#	ARTICLE	IF	CITATIONS
1	The Carbon Cycle: With a Brief Introduction to Global Biogeochemistry. , 2021, , 131-160.		5
2	The Carbon Cycle in Lakes: A Biogeochemical Perspective. , 2021, , .		2
3	Defining the Key Competencies in Radiation Protection for Endovascular Procedures: A Multispecialty Delphi Consensus Study. European Journal of Vascular and Endovascular Surgery, 2018, 55, 281-287.	1.5	14
4	Greenhouse Gas Emissions from Freshwater Reservoirs: What Does the Atmosphere See?. Ecosystems, 2018, 21, 1058-1071.	3.4	145
5	The study of carbon in inland watersâ€”from isolated ecosystems to players in the global carbon cycle. Limnology and Oceanography Letters, 2018, 3, 41-48.	3.9	118
6	Early warning signals precede cyanobacterial blooms in multiple wholeâ€”lake experiments. Ecological Monographs, 2018, 88, 188-203.	5.4	54
7	Reversal of a cyanobacterial bloom in response to early warnings. Proceedings of the National Academy of Sciences of the United States of America, 2017, 114, 352-357.	7.1	79
8	How Many Limnologists Does It Take to Fix the Plumbing? The Established Researcher. Bulletin of the Ecological Society of America, 2017, 98, 100-102.	0.2	0
9	Response of plankton to nutrients, planktivory and terrestrial organic matter: a model analysis of wholeâ€”lake experiments. Ecology Letters, 2016, 19, 230-239.	6.4	41
10	Large CO ₂ effluxes at night and during synoptic weather events significantly contribute to CO ₂ emissions from a reservoir. Environmental Research Letters, 2016, 11, 064001.	5.2	66
11	Exogenously produced CO ₂ doubles the CO ₂ efflux from three north temperate lakes. Geophysical Research Letters, 2016, 43, 1996-2003.	4.0	46
12	Altered energy flow in the food web of an experimentally darkened lake. Ecosphere, 2015, 6, 1-23.	2.2	24
13	Deuterium as a food source tracer: Sensitivity to environmental water, lipid content, and hydrogen exchange. Limnology and Oceanography: Methods, 2015, 13, 213-223.	2.0	26
14	Physical and biological contributions to metalimnetic oxygen maxima in lakes. Limnology and Oceanography, 2015, 60, 242-251.	3.1	24
15	With and without warning: managing ecosystems in a changing world. Frontiers in Ecology and the Environment, 2015, 13, 460-467.	4.0	66
16	Integrating Landscape Carbon Cycling: Research Needs for Resolving Organic Carbon Budgets of Lakes. Ecosystems, 2015, 18, 363-375.	3.4	81
17	A new approach for rapid detection of nearby thresholds in ecosystem time series. Oikos, 2014, 123, 290-297.	2.7	35
18	Carbon Sequestration in a Large Hydroelectric Reservoir: An Integrative Seismic Approach. Ecosystems, 2014, 17, 430-441.	3.4	45

#	ARTICLE	IF	CITATIONS
19	Hydrogen isotope discrimination in aquatic primary producers: implications for aquatic food web studies. <i>Aquatic Sciences</i> , 2014, 76, 217-229.	1.5	34
20	Decadal-Scale Change in a Large-River Ecosystem. <i>BioScience</i> , 2014, 64, 496-510.	4.9	49
21	Assigning hydrogen, carbon, and nitrogen isotope values for phytoplankton and terrestrial detritus in aquatic food web studies. <i>Inland Waters</i> , 2014, 4, 233-242.	2.2	25
22	Use of deep autochthonous resources by zooplankton: Results of a metalimnetic addition of ^{13}C to a small lake. <i>Limnology and Oceanography</i> , 2014, 59, 986-996.	3.1	14
23	Asymmetric response of early warning indicators of phytoplankton transition to and from cycles. <i>Theoretical Ecology</i> , 2013, 6, 285-293.	1.0	26
24	Terrestrial support of pelagic consumers: patterns and variability revealed by a multilake study. <i>Freshwater Biology</i> , 2013, 58, 2037-2049.	2.4	74
25	The Carbon Cycle. , 2013, , 109-135.		11
26	Terrestrial dominance of organic matter in north temperate lakes. <i>Global Biogeochemical Cycles</i> , 2013, 27, 43-51.	4.9	117
27	Emissions from Amazonian dams. <i>Nature Climate Change</i> , 2013, 3, 1005-1005.	18.8	15
28	Changes in ecosystem resilience detected in automated measures of ecosystem metabolism during a whole-lake manipulation. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2013, 110, 17398-17403.	7.1	59
29	Freshwater in flux. <i>Nature Geoscience</i> , 2013, 6, 13-14.	12.9	25
30	First Report of Generalized Face Processing Difficulties in MÃ¶bius Sequence. <i>PLoS ONE</i> , 2013, 8, e62656.	2.5	27
31	Terrestrial support of zebra mussels and the Hudson River food web: A multi-isotope, Bayesian analysis. <i>Limnology and Oceanography</i> , 2012, 57, 1802-1815.	3.1	45
32	Spatial heterogeneity strongly affects estimates of ecosystem metabolism in two north temperate lakes. <i>Limnology and Oceanography</i> , 2012, 57, 1689-1700.	3.1	77
33	Resources supporting the food web of a naturally productive lake. <i>Limnology and Oceanography</i> , 2012, 57, 1443-1452.	3.1	30
34	Hydroelectric carbon sequestration. <i>Nature Geoscience</i> , 2012, 5, 838-840.	12.9	64
35	A practical method for measuring integrated solar radiation reaching streambeds using photodegrading dyes. <i>Freshwater Science</i> , 2012, 31, 1070-1077.	1.8	13
36	Lake-size dependency of wind shear and convection as controls on gas exchange. <i>Geophysical Research Letters</i> , 2012, 39, .	4.0	199

#	ARTICLE	IF	CITATIONS
37	Do Daphnia use metalimnetic organic matter in a north temperate lake? An analysis of vertical migration. <i>Inland Waters</i> , 2012, 2, 193-198.	2.2	7
38	Species loss in the brown world: are heterotrophic systems inherently stable?. <i>Aquatic Sciences</i> , 2012, 74, 397-404.	1.5	5
39	pH change induces shifts in the size and light absorption of dissolved organic matter. <i>Biogeochemistry</i> , 2012, 108, 109-118.	3.5	91
40	Global abundance and size distribution of streams and rivers. <i>Inland Waters</i> , 2012, 2, 229-236.	2.2	257
41	Strong evidence for terrestrial support of zooplankton in small lakes based on stable isotopes of carbon, nitrogen, and hydrogen. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2011, 108, 1975-1980.	7.1	291
42	Terrestrial, benthic, and pelagic resource use in lakes: results from a three-isotope Bayesian mixing model. <i>Ecology</i> , 2011, 92, 1115-1125.	3.2	146
43	Research frontiers in the analysis of coupled biogeochemical cycles. <i>Frontiers in Ecology and the Environment</i> , 2011, 9, 74-80.	4.0	42
44	Carbon emission from hydroelectric reservoirs linked to reservoir age and latitude. <i>Nature Geoscience</i> , 2011, 4, 593-596.	12.9	600
45	Coupled biogeochemical cycles and Earth stewardship. <i>Frontiers in Ecology and the Environment</i> , 2011, 9, 3-3.	4.0	14
46	Introduction to coupled biogeochemical cycles. <i>Frontiers in Ecology and the Environment</i> , 2011, 9, 5-8.	4.0	111
47	Difficulty in Discerning Drivers of Lake Ecosystem Metabolism with High-Frequency Data. <i>Ecosystems</i> , 2011, 14, 935-948.	3.4	35
48	Short-term variation in thermal stratification complicates estimation of lake metabolism. <i>Aquatic Sciences</i> , 2011, 73, 305-315.	1.5	55
49	Early Warnings of Regime Shifts: A Whole-Ecosystem Experiment. <i>Science</i> , 2011, 332, 1079-1082.	12.6	723
50	Terrestrial, benthic, and pelagic resource use in lakes: results from a three-isotope Bayesian mixing model. <i>Ecology</i> , 2011, 92, 1115-1125.	3.2	37
51	Aquatic metabolism in the Everglades: Dominance of water column heterotrophy. <i>Limnology and Oceanography</i> , 2010, 55, 653-666.	3.1	28
52	Variability of carbon dioxide flux from tropical (Cerrado) hydroelectric reservoirs. <i>Aquatic Sciences</i> , 2010, 72, 283-293.	1.5	92
53	Variation in transparent exopolymer particles in relation to biological and chemical factors in two contrasting lake districts. <i>Aquatic Sciences</i> , 2010, 72, 443-453.	1.5	26
54	Multiple approaches to estimating air-water gas exchange in small lakes. <i>Limnology and Oceanography: Methods</i> , 2010, 8, 285-293.	2.0	171

#	ARTICLE	IF	CITATIONS
55	Millennial-aged organic carbon subsidies to a modern river food web. <i>Ecology</i> , 2010, 91, 2385-2393.	3.2	114
56	The relationship between near-surface turbulence and gas transfer velocity in freshwater systems and its implications for floating chamber measurements of gas exchange. <i>Limnology and Oceanography</i> , 2010, 55, 1723-1732.	3.1	203
57	Lake metabolism and the diel oxygen technique: State of the science. <i>Limnology and Oceanography: Methods</i> , 2010, 8, 628-644.	2.0	214
58	Aquatic metabolism in the Everglades: Dominance of water column heterotrophy. <i>Limnology and Oceanography</i> , 2010, 55, 653-666.	3.1	27
59	The influence of environmental water on the hydrogen stable isotope ratio in aquatic consumers. <i>Oecologia</i> , 2009, 161, 313-324.	2.0	120
60	Leading indicators of phytoplankton transitions caused by resource competition. <i>Theoretical Ecology</i> , 2009, 2, 139-148.	1.0	17
61	Production in pristine lakes. <i>Nature</i> , 2009, 460, 463-464.	27.8	6
62	Leading indicators of trophic cascades. <i>Ecology Letters</i> , 2008, 11, 128-138.	6.4	157
63	Support of benthic invertebrates by detrital resources and current autochthonous primary production: results from a whole-lake ¹³ C addition. <i>Freshwater Biology</i> , 2008, 53, 42-54.	2.4	38
64	CO ₂ and O ₂ dynamics in human-impacted watersheds in the state of São Paulo, Brazil. <i>Biogeochemistry</i> , 2008, 88, 271-283.	3.5	17
65	Airborne carbon deposition on a remote forested lake. <i>Aquatic Sciences</i> , 2008, 70, 213-224.	1.5	24
66	Carbon sources supporting fish growth in a north temperate lake. <i>Aquatic Sciences</i> , 2008, 70, 446-458.	1.5	41
67	Temporal dynamics of dissolved oxygen in a floating-leaved macrophyte bed. <i>Freshwater Biology</i> , 2008, 53, 1632-1641.	2.4	47
68	Fates of methane from different lake habitats: Connecting whole-lake budgets and CH ₄ emissions. <i>Journal of Geophysical Research</i> , 2008, 113, .	3.3	392
69	CO ₂ emissions from saline lakes: A global estimate of a surprisingly large flux. <i>Journal of Geophysical Research</i> , 2008, 113, .	3.3	137
70	Depth-integrated, continuous estimates of metabolism in a clear-water lake. <i>Canadian Journal of Fisheries and Aquatic Sciences</i> , 2008, 65, 712-722.	1.4	75
71	HYDROLOGY AND GRAZING JOINTLY CONTROL A LARGE-RIVER FOOD WEB. <i>Ecology</i> , 2008, 89, 12-18.	3.2	60
72	Dissolved organic matter and persistence of the invasive zebra mussel (<i>Dreissena polymorpha</i>) under low food conditions. <i>Limnology and Oceanography</i> , 2007, 52, 70-78.	3.1	20

#	ARTICLE	IF	CITATIONS
73	Does terrestrial organic carbon subsidize the planktonic food web in a clear-water lake?. <i>Limnology and Oceanography</i> , 2007, 52, 2177-2189.	3.1	128
74	Assessing pelagic and benthic metabolism using free water measurements. <i>Limnology and Oceanography: Methods</i> , 2007, 5, 145-155.	2.0	135
75	Patterns and regulation of dissolved organic carbon: An analysis of 7,500 widely distributed lakes. <i>Limnology and Oceanography</i> , 2007, 52, 1208-1219.	3.1	391
76	Diary of a bluegill (<i>Lepomis macrochirus</i>): daily $\delta^{13}C$ and $\delta^{18}O$ records in otoliths by ion microprobe. <i>Canadian Journal of Fisheries and Aquatic Sciences</i> , 2007, 64, 1641-1645.	1.4	50
77	Changes in cyanobacterial dominance following the invasion of the zebra mussel <i>Dreissena polymorpha</i> : Long-term results from the Hudson River estuary. <i>Estuaries and Coasts</i> , 2007, 30, 163-170.	2.2	28
78	Expanding the concept of trophic state in aquatic ecosystems: It's not just the autotrophs. <i>Aquatic Sciences</i> , 2007, 69, 427-439.	1.5	134
79	Sources and fates of dissolved organic carbon in lakes as determined by whole-lake carbon isotope additions. <i>Biogeochemistry</i> , 2007, 84, 115-129.	3.5	80
80	Plumbing the Global Carbon Cycle: Integrating Inland Waters into the Terrestrial Carbon Budget. <i>Ecosystems</i> , 2007, 10, 172-185.	3.4	2,836
81	Impact of chemically enhanced diffusion on dissolved inorganic carbon stable isotopes in a fertilized lake. <i>Journal of Geophysical Research</i> , 2006, 111, .	3.3	53
82	ASLO AWARDS: NOMINATE SOMEONE. <i>Limnology and Oceanography Bulletin</i> , 2006, 15, 29-30.	0.4	0
83	The global abundance and size distribution of lakes, ponds, and impoundments. <i>Limnology and Oceanography</i> , 2006, 51, 2388-2397.	3.1	1,426
84	Top down control from the bottom: Regulation of eutrophication in a large river by benthic grazing. <i>Limnology and Oceanography</i> , 2006, 51, 664-670.	3.1	109
85	Differential support of lake food webs by three types of terrestrial organic carbon. <i>Ecology Letters</i> , 2006, 9, 558-568.	6.4	305
86	Nutrient-chlorophyll relationships in tropical-subtropical lakes: do temperate models fit?. <i>Biogeochemistry</i> , 2006, 79, 239-250.	3.5	90
87	Terrestrial Subsidies of Organic Carbon Support Net Ecosystem Production in Temporary Forest Ponds: Evidence from an Ecosystem Experiment. <i>Ecosystems</i> , 2006, 9, 1170-1176.	3.4	64
88	Is Net Ecosystem Production Equal to Ecosystem Carbon Accumulation?. <i>Ecosystems</i> , 2006, 9, 152-155.	3.4	189
89	Bacterial Growth on Allochthonous Carbon in Humic and Nutrient-enriched Lakes: Results from Whole-Lake ^{13}C Addition Experiments. <i>Ecosystems</i> , 2006, 9, 489-499.	3.4	84
90	Can algal photosynthetic inorganic carbon isotope fractionation be predicted in lakes using existing models?. <i>Aquatic Sciences</i> , 2006, 68, 142-153.	1.5	74

#	ARTICLE	IF	CITATIONS
91	Vascular Plants as Engineers of Oxygen in Aquatic Systems. <i>BioScience</i> , 2006, 56, 219.	4.9	128
92	Primary Production and Its Regulation in the Tidal-Freshwater Hudson River. , 2006, , 107-120.		15
93	Does autochthonous primary production drive variability in bacterial metabolism and growth efficiency in lakes dominated by terrestrial C inputs?. <i>Aquatic Microbial Ecology</i> , 2005, 38, 103-111.	1.8	115
94	Uptake of dissolved organic matter (DOM) and its importance to metabolic requirements of the zebra mussel, <i>Dreissena polymorpha</i> . <i>Limnology and Oceanography</i> , 2005, 50, 36-47.	3.1	36
95	Longitudinal Spatial Patterns of Bacterial Production and Respiration in a Large River Estuary: Implications for Ecosystem Carbon Consumption. <i>Ecosystems</i> , 2005, 8, 318-330.	3.4	43
96	The Biogeochemistry of Carbon at Hubbard Brook. <i>Biogeochemistry</i> , 2005, 75, 109-176.	3.5	246
97	ASLO'S NEXT INTERNATIONAL MEETING- A CALL FOR PROPOSALS. <i>Limnology and Oceanography Bulletin</i> , 2005, 14, 65-66.	0.4	0
98	NOMINATE SOMEONE: ASLO AWARDS AND ASLO GOVERNANCE. <i>Limnology and Oceanography Bulletin</i> , 2005, 14, 63-64.	0.4	0
99	Effects of Postnatal Exposure to a Mixture of Polychlorinated Biphenyls, p,p'-dichlorodiphenyltrichloroethane, and p,p'-dichlorodiphenyldichloroethene in Prepubertal and Adult Female Sprague-Dawley Rats. <i>International Journal of Toxicology</i> , 2005, 24, 111-127.	1.2	16
100	ECOSYSTEM SUBSIDIES: TERRESTRIAL SUPPORT OF AQUATIC FOOD WEBS FROM ^{13}C ADDITION TO CONTRASTING LAKES. <i>Ecology</i> , 2005, 86, 2737-2750.	3.2	341
101	Temperature independence of carbon dioxide supersaturation in global lakes. <i>Global Biogeochemical Cycles</i> , 2005, 19, n/a-n/a.	4.9	318
102	Cognitions Associated With Attempts to Empathize: How Do We Imagine the Perspective of Another?. <i>Personality and Social Psychology Bulletin</i> , 2004, 30, 1625-1635.	3.0	145
103	Whole-lake carbon-13 additions reveal terrestrial support of aquatic food webs. <i>Nature</i> , 2004, 427, 240-243.	27.8	497
104	Controls on the variability of organic matter and dissolved inorganic carbon ages in northeast US rivers. <i>Marine Chemistry</i> , 2004, 92, 353-366.	2.3	180
105	Methane emissions from lakes: Dependence of lake characteristics, two regional assessments, and a global estimate. <i>Global Biogeochemical Cycles</i> , 2004, 18, n/a-n/a.	4.9	890
106	Autochthonous versus allochthonous carbon sources of bacteria: Results from whole-lake ^{13}C addition experiments. <i>Limnology and Oceanography</i> , 2004, 49, 588-596.	3.1	223
107	Controls of ^{13}C in lakes: Geochemistry, lake metabolism, and morphometry. <i>Limnology and Oceanography</i> , 2004, 49, 1160-1172.	3.1	152
108	Sulfate inhibition of molybdenum-dependent nitrogen fixation by planktonic cyanobacteria under seawater conditions: a non-reversible effect. <i>Hydrobiologia</i> , 2003, 500, 277-293.	2.0	38

#	ARTICLE	IF	CITATIONS
109	Title is missing!. Biogeochemistry, 2003, 64, 247-269.	3.5	52
110	Increase in the Export of Alkalinity from North America's Largest River. Science, 2003, 301, 88-91.	12.6	310
111	Sulfate inhibition of molybdenum-dependent nitrogen fixation by planktonic cyanobacteria under sea water conditions: a non-reversible effect. , 2003, , 277-293.		22
112	CONTRASTING IMPACTS OF A NATIVE AND ALIEN MACROPHYTE ON DISSOLVED OXYGEN IN A LARGE RIVER. , 2002, 12, 1496-1509.		171
