#	Article	IF	CITATIONS
1	A Systematic Review of Resilience Factors for Psychosocial Outcomes During the Transition to Adulthood Following Childhood Victimisation. Trauma, Violence, and Abuse, 2023, 24, 946-965.	3.9	5
2	Adolescent depression beyond DSM definition: a network analysis. European Child and Adolescent Psychiatry, 2023, 32, 881-892.	2.8	13
3	Psychological and contextual risk factors for firstâ€onset depression among adolescents and young people around the globe: A systematic review and metaâ€analysis. Microbial Biotechnology, 2023, 17, 5-20.	0.9	6
4	A longitudinal twin study of victimization and loneliness from childhood to young adulthood. Development and Psychopathology, 2022, 34, 367-377.	1.4	32
5	Life events, depression and supportive relationships affect academic achievement in university students. Journal of American College Health, 2022, 70, 1931-1935.	0.8	6
6	Association between genetic and socioenvironmental risk for schizophrenia during upbringing in a UK longitudinal cohort. Psychological Medicine, 2022, 52, 1527-1537.	2.7	21
7	This is what loneliness looks like: A mixed-methods study of loneliness in adolescence and young adulthood. International Journal of Behavioral Development, 2022, 46, 18-27.	1.3	12
8	Cortisol Levels in Childhood Associated With Emergence of Attenuated Psychotic Symptoms in Early Adulthood. Biological Psychiatry, 2022, 91, 226-235.	0.7	11
9	Adolescents' thoughts and feelings about the local and global environment: a qualitative interview study. Child and Adolescent Mental Health, 2022, 27, 4-13.	1.8	12
10	Cortisol and development of depression in adolescence and young adulthood – a systematic review and meta-analysis. Psychoneuroendocrinology, 2022, 136, 105625.	1.3	39
11	Longitudinal associations between adolescents' individualised risk for depression and inflammation in a UK cohort study. Brain, Behavior, and Immunity, 2022, 101, 78-83.	2.0	11
12	Impact on public attitudes of a mental health audio tour of the National Gallery in London. Microbial Biotechnology, 2022, 16, 1192-1201.	0.9	3
13	Childhood Maltreatment, Educational Attainment, and IQ: Findings From a Multicentric Case-control Study of First-episode Psychosis (EU-GEI). Schizophrenia Bulletin, 2022, 48, 575-589.	2.3	9
14	Detection of risk for future depression among adolescents: Stakeholder views of acceptability and feasibility in the United Kingdom. Microbial Biotechnology, 2022, , .	0.9	2
15	The experience of receiving a diagnosis of depression in adolescence: A pilot qualitative study in Brazil. Clinical Child Psychology and Psychiatry, 2022, 27, 598-612.	0.8	2
16	Physical activity and depressive symptoms among adolescents in a school-based sample. Revista Brasileira De Psiquiatria, 2022, 44, 313-316.	0.9	1
17	Handling missing data in rest-activity time series measured by actimetry. Chronobiology International, 2022, 39, 964-975.	0.9	5
18	Defining culturally compelling mental health interventions: A qualitative study of perspectives on adolescent depression in Lagos, Nigeria, SSM Mental Health, 2022, 2, 100093.	0.9	3

#	Article	IF	CITATIONS
19	A myth-busting mental health tour of the National Gallery in London: facilitators and challenges to its development and evaluation. Arts and Health, 2022, , 1-15.	0.6	1
20	Editorial: The near ubiquity of comorbidity – what are the implications for children's mental health research and practice?. Journal of Child Psychology and Psychiatry and Allied Disciplines, 2022, 63, 505-506.	3.1	2
21	Reply to Kao & Gau â€~Comedications, underlying comordity status, and its influence on inflammatory status and depression risk'. Brain, Behavior, and Immunity, 2022, 104, 220-221.	2.0	0
22	Sleep disturbances, circadian activity, and nocturnal light exposure characterize high risk for and current depression in adolescence. Sleep, 2022, 45, .	0.6	13
23	The Lancet Psychiatry Commission on intimate partner violence and mental health: advancing mental health services, research, and policy. Lancet Psychiatry,the, 2022, 9, 487-524.	3.7	65
24	The moderation effect of secure attachment on the relationship between positive events and wellbeing. PsyCh Journal, 2022, , .	0.5	1
25	Adolescent perspectives on depression as a disease of loneliness: a qualitative study with youth and other stakeholders in urban Nepal. Child and Adolescent Psychiatry and Mental Health, 2022, 16, .	1.2	3
26	Predicting the risk of depression among adolescents in Nepal using a model developed in Brazil: the IDEA Project. European Child and Adolescent Psychiatry, 2021, 30, 213-223.	2.8	22
27	Identifying Adolescents at Risk for Depression: AÂPrediction Score Performance in Cohorts Based inÂ3ÂDifferent Continents. Journal of the American Academy of Child and Adolescent Psychiatry, 2021, 60, 262-273.	0.3	43
28	Staff experience of delivering clinical care on acute psychiatric wards for service users who hear voices: a qualitative study. Psychosis, 2021, 13, 58-64.	0.4	7
29	Identifying risk factors and detection strategies for adolescent depression in diverse global settings: A Delphi consensus study. Journal of Affective Disorders, 2021, 279, 66-74.	2.0	26
30	Externalizing the threat from within: A new direction for researching associations between suicide and psychotic experiences. Development and Psychopathology, 2021, , 1-11.	1.4	6
31	Editorial: â€~The early bird catches the worm'—the need for even earlier intervention and targeted prevention for mental illnesses. Journal of Child Psychology and Psychiatry and Allied Disciplines, 2021, 62, 369-371.	3.1	9
32	Association of Air Pollution Exposure in Childhood and Adolescence With Psychopathology at the Transition to Adulthood. JAMA Network Open, 2021, 4, e217508.	2.8	28
33	Population vs Individual Prediction of Poor Health From Results of Adverse Childhood Experiences Screening. JAMA Pediatrics, 2021, 175, 385.	3.3	111
34	Mind the brain gap: The worldwide distribution of neuroimaging research on adolescent depression. Neurolmage, 2021, 231, 117865.	2.1	6
35	Unravelling the contribution of complex trauma to psychopathology and cognitive deficits: a cohort study. British Journal of Psychiatry, 2021, 219, 448-455.	1.7	34
36	A systematic review of the association between biological markers and environmental stress risk factors for adolescent depression. Journal of Psychiatric Research, 2021, 138, 163-175.	1.5	27

 ⁵² CORTISOL PLAY A ROLE?. Schizophrenia Bulletin, 2020, 46, S109-S109. ⁵³ Predicting the risk of future depression among school-attending adolescents in Nigeria using a model developed in Brazil Psychiatry Research, 2020, 294, 113511. ⁵⁴ 11.1 CHILDHOOD EXPOSURE TO AMBIENT AIR POLLUTION AND THE RISK OF DEPRESSION IN ADOLESCENCE. 	#	Article	IF	CITATIONS
 adolescents, Journal of Psychiatric Research, 2021, 138, 60-67. Association between air policition exposure and mental health service use among individuals with first presentations of psychotic and mood disorders: retrospective colort study. British Journal of Psychiatry, 2021, 219, 678-685. Associations between childhood victimization, inflammatory biomarkers and psychotic phenomena in adolescence: A longitudinal cohort study. Brain, Behavior, and Immunity, 2021, 98, 74-65. Social isolation as a core feature of adolescent depression: a qualitative study in Porto Alegre, Brazil. International Journal of Qualitative Studies on Health and Well-being, 2021, 16, 1978374. DNA methylation signatures of adolescent victimization: analysis of a longitudinal monozygotic twin sample. Epigenetics, 2021, 16, 1169-1186. Pest-year intimate partner violence preparation among people with and without depression: an individual participant data (PD) meta-mediation analysis. Social Psychiatry and Psychiatric Epidemiology, 2021, 1, 1 Exploring the role of immune pathways in the risk and development of depression in adolescence: Research protocol of the IDEA+LAME study. Brain, Behavior, & Immunity - Health, 2021, 18, 100396. Mental Health and Functional Outcomes in Young Adulthood of Children With Psychotic Symptoms: A Longitudinal Cohort Study. Schizephrenia Bulletin, 2020, 46, 261-271. Using discordant twin methods to investigate an environmentally mediated pathway between social support and the reduced likelihood of adolescent psychotic experiences. Psychological Medicine, 2020, 50, 1989-1905. Borderline Symptoms at Age 12 Signal Risk for Poor Outcomes During the Transition to Adulthood: Findings From a Centerlialy Sensitive Longitudinal Cohort Study, Journal of the American Academy of Child and Adolescent Psychiatry, 2020, 55, 1165-1177-e2. Childhood bullying victimization, self-labelling,	37		1.3	16
 first presentations of psychotic and mood disorders: retrospective cohort study. British Journal of Psychiatry, 2021, 219, 678-685. Associations between childhood victimization, inflammatory biomarkers and psychotic phenomena in adolescence: Alongitudinal cohort study. Brain, Behavior, and Immunity, 2021, 98, 74-85. Social Isolation as a core feature of adolescent depression: a qualitative study in Porto Alegre, Brazil. International Journal of Qualitative Studies on Health and Well-being, 2021, 16, 1978374. DNA methylation signatures of adolescent victimization: analysis of a longitudinal monozygotic twin sample. Epigenetics, 2021, 16, 1169-1186. Pattyear infinitate partner violence perpetation among people with and without depression: an Ipole (addied) partipoint data (PD) meta-mediation analysis. Social Psychiatry and Psychiatric Epidemiology, 2021, 1. Exploring the role of immune pathways in the risk and development of depression in adolescence: Research protocol of the IDEA-FLAME study. Brain, Behavior, & Immunity - Health, 2021, 18, 100396. Mental Health and Functional Outcomes in Young Adulthood of Children With Psychotic Symptoms: A Longitudinal Cohort Study. Schizophrenia Bulletin, 2020, 46, 261-271. Using discordant twin methods to investigate an environmentally mediated pathway between social support and the reduced likelihood of adolescent psychotic experiences. Psychotic Symptoms: A Longitudinal Cohort Study, 2020, 59, 1165-1177-22. Childhood bullying victimization, self-labelling, and help-seeking for mental health problems. Social Psychiatry and Psychiatric Epidemiology, 2020, 55, 81-88. Association of Adverse Experiences and Exposure to Violence in Childhood and Adolescence With Indianatory Burden In Young People JAMA Pediatics, 2020, 174, 18. Developing an individualized risk calculator for psychopathology among young people victimized during childhood:	38	Childhood exposure to ambient air pollution and predicting individual risk of depression onset in UK adolescents. Journal of Psychiatric Research, 2021, 138, 60-67.	1.5	24
 adolescence: A longitudinal cohort study. Brain, Behavior, and Immunity, 2021, 98, 74-85. Social Isolation as a core feature of adolescent depression: a qualitative study in Porto Alegre, Brazil. International Journal of Qualitative Studies on Health and Well-being, 2021, 16, 1978374. DNA methylation signatures of adolescent victimization: analysis of a longitudinal monozygotic twin sample. Epigenetics, 2021, 16, 1169-1186. Past-year Intimate partner violonce perpetration among people with and without depression: an individual participant data (IPD) meta-mediation analysis. Social Psychiatry and Psychiatric Epidemiology, 2021, 1. Exploring the role of immune pathways in the risk and development of depression in adolescence: Research protocol of the IDEA-FLAME study. Brain, Behavior, & Immunity - Health, 2021, 18, 100396. Mental Health and Functional Outcomes in Young Adulthood of Children With Psychotic Symptoms: A Longitudinal Cohort Study.
