fur Entwicklungspsychologie Und Padagogische Psychologie, 2015, 47, 139-146.	0.3	5
77	Neurocognitive Perspective on Numerical Development. , 2019, , 9-24.		4
78	Development of morphological priming effects in reading aloud in the biscriptal Bosnian orthography. Reading and Writing, 2020, 33, 2073-2095.	1.0	4
79	Neural patterns of word processing differ in children with dyslexia and isolated spelling deficit. Brain Structure and Function, 2021, 226, 1467-1478.	1.2	4
80	Early neurocognitive development of dyscalculia. , 2021, , 359-382.		4
81	Learning to Read German. , 0, , 299-322.		3
82	Recoding strategies of German learners of English as a foreign language. Reading and Writing, 2017, 30, 1215-1230.	1.0	3
83	Deficient Letter-Speech Sound Integration Is Associated With Deficits in Reading but Not Spelling. Frontiers in Human Neuroscience, 2018, 12, 449.	1.0	3
84	Behavioral Precursors of Developmental Dyslexia. , 2019, , 229-252.		3
85	Unravelling the numerical and spatial underpinnings of computational thinking: a pre-registered replication study. Computer Science Education, 2022, 32, 313-334.	2.7	3
86	An Epidemiological Survey of Specific Reading and Spelling Disabilities in Arabic Speaking Children in Egypt. Literacy Studies, 2014, , 99-117.	0.2	2
87	Dyslexia Intervention – What Can We Learn From Neuroscience?. Zeitschrift Fur Psychologie / Journal of Psychology, 2016, 224, 303-304.	0.7	2
88	Introduction to this Special Issue on Reading and its Development across Orthographies: State of the Science. Scientific Studies of Reading, 2022, 26, 91-95.	1.3	2
89	Editorial: Interpreting the Comorbidity of Learning Disorders. Frontiers in Human Neuroscience, 2021, 15, 811101.	1.0	2
90	Phonology-independent general orthographic knowledge. Quarterly Journal of Experimental Psychology, 2021, 74, 174702182110184.	0.6	1
