#	ARTICLE	IF	CITATIONS
1	Infrared Absolute Calibration. I. Comparison of Sirius with Fainter Calibration Stars. <i>Astronomical Journal</i> , 2022, 163, 45.	4.7	6
2	Searching for TESS Photometric Variability of Possible JWST Spectrophotometric Standard Stars. <i>Astronomical Journal</i> , 2022, 163, 136.	4.7	8
3	The Nearby Evolved Stars Survey II: Constructing a volume-limited sample and first results from the James Clerk Maxwell Telescope. <i>Monthly Notices of the Royal Astronomical Society</i> , 2022, 512, 1091-1110.	4.4	5
4	The James Webb Space Telescope Absolute Flux Calibration. I. Program Design and Calibrator Stars. <i>Astronomical Journal</i> , 2022, 163, 267.	4.7	32
5	Trends in Silicates in the $\hat{1}^2$ Pictoris Disk. <i>Astrophysical Journal</i> , 2022, 933, 54.	4.5	3
6	Optical and Near-infrared Pulsation Properties of RR Lyrae and Population II Cepheid Variables in the Messier 15 Globular Cluster. <i>Astrophysical Journal</i> , 2021, 922, 20.	4.5	10
7	Asymptotic Giant Branch Stars in the Nearby Dwarf Galaxy Leo P*. <i>Astrophysical Journal</i> , 2019, 884, 152.	4.5	4
8	An Infrared Census of DUST in Nearby Galaxies with Spitzer (DUSTiNGS). V. The Period-Luminosity Relation for Dusty Metal-poor AGB Stars. <i>Astrophysical Journal</i> , 2019, 877, 49.	4.5	23
9	Circumstellar CO in metal-poor stellar winds: the highly irradiated globular cluster star 47 Tucanae V3. <i>Monthly Notices of the Royal Astronomical Society: Letters</i> , 2019, 484, L85-L89.	3.3	7
10	Stellar Pulsation and the Production of Dust and Molecules in Galactic Carbon Stars. <i>Astrophysical Journal</i> , 2019, 887, 82.	4.5	5
11	The End: Witnessing the Death of Extreme Carbon Stars. <i>Proceedings of the International Astronomical Union</i> , 2018, 14, 305-308.	0.0	0
12	Luminosities and mass-loss rates of Local Group AGB stars and red supergiants. <i>Astronomy and Astrophysics</i> , 2018, 609, A114.	5.1	52
13	The SAGE-Spec Spitzer Legacy program: the life-cycle of dust and gas in the Large Magellanic Cloud. Point source classification - III. <i>Monthly Notices of the Royal Astronomical Society</i> , 2017, 470, 3250-3282.	4.4	47
14	An Infrared Census of DUST in Nearby Galaxies with Spitzer (DUSTiNGS). IV. Discovery of High-redshift AGB Analogs. <i>Astrophysical Journal</i> , 2017, 851, 152.	4.5	29
15	DUSTiNGS. III. DISTRIBUTION OF INTERMEDIATE-AGE AND OLD STELLAR POPULATIONS IN DISKS AND OUTER EXTREMITIES OF DWARF GALAXIES. <i>Astrophysical Journal</i> , 2017, 834, 78.	4.5	31
16	THE INFRARED SPECTRAL PROPERTIES OF MAGELLANIC CARBON STARS. <i>Astrophysical Journal</i> , 2016, 826, 44.	4.5	36
17	Dust in planetary nebulae. <i>Proceedings of the International Astronomical Union</i> , 2016, 12, 121-127.	0.0	1
18	Dust & Abundances of Metal-Poor Planetary Nebulae in the Galactic Anti-Center. <i>Proceedings of the International Astronomical Union</i> , 2016, 12, 341-342.	0.0	0

#	ARTICLE	IF	CITATIONS
19	EU Del: exploring the onset of pulsation-driven winds in giant stars. Monthly Notices of the Royal Astronomical Society, 2016, 456, 4542-4550.	4.4	10
20	<i>Spitzer</i> infrared spectrograph point source classification in the Small Magellanic Cloud. Monthly Notices of the Royal Astronomical Society, 2015, 451, 3504-3536.	4.4	41
21	AN INFRARED CENSUS OF DUST IN NEARBY GALAXIES WITH<i>SPITZER</i> (DUSTINGS). II. DISCOVERY OF METAL-POOR DUSTY AGB STARS. Astrophysical Journal, 2015, 800, 51.	4.5	55
22	SPECTRAL CALIBRATION IN THE MID-INFRARED: CHALLENGES AND SOLUTIONS. Astronomical Journal, 2015, 149, 11.	4.7	20
23	AN INFRARED CENSUS OF DUST IN NEARBY GALAXIES WITH <i>SPITZER</i> (DUSTINGS). I. OVERVIEW. Astrophysical Journal, Supplement Series, 2015, 216, 10.	7.7	49
24	Witnessing the emergence of a carbon star. Monthly Notices of the Royal Astronomical Society: Letters, 2015, 451, L1-L5.	3.3	16
25	Spitzer Space Telescope spectra of post-AGB stars in the Large Magellanic Cloud â€œ polycyclic aromatic hydrocarbons at low metallicities. Monthly Notices of the Royal Astronomical Society, 2014, 439, 1472-1493.	4.4	59
26	CARBON-RICH DUST PAST THE ASYMPTOTIC GIANT BRANCH: ALIPHATICS, AROMATICS, AND FULLERENES IN THE MAGELLANIC CLOUDS. Astrophysical Journal, 2014, 791, 28.	4.5	75
27	VISTA variables in the Sagittarius dwarf spheroidal galaxy: pulsation-versus dust-driven winds on the giant branches. Monthly Notices of the Royal Astronomical Society, 2014, 439, 2618-2637.	4.4	16
28	Modelling the alumina abundance of oxygen-rich evolved stars in the Large Magellanic Cloud. Monthly Notices of the Royal Astronomical Society, 2014, 440, 631-651.	4.4	30
29	CARBON-RICH DUST PRODUCTION IN METAL-POOR GALAXIES IN THE LOCAL GROUP. Astrophysical Journal, 2012, 752, 140.	4.5	39
30	DISCOVERY AND ANALYSIS OF 21 $\hat{1}4\mu\text{m}$ FEATURE SOURCES IN THE MAGELLANIC CLOUDS. Astrophysical Journal, 2011, 735, 127.	4.5	48
31	Spitzer spectra of evolved stars in $\hat{1}\%$ Centauri and their low-metallicity dust production. Monthly Notices of the Royal Astronomical Society, 2011, 417, 20-31.	4.4	36
32	<i>SPITZER</i> SPECTROSCOPY OF MASS-LOSS AND DUST PRODUCTION BY EVOLVED STARS IN GLOBULAR CLUSTERS. Astrophysical Journal, 2010, 719, 1274-1292.	4.5	48
33	The low wind expansion velocity of metal-poor carbon stars in the Halo and the Sagittarius stream. Monthly Notices of the Royal Astronomical Society, 2010, 403, 1331-1338.	4.4	25
34	A<i>SPITZER SPACE TELESCOPE</i> FAR-INFRARED SPECTRAL ATLAS OF COMPACT SOURCES IN THE MAGELLANIC CLOUDS. II. THE SMALL MAGELLANIC CLOUD. Astronomical Journal, 2010, 139, 1553-1565.	4.7	52
35	The SAGE-Spec Spitzer Legacy Program: The Life Cycle of Dust and Gas in the Large Magellanic Cloud. Publications of the Astronomical Society of the Pacific, 2010, 122, 683-700.	3.1	78
36	UNUSUAL DUST EMISSION FROM PLANETARY NEBULAE IN THE MAGELLANIC CLOUDS. Astrophysical Journal, 2009, 699, 1541-1552.	4.5	73

#	ARTICLE	IF	CITATIONS
37	Luminosities and mass-loss rates of SMC and LMC AGB stars and red supergiants. <i>Astronomy and Astrophysics</i> , 2009, 506, 1277-1296.	5.1	138
38	Dust Formation in a Galaxy with Primitive Abundances. <i>Science</i> , 2009, 323, 353-355.	12.6	61
39	The global gas and dust budget of the Large Magellanic Cloud: AGB stars and supernovae, and the impact on the ISM evolution. <i>Monthly Notices of the Royal Astronomical Society</i> , 2009, 396, 918-934.	4.4	176
40	The Magellanic Zoo: Mid-Infrared Spitzer Spectroscopy of Evolved Stars and Circumstellar Dust in the Magellanic Clouds. <i>Astrophysical Journal</i> , 2008, 686, 1056-1081.	4.5	87
41	AGB stars as an origin of dust and gas in the interstellar medium of galaxies. <i>AIP Conference Proceedings</i> , 2008, , .	0.4	0
42	The production of dust in the Magellanic Clouds. <i>Proceedings of the International Astronomical Union</i> , 2008, 4, 405-410.	0.0	0
43	Carbon-rich AGB stars in our Galaxy and nearby galaxies as possible sources of PAHs. <i>Proceedings of the International Astronomical Union</i> , 2008, 4, 197-200.	0.0	0
44	Discovery of Extreme Carbon Stars in the Large Magellanic Cloud. <i>Astrophysical Journal</i> , 2008, 688, L9-L12.	4.5	51
45	Chemical Abundances and Dust in Planetary Nebulae in the Galactic Bulge. <i>Astrophysical Journal</i> , 2008, 680, 1206-1221.	4.5	39
46	Effects of Metallicity on the Chemical Composition of Carbon Stars. <i>Astrophysical Journal</i> , 2008, 681, 1557-1573.	4.5	43
47	Molecules and dust production in the Magellanic Clouds. <i>Astronomy and Astrophysics</i> , 2008, 487, 1055-1073.	5.1	85
48	Molecules and Dust Grains in AGB Stars in Nearby Galaxies—the Influence of Metallicities. , 2007, , .		0
49	The Unusual Hydrocarbon Emission from the Early Carbon Star HD 100764: The Connection between Aromatics and Aliphatics. <i>Astrophysical Journal</i> , 2007, 664, 1144-1153.	4.5	140
50	Spitzer spectroscopy of carbon stars in the Small Magellanic Cloud. <i>Monthly Notices of the Royal Astronomical Society</i> , 2007, 376, 1270-1284.	4.4	67
51	Luminosities and mass-loss rates of carbon stars in the Magellanic Clouds. <i>Monthly Notices of the Royal Astronomical Society</i> , 2007, 376, 313-337.	4.4	94
52	Spitzer Space Telescope spectral observations of AGB stars in the Fornax dwarf spheroidal galaxy. <i>Monthly Notices of the Royal Astronomical Society</i> , 2007, 382, 1889-1900.	4.4	41
53	Mid-Infrared Spectroscopy of Carbon Stars in the Small Magellanic Cloud. <i>Astrophysical Journal</i> , 2006, 645, 1118-1130.	4.5	68
54	A Spitzer mid-infrared spectral survey of mass-losing carbon stars in the Large Magellanic Cloud. <i>Monthly Notices of the Royal Astronomical Society</i> , 2006, 370, 1961-1978.	4.4	94

#	ARTICLE	IF	CITATIONS
55	Spitzer observations of acetylene bands in carbon-rich asymptotic giant branch stars in the Large Magellanic Cloud. <i>Monthly Notices of the Royal Astronomical Society</i> , 2006, 371, 415-420.	4.4	60
56	The Infrared Spectrograph (IRS) on the Spitzer Space Telescope. <i>Astrophysical Journal, Supplement Series</i> , 2004, 154, 18-24.	7.7	1,303
57	A Uniform Database of 2.4–45.4 Micron Spectra from the Infrared Space Observatory Short Wavelength Spectrometer. <i>Astrophysical Journal, Supplement Series</i> , 2003, 147, 379-401.	7.7	213
58	Guilt by Association: The 13 Micron Dust Emission Feature and Its Correlation to Other Gas and Dust Features. <i>Astrophysical Journal</i> , 2003, 594, 483-495.	4.5	77
59	Artifacts at 4.5 and 8.0 Microns in Short-Wavelength Spectra from the [ITAL]Infrared Space Observatory[/ITAL]. <i>Astrophysical Journal</i> , 2002, 565, L55-L58.	4.5	10
60	Classification of 2.4–45.2 Micron Spectra from the Infrared Space Observatory Short Wavelength Spectrometer. <i>Astrophysical Journal, Supplement Series</i> , 2002, 140, 389-406.	7.7	81
61	The Carbon-rich Dust Sequence: Infrared Spectral Classification of Carbon Stars. <i>Astronomical Journal</i> , 1998, 115, 809-820.	4.7	33
62	Sources of the 13 Micron Feature Associated with Oxygen-rich Circumstellar Dust. <i>Astrophysical Journal</i> , 1996, 463, 310.	4.5	67
