#	ARTICLE	IF	CITATIONS
1	Effect of processing on the solubility and molecular size of oat β -glucan and consequences for starch digestibility of oat-fortified noodles. Food Chemistry, 2022, 372, 131291.	8.2	13
2	Liver fibrosis alters the molecular structures of hepatic glycogen. Carbohydrate Polymers, 2022, 278, 118991.	10.2	3
3	The effect of high-amylose resistant starch on the glycogen structure of diabetic mice. International Journal of Biological Macromolecules, 2022, 200, 124-131.	7.5	8
4	Starch Molecular Structural Features and Volatile Compounds Affecting the Sensory Properties of Polished Australian Wild Rice. Foods, 2022, 11, 511.	4.3	2
5	The Extraction of Liver Glycogen Molecules for Glycogen Structure Determination. Journal of Visualized Experiments, 2022, , .	0.3	0
6	Three-Dimensional (3D) Food Printing Based on Starch-Based Inks: Crucial Factors for Printing Precision. , 2022, , 101-140.		0
7	The role of storage protein fractions in slowing starch digestion in chickpea seed. Food Hydrocolloids, 2022, 129, 107617.	10.7	7
8	A Review on the Structure and Anti-Diabetic (Type 2) Functions of β -Glucans. Foods, 2022, 11, 57.	4.3	5
9	Relation between polymer transitions and the extensional viscosity of dough systems during thermal stabilization assessed by lubricated squeezing flow. Food Chemistry, 2022, 389, 133048.	8.2	3
10	Testing the Linearity Assumption for Starch Structure-Property Relationships in Rices. Frontiers in Nutrition, 2022, 9, .	3.7	2
11	Amylose Inter-Chain Entanglement and Inter-Chain Overlap Impact Rice Quality. Foods, 2022, 11, 1516.	4.3	5
12	Starch molecular structural differences between chalky and translucent parts of chalky rice grains. Food Chemistry, 2022, 394, 133471.	8.2	3
13	Amorphous packing of amylose and elongated branches linked to the enzymatic resistance of high-amylose wheat starch granules. Carbohydrate Polymers, 2022, 295, 119871.	10.2	9
14	Probiotic fermentation modifies the structures of pectic polysaccharides from carrot pulp. Carbohydrate Polymers, 2021, 251, 117116.	10.2	30
15	Effects of endogenous proteins on rice digestion during small intestine (in vitro) digestion. Food Chemistry, 2021, 344, 128687.	8.2	22
16	Characterization of the baking-induced changes in starch molecular and crystalline structures in sugar-snap cookies. Carbohydrate Polymers, 2021, 256, 117518.	10.2	18
17	The importance of glycogen molecular structure for blood glucose control. IScience, 2021, 24, 101953.	4.1	11
18	Identification of Structure-Controlling Rice Biosynthesis Enzymes. Biomacromolecules, 2021, 22, 2148-2159.	5.4	10

#	ARTICLE	IF	CITATIONS
19	The dynamic changes of glycogen molecular structure in Escherichia coli BL21(DE3). Carbohydrate Polymers, 2021, 259, 117773.	10.2	7
20	Structural reasons for inhibitory effects of pectin on α -amylase enzyme activity and in-vitro digestibility of starch. Food Hydrocolloids, 2021, 114, 106581.	10.7	24
21	Optimization of liver glycogen extraction when considering the fine molecular structure. Carbohydrate Polymers, 2021, 261, 117887.	10.2	6
22	Sensory design in food 3D printing “ Structuring, texture modulation, taste localization, and thermal stabilization. Innovative Food Science and Emerging Technologies, 2021, 72, 102743.	5.6	30
23	Molecular-structure evolution during in vitro fermentation of granular high-amylose wheat starch is different to in vitro digestion. Food Chemistry, 2021, 362, 130188.	8.2	15
24	Starch structure-property relations in Australian wild rices compared to domesticated rices. Carbohydrate Polymers, 2021, 271, 118412.	10.2	15
25	Starch molecular fine structure is associated with protein composition in chickpea seed. Carbohydrate Polymers, 2021, 272, 118489.	10.2	6
26	Late-maturity α -amylase (LMA) testing and its methodological challenges. LWT - Food Science and Technology, 2021, 151, 112232.	5.2	3
27	Late-Maturity Alpha-Amylase in Wheat (Triticum aestivum) and Its Impact on Fresh White Sauce Qualities. Foods, 2021, 10, 201.	4.3	7
28	Understanding the Binding of Starch Fragments to Granule-Bound Starch Synthase. Biomacromolecules, 2021, 22, 4730-4737.	5.4	4
29	Malt protein inhibition of α -amylase alters starch molecular structure during barley mashing. Food Hydrocolloids, 2020, 100, 105423.	10.7	10
30	Some molecular structural features of glycogen in the kidneys of diabetic rats. Carbohydrate Polymers, 2020, 229, 115526.	10.2	3
31	Dendrobium officinale polysaccharide ameliorates diabetic hepatic glucose metabolism via glucagon-mediated signaling pathways and modifying liver-glycogen structure. Journal of Ethnopharmacology, 2020, 248, 112308.	4.1	91
32	The effects of the chain-length distributions of starch molecules on rheological and thermal properties of wheat flour paste. Food Hydrocolloids, 2020, 101, 105563.	10.7	44
33	New insights into amylose and amylopectin biosynthesis in rice endosperm. Carbohydrate Polymers, 2020, 230, 115656.	10.2	45
34	Metformin and Berberine suppress glycogenolysis by inhibiting glycogen phosphorylase and stabilizing the molecular structure of glycogen in db/db mice. Carbohydrate Polymers, 2020, 243, 116435.	10.2	12
35	Fecal microbiota responses to rice RS3 are specific to amylose molecular structure. Carbohydrate Polymers, 2020, 243, 116475.	10.2	52
36	High-amylose wheat starch: Structural basis for water absorption and pasting properties. Carbohydrate Polymers, 2020, 245, 116557.	10.2	61

#	ARTICLE	IF	CITATIONS
37	Effects of fasting on liver glycogen structure in rats with type 2 diabetes. Carbohydrate Polymers, 2020, 237, 116144.	10.2	12
38	Effects of Nonstarch Genetic Modifications on Starch Structure and Properties. Foods, 2020, 9, 222.	4.3	6
39	Investigating cooked rice textural properties by instrumental measurements. Food Science and Human Wellness, 2020, 9, 130-135.	4.9	40
40	Using Molecular Fine Structure to Identify Optimal Methods of Extracting Starch. Starch/Staerke, 2020, 72, 1900214.	2.1	16
41	The contribution of β -glucan and starch fine structure to texture of oat-fortified wheat noodles. Food Chemistry, 2020, 324, 126858.	8.2	28
42	Characterization of glycogen molecular structure in the worm <i>Caenorhabditis elegans</i> . Carbohydrate Polymers, 2020, 237, 116181.	10.2	11
43	Relations between digestibility and structures of pumpkin starches and pectins. Food Hydrocolloids, 2020, 106, 105894.	10.7	36
44	Effects of amylose and amylopectin fine structure on sugar-snap cookie dough rheology and cookie quality. Carbohydrate Polymers, 2020, 241, 116371.	10.2	40
45	A molecular explanation of wheat starch physicochemical properties related to noodle eating quality. Food Hydrocolloids, 2020, 108, 106035.	10.7	38
46	Using starch molecular fine structure to understand biosynthesis-structure-property relations. Trends in Food Science and Technology, 2019, 86, 530-536.	15.1	86
47	The size dependence of the average number of branches in amylose. Carbohydrate Polymers, 2019, 223, 115134.	10.2	17
48	Relationship between the molecular structure of duckweed starch and its in vitro enzymatic degradation kinetics. International Journal of Biological Macromolecules, 2019, 139, 244-251.	7.5	9
49	Influence of heat treatment on starch structure and physicochemical properties of oats. Journal of Cereal Science, 2019, 89, 102805.	3.7	17
50	The Role of Pullulanase in Starch Biosynthesis, Structure, and Thermal Properties by Studying Sorghum with Increased Pullulanase Activity. Starch/Staerke, 2019, 71, 1900072.	2.1	9
51	A review: Reverse approach to analyze the impact of starch modification on the inflation and gas holding properties of wheat-based matrices. Trends in Food Science and Technology, 2019, 91, 231-239.	15.1	6
52	Characterizing the impact of starch and gluten-induced alterations on gelatinization behavior of physically modified model dough. Food Chemistry, 2019, 301, 125276.	8.2	10
53	Starch branching enzymes contributing to amylose and amylopectin fine structure in wheat. Carbohydrate Polymers, 2019, 224, 115185.	10.2	31
54	A more general approach to fitting digestion kinetics of starch in food. Carbohydrate Polymers, 2019, 225, 115244.	10.2	53

#	ARTICLE	IF	CITATIONS
55	Glycogen structure in type 1 diabetic mice: Towards understanding the origin of diabetic glycogen molecular fragility. International Journal of Biological Macromolecules, 2019, 128, 665-672.	7.5	23
56	Altering starch branching enzymes in wheat generates high-amylose starch with novel molecular structure and functional properties. Food Hydrocolloids, 2019, 92, 51-59.	10.7	75
57	Starch structure-property relations as a function of barley germination times. International Journal of Biological Macromolecules, 2019, 136, 1125-1132.	7.5	17
58	Molecular Structure of Glycogen in <i>Escherichia coli</i> . Biomacromolecules, 2019, 20, 2821-2829.	5.4	27
59	Relations between changes in starch molecular fine structure and in thermal properties during rice grain storage. Food Chemistry, 2019, 295, 484-492.	8.2	48
60	Distribution of short to medium amylose chains are major controllers of in vitro digestion of retrograded rice starch. Food Hydrocolloids, 2019, 96, 634-643.	10.7	137
61	High-amylose rice: Starch molecular structural features controlling cooked rice texture and preference. Carbohydrate Polymers, 2019, 219, 251-260.	10.2	117
62	Mechanically and Thermally Induced Degradation and Modification of Cereal Biopolymers during Grinding. Polymers, 2019, 11, 448.	4.5	9
63	Modification of retrogradation property of rice starch by improved extrusion cooking technology. Carbohydrate Polymers, 2019, 213, 192-198.	10.2	38
64	Molecular structure-property relations controlling mashing performance of amylases as a function of barley grain size. Amylase, 2019, 3, 1-18.	1.6	4
65	Effects of active ingredients from traditional Chinese medicines on glycogen molecular structure in diabetic mice. European Polymer Journal, 2019, 112, 67-72.	5.4	13
66	The role of thermostable proteinaceous α -amylase inhibitors in slowing starch digestion in pasta. Food Hydrocolloids, 2019, 90, 241-247.	10.7	49
67	Colloid chemistry approach to understand the storage stability of fermented carrot juice. Food Hydrocolloids, 2019, 89, 623-630.	10.7	20
68	Characterizing Starch Molecular Structure of Rice. Methods in Molecular Biology, 2019, 1892, 169-185.	0.9	4
69	Molecular brewing: Molecular structural effects involved in barley malting and mashing. Carbohydrate Polymers, 2019, 206, 583-592.	10.2	38
70	Autoclaved rice: The textural property and its relation to starch leaching and the molecular structure of leached starch. Food Chemistry, 2019, 283, 199-205.	8.2	24
71	How amylose molecular fine structure of rice starch affects functional properties. Carbohydrate Polymers, 2019, 204, 24-31.	10.2	167
72	Competition between Granule Bound Starch Synthase and Starch Branching Enzyme in Starch Biosynthesis. Rice, 2019, 12, 96.	4.0	25

#	ARTICLE	IF	CITATIONS
73	Wheat dough imitating artificial dough system based on hydrocolloids and glass beads. Journal of Food Engineering, 2018, 223, 144-151.	5.2	16
74	Diurnal changes of glycogen molecular structure in healthy and diabetic mice. Carbohydrate Polymers, 2018, 185, 145-152.	10.2	32
75	Starch molecular structure: The basis for an improved understanding of cooked rice texture. Carbohydrate Polymers, 2018, 195, 9-17.	10.2	182
76	Proteomic Investigation of the Binding Agent between Liver Glycogen β Particles. ACS Omega, 2018, 3, 3640-3645.	3.5	35
77	Mechanisms of utilisation of arabinoxylans by a porcine faecal inoculum: competition and co-operation. Scientific Reports, 2018, 8, 4546.	3.3	25
78	Direct link between specific structural levels of starch and hydration properties. Carbohydrate Polymers, 2018, 181, 159-166.	10.2	11
79	The adsorption of α -amylase on barley proteins affects the in vitro digestion of starch in barley flour. Food Chemistry, 2018, 241, 493-501.	8.2	118
80	Mechanical wheat flour modification and its effect on protein network structure and dough rheology. Food Chemistry, 2018, 248, 296-303.	8.2	36
81	Mechanistic understanding of the relationships between molecular structure and emulsification properties of octenyl succinic anhydride (OSA) modified starches. Food Hydrocolloids, 2018, 74, 168-175.	10.7	48
82	Effects of the Starch Molecular Structures in Barley Malts and Rice Adjuncts on Brewing Performance. Fermentation, 2018, 4, 103.	3.0	33
83	Improved methodology for analyzing relations between starch digestion kinetics and molecular structure. Food Chemistry, 2018, 264, 284-292.	8.2	87
84	Exploring glycogen biosynthesis through Monte Carlo simulation. International Journal of Biological Macromolecules, 2018, 116, 264-271.	7.5	17
85	High-Pressure Treatment of Non-Hydrated Flour Affects Structural Characteristics and Hydration. Foods, 2018, 7, 78.	4.3	8
86	Effects of pectin on molecular structural changes in starch during digestion. Food Hydrocolloids, 2017, 69, 10-18.	10.7	72
87	The molecular structural features controlling stickiness in cooked rice, a major palatability determinant. Scientific Reports, 2017, 7, 43713.	3.3	101
88	Implications for biological function of lobe dependence of the molecular structure of liver glycogen. European Polymer Journal, 2017, 90, 105-113.	5.4	9
89	Effect of pulsed electrical fields on the structural properties that affect french fry texture during processing. Trends in Food Science and Technology, 2017, 67, 1-11.	15.1	56
90	Molecular structures and properties of starches of Australian wild rice. Carbohydrate Polymers, 2017, 172, 213-222.	10.2	39

#	ARTICLE	IF	CITATIONS
91	Molecular structural differences between maize leaf and endosperm starches. Carbohydrate Polymers, 2017, 161, 10-15.	10.2	13
92	Parameterizing amylose chain-length distributions for biosynthesis-structure-property relations. Analytical and Bioanalytical Chemistry, 2017, 409, 6813-6819.	3.7	84
93	On the Role of Catabolic Enzymes in Biosynthetic Models of Glycogen Molecular Weight Distributions. ACS Omega, 2017, 2, 5221-5227.	3.5	3
94	Physicochemical and structural properties of pregelatinized starch prepared by improved extrusion cooking technology. Carbohydrate Polymers, 2017, 175, 265-272.	10.2	138
95	Drought-tolerant Barley (<i>Hordeum vulgare</i>): The Effects of Stay Green on Starch and Amylose Structure. Cereal Chemistry, 2017, 94, 873-880.	2.2	9
96	Effect of mechanically modified wheat flour on dough fermentation properties and bread quality. European Food Research and Technology, 2017, 243, 287-296.	3.3	24
97	Relationships between protein content, starch molecular structure and grain size in barley. Carbohydrate Polymers, 2017, 155, 271-279.	10.2	84
98	Recent progress toward understanding the role of starch biosynthetic enzymes in the cereal endosperm. Amylase, 2017, 1, .	1.6	32
99	Molecular-size dependence of glycogen enzymatic degradation and its importance for diabetes. European Polymer Journal, 2016, 82, 175-180.	5.4	32
100	Amylopectin chain length distribution in grains of japonica rice as affected by nitrogen fertilizer and genotype. Journal of Cereal Science, 2016, 71, 230-238.	3.7	39
101	Compact structure and proteins of pasta retard in vitro digestive evolution of branched starch molecular structure. Carbohydrate Polymers, 2016, 152, 441-449.	10.2	75
102	A new non-degradative method to purify glycogen. Carbohydrate Polymers, 2016, 147, 165-170.	10.2	13
103	Structural characterizations and in vitro digestibility of acid-treated wrinkled and smooth pea starch (<i>Pisum sativum</i> L.). Starch/Staerke, 2016, 68, 762-770.	2.1	14
104	A broad-standard technique for correcting for band broadening in size-exclusion chromatography. Journal of Chromatography A, 2016, 1443, 267-271.	3.7	3
105	Instrumental measurement of cooked rice texture by dynamic rheological testing and its relation to the fine structure of rice starch. Carbohydrate Polymers, 2016, 146, 253-263.	10.2	108
106	Progress in controlling starch structure by modifying starch-branching enzymes. Planta, 2016, 243, 13-22.	3.2	41
107	Starch-gluten interactions during gelatinization and its functionality in dough like model systems. Food Hydrocolloids, 2016, 54, 196-201.	10.7	137
108	Nanocomposites with functionalised polysaccharide nanocrystals through aqueous free radical polymerisation promoted by ozonolysis. Carbohydrate Polymers, 2016, 135, 256-266.	10.2	41

#	ARTICLE	IF	CITATIONS
109	The importance of amylose and amylopectin fine structure for textural properties of cooked rice grains. Food Chemistry, 2016, 196, 702-711.	8.2	363
110	Relationships between amylopectin molecular structures and functional properties of different-sized fractions of normal and high-amylose maize starches. Food Hydrocolloids, 2016, 52, 359-368.	10.7	105
111	Molecular Structure of Human-Liver Glycogen. PLoS ONE, 2016, 11, e0150540.	2.5	29
