#	ARTICLE	IF	CITATIONS
1	Model responses to CO ₂ and warming are underestimated without explicit representation of Arctic small-mammal grazing. <i>Ecological Applications</i> , 2022, 32, e02478.	1.8	8
2	Temperature sensitivity of woody nitrogen fixation across species and growing temperatures. <i>Nature Plants</i> , 2022, 8, 209-216.	4.7	17
3	Small herbivores with big impacts: Tundra voles (<i>Microtus oeconomus</i>) alter post-fire ecosystem dynamics. <i>Ecology</i> , 2022, 103, e3689.	1.5	4
4	Variation in White spruce needle respiration at the species range limits: A potential impediment to Northern expansion. <i>Plant, Cell and Environment</i> , 2022, 45, 2078-2092.	2.8	4
5	On the rate of phytoplankton respiration in the light. <i>Plant Physiology</i> , 2022, 190, 267-279.	2.3	2
6	Consistent diurnal pattern of leaf respiration in the light among contrasting species and climates. <i>New Phytologist</i> , 2022, 236, 71-85.	3.5	9
7	Contrasting physiological traits of shade tolerance in <i>Pinus</i> and Podocarpaceae native to a tropical Vietnamese forest: insight from an aberrant flat-leaved pine. <i>Tree Physiology</i> , 2021, 41, 223-239.	1.4	4
8	Chlorophyll fluorescence parameters, leaf traits and foliar chemistry of white oak and red maple trees in urban forest patches. <i>Tree Physiology</i> , 2021, 41, 269-279.	1.4	11
9	Ecosystem Recovery from Disturbance is Constrained by N Cycle Openness, Vegetation-Soil N Distribution, Form of N Losses, and the Balance Between Vegetation and Soil-Microbial Processes. <i>Ecosystems</i> , 2021, 24, 667-685.	1.6	15
10	Acclimation of leaf respiration temperature responses across thermally contrasting biomes. <i>New Phytologist</i> , 2021, 229, 1312-1325.	3.5	17
11	Photosynthesis, fluorescence, and biomass responses of white oak seedlings to urban soil and air temperature effects. <i>Physiologia Plantarum</i> , 2021, 172, 1535-1549.	2.6	4
12	Herbivore absence can shift dry heath tundra from carbon source to sink during peak growing season. <i>Environmental Research Letters</i> , 2021, 16, 024027.	2.2	13
13	Respiratory temperature responses of tropical conifers differ with leaf morphology. <i>Functional Ecology</i> , 2021, 35, 1408-1423.	1.7	8
14	High Leaf Respiration Rates May Limit the Success of White Spruce Saplings Growing in the Kampfzone at the Arctic Treeline. <i>Frontiers in Plant Science</i> , 2021, 12, 746464.	1.7	5
15	Preliminary ecophysiological observations of the fern <i>Asplenium platyneuron</i> growing in two microenvironments varying in light intensity at an urban location in New York City1. <i>Journal of the Torrey Botanical Society</i> , 2021, 148, .	0.1	2
16	Transparent polyethylene covering film in tropical grapevines does not alter photosynthesis, plant growth, fruit quality or yield. <i>Theoretical and Experimental Plant Physiology</i> , 2020, 32, 255-270.	1.1	1
17	Is the Kok effect a respiratory phenomenon? Metabolic insight using ¹³ C labeling in <i>Helianthus annuus</i> leaves. <i>New Phytologist</i> , 2020, 228, 1243-1255.	3.5	18
18	Distinct xylem responses to acute vs prolonged drought in pine trees. <i>Tree Physiology</i> , 2020, 40, 605-620.	1.4	20

#	ARTICLE	IF	CITATIONS
19	On the Functional Relationship Between Fluorescence and Photochemical Yields in Complex Evergreen Needleleaf Canopies. <i>Geophysical Research Letters</i> , 2020, 47, e2020GL087858.	1.5	40
20	Remote sensing tracks daily radial wood growth of evergreen needleleaf trees. <i>Global Change Biology</i> , 2020, 26, 4068-4078.	4.2	20
21	A mechanism of expansion: Arctic deciduous shrubs capitalize on warming-induced nutrient availability. <i>Oecologia</i> , 2020, 192, 671-685.	0.9	8
22	20 cm resolution mapping of tundra vegetation communities provides an ecological baseline for important research areas in a changing Arctic environment. <i>Environmental Research Communications</i> , 2019, 1, 105004.	0.9	12
23	Soil Microbial Assemblages Are Linked to Plant Community Composition and Contribute to Ecosystem Services on Urban Green Roofs. <i>Frontiers in Ecology and Evolution</i> , 2019, 7, .	1.1	36
24	Photosynthetic capacity, leaf respiration and growth in two papaya (<i>Carica papaya</i>) genotypes with different leaf chlorophyll concentrations. <i>AoB PLANTS</i> , 2019, 11, plz013.	1.2	9
25	Late growing season carbon subsidy in native gymnosperms in a northern temperate forest. <i>Tree Physiology</i> , 2019, 39, 971-982.	1.4	6
26	Repeatable, continuous and real-time estimates of coupled nitrogenase activity and carbon exchange at the whole-plant scale. <i>Methods in Ecology and Evolution</i> , 2019, 10, 960-970.	2.2	8
27	Terrestrial lidar scanning reveals fine-scale linkages between microstructure and photosynthetic functioning of small-stature spruce trees at the forest-tundra ecotone. <i>Agricultural and Forest Meteorology</i> , 2019, 269-270, 157-168.	1.9	12
28	White oak and red maple tree ring analysis reveals enhanced productivity in urban forest patches. <i>Forest Ecology and Management</i> , 2019, 453, 117626.	1.4	17
29	Proximal remote sensing of tree physiology at northern treeline: Do late-season changes in the photochemical reflectance index (PRI) respond to climate or photoperiod?. <i>Remote Sensing of Environment</i> , 2019, 221, 340-350.	4.6	22
30	Stripâ€œBark Morphology and Radial Growth Trends in Ancient <i>Pinus sibirica</i> Trees From Central Mongolia. <i>Journal of Geophysical Research G: Biogeosciences</i> , 2018, 123, 945-959.	1.3	4
31	Deficit irrigation and transparent plastic covers can save water and improve grapevine cultivation in the tropics. <i>Agricultural Water Management</i> , 2018, 202, 66-80.	2.4	18
32	Interannual variations in needle and sapwood traits of <i>Pinus edulis</i> branches under an experimental drought. <i>Ecology and Evolution</i> , 2018, 8, 1655-1672.	0.8	15
33	Temperature response of respiration and respiratory quotients of 16 co-occurring temperate tree species. <i>Tree Physiology</i> , 2018, 38, 1319-1332.	1.4	13
34	Measurement of Gross Photosynthesis, Respiration in the Light, and Mesophyll Conductance Using H ₂ ¹⁸ O Labeling. <i>Plant Physiology</i> , 2018, 177, 62-74.	2.3	27
35	Blue intensity from a tropical coniferâ€™s annual rings for climate reconstruction: An ecophysiological perspective. <i>Dendrochronologia</i> , 2018, 50, 10-22.	1.0	46
36	Applying terrestrial lidar for evaluation and calibration of airborne lidar-derived shrub biomass estimates in Arctic tundra. <i>Remote Sensing Letters</i> , 2017, 8, 175-184.	0.6	23

#	ARTICLE	IF	CITATIONS
37	Interannual variability in ozone removal by a temperate deciduous forest. <i>Geophysical Research Letters</i> , 2017, 44, 542-552.	1.5	56
38	A gradient of nutrient enrichment reveals nonlinear impacts of fertilization on Arctic plant diversity and ecosystem function. <i>Ecology and Evolution</i> , 2017, 7, 2449-2460.	0.8	24
39	Nitrogen and phosphorus availabilities interact to modulate leaf trait scaling relationships across six plant functional types in a controlled environment study. <i>New Phytologist</i> , 2017, 215, 992-1008.	3.5	41
40	European and Mediterranean hydroclimate responses to tropical volcanic forcing over the last millennium. <i>Geophysical Research Letters</i> , 2017, 44, 5104-5112.	1.5	51
41	Tracking the origins of the Kok effect, 70 years after its discovery. <i>New Phytologist</i> , 2017, 214, 506-510.	3.5	40
42	Leaf day respiration: low CO_2 flux but high significance for metabolism and carbon balance. <i>New Phytologist</i> , 2017, 216, 986-1001.	3.5	159
43	Repackaging precipitation into fewer, larger storms reduces ecosystem exchanges of CO_2 and H_2O in a semiarid steppe. <i>Agricultural and Forest Meteorology</i> , 2017, 247, 356-364.	1.9	43
44	Growth and physiology of a dominant understory shrub, <i>Hamamelis virginiana</i> , following canopy disturbance in a temperate hardwood forest. <i>Canadian Journal of Forest Research</i> , 2017, 47, 193-202.	0.8	5
45	Xanthophyll Cycle Activity in Two Prominent Arctic Shrub Species. <i>Arctic, Antarctic, and Alpine Research</i> , 2017, 49, 277-289.	0.4	10
46	Implications of improved representations of plant respiration in a changing climate. <i>Nature Communications</i> , 2017, 8, 1602.	5.8	100
47	Photosynthetic acclimation to elevated CO_2 combined with partial rootzone drying results in improved water use efficiency, drought tolerance and leaf carbon balance of grapevines (<i>Vitis</i>). https://doi.org/10.1093/aob/abw101	4.0	101
48	Thermal limits of leaf metabolism across biomes. <i>Global Change Biology</i> , 2017, 23, 209-223.	4.2	213
49	Where does the carbon go? Thermal acclimation of respiration and increased photosynthesis in trees at the temperate-boreal ecotone. <i>Tree Physiology</i> , 2017, 37, 281-284.	1.4	12
50	Leaf Respiration in Terrestrial Biosphere Models. <i>Advances in Photosynthesis and Respiration</i> , 2017, , 107-142.	1.0	25
51	Light inhibition of foliar respiration in response to soil water availability and seasonal changes in temperature in Mediterranean holm oak (<i>Quercus ilex</i>) forest. <i>Functional Plant Biology</i> , 2017, 44, 1178.	1.1	11
52	Scaling Thermal Properties from the Leaf to the Canopy in the Alaskan Arctic Tundra. <i>Arctic, Antarctic, and Alpine Research</i> , 2016, 48, 739-754.	0.4	13
53	Spectral determination of concentrations of functionally diverse pigments in increasingly complex arctic tundra canopies. <i>Oecologia</i> , 2016, 182, 85-97.	0.9	5
54	Biodiversity as a multidimensional construct: a review, framework and case study of herbivory's impact on plant biodiversity. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2016, 283, 20153005.	1.2	52

#	ARTICLE	IF	CITATIONS
55	Separating species and environmental determinants of leaf functional traits in temperate rainforest plants along a soil-development chronosequence. <i>Functional Plant Biology</i> , 2016, 43, 751.	1.1	17
56	Reply to Adams et al.: Empirical versus process-based approaches to modeling temperature responses of leaf respiration. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2016, 113, E5996-E5997.	3.3	9
57	High-resolution mapping of aboveground shrub biomass in Arctic tundra using airborne lidar and imagery. <i>Remote Sensing of Environment</i> , 2016, 184, 361-373.	4.6	72
58	Responses of greenhouse gas fluxes to climate extremes in a semiarid grassland. <i>Atmospheric Environment</i> , 2016, 142, 32-42.	1.9	49
59	Convergence in the temperature response of leaf respiration across biomes and plant functional types. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2016, 113, 3832-3837.	3.3	198
60	LiDAR canopy radiation model reveals patterns of photosynthetic partitioning in an Arctic shrub. <i>Agricultural and Forest Meteorology</i> , 2016, 221, 78-93.	1.9	28
61	Estimating aboveground biomass and leaf area of low-stature Arctic shrubs with terrestrial LiDAR. <i>Remote Sensing of Environment</i> , 2015, 164, 26-35.	4.6	141
62	Global variability in leaf respiration in relation to climate, plant functional types and leaf traits. <i>New Phytologist</i> , 2015, 206, 614-636.	3.5	350
63	Greater deciduous shrub abundance extends tundra peak season and increases modeled net CO_2 uptake. <i>Global Change Biology</i> , 2015, 21, 2394-2409.	4.2	37
64	Thermal acclimation of shoot respiration in an Arctic woody plant species subjected to 22 years of warming and altered nutrient supply. <i>Global Change Biology</i> , 2014, 20, 2618-2630.	4.2	28
65	Predicting ecosystem carbon balance in a warming Arctic: the importance of long-term thermal acclimation potential and inhibitory effects of light on respiration. <i>Global Change Biology</i> , 2014, 20, 1901-1912.	4.2	14
66	Seasonality of foliar respiration in two dominant plant species from the Arctic tundra: response to long-term warming and short-term temperature variability. <i>Functional Plant Biology</i> , 2014, 41, 287.	1.1	34
67	Leaf respiration in darkness and in the light under pre-industrial, current and elevated atmospheric CO_2 concentrations. <i>Plant Science</i> , 2014, 226, 120-130.	1.7	47
68	Rapid rebound of soil respiration following partial stand disturbance by tree girdling in a temperate deciduous forest. <i>Oecologia</i> , 2014, 174, 1415-1424.	0.9	19
69	Foliar nitrogen characteristics of four tree species planted in New York City forest restoration sites. <i>Urban Ecosystems</i> , 2014, 17, 807-824.	1.1	18
70	Tall Deciduous Shrubs Offset Delayed Start of Growing Season Through Rapid Leaf Development in the Alaskan Arctic Tundra. <i>Arctic, Antarctic, and Alpine Research</i> , 2014, 46, 682-697.	0.4	20
71	Light inhibition of leaf respiration as soil fertility declines along a post-glacial chronosequence in New Zealand: an analysis using the Kok method. <i>Plant and Soil</i> , 2013, 367, 163-182.	1.8	53
72	Modulation of respiratory metabolism in response to nutrient changes along a soil chronosequence. <i>Plant, Cell and Environment</i> , 2013, 36, 1120-1134.	2.8	13

#	ARTICLE	IF	CITATIONS
73	Breaking the cycle: how light, CO ₂ and O ₂ affect plant respiration. <i>Plant, Cell and Environment</i> , 2013, 36, 498-500.	2.8	13
74	Hill Slope Variations in Chlorophyll Fluorescence Indices and Leaf Traits in a Small Arctic Watershed. <i>Arctic, Antarctic, and Alpine Research</i> , 2013, 45, 39-49.	0.4	4
75	Light saturated R_u oxygenation by Rubisco is a robust predictor of light inhibition of respiration in <i>Triticum aestivum</i> L. <i>Plant Biology</i> , 2013, 15, 769-775.	1.8	39
76	Differential physiological responses to environmental change promote woody shrub expansion. <i>Ecology and Evolution</i> , 2013, 3, 1149-1162.	0.8	33
77	Respiratory flexibility and efficiency are affected by simulated global change in Arctic plants. <i>New Phytologist</i> , 2013, 197, 1161-1172.	3.5	20
78	Bringing the Kok effect to light: A review on the integration of daytime respiration and net ecosystem exchange. <i>Ecosphere</i> , 2013, 4, 1-14.	1.0	90
79	Isoprene emissions from a tundra ecosystem. <i>Biogeosciences</i> , 2013, 10, 871-889.	1.3	41
80	Urban environment of New York City promotes growth in northern red oak seedlings. <i>Tree Physiology</i> , 2012, 32, 389-400.	1.4	63
81	Leaf and cell level carbon cycling responses to a nitrogen and phosphorus gradient in two Arctic tundra species. <i>American Journal of Botany</i> , 2012, 99, 1702-1714.	0.8	27
82	Oak loss increases foliar nitrogen, $\delta^{15}N$ and growth rates of <i>Betula lenta</i> in a northern temperate deciduous forest. <i>Tree Physiology</i> , 2012, 32, 1092-1101.	1.4	25
83	Out of the light and into the dark: postillumination respiratory metabolism. <i>New Phytologist</i> , 2012, 195, 4-7.	3.5	9
84	High alternative oxidase activity in cold soils and its implication to the Dole Effect. <i>Geophysical Research Letters</i> , 2012, 39, .	1.5	5
85	The autotrophic contribution to soil respiration in a northern temperate deciduous forest and its response to stand disturbance. <i>Oecologia</i> , 2012, 169, 211-220.	0.9	31
86	Age-related decline of stand biomass accumulation is primarily due to mortality and not to reduction in NPP associated with individual tree physiology, tree growth or stand structure in a <i>Quercus</i> -dominated forest. <i>Journal of Ecology</i> , 2012, 100, 428-440.	1.9	72
87	A field-compatible method for measuring alternative respiratory pathway activities <i>in vivo</i> using stable O ₂ isotopes. <i>Plant, Cell and Environment</i> , 2012, 35, 1518-1532.	2.8	13
88	Effects of leaf age and tree size on stomatal and mesophyll limitations to photosynthesis in mountain beech (<i>Nothofagus solandrii</i> var. <i>cliffortioides</i>). <i>Tree Physiology</i> , 2011, 31, 985-996.	1.4	37
89	Respiratory alternative oxidase responds to both low- and high-temperature stress in <i>Quercus rubra</i> leaves along an urban-rural gradient in New York. <i>Functional Ecology</i> , 2011, 25, 1007-1017.	1.7	18
90	Leaf respiration and alternative oxidase in field-grown alpine grasses respond to natural changes in temperature and light. <i>New Phytologist</i> , 2011, 189, 1027-1039.	3.5	57

#	ARTICLE	IF	CITATIONS
91	Processing arctic eddy flux data using a simple carbon exchange model embedded in the ensemble Kalman filter. <i>Ecological Applications</i> , 2010, 20, 1285-1301.	1.8	25
92	The growth response of <i>Alternanthera philoxeroides</i> in a simulated post-combustion emission with ultrahigh [CO ₂] and acidic pollutants. <i>Environmental Pollution</i> , 2009, 157, 2118-2125.	3.7	5
93	Cost-effectiveness of leaf energy and resource investment of invasive <i>Berberis thunbergii</i> and co-occurring native shrubs. <i>Canadian Journal of Forest Research</i> , 2009, 39, 2109-2118.	0.8	10
94	Thermal acclimation of leaf respiration but not photosynthesis in <i>Populus deltoides</i> — <i>Populus nigra</i> . <i>New Phytologist</i> , 2008, 178, 123-134.	3.5	139
95	Dendrochronological Potential of Japanese Barberry (<i>Berberis thunbergii</i>): A Case Study in the Black Rock Forest, New York. <i>Tree-Ring Research</i> , 2008, 64, 115-124.	0.4	7
96	Changes in composition, structure and aboveground biomass over seventy-six years (1930-2006) in the Black Rock Forest, Hudson Highlands, southeastern New York State. <i>Tree Physiology</i> , 2008, 28, 537-549.	1.4	61
97	Sapwood temperature gradients between lower stems and the crown do not influence estimates of stand-level stem CO ₂ efflux. <i>Tree Physiology</i> , 2008, 28, 1553-1559.	1.4	15
98	Scaling foliar respiration to the stand level throughout the growing season in a <i>Quercus rubra</i> forest. <i>Tree Physiology</i> , 2008, 28, 637-646.	1.4	3
99	Precipitation chloride at West Point, NY: Seasonal patterns and possible contributions from non-seawater sources. <i>Atmospheric Environment</i> , 2007, 41, 2240-2254.	1.9	18
100	Seasonal variation of temperature response of respiration in invasive <i>Berberis thunbergii</i> (Japanese) Tj ETQq0 0 0 rgBT /Overlock 10 Tf 50 <i>Oecologia</i> , 2007, 153, 809-819.	0.9	14
101	Leaf phenology and seasonal variation of photosynthesis of invasive <i>Berberis thunbergii</i> (Japanese) Tj ETQq1 1 0.784314 rgBT /Overlock forest. <i>Oecologia</i> , 2007, 154, 11-21.	0.9	82
102	Spatial and temporal scaling of intercellular CO ₂ concentration in a temperate rain forest dominated by <i>Dacrydium cupressinum</i> in New Zealand. <i>Plant, Cell and Environment</i> , 2006, 29, 497-510.	2.8	11
103	Seasonal variation in the temperature response of leaf respiration in <i>Quercus rubra</i> : foliage respiration and leaf properties. <i>Functional Ecology</i> , 2006, 20, 778-789.	1.7	60
104	Twentieth Century Climate in the New York Hudson Highlands and the Potential Impacts on Eco-Hydrological Processes. <i>Climatic Change</i> , 2006, 75, 455-493.	1.7	1
105	Atmospheric CO ₂ enrichment alters energy assimilation, investment and allocation in <i>Xanthium strumarium</i> . <i>New Phytologist</i> , 2005, 166, 513-523.	3.5	22
106	Sap flow rates and sapwood density are critical factors in within and between tree variation in CO ₂ efflux from stems of mature <i>Dacrydium cupressinum</i> trees. <i>New Phytologist</i> , 2005, 167, 815-828.	3.5	83
107	Respiration characteristics in temperate rainforest tree species differ along a long-term soil-development chronosequence. <i>Oecologia</i> , 2005, 143, 271-279.	0.9	57
108	Inter-annual variability of NDVI in response to long-term warming and fertilization in wet sedge and tussock tundra. <i>Oecologia</i> , 2005, 143, 588-597.	0.9	58

#	ARTICLE	IF	CITATIONS
109	Photosynthesis and reflectance indices for rainforest species in ecosystems undergoing progression and retrogression along a soil fertility chronosequence in New Zealand. <i>Oecologia</i> , 2005, 144, 233-244.	0.9	56
110	Nocturnal stomatal conductance and implications for modelling $\delta^{18}O$ of leaf-respired CO ₂ in temperate tree species. <i>Functional Plant Biology</i> , 2005, 32, 1107.	1.1	67
111	Stomatal and non-stomatal limitations to photosynthesis in four tree species in a temperate rainforest dominated by <i>Dacrydium cupressinum</i> in New Zealand. <i>Tree Physiology</i> , 2005, 25, 447-456.	1.4	39
112	Radiative transfer and carbon assimilation in relation to canopy architecture, foliage area distribution and clumping in a mature temperate rainforest canopy in New Zealand. <i>Agricultural and Forest Meteorology</i> , 2005, 135, 326-339.	1.9	73
113	Variations in dark respiration and mitochondrial numbers within needles of <i>Pinus radiata</i> grown in ambient or elevated CO ₂ partial pressure. <i>Tree Physiology</i> , 2004, 24, 347-353.	1.4	18
114	CO ₂ ENRICHMENT REDUCES THE ENERGETIC COST OF BIOMASS CONSTRUCTION IN AN INVASIVE DESERT GRASS. <i>Ecology</i> , 2004, 85, 100-106.	1.5	53
115	Growth CO ₂ concentration modifies the transpiration response of <i>Populus deltoides</i> to drought and vapor pressure deficit. <i>Tree Physiology</i> , 2004, 24, 1137-1145.	1.4	20
116	Response of total night-time respiration to differences in total daily photosynthesis for leaves in a <i>Quercus rubra</i> L. canopy: implications for modelling canopy CO ₂ exchange. <i>Global Change Biology</i> , 2004, 10, 925-938.	4.2	97
117	Nocturnal warming increases photosynthesis at elevated CO ₂ partial pressure in <i>Populus deltoides</i> . <i>New Phytologist</i> , 2004, 161, 819-826.	3.5	49
118	Response of <i>Xanthium strumarium</i> leaf respiration in the light to elevated CO ₂ concentration, nitrogen availability and temperature. <i>New Phytologist</i> , 2004, 162, 377-386.	3.5	78
119	Leaf respiratory CO ₂ is ¹³ C-enriched relative to leaf organic components in five species of C ₃ plants. <i>New Phytologist</i> , 2004, 163, 499-505.	3.5	62
120	Chloroplast numbers, mitochondrion numbers and carbon assimilation physiology of <i>Nicotiana sylvestris</i> as affected by CO ₂ concentration. <i>Environmental and Experimental Botany</i> , 2004, 51, 21-31.	2.0	55
121	Can Gas-Exchange Characteristics help Explain the Invasive Success of <i>Lythrum salicaria</i> ?. <i>Biological Invasions</i> , 2004, 6, 101-111.	1.2	42
122	The influence of winter temperatures on the annual radial growth of six northern range margin tree species. <i>Dendrochronologia</i> , 2004, 22, 7-29.	1.0	195
123	Scaling carbon uptake from leaves to canopies: insights from two forests with contrasting properties.. , 2004, , 231-254.		20
124	Age at flowering differentially affects vegetative and reproductive responses of a determinate annual plant to elevated carbon dioxide. <i>Oecologia</i> , 2003, 135, 194-201.	0.9	14
125	Response of NDVI, biomass, and ecosystem gas exchange to long-term warming and fertilization in wet sedge tundra. <i>Oecologia</i> , 2003, 135, 414-421.	0.9	190
126	Scaling foliar respiration in two contrasting forest canopies. <i>Functional Ecology</i> , 2003, 17, 101-114.	1.7	81

#	ARTICLE	IF	CITATIONS
