

A moment magnitude scale

Journal of Geophysical Research

84, 2348-2350

DOI: [10.1029/jb084ib05p02348](https://doi.org/10.1029/jb084ib05p02348)

Citation Report

#	ARTICLE	IF	CITATIONS
2	Analysis of the statistical distribution of stress drops occurring during earthquakes. <i>Tectonophysics</i> , 1980, 69, T9-T13.	0.9	3
3	A stochastic fault model: 1. Static case. <i>Journal of Geophysical Research</i> , 1980, 85, 3867-3877.	3.3	262
4	The Montenegro, Yugoslavia, earthquake of April 15, 1979: source orientation and strength. <i>Physics of the Earth and Planetary Interiors</i> , 1981, 27, 133-142.	0.7	35
5	Earthquake magnitude " recent research and current trends. <i>Earth-Science Reviews</i> , 1981, 17, 315-398.	4.0	122
6	Regional relationships among earthquake magnitude scales. <i>Reviews of Geophysics</i> , 1981, 19, 649-663.	9.0	51
7	Volcanism and aseismic slip in subduction zones. <i>Journal of Geophysical Research</i> , 1981, 86, 335-344.	3.3	17
8	Seismic energy release of the Moon. <i>Journal of Geophysical Research</i> , 1981, 86, 378-388.	3.3	62
9	An interpretation of episodic slip on the Calaveras Fault near Hollister, California. <i>Journal of Geophysical Research</i> , 1981, 86, 4941-4948.	3.3	21
10	Quantitative relations of seismic source parameters and a classification of earthquakes. <i>Tectonophysics</i> , 1982, 84, 57-128.	0.9	106
11	The Oroville Earthquakes: A study of source characteristics and site effects. <i>Journal of Geophysical Research</i> , 1982, 87, 4585-4594.	3.3	41
12	A comparison between the tectonic stress measured in situ and stress parameters from induced seismicity at Monticello Reservoir, South Carolina. <i>Journal of Geophysical Research</i> , 1982, 87, 6931-6944.	3.3	68
13	Microearthquakes in the Black Smoker Hydrothermal Field, East Pacific Rise at 21°N. <i>Journal of Geophysical Research</i> , 1982, 87, 10613-10623.	3.3	63
14	Optimal estimation of scalar seismic moment. <i>Geophysical Journal of the Royal Astronomical Society</i> , 1982, 70, 755-787.	0.2	142
15	Continental fault structure and the shallow earthquake source. <i>Journal of the Geological Society</i> , 1983, 140, 741-767.	0.9	461
16	Magnitude scale and quantification of earthquakes. <i>Tectonophysics</i> , 1983, 93, 185-199.	0.9	278
17	Empirical magnitude and spectral scaling relations for mid-plate and plate-margin earthquakes. <i>Tectonophysics</i> , 1983, 93, 207-223.	0.9	32
18	Accurate source depths and focal mechanisms of shallow earthquakes in western South America and in the New Hebrides Island Arc. <i>Tectonics</i> , 1983, 2, 529-563.	1.3	162
19	An explanation for contradictory geodetic strain and fault plane solution data in western North America. <i>Geophysical Research Letters</i> , 1983, 10, 177-180.	1.5	16
