#	ARTICLE	IF	CITATIONS
1	Quantifying fixed individual heterogeneity in demographic parameters: Performance of correlated random effects for Bernoulli variables. <i>Methods in Ecology and Evolution</i> , 2022, 13, 91-104.	2.2	4
2	The Contributions of Maternal Age Heterogeneity to Variance in Lifetime Reproductive Output. <i>American Naturalist</i> , 2022, 199, 603-616.	1.0	6
3	Causes and consequences of pair-bond disruption in a sex-skewed population of a long-lived monogamous seabird. <i>Ecological Monographs</i> , 2022, 92, .	2.4	7
4	The Role of Kinship in Racial Differences in Exposure to Unemployment. <i>Demography</i> , 2022, , .	1.2	1
5	The Paris Agreement objectives will likely halt future declines of emperor penguins. <i>Global Change Biology</i> , 2020, 26, 1170-1184.	4.2	33
6	A matrix model for density-dependent selection in stage-classified populations, with application to pesticide resistance in <i>Tribolium</i> . <i>Ecological Modelling</i> , 2020, 416, 108875.	1.2	14
7	A demographic and evolutionary analysis of maternal effect senescence. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2020, 117, 16431-16437.	3.3	19
8	Variance as a life history outcome: Sensitivity analysis of the contributions of stochasticity and heterogeneity. <i>Ecological Modelling</i> , 2020, 417, 108856.	1.2	21
9	Selection in two-sex stage-structured populations: Genetics, demography, and polymorphism. <i>Theoretical Population Biology</i> , 2019, 130, 160-169.	0.5	16
10	Ringed seal demography in a changing climate. <i>Ecological Applications</i> , 2019, 29, e01855.	1.8	18
11	Introduction: Sensitivity Analysis – What and Why?. <i>Demographic Research Monographs</i> , 2019, , 3-12.	0.1	2
12	Sensitivity Analysis of Nonlinear Demographic Models. <i>Demographic Research Monographs</i> , 2019, , 199-252.	0.1	1
13	Sensitivity Analysis of Discrete Markov Chains. <i>Demographic Research Monographs</i> , 2019, , 255-280.	0.1	0
14	Sensitivity Analysis of Continuous Markov Chains. <i>Demographic Research Monographs</i> , 2019, , 281-299.	0.1	0
15	The Sensitivity of Population Growth Rate: Three Approaches. <i>Demographic Research Monographs</i> , 2019, , 31-43.	0.1	1
16	Sensitivity Analysis of Longevity and Life Disparity. <i>Demographic Research Monographs</i> , 2019, , 45-65.	0.1	0
17	Age – Stage-Classified Models. <i>Demographic Research Monographs</i> , 2019, , 115-138.	0.1	0
18	LTRE Decomposition of the Stochastic Growth Rate. <i>Demographic Research Monographs</i> , 2019, , 179-195.	0.1	0

#	ARTICLE	IF	CITATIONS
19	Sensitivity Analysis: Matrix Methods in Demography and Ecology. Demographic Research Monographs, 2019, , .	0.1	78
20	Transient Population Dynamics. Demographic Research Monographs, 2019, , 141-158.	0.1	1
21	Matrix Calculus and Notation. Demographic Research Monographs, 2019, , 13-28.	0.1	1
22	Stage-Structured Evolutionary Demography: Linking Life Histories, Population Genetics, and Ecological Dynamics. American Naturalist, 2019, 193, 545-559.	1.0	20
23	Periodic Models. Demographic Research Monographs, 2019, , 159-178.	0.1	0
24	Changing contribution of area-level deprivation to total variance in age at death: a population-based decomposition analysis. BMJ Open, 2019, 9, e024952.	0.8	16
25	Sensitivity analysis of the recovery time for a population under the impact of an environmental disturbance. Natural Resource Modelling, 2019, 32, e12166.	0.8	8
26	Inferring forest fate from demographic data: from vital rates to population dynamic models. Proceedings of the Royal Society B: Biological Sciences, 2018, 285, 20172050.	1.2	31
27	Occupancy time in sets of states for demographic models. Theoretical Population Biology, 2018, 120, 62-77.	0.5	13
28	General conclusion to the special issue Moving forward on individual heterogeneity. Oikos, 2018, 127, 750-756.	1.2	8
29	Age- and stage-classified demographic analysis: a comprehensive approach. Ecological Monographs, 2018, 88, 560-584.	2.4	51
30	Interacting effects of unobserved heterogeneity and individual stochasticity in the life history of the southern fulmar. Journal of Animal Ecology, 2018, 87, 212-222.	1.3	34
31	Demography when history matters: construction and analysis of second-order matrix population models. Theoretical Ecology, 2018, 11, 129-140.	0.4	3
32	Variance in animal longevity: contributions of heterogeneity and stochasticity. Population Ecology, 2018, 60, 89-99.	0.7	26
33	Mating, births, and transitions: a flexible two-sex matrix model for evolutionary demography. Population Ecology, 2018, 60, 21-36.	0.7	13
34	Matrix methods in health demography: a new approach to the stochastic analysis of healthy longevity and DALYs. Population Health Metrics, 2018, 16, 8.	1.3	13
35	Demographic variance in heterogeneous populations: matrix models and sensitivity analysis. Oikos, 2018, 127, 648-663.	1.2	16
36	Climate change and functional traits affect population dynamics of a long-lived seabird. Journal of Animal Ecology, 2018, 87, 906-920.	1.3	45

#	ARTICLE	IF	CITATIONS
37	The Rarity of Survival to Old Age Does Not Drive the Evolution of Senescence. <i>Evolutionary Biology</i> , 2017, 44, 5-10.	0.5	51
38	Stochasticity, heterogeneity, and variance in longevity in human populations. <i>Theoretical Population Biology</i> , 2017, 114, 107-116.	0.5	35
39	Dynamics of leprosy in nine-banded armadillos: Net reproductive number and effects on host population dynamics. <i>Ecological Modelling</i> , 2017, 350, 100-108.	1.2	6
40	Senescence, Selection Gradients and Mortality. , 2017, , 56-82.		43
41	Analysis of lethal and sublethal impacts of environmental disasters on sperm whales using stochastic modeling. <i>Ecotoxicology</i> , 2017, 26, 820-830.	1.1	6
42	Lifetime reproductive output: individual stochasticity, variance, and sensitivity analysis. <i>Theoretical Ecology</i> , 2017, 10, 355-374.	0.4	53
43	Mechanistic description of population dynamics using dynamic energy budget theory incorporated into integral projection models. <i>Methods in Ecology and Evolution</i> , 2017, 8, 146-154.	2.2	52
44	A Note on the vec Operator Applied to Unbalanced Block-Structured Matrices. <i>Journal of Applied Mathematics</i> , 2016, 2016, 1-3.	0.4	7
45	A demographic model for sex ratio evolution and the effects of sex-biased offspring costs. <i>Ecology and Evolution</i> , 2016, 6, 1470-1492.	0.8	21
46	COMADRE: a global data base of animal demography. <i>Journal of Animal Ecology</i> , 2016, 85, 371-384.	1.3	189
47	Hyperstate matrix models: extending demographic state spaces to higher dimensions. <i>Methods in Ecology and Evolution</i> , 2016, 7, 1438-1450.	2.2	21
48	A life-history perspective on the demographic drivers of structured population dynamics in changing environments. <i>Ecology Letters</i> , 2016, 19, 1023-1031.	3.0	80
49	Frequency-dependent two-sex models: a new approach to sex ratio evolution with multiple maternal conditions. <i>Ecology and Evolution</i> , 2016, 6, 6855-6879.	0.8	13
50	The COMPADRE Plant Matrix Database: an open online repository for plant demography. <i>Journal of Ecology</i> , 2015, 103, 202-218.	1.9	260
51	Why do lifespan variability trends for the young and old diverge? A perturbation analysis. <i>Demographic Research</i> , 2014, 30, 1367-1396.	2.0	30
52	Projected continent-wide declines of the emperor penguin under climate change. <i>Nature Climate Change</i> , 2014, 4, 715-718.	8.1	95
53	Diversity of ageing across the tree of life. <i>Nature</i> , 2014, 505, 169-173.	13.7	800
54	Calculating second derivatives of population growth rates for ecology and evolution. <i>Methods in Ecology and Evolution</i> , 2014, 5, 473-482.	2.2	23

#	ARTICLE	IF	CITATIONS
55	Sensitivity analysis of discrete Markov chains via matrix calculus. <i>Linear Algebra and Its Applications</i> , 2013, 438, 1727-1745.	0.4	36
56	Age, stage and senescence in plants. <i>Journal of Ecology</i> , 2013, 101, 585-595.	1.9	95
57	Perturbation Analysis of Indices of Lifespan Variability. <i>Demography</i> , 2013, 50, 1615-1640.	1.2	95
58	A seasonal, density-dependent model for the management of an invasive weed. <i>Ecological Applications</i> , 2013, 23, 1893-1905.	1.8	13
59	Sensitivity analysis of periodic matrix population models. <i>Theoretical Population Biology</i> , 2012, 82, 329-339.	0.5	26
60	Contributions of high- and low-quality patches to a metapopulation with stochastic disturbance. <i>Theoretical Ecology</i> , 2012, 5, 167-179.	0.4	15
61	Matrix models and sensitivity analysis of populations classified by age and stage: a vec-permutation matrix approach. <i>Theoretical Ecology</i> , 2012, 5, 403-417.	0.4	73
62	Incorporating "recruitment" in matrix projection models: estimation, parameters, and the influence of model structure. <i>Journal of Ornithology</i> , 2012, 152, 585-595.	0.5	4
63	Effects of climate change on an emperor penguin population: analysis of coupled demographic and climate models. <i>Global Change Biology</i> , 2012, 18, 2756-2770.	4.2	93
64	Beyond R0: Demographic Models for Variability of Lifetime Reproductive Output. <i>PLoS ONE</i> , 2011, 6, e20809.	1.1	65
65	The stage-structured epidemic: linking disease and demography with a multi-state matrix approach model. <i>Theoretical Ecology</i> , 2011, 4, 301-319.	0.4	51
66	Demography and dispersal: invasion speeds and sensitivity analysis in periodic and stochastic environments. <i>Theoretical Ecology</i> , 2011, 4, 407-421.	0.4	27
67	Perturbation analysis of continuous-time absorbing Markov chains. <i>Numerical Linear Algebra With Applications</i> , 2011, 18, 901-917.	0.9	20
68	Life table response experiment analysis of the stochastic growth rate. <i>Journal of Ecology</i> , 2010, 98, 324-333.	1.9	59
69	Survival and breeding of polar bears in the southern Beaufort Sea in relation to sea ice. <i>Journal of Animal Ecology</i> , 2010, 79, 117-127.	1.3	216
70	Climate change threatens polar bear populations: a stochastic demographic analysis. <i>Ecology</i> , 2010, 91, 2883-2897.	1.5	203
71	Mating Behavior, Population Growth, and the Operational Sex Ratio: A Periodic Two-Sex Model Approach. <i>American Naturalist</i> , 2010, 175, 739-752.	1.0	64
72	Sensitivity and elasticity of density-dependent population models. <i>Journal of Difference Equations and Applications</i> , 2009, 15, 349-369.	0.7	22

#	ARTICLE	IF	CITATIONS
73	Rank and Redundancy of Multistate Mark-Recapture Models for Seabird Populations with Unobservable States. , 2009, , 797-825.		20
74	Demographic models and IPCC climate projections predict the decline of an emperor penguin population. Proceedings of the National Academy of Sciences of the United States of America, 2009, 106, 1844-1847.	3.3	206
75	Environment-specific elasticity and sensitivity analysis of the stochastic growth rate. Ecological Modelling, 2009, 220, 605-610.	1.2	22
76	Demography of Verreaux's sifaka in a stochastic rainfall environment. Oecologia, 2009, 161, 491-504.	0.9	73
77	Limitation of population recovery: a stochastic approach to the case of the emperor penguin. Oikos, 2009, 118, 1292-1298.	1.2	37
78	Stage, age and individual stochasticity in demography. Oikos, 2009, 118, 1763-1782.	1.2	136
79	Population growth rate of a common understory herb decreases non-linearly across a gradient of deer herbivory. Forest Ecology and Management, 2009, 257, 1095-1103.	1.4	67
80	Rebuttal of "Polar Bear Population Forecasts: A Public-Policy Forecasting Audit". Interfaces, 2009, 39, 353-369.	1.6	12
81	Detecting reactivity. Ecology, 2009, 90, 2683-2688.	1.5	19
82	Sensitivity Analysis of Reactive Ecological Dynamics. Bulletin of Mathematical Biology, 2008, 70, 1634-1659.	0.9	49
83	Contributions of growth, stasis, and reproduction to fitness in brooding and broadcast spawning marine bivalves. Population Ecology, 2008, 50, 207-214.	0.7	9
84	A Demographic Analysis of the Fitness Cost of Extended Longevity in <i>Caenorhabditis elegans</i> . Journals of Gerontology - Series A Biological Sciences and Medical Sciences, 2007, 62, 126-135.	1.7	61
85	A MODEL FOR ENERGETICS AND BIOACCUMULATION IN MARINE MAMMALS WITH APPLICATIONS TO THE RIGHT WHALE. , 2007, 17, 2233-2250.		42
86	Extrinsic mortality and the evolution of senescence. Trends in Ecology and Evolution, 2007, 22, 173-174.	4.2	91
87	Sensitivity analysis of transient population dynamics. Ecology Letters, 2007, 10, 1-15.	3.0	223
88	A guide to calculating discrete-time invasion rates from data. , 2006, , 169-192.		30
89	On the Estimation of Dispersal Kernels from Individual Mark-Recapture Data. Environmental and Ecological Statistics, 2006, 13, 183-197.	1.9	28
90	How does stochasticity in colonization accelerate the speed of invasion in a cellular automaton model?. Ecological Research, 2006, 21, 334-345.	0.7	26
