#	ARTICLE	IF	CITATIONS
1	Evaluation of clinical prognostic variables on short-term outcome for colorectal cancer surgery: An overview and minimum dataset. <i>Cancer Treatment and Research Communications</i> , 2022, 31, 100544.	1.7	2
2	The relationship between frailty, nutritional status, co-morbidity, CT-body composition and systemic inflammation in patients with COVID-19. <i>Journal of Translational Medicine</i> , 2022, 20, 98.	4.4	15
3	Spatial expression of IKK-alpha is associated with a differential mutational landscape and survival in primary colorectal cancer. <i>British Journal of Cancer</i> , 2022, , .	6.4	2
4	The prevalence and prognostic value of frailty screening measures in patients undergoing surgery for colorectal cancer: observations from a systematic review. <i>BMC Geriatrics</i> , 2022, 22, 260.	2.7	11
5	Determinants of emergency presentation in patients with colorectal cancer: a systematic review and meta-analysis. <i>Scientific Reports</i> , 2022, 12, 4366.	3.3	9
6	The role of faecal calprotectin in diagnosis and staging of colorectal neoplasia: a systematic review and meta-analysis. <i>BMC Gastroenterology</i> , 2022, 22, 176.	2.0	6
7	Molecular mechanisms of tumour budding and its association with microenvironment in colorectal cancer. <i>Clinical Science</i> , 2022, 136, 521-535.	4.3	4
8	Randomised trial of intravenous thiamine and/or magnesium sulphate administration on erythrocyte transketolase activity, lactate concentrations and alcohol withdrawal scores. <i>Scientific Reports</i> , 2022, 12, 6941.	3.3	5
9	Cancer cachexia: a nutritional or a systemic inflammatory syndrome?. <i>British Journal of Cancer</i> , 2022, 127, 379-382.	6.4	48
10	The relationship between the Glasgow Microenvironment Score and markers of epithelial-mesenchymal transition in TNM II-III colorectal cancer. <i>Human Pathology</i> , 2022, 127, 1-11.	2.0	2
11	The combination of computed tomographyâ€derived muscle mass and muscle density and relationship with clinicopathological characteristics and survival in patients undergoing potentially curative surgery for colorectal cancer. <i>JCSM Clinical Reports</i> , 2022, 7, 65-76.	1.3	5
12	Relationship between preâ€operative glycated haemoglobin and surgical site infection in patients undergoing elective colon cancer surgery. <i>Oncology Letters</i> , 2022, 24, .	1.8	0
13	The Relationship Between the Tumor Cell Expression of Hypoxic Markers and Survival in Patients With ER-positive Invasive Ductal Breast Cancer. <i>Journal of Histochemistry and Cytochemistry</i> , 2022, 70, 479-494.	2.5	4
14	The Glasgow Microenvironment Score associates with prognosis and adjuvant chemotherapy response in colorectal cancer. <i>British Journal of Cancer</i> , 2021, 124, 786-796.	6.4	11
15	Aortic calcification is associated with non-infective rather than infective postoperative complications following colorectal cancer resection: an observational cohort study. <i>European Radiology</i> , 2021, 31, 4319-4329.	4.5	4
16	A meta-analysis of CD274 (PD-L1) assessment and prognosis in colorectal cancer and its role in predicting response to anti-PD-1 therapy. <i>Critical Reviews in Oncology/Hematology</i> , 2021, 157, 103147.	4.4	27
17	Relationship between immune checkpoint proteins, tumour microenvironment characteristics, and prognosis in primary operable colorectal cancer. <i>Journal of Pathology: Clinical Research</i> , 2021, 7, 121-134.	3.0	17
18	Staging the Tumor and Staging the Host: Pretreatment Combined Neutrophil Lymphocyte Ratio and Modified Glasgow Prognostic Score Is Associated with Overall Survival in Patients with Esophagogastric Cancers Undergoing Treatment with Curative Intent. <i>Annals of Surgical Oncology</i> , 2021, 28, 722-731.	1.5	13

#	ARTICLE	IF	CITATIONS
19	The prognostic value of combined measures of the systemic inflammatory response in patients with colon cancer: an analysis of 1700 patients. <i>British Journal of Cancer</i> , 2021, 124, 1828-1835.	6.4	21
20	The relationship between hypoxia-inducible factor 1 α (HIF-1 α) and patient survival in breast cancer: Systematic review and meta-analysis. <i>Critical Reviews in Oncology/Hematology</i> , 2021, 159, 103231.	4.4	20
21	Relationship between cytokines and symptoms in people with incurable cancer: A systematic review. <i>Critical Reviews in Oncology/Hematology</i> , 2021, 159, 103222.	4.4	6
22	Vascular calcification and response to neoadjuvant therapy in locally advanced rectal cancer: an exploratory study. <i>Journal of Cancer Research and Clinical Oncology</i> , 2021, 147, 3409-3420.	2.5	1
23	The Relationship Between Comorbidity, Screen-Detection and Outcome in Patients Undergoing Resection for Colorectal Cancer. <i>World Journal of Surgery</i> , 2021, 45, 2251-2260.	1.6	4
24	The Emerging Role of Interleukin 1 β (IL-1 β) in Cancer Cachexia. <i>Inflammation</i> , 2021, 44, 1223-1228.	3.8	27
25	Modified intramuscular adipose tissue content as a feasible surrogate marker for malnutrition in gastrointestinal cancer. <i>Clinical Nutrition</i> , 2021, 40, 2640-2653.	5.0	10
26	The relation between acute changes in the systemic inflammatory response and circulating thiamine and magnesium concentrations after elective knee arthroplasty. <i>Scientific Reports</i> , 2021, 11, 11271.	3.3	6
27	The wider implications of the COVID-19 pandemic: Assessing the impact of accident and emergency use for frequent attenders. <i>International Emergency Nursing</i> , 2021, 56, 100984.	1.5	5
28	The systemic inflammatory response and clinicopathological characteristics in patients admitted to hospital with COVID-19 infection: Comparison of 2 consecutive cohorts. <i>PLoS ONE</i> , 2021, 16, e0251924.	2.5	13
29	Relation Between Body Composition, Systemic Inflammatory Response, and Clinical Outcomes in Patients Admitted to an Urban Teaching Hospital with COVID-19. <i>Journal of Nutrition</i> , 2021, 151, 2236-2244.	2.9	24
30	The inflammatory microenvironment in screen-detected premalignant adenomatous polyps: early results from the integrated technologies for improved polyp surveillance (INCISE) project. <i>European Journal of Gastroenterology and Hepatology</i> , 2021, 33, 983-989.	1.6	3
31	The relationship between β -catenin and patient survival in colorectal cancer systematic review and meta-analysis. <i>Critical Reviews in Oncology/Hematology</i> , 2021, 163, 103337.	4.4	8
32	Longitudinal Changes in CT Body Composition in Patients Undergoing Surgery for Colorectal Cancer and Associations With Peri-Operative Clinicopathological Characteristics. <i>Frontiers in Nutrition</i> , 2021, 8, 678410.	3.7	5
33	The effect of anesthesia on the magnitude of the postoperative systemic inflammatory response in patients undergoing elective surgery for colorectal cancer in the context of an enhanced recovery pathway. <i>Medicine (United States)</i> , 2021, 100, e23997.	1.0	3
34	Computed tomography-defined low skeletal muscle index and density in cancer patients: observations from a systematic review. <i>Journal of Cachexia, Sarcopenia and Muscle</i> , 2021, 12, 1408-1417.	7.3	50
35	The role of faecal calprotectin in the identification of colorectal neoplasia in patients attending for screening colonoscopy. <i>Colorectal Disease</i> , 2021, , .	1.4	5
36	Systematic review of tumour budding and association with common mutations in patients with colorectal cancer. <i>Critical Reviews in Oncology/Hematology</i> , 2021, 167, 103490.	4.4	3

#	ARTICLE	IF	CITATIONS
37	PTH-95â€¦Relationship between faecal calprotectin and risk of future colorectal neoplasia. , 2021, , .		0
38	REVOLUTION (Routine EVALuatiOn of people Living with caNcer)â€™Protocol for a prospective characterisation study of patients with incurable cancer. PLoS ONE, 2021, 16, e0261175.	2.5	3
39	Lymphocyte-to-C-reactive protein ratio and score are clinically feasible nutrition-inflammation markers of outcome in patients with gastric cancer. Clinical Nutrition, 2020, 39, 1209-1217.	5.0	90
40	The effect of anesthesia on the postoperative systemic inflammatory response in patients undergoing surgery: A systematic review and meta-analysis. Surgery Open Science, 2020, 2, 1-21.	1.2	31
41	The relationship between the BMIâ€™adjusted weight loss grading system and quality of life in patients with incurable cancer. Journal of Cachexia, Sarcopenia and Muscle, 2020, 11, 160-168.	7.3	40
42	Perioperative Blood Transfusion is Associated with Postoperative Systemic Inflammatory Response and Poorer Outcomes Following Surgery for Colorectal Cancer. Annals of Surgical Oncology, 2020, 27, 833-843.	1.5	48
43	Preoperative, biopsyâ€™based assessment of the tumour microenvironment in patients with primary operable colorectal cancer. Journal of Pathology: Clinical Research, 2020, 6, 30-39.	3.0	11
44	Comparison of the prognostic value of ECOG-PS, mGPS and BMI/WL: Implications for a clinically important framework in the assessment and treatment of advanced cancer. Clinical Nutrition, 2020, 39, 2889-2895.	5.0	33
45	The local inflammatory response in colorectal cancer â€™ Type, location or density? A systematic review and meta-analysis. Cancer Treatment Reviews, 2020, 83, 101949.	7.7	38
46	Lymphocyte-C-reactive Protein Ratio as Promising New Marker for Predicting Surgical and Oncological Outcomes in Colorectal Cancer. Annals of Surgery, 2020, 272, 342-351.	4.2	167
47	The relationship between plasma albumin, alkaline phosphatase and pyridoxal phosphate concentrations in plasma and red cells: Implications for assessing vitamin B6 status. Clinical Nutrition, 2020, 39, 2824-2831.	5.0	13
48	A biobank analysis of prognostic biomarkers of the systemic inflammatory response in patients presenting with malignancy of undefined primary origin. European Journal of Cancer, 2020, 139, 1-9.	2.8	4
49	A comparison of the prognostic value of composite ratios and cumulative scores in patients with operable rectal cancer. Scientific Reports, 2020, 10, 17965.	3.3	6
50	The effect of postoperative complications on survival and recurrence after surgery for breast cancer: A systematic review and meta-analysis. Critical Reviews in Oncology/Hematology, 2020, 155, 103075.	4.4	13
51	The relationship between computed tomographyâ€™derived body composition and survival in colorectal cancer: the effect of image software. JCSM Rapid Communications, 2020, 3, 81-90.	1.6	5
52	Hypoalbuminemia Reflects Nutritional Risk, Body Composition and Systemic Inflammation and Is Independently Associated with Survival in Patients with Colorectal Cancer. Cancers, 2020, 12, 1986.	3.7	61
53	The relationship between computed tomography derived skeletal muscle index, psoas muscle index and clinical outcomes in patients with operable colorectal cancer. Clinical Nutrition ESPEN, 2020, 39, 104-113.	1.2	10
54	Prognostic factors in patients admitted to an urban teaching hospital with COVID-19 infection. Journal of Translational Medicine, 2020, 18, 354.	4.4	41

#	ARTICLE	IF	CITATIONS
55	Comparison of the prognostic value of MUST, ECOG-PS, mGPS and CT derived body composition analysis in patients with advanced lung cancer. <i>Clinical Nutrition ESPEN</i> , 2020, 40, 349-356.	1.2	8
56	The relationship between 18F-FDG-PETCT-derived tumour metabolic activity, nutritional risk, body composition, systemic inflammation and survival in patients with lung cancer. <i>Scientific Reports</i> , 2020, 10, 20819.	3.3	13
57	The relationship between anaesthetic technique, clinicopathological characteristics and the magnitude of the postoperative systemic inflammatory response in patients undergoing elective surgery for colon cancer. <i>PLoS ONE</i> , 2020, 15, e0228580.	2.5	5
58	The Relationship between ECOG-PS, mGPS, BMI/WL Grade and Body Composition and Physical Function in Patients with Advanced Cancer. <i>Cancers</i> , 2020, 12, 1187.	3.7	25
59	Histological phenotypic subtypes predict recurrence risk and response to adjuvant chemotherapy in patients with stage III colorectal cancer. <i>Journal of Pathology: Clinical Research</i> , 2020, 6, 283-296.	3.0	17
60	The impact of preoperative systemic inflammation on the efficacy of intravenous iron infusion to correct anaemia prior to surgery for colorectal cancer. <i>Perioperative Medicine (London, England)</i> , 2020, 9, 17.	1.5	10
61	The prevalence of cancer associated systemic inflammation: Implications of prognostic studies using the Glasgow Prognostic Score. <i>Critical Reviews in Oncology/Hematology</i> , 2020, 150, 102962.	4.4	26
62	Determinants of quality of life in patients with incurable cancer. <i>Cancer</i> , 2020, 126, 2872-2882.	4.1	33
63	Perioperative nutrition: Recommendations from the ESPEN expert group. <i>Clinical Nutrition</i> , 2020, 39, 3211-3227.	5.0	132
64	Systemic Inflammation and Outcome in 2295 Patients with Stage III Colorectal Cancer from Scotland and Norway: First Results from the ScotScan Colorectal Cancer Group. <i>Annals of Surgical Oncology</i> , 2020, 27, 2784-2794.	1.5	11
65	Clinical and Analytical Impact of Moving from Jaffe to Enzymatic Serum Creatinine Methodology. <i>Journal of applied laboratory medicine</i> , The, 2020, 5, 631-642.	1.3	19
66	Computed tomography-derived body composition analysis in patients with advanced cancer: clinical utility and future research. <i>Current Opinion in Supportive and Palliative Care</i> , 2020, 14, 309-315.	1.3	13
67	The relationship between systemic inflammation, body composition and clinical outcomes in patients with operable colorectal cancer at low and medium to high nutritional risk. <i>JCSM Clinical Reports</i> , 2020, 5, 99-107.	1.3	1
68	The relationship between members of the canonical NF- κ B pathway, tumour microenvironment and cancer specific survival in colorectal cancer patients. <i>Histology and Histopathology</i> , 2020, 35, 569-578.	0.7	1
69	Genetic influence of cytokine polymorphisms on the clinical outcome of Japanese gastrointestinal cancer patients in palliative care. <i>Oncology Letters</i> , 2019, 17, 623-629.	1.8	3
70	Attitudes towards the use of perioperative steroids in resectional colorectal cancer surgery in the UK: A qualitative study. <i>Annals of Medicine and Surgery</i> , 2019, 48, 23-28.	1.1	2
71	The Relationship Between Tumor Budding, Tumor Microenvironment, and Survival in Patients with Primary Operable Colorectal Cancer. <i>Annals of Surgical Oncology</i> , 2019, 26, 4397-4404.	1.5	47
72	The Relationship between Imaging-Based Body Composition Analysis and the Systemic Inflammatory Response in Patients with Cancer: A Systematic Review. <i>Cancers</i> , 2019, 11, 1304.	3.7	56

#	ARTICLE	IF	CITATIONS
73	The relation between Malnutrition Universal Screening Tool (MUST), computed tomography-derived body composition, systemic inflammation, and clinical outcomes in patients undergoing surgery for colorectal cancer. <i>American Journal of Clinical Nutrition</i> , 2019, 110, 1327-1334.	4.7	57
74	Src family kinases, HCK and FGR, associate with local inflammation and tumour progression in colorectal cancer. <i>Cellular Signalling</i> , 2019, 56, 15-22.	3.6	38
75	The relationship between body mass index, sex, and postoperative outcomes in patients undergoing potentially curative surgery for colorectal cancer. <i>Clinical Nutrition ESPEN</i> , 2019, 30, 185-189.	1.2	8
76	Low serum magnesium and 1-year mortality in alcohol withdrawal syndrome. <i>European Journal of Clinical Investigation</i> , 2019, 49, e13152.	3.4	12
77	Possible dose dependent effect of perioperative dexamethasone and laparoscopic surgery on the postoperative systemic inflammatory response and complications following surgery for colon cancer. <i>European Journal of Surgical Oncology</i> , 2019, 45, 1613-1618.	1.0	14
78	Regression Correction Equation to Adjust Serum Iron and Ferritin Concentrations Based on C-Reactive Protein and Albumin in Patients Receiving Primary and Secondary Care. <i>Journal of Nutrition</i> , 2019, 149, 877-883.	2.9	9
79	Circulating miR-203 derived from metastatic tissues promotes myopenia in colorectal cancer patients. <i>Journal of Cachexia, Sarcopenia and Muscle</i> , 2019, 10, 536-548.	7.3	57
80	Quantitative data on red cell measures of iron status and their relation to the magnitude of the systemic inflammatory response and survival in patients with colorectal cancer. <i>European Journal of Surgical Oncology</i> , 2019, 45, 1205-1211.	1.0	6
81	Relationship between computed tomography-derived body composition, sex, and post-operative complications in patients with colorectal cancer. <i>European Journal of Clinical Nutrition</i> , 2019, 73, 1450-1457.	2.9	8
82	The relationship between phosphorylation status of focal adhesion kinases, molecular subtypes, tumour microenvironment and survival in patients with primary operable ductal breast cancer. <i>Cellular Signalling</i> , 2019, 60, 91-99.	3.6	7
83	A prospective evaluation of thiamine and magnesium status in relation to clinicopathological characteristics and 1-year mortality in patients with alcohol withdrawal syndrome. <i>Journal of Translational Medicine</i> , 2019, 17, 384.	4.4	7
84	An exploratory study examining the relationship between performance status and systemic inflammation frameworks and cytokine profiles in patients with advanced cancer. <i>Medicine (United Kingdom)</i> , 2019, 98, 107-114.	1.0	10
85	"How Long Have I Got?" A Prospective Cohort Study Comparing Validated Prognostic Factors for Use in Patients with Advanced Cancer. <i>Oncologist</i> , 2019, 24, e960-e967.	3.7	22
86	Relationship between nutritional status and the systemic inflammatory response: micronutrients. <i>Proceedings of the Nutrition Society</i> , 2019, 78, 56-67.	1.0	59
87	The Relationship Between Tumor Glucose Metabolism and Host Systemic Inflammatory Responses in Patients with Cancer: A Systematic Review. <i>Journal of Nuclear Medicine</i> , 2019, 60, 467-471.	5.0	22
88	The relationship between computed tomography-derived body composition, systemic inflammatory response, and survival in patients undergoing surgery for colorectal cancer. <i>Journal of Cachexia, Sarcopenia and Muscle</i> , 2019, 10, 111-122.	7.3	118
89	Signal interaction between the tumour and inflammatory cells in patients with gastrointestinal cancer: Implications for treatment. <i>Cellular Signalling</i> , 2019, 54, 81-90.	3.6	11
90	Close Relationship Between Immunological/Inflammatory Markers and Myopenia and Myosteatorsis in Patients With Colorectal Cancer: A Propensity Score Matching Analysis. <i>Journal of Parenteral and Enteral Nutrition</i> , 2019, 43, 508-515.	2.6	31

#	ARTICLE	IF	CITATIONS
91	The association between markers of tumour cell metabolism, the tumour microenvironment and outcomes in patients with colorectal cancer. <i>International Journal of Cancer</i> , 2019, 144, 2320-2329.	5.1	10
92	Normocytic anaemia is associated with systemic inflammation and poorer survival in patients with colorectal cancer treated with curative intent. <i>International Journal of Colorectal Disease</i> , 2019, 34, 401-408.	2.2	20
93	Palliative stenting for oesophagogastric cancer: tumour and host factors and prognosis. <i>BMJ Supportive and Palliative Care</i> , 2019, 9, 332-339.	1.6	4
94	Factors associated with the efficacy of polyp detection during routine flexible sigmoidoscopy. <i>Frontline Gastroenterology</i> , 2018, 9, 135-142.	1.8	4
95	The relationship between right-sided tumour location, tumour microenvironment, systemic inflammation, adjuvant therapy and survival in patients undergoing surgery for colon and rectal cancer. <i>British Journal of Cancer</i> , 2018, 118, 705-712.	6.4	46
96	Outcome in colorectal cancer—tumour, stroma and so much more. <i>Annals of Oncology</i> , 2018, 29, 534-535.	1.2	2
97	The relationship between body mass index and short term postoperative outcomes in patients undergoing potentially curative surgery for colorectal cancer: A systematic review and meta-analysis. <i>Critical Reviews in Oncology/Hematology</i> , 2018, 121, 68-73.	4.4	28
98	Predictive Biomarkers for Endocrine Therapy: Retrospective Study in Tamoxifen and Exemestane Adjuvant Multinational (TEAM) Trial. <i>Journal of the National Cancer Institute</i> , 2018, 110, 616-627.	6.3	8
99	Determinants of lymph node count and positivity in patients undergoing surgery for colon cancer. <i>Medicine (United States)</i> , 2018, 97, e0185.	1.0	10
100	NF- κ B pathways in the development and progression of colorectal cancer. <i>Translational Research</i> , 2018, 197, 43-56.	5.0	164
101	The role of thiamine dependent enzymes in obesity and obesity related chronic disease states: A systematic review. <i>Clinical Nutrition ESPEN</i> , 2018, 25, 8-17.	1.2	52
102	In reply to: Meyer CP et al., The association of hypoalbuminemia with early perioperative outcomes—A comprehensive assessment across 16 major procedures. <i>American Journal of Surgery</i> , 2018, 216, 174-175.	1.8	1
103	The relationship between tumour stage, systemic inflammation, body composition and survival in patients with colorectal cancer. <i>Clinical Nutrition</i> , 2018, 37, 1279-1285.	5.0	93
104	Staging the tumor and staging the host: A two centre, two country comparison of systemic inflammatory responses of patients undergoing resection of primary operable colorectal cancer. <i>American Journal of Surgery</i> , 2018, 216, 458-464.	1.8	21
105	The relationship between 18 F-FDG-PETCT-derived markers of tumour metabolism and systemic inflammation in patients with recurrent disease following surgery for colorectal cancer. <i>Colorectal Disease</i> , 2018, 20, 407-415.	1.4	12
106	Comment on “The Important Role for Intravenous Iron in Perioperative Patient Blood Management in Major Abdominal Surgery. <i>Annals of Surgery</i> , 2018, 267, e49.	4.2	4
107	Patients with inflammatory bowel disease have higher abdominal adiposity and less skeletal mass than healthy controls. <i>Annals of Gastroenterology</i> , 2018, 31, 566-571.	0.6	13
108	Comment on the Biomarkers Reflecting Inflammation and Nutritional Determinants of Anemia (BRINDA) project. <i>American Journal of Clinical Nutrition</i> , 2018, 108, 204-205.	4.7	4

#	ARTICLE	IF	CITATIONS
109	The relationship between sex, body mass index, and postoperative outcomes in patients undergoing surgery for colorectal cancer. <i>Proceedings of the Nutrition Society</i> , 2018, 77, .	1.0	0
110	Targeting IL-1 \pm in cancer cachexia: a narrative review. <i>Current Opinion in Supportive and Palliative Care</i> , 2018, 12, 453-459.	1.3	28
111	The relationship between cardiopulmonary exercise test variables, the systemic inflammatory response, and complications following surgery for colorectal cancer. <i>Perioperative Medicine (London, England)</i> , 2018, 7, 11.	1.5	6
112	The prognostic value of the systemic inflammatory response in randomised clinical trials in cancer: A systematic review. <i>Critical Reviews in Oncology/Hematology</i> , 2018, 132, 130-137.	4.4	95
113	Reply to comment of "ERK and p38MAPK combine to improve survival in patients with BRAF mutant colorectal cancer". <i>British Journal of Cancer</i> , 2018, 119, 909-909.	6.4	0
114	The relationship between circulating concentrations of thiamine, magnesium, lactate and erythrocyte transketolase activity (ETKA) in patients presenting with alcohol withdrawal syndrome. <i>Clinical Nutrition</i> , 2018, 37, S93-S94.	5.0	0
115	The prognostic value of systemic inflammation in patients undergoing surgery for colon cancer: comparison of composite ratios and cumulative scores. <i>British Journal of Cancer</i> , 2018, 119, 40-51.	6.4	103
116	Clinical Impact of Muscle Quantity and Quality in Colorectal Cancer Patients: A Propensity Score Matching Analysis. <i>Journal of Parenteral and Enteral Nutrition</i> , 2018, 42, 1322-1333.	2.6	35
117	ERK and p38MAPK combine to improve survival in patients with BRAF mutant colorectal cancer. <i>British Journal of Cancer</i> , 2018, 119, 323-329.	6.4	11
118	Telomere Homeostasis: Interplay with Magnesium. <i>International Journal of Molecular Sciences</i> , 2018, 19, 157.	4.1	31
119	Clinical Burden of Modified Glasgow Prognostic Scale in Colorectal Cancer. <i>Anticancer Research</i> , 2018, 38, 1599-1610.	1.1	14
120	Erythrocyte concentrations of B1, B2, B6 but not plasma C and E are reliable indicators of nutrition status in the presence of systemic inflammation. <i>Clinical Nutrition ESPEN</i> , 2017, 17, 54-62.	1.2	16
121	Prognostic Tools in Patients With Advanced Cancer: A Systematic Review. <i>Journal of Pain and Symptom Management</i> , 2017, 53, 962-970.e10.	1.2	156
122	In reply to "Hynes et al". Back to the future: routine morphological assessment of the tumour microenvironment is prognostic in stage II/III colon cancer in a large population-based study. <i>Histopathology</i> , 2017, 71, 326-327.	2.9	2
123	The modified Glasgow prognostic score in patients undergoing surgery for bone and soft tissue sarcoma. <i>Journal of Plastic, Reconstructive and Aesthetic Surgery</i> , 2017, 70, 618-624.	1.0	15
124	The Impact of Preoperative Dexamethasone on the Magnitude of the Postoperative Systemic Inflammatory Response and Complications Following Surgery for Colorectal Cancer. <i>Annals of Surgical Oncology</i> , 2017, 24, 2104-2112.	1.5	30
125	Tumour invasiveness, the local and systemic environment and the basis of staging systems in colorectal cancer. <i>British Journal of Cancer</i> , 2017, 116, 1444-1450.	6.4	46
126	Colorectal cancer subtypes: Translation to routine clinical pathology. <i>Cancer Treatment Reviews</i> , 2017, 57, 1-7.	7.7	36

379	Modulation of the liver export protein synthetic response to feeding by an n ³ fatty-acid-enriched nutritional supplement is associated with anabolism in cachectic cancer patients. <i>Clinical Science</i> , 2004, 106, 359-364.	4.3	36
380	Lower concentrations of carotenoids in the critically ill patient are related to a systemic inflammatory response and increased lipid peroxidation. <i>Clinical Nutrition</i> , 2003, 22, 459-462.	5.0	34
381	Male gender adversely affects survival following surgery for colorectal cancer. <i>British Journal of Surgery</i> , 2003, 90, 711-715.	0.3	119
382	Optimisation and validation of a sensitive high-performance liquid chromatography assay for routine measurement of pyridoxal 5-phosphate in human plasma and red cells using pre-column semicarbazide derivatisation. <i>Journal of Chromatography B: Analytical Technologies in the Biomedical and Life Sciences</i> , 2003, 792, 333-343.	2.3	101
383	Evaluation of cumulative prognostic scores based on the systemic inflammatory response in patients with inoperable non-small-cell lung cancer. <i>British Journal of Cancer</i> , 2003, 89, 1028-1030.	6.4	639
384	A prospective study of the impact of weight loss and the systemic inflammatory response on quality of life in patients with inoperable non-small cell lung cancer. <i>Lung Cancer</i> , 2003, 40, 295-299.	2.0	56
385	Pyridoxal Phosphate Decreases in Plasma but not Erythrocytes during Systemic Inflammatory Response. <i>Clinical Chemistry</i> , 2003, 49, 515-518.	3.2	48
386	The relationship between T-lymphocyte infiltration, stage, tumour grade and survival in patients undergoing curative surgery for renal cell cancer. <i>British Journal of Cancer</i> , 2003, 89, 1906-1908.	6.4	140
387	The effect of deprivation and the systemic inflammatory response on outcome following curative resection for colorectal cancer. <i>British Journal of Cancer</i> , 2003, 89, 612-614.	6.4	19
388	Comparison of simple acid-ethanol precipitation with gel exclusion chromatography for measuring leptin binding in serum of normal subjects and cancer patients. <i>Annals of Clinical Biochemistry</i> , 2003, 40, 185-187.	1.6	2
389	The systemic inflammatory response, weight loss, performance status and survival in patients with inoperable non-small cell lung cancer. <i>British Journal of Cancer</i> , 2002, 87, 264-267.	6.4	266
390	Performance Status of Male and Female Advanced Cancer Patients Is Independently Predicted by Mid-Upper Arm Circumference Measurement. <i>Nutrition and Cancer</i> , 2002, 42, 191-193.	2.0	26
391	Circulating Concentrations of "Free" Leptin in Relation to Fat Mass and Appetite in Gastrointestinal Cancer Patients. <i>Nutrition and Cancer</i> , 2002, 44, 157-160.	2.0	29
392	A LONGITUDINAL STUDY OF LEPTIN AND APPETITE, RESTING ENERGY EXPENDITURE AND BODY FAT MASS IN WEIGHT-STABLE CANCER PATIENTS. <i>Cytokine</i> , 2002, 20, 174-177.	3.2	8
393	The relationship between reduced vitamin antioxidant concentrations and the systemic inflammatory response in patients with common solid tumours. <i>Clinical Nutrition</i> , 2002, 21, 161-164.	5.0	51
394	The relationship of circulating insulin-like growth factor 1, its binding protein, prostate-specific antigen and C-reactive protein with disease stage in prostate cancer. <i>BJU International</i> , 2002, 89, 396-399.	2.5	36
395	Effect of a Fish Oil-Enriched Nutritional Supplement on Metabolic Mediators in Patients With Pancreatic Cancer Cachexia. <i>Nutrition and Cancer</i> , 2001, 40, 118-124.	2.0	129
396	Longitudinal study of resting energy expenditure, body cell mass and the inflammatory response in male patients with non-small cell lung cancer. <i>Lung Cancer</i> , 2001, 32, 307-312.	2.0	30
