#	ARTICLE	IF	CITATIONS
1	The longitudinal associations of inflammatory biomarkers and depression revisited: systematic review, meta-analysis, and meta-regression. <i>Molecular Psychiatry</i> , 2021, 26, 3302-3314.	7.9	143
2	To exclude or not to exclude: Considerations and recommendations for C-reactive protein values higher than 10Åmg/L. <i>Brain, Behavior, and Immunity</i> , 2020, 87, 898-900.	4.1	58
3	Maternal inflammation during pregnancy and offspring psychiatric symptoms in childhood: Timing and sex matter. <i>Journal of Psychiatric Research</i> , 2019, 111, 96-103.	3.1	51
4	Inflammatory Proteins Predict Change in Depressive Symptoms in Male and Female Adolescents. <i>Clinical Psychological Science</i> , 2019, 7, 754-767.	4.0	47
5	Negative cognitive style interacts with negative life events to predict first onset of a major depressive episode in adolescence via hopelessness.. <i>Journal of Abnormal Psychology</i> , 2018, 127, 1-11.	1.9	47
6	Executive dysfunction in depression in adolescence: the role of inflammation and higher body mass. <i>Psychological Medicine</i> , 2020, 50, 683-691.	4.5	42
7	Bidirectional Associations Between Inflammatory Biomarkers and Depressive Symptoms in Adolescents: Potential Causal Relationships. <i>Clinical Psychological Science</i> , 2020, 8, 690-703.	4.0	39
8	The impact of caring for an adult with intellectual disability and psychiatric comorbidity on carer stress and psychological distress. <i>Journal of Intellectual Disability Research</i> , 2016, 60, 553-563.	2.0	26
9	Characterizing adult attention-deficit/hyperactivity-disorder and comorbid borderline personality disorder: ADHD symptoms, psychopathology, cognitive functioning and psychosocial factors. <i>European Psychiatry</i> , 2016, 31, 29-36.	0.2	25
10	Unique and predictive relationships between components of cognitive vulnerability and symptoms of depression. <i>Depression and Anxiety</i> , 2019, 36, 950-959.	4.1	24
11	Longitudinal changes of inflammatory biomarkers moderate the relationship between recent stressful life events and prospective symptoms of depression in a diverse sample of urban adolescents. <i>Brain, Behavior, and Immunity</i> , 2020, 86, 43-52.	4.1	23
12	Is Worse Attention a Risk Factor for or a Consequence of Depression, or Are Worse Attention and Depression Better Accounted for by Stress? A Prospective Test of Three Hypotheses. <i>Clinical Psychological Science</i> , 2019, 7, 93-109.	4.0	22
13	The Development of Future Orientation is Associated with Faster Decline in Hopelessness during Adolescence. <i>Journal of Youth and Adolescence</i> , 2018, 47, 2129-2142.	3.5	20
14	Early Pubertal Timing Mediates the Association between Low Socioeconomic Status and Poor Attention and Executive Functioning in a Diverse Community Sample of Adolescents. <i>Journal of Youth and Adolescence</i> , 2020, 49, 1420-1432.	3.5	15
15	Goal-striving tendencies moderate the relationship between reward-related brain function and peripheral inflammation. <i>Brain, Behavior, and Immunity</i> , 2021, 94, 60-70.	4.1	14
16	Investigating whether depressed youth exhibiting elevated C reactive protein perform worse on measures of executive functioning, verbal fluency and episodic memory in a large, population based sample of Dutch adolescents. <i>Brain, Behavior, and Immunity</i> , 2021, 94, 369-380.	4.1	12
17	Inflammation and depression: Research designs to better understand the mechanistic relationships between depression, inflammation, cognitive dysfunction, and their shared risk factors. <i>Brain, Behavior, &amp; Immunity - Health</i> , 2021, 15, 100278.	2.5	12
18	Investigating whether a combination of higher CRP and depression is differentially associated with worse executive functioning in a cohort of 43,896 adults. <i>Brain, Behavior, and Immunity</i> , 2021, 96, 127-134.	4.1	12

#	ARTICLE	IF	CITATIONS
19	Dissociable psychosocial profiles of adolescent substance users. PLoS ONE, 2018, 13, e0202498.	2.5	7
20	A Latent Structure Analysis of Cognitive Vulnerability to Depression in Adolescence. Behavior Therapy, 2019, 50, 755-764.	2.4	6
21	Concurrent and Longitudinal Associations of Sex and Race with Inflammatory Biomarkers during Adolescence. Journal of Youth and Adolescence, 2021, 50, 711-723.	3.5	6
22	Examining inflammation, health, stress and lifestyle variables linking low socioeconomic status with poorer cognitive functioning during adolescence. Brain, Behavior, and Immunity, 2022, 104, 1-5.	4.1	4
23	Interleukin-6 receptor antagonists in immunopsychiatry: Can they lead to increased interleukin-6 in the central nervous system (CNS) and worsening psychiatric symptoms?. Brain, Behavior, and Immunity, 2022, 103, 202-204.	4.1	3
24	Attention, rumination and depression in youth with negative inferential styles: A prospective study. Journal of Affective Disorders, 2021, 291, 209-217.	4.1	2
25	Cognitive Functioning, Conduct Disorder and Substance Use as Predictors of Offending in Adults with ADHD. Journal of Forensic Psychology, 2016, 01, .	0.1	1
26	238. Maternal Inflammation During Pregnancy and Offspring Psychopathology: Contributions of Gestational Timing and Fetal Sex. Biological Psychiatry, 2018, 83, S96.	1.3	0
